—, **7,8,9,10 - tetrahydro - 3 - hydroxy - 1,9-dimethyl-**, 383⁴.

—, **7,8,9,10 - tetrahydro - 3 - methoxy -**, 383⁴.

—, **7,8,9,10-tetrahydro-3-methyl-**, 383⁷.

Dibenzopyrrole. See *Carbazole*.

Dibenzoquinolizine,

—, **5,6,12,13a - tetrahydro - 3,10 - dimethoxy-**, 2184¹.

—, **5,6,12,13a-tetrahydro-2,3,9,10-tetramethoxy-13-methyl-**. See *Corydaline*.

8-Dibenzoquinolizisinone, 5,6,-dihydro-3,10-dimethoxy-, 2184¹.

—, **5,6-dihydro-2,3,9,10-tetramethoxy-13-methyl-**, 843¹.

Dibenzorubrene*, spectrum of, 4889¹.

Dibenzothiophene (biphenylene sulfide),

—, **2,3,6,7-tetramethoxydinitro-**, 9-oxide, 3468².

Dibenzothioxine. See *Phenothioxin*.

Dibenzoxanthene,

ββ'-Dibenzoxanthene (?), 3449².

7-γγ'-Dibenzoxanthanol, 7-phenyl-, 2967⁴.

7-γγ'-Dibenzoxanthanone, 2967⁴.

12-ββ'-Dibenzoxanthanone, 833².

Dibenzoyl. See *Benzil*.

Dibenzoyl peroxide. See *Benzoyl peroxide*.

Dibenzyl. See *Bibenzyl*.

Dibenzylamine, p,p'-dichloro-N-methyl-, 4450².

—, **p,p'-dicyano-N-methyl-**†, 4450².

—, **α,α'-diimino-**†, sodium salt, 596².

—, **m,m'-dinitro-N-phenyl-**, 3445².

—, **N-(2,6-dinitrophenyl)-**, 378².

—, **N-(m-nitrophenyl)-**, and -HCl, 378².

—, **N-[o(and p)-nitrophenyl]-**, 378².

—, **N-phenyl-**, nitration of, 3445².

—, nitro derivs. of, 378².

—, **N,p,p'-trimethyl-**, 4450².

β-Dibromohydrin. See *1-Propanol, 2,3-di-*

bromo-.

Dibutylamine, β,β'-dibromo-, -HBr, 4669⁴.

—, **β,β'-dichloro-**, 4669⁴.

—, **β,β'-dimethyl-**, salt with pimic acid, 4224².

1,2,3,4-Dicamphorquinoxaline*, 2169⁴.

2,3,5,6-Dicamphorquinoxaline*, 2169⁷.

Dicellulose, methyl-*, 3672².

Dichloramine, prepn. of, 4158².

α-Dichlorohydrin. See *2-Propanol, 1,3-di-*

chloro-.

Dichlorohydrin ether*, 2152².

Dicholanic acid, pentahydroxy-*, 153².

Dichroism, circular, of caryophyllene nitrosite,

1814¹.

circular, relation to optical rotation, 4143².

of herapathite single crystals, 17².

induced, 4146⁴.

of iron films obtained by distn., 4386⁷.

photo-, 4146², 5413².

photo-, quant. measurements of induced, 4620¹.

Dichromates, chromate transformation into,

2092².

oxidation of iodide ion by acid solns. of, in presence of neutral salt, 4397⁷.

photochem. reaction with ethylene glycol, 4408².

photooxidation of alcs. by means of, 5157⁴.

reduction to basic chromic salts, 1584¹, 4158².

Dichromic acid, extinction coeffs. of solns. of,

1351⁴.

Diconal, chlorodihydro-*, perchlorate, 2979²,

2980¹.

Dipyridyl. See *Bipyridine*.

Di-2-pyridylamine. See *Pyridine*, 2,2'-imino-.

Dipyrite, of Texas (Franklin Mts.), 1083^o.

Diquinone, chloroarsino-^o, 393^o.

Diquinolinisimidazole,

14-Diquinolinisimidazole, 1410^o

—, 5, 6, 6a, 12, 13, 13a-hexahydro-, 1410^o.

Disaccharides, constitution of, 3444^o, 3911^o

detn. of α - or β -configuration of, 1116^o.

hydrolysis of, 106^o.

synthesis of, 106^o, 107^o, 3.

synthesis of, benzylidenemethylglucosides in, 1392^o

triphenylmethyl ethers of, 1675^o.

Discharging apparatus, for centrifuges, 5061^o

for coke ovens, P 694^o, P 961^o

for cylindrical reaction chambers, P 4110^o

for gas retorts, P 2812^o.

for kilns, P 2006^o.

for lime kilns, 243^o, P 2256^o, P 3547^o

for liquids, P 313^o.

for liquids, from containers under low pressure into containers with higher pressure, P 1024^o.

for shaft furnace, P 1534^o, P 4853^o.

for tubular driers for brown coal, etc., P 2858^o.

Discoloration, of casein, 5549^o.

of paints and its prevention, 1290^o.

of paper, 4067^o

of soaps, 2050^o.

of sulfite paper pulps, 5577^o.

of viscose rayon, removal of yellow, P 4085^o.

of zinc oxide during rubber vulcanization, 308^o.

Diseases. (See also *Infections*; the specific diseases as *Tuberculosis*; and the different organs as *Kidney*, etc.)

deficiency—see *Avitaminosis*.

experimentally induced infectious, 190^o.

intestinal, carbohydrate and protein metabolism of intestinal bacteria in relation to infectious, 803^o.

liver, function test in, 3508^o.

occupational—see also *Poisoning*.

occupational, in gas industry, 5303^o.

peptidase detns. in surgical, 3273^o.

respiratory, in industry, 919^o.

treatment of, by sunlight, 2452^o.

worm, genesis of eosinophilia in, 3020^o.

Diselenide, 2,2' - diacetmethylamidodiphenyl^o, 142^o.

1,2-Diseleninane,

3704^o.

Diselenodilactic acid^o, and K salts, 2154^o.

Disinfectants. (See also *Antiseptics*; *Dipping fluids*; *Formaldehyde*; *Fumigants*; *Fungicides*; *Insecticides*; *Lysol*; *Physiol AI*; *Quinosol*; *Resorcinol*, hexyl-; *Soaps*; *Sprays*; *Surgical dressings*; etc.) 4532^o; (Patents.) 484^o, 665^o, 670^o, 934^o, 1210^o,

1730^o, 2539^o, 3053^o, 3307^o, 3543^o, 3777^o, 3783^o, 4520^o, 5001^o, 5013^o.

acidine derivs., P 4777^o.

action of, effect of temp. on, 1863^o.

als. (higher) in, P 3825^o.

alkali perphosphates, P 4027^o.

alkylphenols as, 1662^o.

amino als. as, P 2722^o.

for amylase soln. of *Aspergillus oryzae*, 1656^o.

for anthrax films (dried), 2737^o.

from beechwood tar, P 1219^o.

α bromo soaps as, 862^o.

from cellulose waste liquor, P 670^o.

chlorine, comparative tests of, 3539^o.

cleaning compn. for glassware, P 1006^o.

compn. of, 4010^o.

compd. of urea and *m*-cresol, P 4778^o.

compds. of desoxychoic acid with safranin and

acidine dyes, P 484^o.

compds. of indene and phenols as, P407^o.

for creamery app., NaOCl as, 1695^o.

cyclopentyl compds., P 3543^o.

diaryl sulfide phenols as, 2956^o.

from dyes, P 2252^o.

effect of SCN group in, 2245^o.

effect on yeast, 4211^o.

examn. of, 238^o.

formaldehyde contg., γ -cresol soap soln., 5012^o.

for glass containers, etc., P 1729^o

for hats, P 184^o

5-hexyl-alkyleic acid, P 1217^o

2 hydroxy 5 β phenylethylbenzoic acid, P 5012^o

incubator, effect on bacterial count, 1150^o

internal, alkyl and aralkylresorcinoleur

boxylic acids for use as, P 1217^o

iodine, P 1728^o.

from lanolin treated with ultra-violet rays, P 5013^o

manuf. of, from rosin and crude cresols, P 4587^o.

medical, 4532^o

mercury compds., P 1471^o, P 5276^o.

mercury from, in grain and flour, 2506^o.

mercury oxycyanide compds. as, 1115^o

metals as, P 1702^o.

oral, Silargel contg. chewing gum as, 2480^o

phenol detn. in, 3419^o.

phenolic, effect of soaps on action of, 630^o.

for potato seed, 3295^o

preoperative skin, methylene blue gentian violet as, 3743^o

resorcinol derivs. as, 1407^o.

review on, 1178^o

seed, for control of kernel smut of foxtail millet, 4765^o

for seeds, P 665^o, P 2239^o, P 3208^o, P 3770^o

seed, *Uspulun* Universal as, 2238^o.

skin, mercurochrome and tincture of I as, 3249^o

soil, AcOH as, 1461^o.

stability of, in presence of milk, 4277^o

for sugar-beet seeds against blight, 469^o.

tellurium compds., P 1474^o

for tuberculous excretions, 667^o

veterinary, P 2786^o

weakening by glycerol, 4965^o.

Disinfection. (See also *Fumigation*, *Sterilization*.)

of anthrax-infected hides, 4364^o.

app. for, P 934^o, P 1785^o, P 1978^o.

of beer vats, etc., P 3772^o.

with chlorine, 178⁷.
 of foulbrood combs with CH_2O , 2529¹.
 of garbage in cans, P 4005¹.
 by mercury ion, relations to activity, 1800⁹.
 review on, 659⁴.
 of seeds of cereals by wet treatments, 5267⁴.
 of seeds with Hg, effect on plants, 3006⁴.
 of seeds with Hg, permeability of plant cells in relation to, 5267⁴.
 with sulfur dioxide, 659².
 unsatd. compds. vs. satd. compds. in, 3248².
 of urine, 5482².
 of wool-bearing tuberculous matter, 5211⁷.

Disinomenine^{*}, 5185⁷.

Disperse systems. (See also *Colloids; Particles; Solutions.*)

deposition of aq., P 4756⁴.
 heat effects in formation of, 5404⁴.
 solid phase rule of Wo. Ostwald, 5386¹.
 stirring app. for, P 4376³.
 viscosity of, velocity function of, 5083⁴.

Dispersion, P 655⁴, P 3062⁴, P 3761¹.

agents for, (*Patents*) 921¹, 942², 1453², 2046², 2229¹, 2792², 3062², 4030², 4061².
 app. for, P 1533⁴, P 4600¹.
 aqueous, of org. substances, P 2850⁴.
 aqueous, of pitch, bitumens, resins, etc., P 4061⁷.

of carbon black in rubber, 4097⁴.
 of cellulose in soln., 4611².
 of crvst. particles, chem. combination and, 3388¹.

of dyes, etc., P 1702².
 of ions, colloid chemistry and, 4865⁴.
 of org. substances in liquids, P 1190².
 of pigments in rubber, 4097⁷.
 size of particles and, 3388¹.

Dispersion (of rays), in air and CO_2 in interval from 600 to 60 meters, 563².

anomalous, 2658⁷.
 in Ca, Sr, Ba, Mg and Zn, 34¹.
 of Li and Hg, 2884².
 by Li vapor, 5416⁴.

by unexcited gases, 33².

book: *Handbuch der Experimentalphysik*, 2888².

in crystals, 338².

generalized formula for, 1564⁴.

by magnesium sulfide, 1323⁴.

magnetic rotatory, law of, 4385², 5366⁴.

negative, 25², 1350⁴.

by org. compds., 318¹.

of platinum ammino compds., effect of stereoisomerism on, 1583².

quantum equation, 5107¹.

quantum formula of, for at. H in normal state, 2352².

by quartz, formula for, 3164⁴.

rotatory, by ammonium salts, 5171².

by borneol acetate, effect of solvent on, 1553².

by caryophyllene nitrosite, 1814¹.

by complex salts of Co and Rh contg. ethylenediamine and *trans*-1,2-diaminocyclopentane, 578².

effect of solvent on, 3145⁴.

by mineral oils of various origins, 3801².

by nicotine solns. in ultra-violet, 754².

by sugars, 821⁴.

in sodium vapor, 5103².

super-, 2661¹.

Dispersoid chemistry. See *Colloid chemistry*.

Dispersoids. See *Colloids*.

Dissimulation. See *Metabolism*.

Dissociation. (See also *Heat of dissociation; Ionization; electrolytic.*)

color of free radicals and, 2617⁴.

energy of, 564².

of gases, effect of high-frequency discharge on, 5423².

of halogen mols. caused by radiation, 5407⁷ by heat, of cyclic compds. under H pressure, 2174², 3697¹, 3926², 4465².

homogeneous, calcn. of, 2636².

of liquid crystals, 1793⁴.

measurement of, of salt vapors, 1326¹, 1793¹.

of mols. as disclosed by band spectra, 1350⁹ of mols. as explained by analysis of vibration spectrum of SO , 4130².

of mols. caused by rotation, 5094⁶.

of org. compds., ring strain and, 1337, 4942².

of polymeric thioketones and corresponding compds. of the ethane series, 2708⁴.

pre-, theory of, 5407².

rate of, for perfect gas, 5396².

Dissolution. See *Solution*.

Dissolved substances. See *Solutes*.

Distempers, manuf. of, P 292⁴.

peeling of, off Keene's cement, 1239².

sealing of, 3586⁴.

Distillation. (See also *Coal; Destructive distillation; Distillation apparatus; Evaporation; Gas, illuminating and fuel; Hydrocarbon oils; Petroleum refining; etc.*)

app. for automatic stopping of, 4819⁶

of aqueous solns. to ext. volatile substances, P 3761¹.

of azeotropic mixts., 1714².

of binary mixts., 4861⁴.

book: *Bases physico-chimiques de la*, 3283¹ with columns, application of F. D. Brown's rule to, 3281².

of complex hydrocarbon mixts., 4052⁴.

continuous and intermittent, with a single column, 4754².

fractional, P 1452², 2624², 3281², P 4712⁴.

fractionating distn. products of org. matter as they are evolved from still, P 2021².

in gas currents, 2865².

gaseous products of, sepg. solids from, P 2610⁴.

heating method for, P 4228², P 4756¹.

of intensively dried liquids, 1327⁴.

low-pressure, simplification of lab., 2080⁴.

mechanism of, 4119⁴.

of mixts. of many components, theory of, 1033².

sepn. of various liquids by, P 4712².

steam, calcn. of problems of, 4280².

steam, of acids in enology, 234².

steam, of water-sol. org. substances, 321².

steam theory of, 1033².

of tar oils or salts, etc., P 919².

vacuum, pressure regulator for, 1780⁴.

Distillation apparatus. (See also *Carbonization; Condensers; Gas, illuminating and fuel; Petroleum refining; Receivers; Retorts.*)

1529⁴, 4561⁴; (*Patents.*) 5⁴, 7², 1019²,

1784², 2514⁴, 2609², 2610⁴, 3181¹, 3331²,

3340², 3381¹, 3605², 3832², 4107⁴, 4600¹, 4802².

adapter for vacuum, 4105¹.

for alc. (abs.) prepn., 1015⁴, 1714².

for alc., etc., app. for sepg. 1st and last runnings in, P 59.
 for alc. liquors, P 4768³.
 for alc. production, P 1988⁴.
 for benzene purification, P 961³.
 for bitumen and hydrocarbons in sand and sandstone, P 1748⁴.
 for bituminous materials, P 3078², 3805⁷.
 for brown coal, etc., in granular form, P 2021³.
 bubble cap and tray for, P 3130³.
 bubble still, P 4600¹.
 bubble towers from old, 4377⁴.
 bubble tray for, P 3132⁴.
 for carbonaceous material, P 6917⁴, P 692², P 2270⁴, P 2291⁴, P 2555¹, P 4805⁶.
 charging device for destructive, P 275⁶, P 2276⁴.
 closing device for vertical, P 2858⁷.
 for coal, P 2021⁴, P 3073⁴, P 3796⁴.
 for coal and wood in lab. demonstration, 5357⁴.
 for coal, collecting pipes for, P 265³.
 for coal, etc., (*Patents.*) 265³, 504², 1250⁹, 1251³, 1315¹, 1316¹, 2021⁴, 2277¹, 2555⁷, 2811¹, 3075⁴, 3332⁴, 5307¹, 5307², 5562², 5563¹.
 for coal, etc., app. for evacuating residues from, P 265⁴.
 for coal samples, 4325¹.
 coated spiral columns for, 2325⁴.
 columns, P 3831⁷, 4561⁶.
 columns and flasks with Hücke's dropping neck, 1780⁴.
 columns, calcn. of, 1529⁴.
 for corrosive substances, P 2609⁴.

 Dodecane, 1 - bromo - 2, 7, 11 - trimethyl-, 3702⁴.
 1, 12-Dodecanediol, prepn. of, 817³, 4439⁴.
 Dodecanolic acid. See *Lawric acid*.
 1-Dodecanol. See *Dodecyl alcohol*.
 1-Dodecene, compd. with Hg(OAc)₂, 3899¹.
 phys. consts. of, 3897².
 —, 2, 7, 11-trimethyl-, 4926¹.
 Δ¹ - 3 - Dodecenone, 1 - (m - chlorophenyl)-, 116⁷.
 —, 1 - (o - chlorophenyl) -, and semicarbazone, 116⁹.
 —, 1 - (p - chlorophenyl) -, and dimeride, 116⁷.
 —, 1 - p - cumenyl-, and dimeride, 116⁷.
 —, 1-(3, 4-dimethoxyphenyl)-, and dimeride, 116⁴.
 —, 1 - (3, 4 - methylenedioxyphenyl)-, dimeride, 116⁷.
 —, 1-phenyl-, dimeride and its oxime, 116⁴.
 —, 1-salicyl-, 116⁴.
 —, 1-p-tolyl-, dimeride, 116⁷.

- n*-Dodecotic acid. See *Lauric acid*.
- Dodecyl alcohol**, dipole moment of, 5074^o.
esters, and their addn. compds. with deoxycholic acid, 4926^o 3^o.
- Dodecylamine**, μ - Δ^2 -cyclopentenyl-, and salts, 113^o, 114^o, 115^o.
- , *N*, *N*, γ , η , λ -pentamethyl-, 4926^o.
- Doebner reaction**, 391^o, 3706^o.
- Doebner's violet**, spectrum of, 384^o.
- Dogfish**, body fluids of *Musculus canis*, 2219^o.
carbon dioxide from nerves of, 3751^o, 3752^o.
pepsin and trypsin prepn. from *Acanthias vulgaris*, 2736^o.
scyllitol synthesis in eggs and embryos of *Acanthias vulgaris*, 5242^o.
vitamin D in liver oil of, 3008^o, 3253^o.
- Dolerites**, formation of red soil and of black vlei soil from, 2120^o.
metamorphosed, from Broken Hill, 1086^o.
- Dolomite**, action on ZnSO₄ solns., 3409^o.
of Buda-Kovácsier Mts., 3880^o.
corrosion of crystals of, by active isotropic liquid, 4115^o.
detection of ferric and manganic, 4419^o.
fluorescence of, 5360^o.
of India, 5443^o.
klns. for, P 4110^o, P 5019^o, P 5282^o.
open hearth furnace bottoms of, 2400^o.
poly-synthetic twinning in, 5141^o.
review, 5445^o.
sols. in H₂CO₃ solns., 63^o.
symmetry and twins of, 4649^o.
- Dolomitization**, of limestone, 4425^o, 5448^o.
- Doloresum liniment**, 2244^o.
- Dolphin**, antirachitic effect of oil of, 3011^o.
vitamin A in subcutaneous fat of, 421^o.
- Domeykite**, 3612^o.
- Donnan equilibrium**, 2630^o.
application to cell membrane of erythrocytes, 2728^o.
application to ionic relations of plant tissues, 181^o.
in dyeing, 3347^o.
effect of heating protein solns. on, 3723^o.
electrochem. potential and, 4125^o.
in pathol. human serums, 398^o.
review on, 4865^o.
selective absorption and, 4865^o.
theory of, 323^o.
- Doors**, furnace, machine for molding, P 4853^o.
- Dopes** (See also *Fuels*; *Lacquers*.)
contg. cellulose esters, P 4356^o.
- Doppler effect**, broadening of spectrum by, 1814^o.
in canal rays of H, 5413^o.
of hot cathode arc in He, 2654^o.
of mercury, 4888^o.
- Dotriacontane**, melting p. of, 4438^o.
surface tension and d. of, 1549^o.
- , 2, 6, 10, 14, 19, 23, 27, 31 - octamethyl-, 3227^o.
- Double bonds**, addn. reactions with Na, 3907^o.
addn. to, with formation of two asymmetric carbon atoms, 3851^o.
conjugated, 2698^o, 3712^o, 4682^o.
conjugated, valence octet theory and, 1573^o.
detrn. of no. of, 4948^o.
detr. position of, by decompn. of ozonides, 595^o.
effect on biochem. synthesis and hydrolysis of glycerides, 621^o.
isomer production in formation of, 2694^o.
migration of, 5466^o.
- in petrolatum, esp. that used in smokeless powder, 1745^o.
polarity of, 1538^o.
Raman lines assocd. with, 3855^o.
stability of, in Δ^2 - Δ^2 -bixanthene, 1638^o.
- Double decomposition**, in absence of a solvent, 3845^o.
equil. const. of, in aq. soln., 4126^o.
mass-action law applied to, 4126^o.
- Double refraction**. See *Refraction*.
- Double salts**, of arylenediamines, P 2722^o.
ebullioscopic, detn. of, in aq. soln., 557^o, 3390^o.
isotherms, 4616^o.
non hygroscopic, of Ca(NO₃)₂ with (NH₄)₂SO₄ or NH₄ phosphate, P 676^o.
oxalates, amines corresponding to, 1361^o.
- Dough**, analyses of, interpretation of, 3277^o.
bread-making prepn. of yeast and, P 5250^o.
for bread or biscuits, etc., P 4752^o.
effect of dry skim milk on fermentation and H ion concn. of, 1693^o.
fermentation prior to baking, prevention of, P 1967^o.
mech. treatment of, testing flours by effect of, 4461^o.
mixing app. for, P 2510^o.
treatment of, P 4512^o.
water absorption of, effect of dry skim milk on, 2766^o.
yellow color in, without use of a dye, 3517^o.
- Douglas fir**, effect of sulfite liquor on, 4066^o.
- Douglas medal**, award to Paul D. Merica 1371^o.
- Draft**, regulator for furnaces, P 740^o, P 1783^o.
P 4108^o.
- Draft gages**, elec. control or recording app. for, P 3630^o.
- Drainage**, lab., 733^o.
- Dressings**. See *Surgical dressings*.
- Driers**. (See also *Drying apparatus*; *Oil*.)
P 1293^o, P 5338^o.
cobalt detn. in, 4161^o, 4637^o.
effect on linseed oil films during aging, 3580^o.
for fatty oils, differentiation from anti-oxidants, 1295^o.
metallic soaps as, 1004^o.
reviews, 260^o, 2049^o.
Soligen Trockenstoffe, 997^o.
use of, 3357^o.
- Drills**, elec. furnace for heating ends of, P 4414^o.
- Drinks**. See *Beverages*.
- Drop point**, detn. of, 2469^o.
- Drops**. (See also *Particles*.)
liquid, on same liquid surface, 4118^o.
photoelec. effect with submicroscopic, 1810^o.
recorder for, 3830^o, 4490^o.
shapes and figures of microscopic, during equil. caused by diffusion, 5087^o.
shapes of, in relation to detn. of surface tension, 4861^o.
spontaneous division of microscopic, 2627^o.
- Drosophila melanogaster**, esterolytic processes and duration of life of, 3276^o.
resistance to HCN, 468^o.
- Drozol**, as dust preventive on roads, 2564^o.
- Drugs**. (See also *Narcotics*; *Ointments*; *Pharmaceutical preparations*; *Pharmacology*; *Tinctures*; "medicinal" under *Plants*; etc.)
active principles and "ballast" substances of vegetable, 5012^o.
adulteration and misjudgment of vegetable, 2632^o.

 cond. of, detn. of, 4603⁴, 4613⁹.
 within dried collodion membranes, 1394¹.
 effect of a high-potential direct current on, 2635⁹.
 for high-frequency currents, 752⁴, 3110⁴.
 law of equil. and, 5087⁴.
 Ohm's law and, 1043⁹.
 cond. of dil. solns. of, "water correction" in detn. of, 5087⁴.
 cond. of strong, dispersion of, 5390⁹.
 cond. of strong, frequency dependence of, 4871⁹.
 dielec. consts. of solns. of, 558⁴.

- diffusion through membranes, velocity of, 1035⁷.
- distribution of soap and, in soap body, niger and lye, 726¹.
- effect of concd., on chem. processes, 2637⁶.
- effect of diffusion at a moving boundary between 2 solns. of, 2634⁴.
- effect of dil. solns. of, on mobility of suspended quartz-sand filter, 14³.
- effect of salts on weak, 211, 3618⁷.
- effect of solns. of weak, on soly., 1043⁷.
- effect on action of specific diuretics and on secretion of urine, 4506⁷.
- on blood sugar, 869⁷.
- on clay slip, 4311⁹.
- on coupling reactions of H-acid, 4125⁴.
- on distribution of AcOH between C_6H_6 and H_2O , 21⁶.
- on electroendosmose through wood membranes, 1035⁹.
- on electrokinetic potentials of silicic acid gels, 17⁷.
- on emulsions, 2627⁶.
- on glycerophosphatase, 4489³.
- on optical activity and relative resistance to shear of gelatin systems, 3842⁹.
- on org. iso-colloids, 2089⁶.
- on n of solns. contg colloids, 5384⁴.
- on rotatory power of tartrates of org bases, 2090⁷.
- on sedimentation of quartz suspensions, 14³.
- on sugar metabolism, 3261⁹.
- on velocity of action of HCl on alc., 4398².
- on viscosity of lyophilic sols, 1551⁹.
- on viscosity of sols, 3839⁷.
- electrokinetic potential of Au in very dil. solns. of, 4861⁴.
- electroosmosis of mixts. of, 2631⁹.
- equil. in membranes with an elective permeability to ions and its biol. significance, 1169⁹.
- equil. law of, 3390⁹, 4396⁸.
- equil. of heterogeneous systems including, 2310⁴.
- equiv. refractivity of solns. of strong, concn. and, 2091⁴.
- Faraday effect in aq. solns. of some uni univalent, 3391⁴.
- feeding device for, for cells, P 4899².
- freezing point lowering of dil. solns. of mixts of 2, 4870².
- heat of diln. of strong, individuality of, 3150⁹.
- heat of soln. of strong, temp. coeff. of, 1502⁹.
- ionic concns. and activity coeffs. of weak, in salt solns., 752⁴.
- ionization in dil. solns. of strong, Debye's theory of, 4125⁴.
- ionization of strong, and application of law of mass action, 1802⁹.
- ionization of weak, interionic forces and, 4871⁴.
- lyotropic influence of, on agar sols, 17¹.
- neutralization of oligodynamic power of Cu by solns. of, 2485².
- penetration of strong, into plant cells, 4243⁷.
- permeability of muscles to, during work and in repose, 3502⁴.
- permeability of protoplasm to, 3935⁴.
- phenomena in gas space at boundary of fluid, during passage of current, 5114⁴.
- polarizing, P 5424³.
- reaction with gelatin, 867⁷.
- refractivity of, dependence on concn., 5388⁴.
- Röntgen-ray diffraction by solns. of, 3625⁷.
- soly. of, temp. coeffs. of, 5084¹.
- stirring app. for molten, P 4899².
- theories of, 1043⁴.
- thermochem. and refractometric investigations on strong, 1048⁴.
- thermochem. behavior of weak, 2350⁷.
- viscosity of solns. of strong, 5375².
- Wien difference of potential effect in, calcul. of, 3146⁹.

- Elektroschmelzement,** manuf. of, 3067⁷.
- Elements.** (See also *Atoms*, *Isotopes*; *Isotopy*; *Periodic system*, *Radioelements*, *Transmutation*; and the various individual elements, as *Hydrogen*)
 of atomic no. above 92, 4878².
 of atomic no. 61—see *Illium*.
 of atomic no. 75—see *Rhenium*.
 of atomic no. 91—see *Protactinium*.
 book: Das Alter der Grundstoffe, 3167³.
 classification of, rectilinear diam. of d curves as starting point of, 4387⁴.
 creation of, 759².
 densities in the liquid state, 9¹.
 density of, in compds., 4861⁶.
 emission of soft x rays by, at high voltages, 3404⁸.
 energy emitted or absorbed in formation of, importance of packing fraction in detn. of, 3152⁹.
 energy levels of solid, from Cr to La, 1345⁶.
 entropy, sp. heat and heat of vaporization of solid, 4383⁹.
 evolution of, 49¹.
 evolution of odd-numbered, 1026³.
 interrelations within mol. of compds., Men delyeev's periodic law and, 3835¹.
 ionic radii of, regularities in, 2860⁷, 4383⁴.
 isobaric, 1808¹.
 metastability of, as result of enantiotropy or monotropy, 555¹, 1562⁹, 2626¹.
 radiations of, in bright atm. of sun, relations between, 2884¹.
 review, 5405².
 synthesis of, 3622⁹.
 from protons, 2879².
 in stars, 3622⁹.
- Elemi oil,** 4532⁹.
- Eleocaris tuberosa,** vitamins B and C in, 3012².
- Eleostearic acid,** absorption of halogens by, 4837⁹.
 α -, and β -, tetrabromides*, 1873⁹.
 α -, constitution of, 5160⁹.
 β -, esters, atm. oxidation of, 2151⁴.
 halogen addn. to, and to its glyceride, 3360⁹.
 peroxide detn. in oxidation products of glyceride of, 5439⁹.
 constitution of, 3362⁹.
 ethyl ester of, heat polymerization of, 531⁴.
 -, θ -, dibromo-, α -, elimination of Br from, 3215⁷.
- Eleostearin,** in wood oil, effect of light on, 291⁸.
- Elephantorrhiza burchelli,** native uses of, 1508¹.
- Eleusine,** chem. and biol. analyses of *E. atra*, *E. fusca* and *E. alba*, 3753⁹.
coracana, proteins of, 211⁶.
- Eleusinin,** 211⁵.
- Elevators,** for chem. factories, 1016².
- Eliot, Charles, W.,** biography, 3133³.
- Elodea canadensis,** aluminum effect on, 409⁶.
 effect of elec. currents on assimilation of, 2460⁶.
 photochem. yield of chlorophyllic assimilation in, with complex and intermittent light, 3002².
- Elutriation,** app. for lab., 3127⁴.
 app. for testing granular materials, P 2609² of cement, app. for, 3786².
 of iodine and its compds. adsorbed on solids, 5382².
 of ores, app. for, 4655².
 of powders, app. for, P 1317⁶.
 of soils, app. for, 5531⁹.
- Emanations.** See *Active deposits*; *Radon*.
- Embryoma,** indole effect on, 1959⁷.
- Embryos,** adrenaline content of suprarenal capsule in chick, 869¹.
 adrenaline in adrenals in human and bovine, 3255⁶.
 blood development in, in cattle, 3504⁴.
 blood vessels of yolk sac of chick, effect of H ion concn. on, 3963¹.
 cyanic acid as precursor of NH₃ and urea formed by kidney tissue of, 4731².
 detoxication in chicken, 423⁷.
 enzymes in digestive organs of, 3506⁹.
 enzymes in various parts of, 5222⁹.
 fungicide for use with amphibian, mercuriochrome as, 2218⁴.
 glutathione, cytochrome and H-ion concn. of chick, 4247⁹.
 glycogen in intestinal mucous membrane of, 4255⁷.
 growth and implantation of, after ablation of ovaries under influence of corpus luteum exts., 4252⁹.
 growth of heart and lung tissue in chick, effect of diff. drugs on, 3986².
 heart transplants of, contractile activity of, and effect of certain hormones, 3499¹.
 hydrogen-ion concn. of blood of, and of mother during birth, 1669⁹.
 hydrogen-ion concn. of blood of chicken as function of time, 4737⁴.
 interchange of substances between mother and, 3257⁷.
 ionic compn. of, 3501².
 karyokinesis of cells of, O tension for, 1681¹.
 lead effect on chick, 4272¹.
 leucocyte peroxidase development in, 3494⁴.
 liver glycogen in, 4972⁹.
 melanophore-expanding and uterus-stimulating substances in pituitary body of early pig, 2470⁶.
 metabolism of, 4725¹, 5494⁴.
 nitrogen metabolism in bird, 3502¹.
 nitrogenous excretory product of an animal in relation to environment of, 3720³.
 non-sp. pressor ext. of, 2450⁴.
 phosphorus partition in blood of, comparison with maternal blood, 2208⁴.
 pulsation rate of hearts from chick, effect of various solns. and salts on, 3975⁴.

- scyllitol synthesis in selachian, 5242^o.
 secretions of, capillary analysis of, 4237^o.
 vol. changes of red blood cells of bovine, in hypertonic solns., 879^o.
- Emerald**, pigment of, 5441^o.
- Emerald green**. See *Copper acetoarsenite*.
- Emery**, particle sizes in, detn. of distribution of, and app. therefor, 3382^o.
- Emesis**, by digitalis bodies and by strophanthidin in cats with denervated hearts, 902^o.
- Emetics**, antimony (tervalent and quinquavalent) as, 1687^o.
- Emetine**, P 1216^o, P 3933^o, 4299^o.
 cholate, P 612^o.
 effect on gastrointestinal tract, 2211^o.
 effect on intestine, 4742^o.
 poisoning by, 3745^o.
 salts with bile acids, P 3932^o.
- Emission**. See *Photorelectricity*, *Radiation*; etc.
- Emodin**, prepn. of, 2784^o, 4014^o.
 in rhubarb, 4769^o.
- Empoasca fabae**, insecticide for, Bordeaux mixt as, 3294^o.
- Emptying devices**, combined with filling devices for measuring vessels filled under pressure, P 554^o.
 regulation of, elec. control system for, P 739^o.
- Emulsification**, P 457^o, P 3118^o.
 agents for, 221^o, 2051^o, 5279^o, 5382^o; (*Patents*.) 222^o, 536^o, 605^o, 681^o, 937^o, 1228^o, 1298^o, 1418^o, 1453^o, 1650^o, 2001^o, 2047^o, 2057^o, 2539^o, 2821^o, 3806^o, 4030^o, 4061^o, 4282^o, 4353^o, 4368^o, 4515^o, 4581^o, 4593^o, 4982^o, 5284^o, 5313^o.
 agents for, behavior when in soln. of a solvent and mixed with water, 2052^o.
 sulfonic acids for use as, P 848^o, P 2190^o, P 4569^o.
 for use in water-paint manuf., 1290^o.
 agents for physiol., 4253^o.
 app. for, (*Patents*.) 553^o, 741^o, 1025^o, 1314^o, 1535^o, 1784^o, 4378^o, 4509^o, 4600^o, 4851^o, 5068^o, 5314^o.
 app. for, of bitumen for roads, etc., P 497^o.
 feeding device for, P 553^o.
 of margarine and fruit, P 4279^o.
 of tars or bitumen, P 2812^o.
 of asphalt, P 3571^o.
 of bitumens, P 3571^o.
 in confectionery and bakery industries, 5247^o.
 by dispersion, P 921^o, P 3062^o.
 effect on peptic synthesis of protein, 3237^o.
 of fats, P 4841^o.
 by fat-splitting agents, effect of salts on, 5601^o.
 by high-frequency sound waves, 3838^o.
 in hydrotropic mixts., 3388^o.
 in insulating liquids, P 655^o.
 with metallic soaps, 1004^o.
 of oils for wool, 1754^o.
 purifying liquids with tendency for, and app. therefor, P 1189^o.
 of sulfonated oils, 534^o.
 surface energy and, 2226^o.
 of tar, bitumen, creosote, petroleum, etc., P 1502^o.
 of waxes, P 5343^o.
- Emulsin**, almond, conservation of properties of, 400^o.
 hydrolysis of *d*-glucosides of *d*- and *L*-methyl- α -hexylcarbinol with, 4714^o.
- Emulsions**. (See also *Photography*; *Sprays*.) 3889^o.
- of alk. earth stearates, 2588^o.
 of aromatic hydrocarbons, P 2988^o.
 asphalt, 1746^o, P 3069^o.
 effect of waterproofing cement with, on time of setting and strength, 2799^o.
 for highways, testing and judging of, 4791^o.
 for paints and waterproofing compns., P 5337^o.
 review on, 3803^o.
 for roads, 686^o.
 uses in chem. plant, 4812^o.
 of asphalt, bitumen or tar, P 275^o.
 of asphalt, oils, rubber, etc., P 4339^o.
 bacterial, effect on metabolism, 5508^o.
 of bitumens, gums, waxes, etc., P 1263^o.
 bituminous, (*Patents*.) 511^o, 698^o, 949^o, 1263^o, 1502^o, 2568^o, 3069^o, 3079^o, 4061^o, 4816^o, 5038^o, 5314^o.
 bituminous, removing suspended solid particles in, P 4061^o.
 for roads, P 2265^o.
 for roads, etc., P 1734^o.
 from sands, dehydration of, 270^o.
 specifications for, 947^o.
 tests of A. S. T. M. for, 1449^o.
 books: Technik der, 1806^o. Technisch verwendbare Emulsionen mit bes. Berücks. d. bituminösen, 3282^o.
 breaking of, by high-voltage a. c., 325^o.
 breaking, surface energy and, 2226^o.
 of carbon disulfide, P 4306^o.
 clarification of, P 2228^o.
 clearing velocity of, acceleration of, P 655^o.
 of coconut oil and soy bean phosphatide, P 3118^o.
 of cod-liver oil, 2785^o.
 cold bitumen, for roads, 1489^o.
 cold bitumen, uses of, 1499^o.
 in dairy industry, mech. stabilization of, 3756^o.
 depositing japan-forming materials from, P 4837^o.
 detg. type of, 5382^o.
 of *p*-dichlorobenzene, P 3062^o.
 dielec. const. of, of water in transformer oil and of EtOH, water or Hg in paraffin oil, 4120^o.
 dual, esp. in spraying of trees, 1332^o.
 for dyeing, etc., P 3548^o.
 for dyeing, tanning, etc., P 457^o.
 effect of electrolytes on, 2627^o.
 and effect of H-ion concn. on their stability, 3388^o.
 effect of soap concn. in both phases on action of, 3615^o.
 of fats and hydrocarbons and their industrial uses, 2052^o, 4358^o.
 fat sepn. from, centrifuge for, P 726^o.
 filters for, P 1017^o.
 formation of, 1038^o, 2088^o.
 -forming capacity of fats, detn. of, 2051^o.
 fuel, P 1496^o.
 of glycerol and turpentine, 5565^o.
 of hydrocarbon oils, sepn. of, P 5037^o.
 "Kiton," 2283^o.
 in leather and fur industries, 1770^o.
 of lecithin, stabilizing and reducing viscosity of, P 5013^o.
 of liquid or dissolved inorg. substances, P 5253^o.
 of lubricants, tests of A. S. T. M. for, 1450^o.
 for lubricating, for prepn. of pigments and

- for treatment of wool, cotton, leather, etc., P 1453¹.
 of malt ext. and cod-liver oil, 1470⁷.
 margarine, chilling rolls for, P 4513⁴.
 mayonnaise, mobilometer for detn. of consistency of, 1695¹.
 of medicines, insecticides, etc., P 3052².
 of mercury in vaseline, dielec. const. of, 4121¹.
 oil-field, 3800⁹.
 oil, for sortening and oiling textile fibers, P 5330⁹.
 of oil in agar medium, 4964².
 of oil in water, etc., P 1552⁴.
 oil recovery from, P 536⁷.
 of oils, app. for sepg. constituents by elec. treatment, P 348¹.
 of oils, etc., products from suint or its fatty acid for making, P 3825¹.
 of oils, S, waxes, resins, etc., P 4282².
 of oils, tars, asphalt, S, rubber, etc., P 1262².
 from oxidized petroleum wax, P 510⁴.
 paint, comparative analyses of water paints and, 3358¹.
 petroleum, 2560¹, 3076¹, 3336⁷, 4336⁴.
 analysis of, 1743¹.
 app. for dehydrating, P 2028¹, P 4814¹.
 app. for simultaneously dehydrating and distg., P 696¹.
 app. for treating, P 4565¹.
 from Boryslaw-Tustanowic, 1255².
 breaking of, 270⁴, P 1501¹, P 2818², P 3570⁴, 4560⁴, P 5312², 5564⁷.
 colloid chem. factors in formation and breaking of, 5081⁴.
 effect of hard water on stability of cold mix, 468².
 effect of H-ion concn. on breaking of, 963¹.
 elec. dehydration of, 2280¹.
 prepn. of, 4534¹.
 treating with chemicals, 4336⁷.
 treating without cont., 3336¹.
 phosphatide, P 5054².
 Pickering, model of, 15¹.
 for pigments, P 999¹.
 of pitchy substances, P 511⁴.
 precipitation rule for, on basis of sulfonated oils, 4867⁴.
 preservative for, N as, 4534¹.
 review on, 3615⁴.
 for roads, detergents or sheep dips, P 5023¹.
 scope and application of, 3522¹.
 for sizing textiles, P 995¹.
 of solid fats, physicochem. examn. of, 2631¹.
 of solvents for fats, P 3824¹.
 stability of, test for, 4163¹.
 stabilizers for, P 3806¹.
 sulfo-fatty acids for producing, P 1005¹.
 of sulfonated castor oil and toluene, structural viscosity of, 5375⁴.
 of tall oil, P 4842¹.
 tanning, P 1008¹.
 of tar, etc., P 2558⁴.
 tar, for roads, P 2265¹.
 of tar oils, resolving P 961⁴.
 tar recovery from, P 4805⁴.
 tar, sepg. constituents of, P 266¹.
 for textile treatment, P 3818¹.
 theory of, 2088¹.
 transparent, of essential oils, 931¹, 5005⁴.
 treating fibrous materials with, P 5597¹.
 vehicles (casein-oil) for, 2307^{1,2}.
 vitamin or enzyme production in, with ultra-violet rays, P 1698¹.
 water-gas tar, 5303¹.
 of water-gas tar, dehydrating, 4556¹.
 of wool fat, P 249¹.

 of methanol, 1344⁹.
 of MeOH synthesis, 2350⁹.
 of molten alloys of Tl with Sn or Pb, 1559⁹.

- of 19 org. compds., 4877¹.
 of HNO₃ solus. in water, 1042².
 in reactions: $4\text{AlN} + 3\text{C} = \text{Al}_4\text{C}_3 + 2\text{N}_2$ and $\text{Al}_2\text{O}_3 + 3\text{C} + \text{N}_2 = 2\text{AlN} + 3\text{CO}$, 7572^{3,4}.
 of system consisting of monomol. film and a vol. phase, 7482.
 in system: $\text{MeOH}-\text{H}-\text{CO}$, 3148¹.
 of Ti_2O_3 , 5401¹.
 of toluene formation, 5403⁷.
 of H_2O , CO and CO_2 , 5403⁶.
 of gases, 1032⁶.
 relation between abs. temp. and mean kinetic, 1542¹.
 thermodynamics of distribution of, 2865².
 grating, of atoms in solid state, 1544¹.
 grating, of simple salts, calcul. on basis of wave mechanics, 561¹.
 of helium, 3626².
 of hydrogen, 5363⁶.
 from incandescent solids, proportion in various spectral regions, 3855⁶.
 increase of, with elementary processes, 3165⁶.
 internal, absorption of materials under load, detn. of, 802⁷.
 of monat ideal gas in adiabatic reversible transformation, 2861⁸.
 of substances or mixts. under constraint, zero of, 1324³.
 at zero abs., 24¹, 1321¹.
 internal, magnetic and elec., of mixts., detn. of, 3119.
 levels of solid elements from Cr to La, 1315⁶.
 losses of electrons in H, 1019⁶.
 measurement of small quantities of, use of amplifiers for, 3602².
 measurements by means of Jone effect, 5078¹.
 metabolism of cattle in relation to plane of nutrition, 2205².
 metabolism of, during work, 1159¹.
 metabolism of, of *Paramecium caudatum*, 2099.
 in mols., relations of, 5363².
 of Röntgen rays, detn. of, 4882².
 simultaneous action of 2 sorts of, in one excitation act, 562².
 subatomic, 1345¹.
 surface - see *Surface energy*.
 transfer during nuclear impact, 759².
 transfer of, quantum theory of anomalously large effective cross sections of atom systems during, 3399¹.
 transfers between at systems, quantum mech. analysis of, 3399.
 transformation of, by rubber, 5611¹.
 transformation of kinetic, of a particles into radiant energy, 2353¹.
 in vibrating continuum, quantum theory of, 5361².
Energy of dilution. Energy of formation, etc. See *Heat of dilution; Heat of formation*; etc.
Engineering. books: Chem., Catalog, 1928, 654¹; Some Com. Aspects of Metallurgical and Chem., 654¹. Modernizing for Profits in Chem., Industries, 1969². The Chem., and Chem. Catalogue, 2228³.  pharmacol. action and, 1683².
 of a liquid with its vapor, 2623¹.
 in metallurgy, importance of, 1375¹.
 between metals and salts in fusion, 4399^{3,4,5}, 5087⁵.
 between methoxide and hydroxyl ions in MeOH-H₂O mixts., 5392².
 pressures and consts., free-energy charts for predicting, 4127⁵.
 in reactions between 2 condensed phases, 4126².
 between solid salts, 5400⁵.
 stationary state and, 2636¹.
 in system: metal-sulfide silicate, 582⁵.
 in systems of both vol. and surface phases in connection with spontaneous surface increase of microscopic particles, 748².
 in systems of large sp. surface, 2627¹.
 thermodynamic, in the universe, 1792¹.
 between two liquid phases, 2875⁵.
 unilateral and non-unilateral reaching of, 323⁵.
- Equisetum palustre**, combating, and destroying its poison, 4979⁵.
- Equivalence point**, mole no. and position of, 23².
- Equivalent weights**, detn. of, lab. expts. on, 316¹, 2612².
- Erbium**, atomic wt. of, 2080⁵, 2613¹.
 sepu. from Yt, 3179¹.
 spectrum of, 32¹, 1055¹.
- Erbium boride**, prepn. of, 4893⁵.
- Erbium chloride**, hydrate of, spectrum of, 3159⁵.
- Erbium oxides**, visible radiation of, 2100⁵.
 Er₂O₃, crystal structure of, 1791¹.
- Erbium salts**, paramagnetic properties of, 4857¹.
- Erbium sulfate**, magnetic susceptibility at low temps. and magnetic moment of, 5366².
- Erepsin**, action on *N, N'*-dileucyllysine, 1619².
 action on dipeptides, 1619², 2697².
 on dipeptides formed from racemic amino acids, 2195².
 on *L*-leucylpentaglycyl-*L*-tryptophan, 374¹.
 on peptides, 3210⁴.
 on polypeptides, 1111⁵, 1112⁵, 1113^{3,4}, 1114¹, 1388¹, 1389⁵, 2991³, 2992^{1,3,4}, 2993², 2994^{1,4}, 4192², 4232^{1,3}, 4233^{1,4}.
 on polypeptides and related compds., 2726².
 on polypeptides contg. *D*-alanine, 1619².
 on polypeptides contg. α -aminovaleric acid, 1618².
 -decomposing action of acids, 3723².
 detection of polypeptides in blood plasma and serum with, 158².
 enzyme cleavage by, inhibition of, 1144⁵.
 of gastric mucosa, 1653².
 hydrolysis of glycylglycine, glycylleucine, glycylalanine, glycylasparagine, glycylaspartic acid and biuret base by, effect of H-ion concn. on rate of, 1429¹.
 hydrolysis of protein and polypeptides by, effect of alics. on rate of, 5199².
 intestinal, 2094², 3718⁵.
 intestinal, effect on phthalylglycylglycine and phthalylidiglycylglycine, 160⁵.
 of pancreatic and enteric juices, 617³.
 protein breakdown by, 5199².
 sepn. into fractions with sp. action, 5200¹.
 specific hydrolysis by, structural assumption for, 3244¹.
 yeast, as term, 616¹.
- Ereptase**. See *Erepsin*.
- Ergamine**. See *Histamine*.
- Ergates faber**, oil from, 3514¹.
- n*-Ergostadienol**, and acetate, 4708⁵.
Ergostadienone, and oxime, 4708⁵.
n-**Ergostanol**, and acetate, 4708⁵.
n-**Ergostatrienol**, and acetate, 4709¹.
Ergostatrienol D, and acetate, 4709¹.
n-**Ergostatrienone**, and oxime, 4709¹.
Ergostatrienone D, 4708⁵.
Ergostenone, α - and β -, and derivs., 1649^{1,4}.
 --, benzal-*, α -, 1647¹.
- Ergosterin**. See *Ergosterol*.
- Ergosterol**, α -acetate, 3712².
 acetylation and hydrogenation of, 3712².
 activation of, quant. biophys. studies on, 1163².
 antirachitic action of highly purified, and its esters, 1162².
 antirachitic action of irradiated, 1938², 1939⁵, 1944², 3493², 3955², 4724², 5490⁵, 5492².
 antirachitic action of irradiated, and its effect on arteries, 2743⁵.
 in *Aspergillus oryzae* spores, 1927⁵.
 calcium deposition in organs from administration of irradiated, 1178^{1,2}.
 color reaction for, 2733², 3959⁵.
 color reaction for, and its transformation products, 2735².
 compd. with digitonin, 5543⁵.
 in constitutive lipides, 3936⁵.
 in *Corticellus shiitake*, 1942².
 detection of, 3953¹.
 diphosphate of, vitamin effects of, 420².
 effect of large doses of irradiated, 3958⁵, 5219¹.
 on Ca and P content of blood, 4500⁵.
 on compn. of bone, 4972².
 in normal and rachitic animals, 3958⁵.

 prepn. for washing, etc., P 280⁹.
 protecting animal, from acids and alkalies, P 996¹.
 protection of vegetable, against marine influences, 5595⁵.
 protective agents for animal, tests for, 4576³.
 purified wood, 3090⁴.
 purified wood, as paper-making material, 5585⁴.
 recovery from liquids, P 920⁹, P 3808³.
 recovery from rubber fabrics, P 1778¹.
 refining, emulsified waxes for use in, P 5343⁹.
 -rubber compn., P 547⁴.
 sepn. from peat in briquet manuf., P 1251⁴.
 from shark skins, etc., for textiles, P 3370⁹.
 shrinking and felting animal, P 5332⁸.
 singeing device for textile, P 5048⁹.
 sized xanthated cellulose, P 704⁸.
 sizing textile, P 529⁹.
 sizing textile, app. for, P 1515².
 skin removal from plant, P 4084⁷.
 from skins, intestines and bladders, P 3818⁴.
 from skins of fishes, P 2593³.
 from skins of fishes, etc., P 995¹.
 sodium hydroxide treatment of sulfite, P 1506⁸.
 from sodium silicate, P 5550⁶.
 softening and oiling textile, compn. for, P 5330⁹.
 softening vegetable, P 3574⁴.
 spinnable, from coconut husks, P 3584⁶.
 spinning app. for artificial, P 3099⁹.
 spontaneous combustion of oily textile, prevention with negative catalysts and 2-naphthol, 1519⁹.
 straining app. for pulp, P 5593⁴.
 from straws and leaves, P 4084⁷.
 structure of, 757⁹.
 swelling of, in cuprammonia soln., 5045¹.
 testing app. for, 282⁷, 710².
 tests of A. S. T. M. for scoured content of grease, 1449⁸.
 textile, chem. technology in 1919-1927, 709⁹.
 textile, production of, 520².
 treating cut, P 4352².
 treating vegetable, P 529⁹, P 1514⁹.
 tropical plants producing, utilization of, 4340¹.
 vegetable, P 3574⁴, P 3818⁴.
 viscose, hygroscopicity of, 4076⁸.
 vulcanized, P 3808⁴.
 washing, P 4832⁸.
 waste liquor from producing, treatment of, P 4084⁷.
 waste, production of alc., fuel and fertilizers from, P 3300⁹.
 wettability of vegetable or animal, increasing, P 1289⁹.
 wetting agents for—see *Wetting agents*.
 of wood pulps, length of, 5580⁹.
 "wool" from vegetable, P 2047¹.
 wool-like, P 1289⁹, P 1759⁹, 4576³.
Fibrin, breakdown by pepsin, trypsin, kinase and erepsin, 5190⁷.
 clotting of, as micellar crystn. and agglutination, 193¹.
 combination with dyes, 4714¹.
 digestion by pancreatic juice with and without CaCl₂, 875⁹.
 racemization of, 2720⁷.
 relation to sedimentation index in orthopedic cases, 3269⁴.
 sulfur content of, 5479⁹.
 in tuberculosis in relation to sedimentation index, 3508³.
Fibrinogen. (See also *Thrombin*.)
 as antigen, 5506¹.
 in blood after aseptic traumas and surgical intervention, 645⁴.
 in blood plasma, coexistence of both free and combined, 4735⁹.
 in blood plasma, state of, 4735⁹.

- in blood rendered incoagulable by morphine, 2491¹.
 detn. of, 403⁴, 3484⁴.
 formation of, 888⁷.
- Fibroblasts**, growth of, effect of glutathione and hemoglobin on, 1168⁴.
 growth of, effect of glutathione, hemoglobin and ash of liver on, 1681⁸.
- Fibroin**, sericin and, 442⁸.
 splitting of silk, 4488¹.
 structure of silk, 398⁶, 1145⁴, 2726³, 5478⁶.
- Fibroin, amino-**, 1134⁹.
- Fibrolite**. See *Sillimanite*.
- Fibrolysin**, leprosy treatment with, 2759¹.
- Fibrolysis**, in leprosy treatment, 5238¹.
- Fibrous materials**. (See also *Retting*.)
 analysis of, 5585⁶.
 applying to a core such as wire, app. for, P 3381⁵.
 baking pan from, P 1271³.
 coating with mica for elec. insulation, app. for, P 921⁶.
 compn. of thermoplastic rubber deriv. and, P 2547⁶.
 digesting, P 1269¹.
 drying app. for, P 3100⁷, P 3605⁸.
 food containers of, P 4819⁶.
 impregnating, by elec. pptn., P 1068³.
 impregnation with synthetic resin, P 1002¹.
 improving, P 4352⁴.
 molded, P 5283⁸.
 ozone treatment of, P 348².
 permeating with liquid metals or alloys, P 2547⁶.
 plates, molded articles, etc., of, P 2000⁸.
 protection against action of alk. or acid agents, P 1759⁹.
 pulverizing device for, P 5307³.
 removing oils, fats, resins, etc., from, P 5253⁸.
 rubber-lined app. for washing, etc., of, on bobbins, P 4833².
 sheets of, P 1229⁴.
 for silent gearing, tight linings, piston segments, clutch linings, etc., P 2793¹.
 structure of, 2083³.
 tensile strength of vegetable, improving, P 1289³.
 treating before compacting, P 515².
 treating with emulsions, spinning oils or fats, etc., P 5597⁶.
 treatment of, P 1270⁷.
 washing app. for, on bobbins, P 529⁷.
 water detn. in, app. for, P 2307⁴.
 water for treating, decreasing hardness of, P 1197³.
 waterproofing, P 1270⁷.
 waterproofing and hardening, P 4548⁹.
 waterproofing, app. for, P 4381¹.
- Ficus**. See *Figs*.
- Figs**, preserving, P 1968³.
 zinc content of, 1696³, 2505⁷.
- Filaments**. (See also *Fibers*; *Rayon*; *Threads*; *Viscose*.)
 of acetylnitrocellulose, P 2822⁹.
 activating refractory-metal, P 1025¹.
 activating thoriated-W, P 781³.
 app. for degassing, and applying gettering material, etc., to, P 348⁶.
 app. for forming and inserting lamp, P 570⁷.
 applying "getter" material to, for incandescent lamps, P 781¹.
 bacterial prepn. of, P 1483⁴.
 carbohydrate products for manuf. of, P 155⁶.
 carbon, P 1357⁶.
 from cellulose acetate, etc., P 1268¹.
 from cellulose derivs., P 3344².
 drying of, P 2033^{1,2}.
 treatment of, P 3097^{8,9}.
 from cellulose ester or ether solns., die for extrusion of, P 1751⁴.
 from cellulose esters, P 4571¹.
 cellulose esters for, P 2033^{1,2}.
 coating, P 569³.
 coating with rubber, etc., P 1309¹.
 dampening device for, P 2047¹.
 from difficultly fusible metals, P 4153³.
 for electron tubes, P 568¹, P 737⁴.
 incandescent lamp, P 18¹, P 571¹, P 1357⁶.
 P 2379³, P 3861⁴.
 insulating, P 5520¹.
 nozzles for forming, P 289⁶.
 oxide-coated, development of, 1147⁶.
 oxide coated, emission from, 1880².
 prepd. by drying solns. contg. FeCl₃, structure of, 3143⁹.
 radio tube, of BaO, manuf. of, 1824⁹.
 radio tube, operation on a c., 1824⁹.
 resistance in tube contg. glowing W, relation of H pressure to, 3373³.
 rubber, P 2851³.
 solns. for making, P 279¹.
 spinning app. for, P 3808⁷.
 thorium-coated, P 737⁴.
 treating with liquids, app. for, P 4833².
 tungsten compn. for lamp, P 415⁴.
 tungsten, manuf. of, P 3174³, 4898⁴.
 tungsten, temp. variation along incand. cent. 5360².
 unicryst., of refractory metals, P 5150⁸.
 vacuum tube, P 552¹.
 of vacuum tubes, electrostatic forces on, 45³.
 for vacuum tubes, etc., P 781¹.
 vibration- and sag-resistant, P 4153³.
 from viscose, etc., P 1268¹.
 washing artificial, in spinning box, P 5317¹.
 wire, P 3637¹.
- Filaria**, blood serum in, surface tension of, 3209¹.
 treatment of, 2759¹.
- Files**, electrolytic sharpening of, P 4150⁹.
- Filix**. See *Ferns*.
- Filling devices**, for accumulators, P 3634¹.
 combined with emptying devices for measuring vessels filled under pressure, P 554¹.
 for corrosive substances for pipets and burets, 3377⁴.
 for molds in casting metals, P 85⁹.
 regulation of, elec. control device for, P 730¹.
- Filling materials**. (See also *Paper*; *Patent materials*.)
 for absorption or reaction towers, P 2078¹.
 for bituminous materials, 2563⁶.
 cellulose ester compns., P 4818⁹.
 for containers for explosive gases, P 708¹.
 cork charcoal as, P 3062⁶.
 cork scraps as, 3311⁶.
 for gas storage, P 679⁴.
 from leather, P 5285⁹.
 rail, P 5550⁷.
 for reaction towers, etc., P 2858⁶.
 shoe-bottom, P 1231⁴, P 2002⁴, P 4543¹.
 for wash towers, 3830⁴.
- Films**. (See also *Cinematographic films*, *Coating(s)*; *Lubricants*; *Photographic films*.)

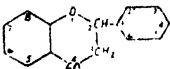

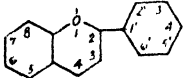

- absorbed, optical study of, 2866¹.
 of acetyl nitrocellulose, P 2822².
 adsorbed, effect on rates of evapn., 3387¹.
 adsorbed, internal pressures in, 4609².
 adsorbed vapor, thickness of, 1331¹.
 aluminum, continuous x-radiation from, 765².
 from aminocellulose, P 1269¹.
 bacteria in prepn. of, P 1483¹.
 bismuth, behavior in magnetic field, 1321⁶.
 books: Soap, 3151¹. Handbuch der biol. Arbeitsmethoden—Die Verwendung des Schmalfilms für biol. Zwecke, 3217¹.
 carbohydrate products for making, P 155¹.
 cellulose acetate, 3082¹, P 5338¹.
 from cellulose acetate, etc., P 1268¹.
 from cellulose acetate, etc., app. for making, P 513¹.
 cellulose acetate for, P 2033¹, P 3573¹.
 cellulose conditioning for production of derivs. for, P 5593².
 from cellulose derivs., P 1751¹, P 1831¹, P 2822¹, P 3097¹, P 3344¹, P 407¹, P 4312¹, P 4572¹.
 app. for making, P 704¹.
 carbon disulfide as solvent for making, P 2293¹.
 coagulating liquid for, P 514¹.
 delustering of, P 4071².
 discharging electricity from, P 3863¹.
 drying, P 2033¹, P 407¹.
 drying app. for, P 981¹.
 treatment of, P 3097¹.
 use of Cr surfaced rollers, etc., in finishing, P 277¹.
 of cellulose derivs., etc., P 2293¹.
 cellulose derivs. for making, P 1571¹.
 cellulose ester and ether solns. for, P 513¹.
 cellulose esters and ester ethers for, P 4071¹.
 of cellulose esters and ethers, P 277¹, P 704¹, P 1750¹, P 2032¹, P 2293¹, P 5317¹.
 cellulose ester for, P 512¹, P 1267¹, P 1268¹, P 2033¹, P 4818¹.
 from cellulose ethers, P 2822¹, P 3808¹.
 of cellulose nitrates and acetates, orientation and pseudo crystn. from traction in, 4393¹.
 of cellulose (regenerated), manuf. and properties of, 3081¹.
 centrifuges for treating, P 3111¹.
 colored, of cellulose esters or ethers, P 2822¹.
 drying-oil, effect of age on gain in wt. of, 5335¹.
 effect of inside, in capillary tubes on time of flowing, 749¹.
 of ester of component fatty acids of linseed oil, 5335¹.
 ethylcellulose compns. for, P 3807¹.
 from ethylcellulose, etc., P 4342¹.
 of fatty acids, 3847¹.
 from flour or meal from aroid plants, P 4819¹.
 formation of boundary, plastometric studies of, 4391¹.
 forming, by flotation of surface on Hg, P 4082¹.
 gas occlusion in, 763¹.
 hardened colloid, for dye imbibition, etc., P 529¹.
 iron, obtained by distn., birefringence and dichroism of, 4386¹.
 liquid, theory of formation of, 5378¹.
 metal, diffraction of electrons by, 3402¹.
 microstructure of, 4087¹.
 mol. dimensions and, on water, 5378¹.
 monomol., 3143¹.
 dark-field microscopy of, 5378¹.
 equil. with a vol. phase in connection with spontaneous surface increase of microscopic particles, 748².
 expansion of, 4609¹.
 formation by triolein, by its vulcanization products and by the fatty acids from sapon. of the products, 750¹.
 of myristic acid, surface tension produced by, 4610¹.
 soln. of, 4609¹.
 stability of, 4609¹.
 multilayer, for ornamenting and printing, P 2542¹.
 nickel, crystal structure of, 4386¹.
 magnetic properties of, 1026¹.
 reflection of x-rays from, 2099¹.
 nitrocellulose-contg., P 4572¹.
 nitrocellulose soln. for making, P 3573¹.
 oil, elec. cond. of, 5081¹.
 of oleic acid, 4119¹.
 of org. colloids on Hg, formation of, 2630¹.
 orientation of, method for study of, 3404¹.
 orientation of mol., on solids, 5363¹.
 overpotentials produced by, of H less than 1 mol. thick, 1802¹.
 oxide (invisible), on metals, 4143¹.
 oxide, on metals, comparison of thickness of, 3651¹.
 paint—see *Paint*.
 plastic, app. for making, P 5317¹.
 plastic materials for production of, P 5284¹.
 platinum, cond. and Hall effect in sputtered, 1321¹.
 from protein solns., P 5019¹.
 rubber, ornamental effects on, P 1309¹.
 of substances of high mol. wt on H₂O, 5378¹.
 supermol. state of polymerized substances in relation to thin, 1796¹.
 thickness of surface 3142¹.
 transparent, from viscose or cellulose cuprammonium solns., app. for making, P 4071¹, P 4819¹.
 treatment to regulate hygrometry and draw off elec. charge, P 781¹.
 from urea-aldehyde condensation products, P 2990¹, P 3821¹.
 varnish—see *Varnish*.
 viscose, P 979¹, P 1750¹, P 1268¹, P 2034¹, P 3808¹, P 4072¹, P 4572¹, P 4820¹, P 5041¹.
 viscose, app. for washing or other treatments after coagulation, P 981¹.
 viscose tubular, app. for making, P 5317¹.
 of wood oil, formation of wrinkles in, 5336¹.
Filter cake, discharging app., P 1314¹.
 removal from filter drums, app. for, P 3832¹.
 removal of org. compds. from, P 611¹.
Filtering materials. (See also *Water, purification of.*) (Patents.) 654¹, 1751¹, 2608¹, 3315¹, 3316¹, 3783¹, 5019¹, 5021¹.
 for acids, leaching, P 2855¹.
 for air, gasoline, etc., P 1017¹.
 burlap as filter cloth covering in sugar manuf., 300¹.
 clay for carrying, P 4784¹.
 cloth investigations, 2512¹.
 "cloth resistance," definition of, 917¹.
 cloths, P 4599¹, P 5065¹.

- economy in procuring and use of, 1311¹.
 for sugar mills, 2062², 2317², 5604¹.
 for gases, P 5252².
 for hydrocarbon oils, water or sewage, P 1482².
 kieselguhr, regenerating, P 2541⁴.
 for lubricants, extg. entrained matter from, P 2821¹.
 metal, for wort, 4767¹.
 for petroleum, 5071¹.
 plates, rings, etc., P 2075².
 porous metals, P 4185².
 for rayon manuf., P 1751⁴.
 revivifying, P 660².
 revivifying app., P 696².
 revivifying used clay, use of catalytic agents in, 2284⁴.
 from silk, P 1971¹.
 for soles, in manuf. of rayon, etc., P 706⁴.
Filter paper, absorption of dyes from mixed solvents by, 2341⁴.
 manuf. of high-grade, 5585¹.
Filter press. See *Filters*.
Filters. (See also *Filtering materials*, *Sewage Strainers*; *Water, purification of*.) 4377², (*Patents*.) 5¹, 550², 1017², 1782², 3603², 4107², 4378², 4590², 4850², 5065².
 for air, P 312², P 550², P 736², P 1314², P 2328², P 3130², P 3378², P 3603², P 4378², P 5065².
 for air, etc., P 4850².
 air, for engines, P 4378².
 for gasoline tanks, etc., P 2075².
 for refrigerating chambers, etc., P 3998².
 for air or gas, P 222².
 air-pressure, 5355².
 automatic, 5355².
 automatic self-cleaning viscous, 4².
 for backfiring prevention in oxy-acetylene burners, P 312².
 bacterial, 1807².
 bag support, P 5065².
 with a bed of granular material, P 1314².
 for benzene, etc., P 690², P 736².
 for benzine, P 1253⁴.
 Berkefeld, diam. of pores and manner of operation of, 733².
 beveled bars for, P 1017².
 for beverages, etc., P 2075², P 2225².
 book: Membranfilter, Cella- und Ultrafeinfilter, 3397².
 for cacao presses, P 3366¹.
 cake removal from drums, app. for, P 3832¹.
 centrifugal, P 4599², 5355².
 centrifuges with, clarification with, 3995².
 ceramic, detn. of size of pore of, 5554¹.
 circulator for continuous, 4598².
 cloth mounting in, P 3130².
 for coal slimes, etc., P 950².
 for colloids, 2073².
 for colloids, emulsions or suspensions, P 1017².
 comparison of Seitz and Mandler, 3601².
 for compressed air or other fluids, P 4590².
 continuous pressure, P 312².
 continuous rotary drum, P 3130².
 for corrosive liquids in treatment of ores, P 2608².
 for crankcase used oil, P 1261⁴.
 crucible, 2073².
 crucibles of Jena glass, 3378².
 distributing liquids on, app. for, P 1978², P 2608², P 4290².
 drum, P 2328², P 2855², P 4850².
 for dry-cleaning liquids, etc., P 4107².
 dust, P 1533², P 1782², P 3603².
 dust, cleaning device for, P 1018¹.
 for effervescent liquids or other liquids under pressure, P 550².
 Emich's tube, potentiometric titration with, 354².
 for fats, P 1520².
 filter cake-discharging app. for continuous, P 1314².
 flat-bottomed cup, P 1782².
 flexible tube, P 5².
 flue-gas, P 4870².
 flue-gas, for textile plants, 5301².
 formed as hollow disks rotating on a hollow axle, P 2328².
 for fuel oil, etc., P 5314².
 for fuels (internal-combustion), P 2020².
 for gases, P 5², P 222², P 550², P 1017², P 1314², P 2328², P 2608², P 3997², P 4107², P 4850², P 5065².
 for gasoline, P 2030², P 4060².
 for gasoline, etc., P 698², P 1017², P 4060², P 4815², P 5314², P 5568².
 grids for, P 736².
 homogenizer for rotating drum, P 3831².
 household, P 312².
 for hydrocarbon oils, P 696², P 3805².
 laminated, P 4378².
 light (color screens), 4153², (*Patents*.) 49², 349², 1072², 1750², 1811², 2670², 4416², 5358².
 for cinematography, P 49².
 colored particles for making, P 3867².
 Davis-Gilson, 4153².
 for measurement of color temp., 506².
 for monochromatic light, 3601².
 pyridine and mannitol as standards in prepn. of, 1071¹.
 for light (infra red), paraffin wax as, 510².
 for liquids under pressure, P 3370².
 loss of head of liquids passing through, 1017², of, app. for indicating, P 2608².
 for lubricants, P 511², P 697², P 970², 1262², P 1502², P 1748², P 3311², 4050², P 4061², P 4338², P 4568², 4569², P 5314², P 5568².
 for lubricants, etc., P 511², P 970², 2568², P 4338², P 4568², P 4816².
 membrane, working with, 1².
 for mercury, 5355².
 meta-, 1186².
 of metallic gauze, P 2075².
 micro-, for Ca detn., 5206².
 milk, P 4270².
 for milk of lime, 2073².
 for milk or other liquids, P 550², P 1017², P 2855².
 mol. sieve, 1035².
 nitrocellulose, metallic complexes in, 260².
 for nitrogen atm., 2325².
 for P 275², P 736², P 909², P 1533², 2075², P 2328², P 2608², P 3603², P 3832², P 4568², P 5065², P 5358².
 oil and air, P 1502².
 for oil and water, etc., P 3379².
 for oil, etc., P 3603².
 for oils, gasoline or other liquids, P 2608².
 for ore slime solns., etc., P 2075².
 overflow alarm device for, P 2328².
 for paper pulp white-water, 975².
 of perforated cylinders or plates, P 1314².
 of porous glass, P 4788².

- porous layer for, P 3603³.
 for powd. fuel sepn. from air, etc., P 3073³.
 -press electrolyzer for decomp. water, etc., P 4150².
 presses, P 1018², P 1314², P 2608^{2,4}, P 3379¹, P 4378², P 5065².
 arrangement of filter cloths in, P 550².
 for ceramic materials, P 2262².
 washing app. for, P 4851¹.
 quant., rapid, 14.
 rake gear for sand and similar, P 312².
 for refrigerating app., P 457².
 resistant to HCl, 3777¹.
 reticulated, with cleaning b'ides, P 5².
 rotary, P 3130².
 app. for washing cakes of, P 4599².
 for liquids, P 1017², P 2608², P 4378².
 single-stage, for liquids, P 5065².
 for slurry, etc., P 312².
 rotary-cell, drum for, P 1782².
 rotary suction drum, P 3831².
 rotating drum, P 736², P 2075².
 for rubber dispersions, P 2072².
 for rubber dispersions, etc., P 3831².
 for rubber latex, etc., P 1017².
 sand, P 1533², P 2328².
 cleaning app. for, P 3831².
 effect of dil. solns. of electrolytes on the mobility of suspended, 14.
 and flushing system for cleaning, P 4599².
 for water, etc., P 3042².
 sector drum, P 4107².
 settling, P 4851¹.
 siphon feed device for, for liquids, P 5065².
 for sludges, 4849¹.
 seal, repair of, 5534¹.
 spiral, for oil, etc., P 312².
 suction, P 1314², P 4378².
 suction, of adjustable capacity, P 4599².
 suction (one-piece lab.), P 4599².
 for sugar factories (beet), etc., P 1767¹.
 for sugar juice of 1st and 2nd carbonation with mech. cleaning, 300².
 for sugar manuf., 300².
 operation of Oliver, 5603².
 of Sweetland and Kroog, 3123².
 supports for, P 1314².
 tap, for liquids, P 312².
 testing, app. for, P 2075².
 thickening app. for, P 3603².
 vacuum-drum (rotary), with assocd. pressure rolls, P 312².
 vacuum, horizontal, continuous, rotary, 3378².
 vacuum, rotary, P 5², P 1314², P 5065².
 for viscous liquids, P 2608^{2,4}.
 for waste, P 4290¹.
 for water, etc., P 227², P 3603², P 5260^{2,4}.
 for water of engine-cooling systems, etc., P 3603².
 wick, for oil, etc., P 3833¹.
 for wine or other liquids, P 5², P 550².
 with wire mesh capable of being extended or contracted, P 2328².
 for zeolite use, P 2328².
Filtration. (See also *Sugar manufacture*;
Ultrafiltration; *Water, purification of*.)
 app. for, 2853².
 app. for studying, 311².
 of compressible sludges, 917².
 of decolorizing C, etc., P 2792².
 of dust, 917².
 effect on polarization of sugar solns., 537².
 of effluents, P 1189².
 by elec. adsorption under low-pressure differences, P 3284².

 synthesis of, in Germany, 2266².
 synthetic, review for 1927, 226⁹.
 technologists, training of, 259².
 technology of, review on, 1242⁴, 2548¹.
 testing, at Gov. Testing Inst. of Sweden, 2268¹.
 testing, reduction of values to standard conditions of temp. and pressure, 2804⁹.
 tests and plant operation, 3789⁴.
 tests of, burned in domestic hot-water boilers, 5559⁴.
 thermoregulators for controlling supply of—see *Thermoregulators*.
 treatment of particles before coalescing, P 264⁴.
 use in tunnel kilns, 5024⁴.
 utilization of, app. for, P 2554⁹.
 problems of, 5024⁴.
 review for 1928, 950¹.
 Valenta reaction of gasolines and gasoline-C₆H₆ mixts., 2286⁹.
 vapors, plant for producing, P 5034².
 volatile-matter recovery from, P 3331⁷.
 volatility of, engine acceleration and, 4334⁴.
 from waste fibers, P 3300⁹.
 for water-gas producers, P 2811⁶.
 from wood or other ligneous material, P 2811⁴.
 wood tar as, 2027¹.
 wood waste as, 950⁴, 951⁴, 4048⁴.
 wood waste burning, app. for, 1749⁹.
Fugitometer, 2299⁹.
Fulgurator, as atomizer of salt solns. for flame spectra, 2327⁷.

- Fulgurites**, from Miocene glass sands of Guterborn, 1370⁸.
- Fuller's earth** (*Floridin*). (See also *Florida earth*; *Japanese acid clay*.)
 absorption capacity of, 3823⁸.
 as adsorbent in oil refining, 3565⁸.
 adsorption of active factors of vitamin B complex by, effect of H-ion concn. on, 1163².
 adsorption of quinine, oxalate and glucose by, 616⁸.
 bleaching powder of, detn. of, 3055².
 drying, 1725⁸.
 effect on crop muscles, 3981⁸.
 fat recovery from, 5339⁸.
 filtration of hydrocarbon oils through, app. for, P 3805².
 industry, 5278⁸.
 neutralizing machine for, P 2850¹.
 paraffin wax absorbed by, recovery of, 4561⁸.
 polymerization of turpentine oil and α -pinene by, heat of, 4866⁸.
 regeneration of, 2790¹.
 resources of U. S. in 1927, 671².
 restoration of, 4055⁷.
 revivifying, after use in refining hydrocarbon oils, P 2820¹.
 revivifying app., P 1729⁸.
 structure and analysis of, 3778⁸.
 treatment of, P 3783⁸.
 wetting by water, heat of, 4866⁸.
- Fulminic acid**, mercury salt—see *Mercury fulminate*.
- Fulvene**, dimethyl-, compds with metal chlorides, 4465⁸.
- Fumarase**, action of, effect of phosphate and other factors on, 616¹.
- Fumaric acid**, absorption of halogens by, 4837⁸.
 acetic acid transformation into, by *Mucor stolonifer*, 3488⁸.
 adsorption by charcoal, 5080⁸.
 adsorption by viscose, 3571⁸.
 l-aspartic acid synthesis from, by means of yeast, 2531².
 biochem. synthesis of, from pyruvic acid, 3937².
 crystal structure of, 2083⁷.
 dimethyl ester, photochem. reaction with Br, 1059².
 enzymes in *B. coli communis* acting on, 4900¹.
 l-malic acid formation from, by *Aspergillus niger*, 5269⁸.
 l-malonic acid formation from, by enzymes, 1918².
 polymeric ethylene ester, 4438⁷.
 salt with 5-anilino-1-phenylimino- Δ^2 4 2-pentadienol, 2438⁷.
 in sugar cultures of *Rhizopus nigricans*, 3004¹.
- Fumaric acid, dimethyl-**, hydrogenation of, effect of reaction velocity on course of, 385².
 —, methyl-. See *Mesaconic acid*.
- Fumaroles**, exhalations of Pozzuoli solfataras, steam content of, 1845⁸.
 steam from, utilization of, 918⁸.
- Fumes**. (See also *Clouds*; *Flue gases*; *Fog*; *Respirators*; and "elec." under *Precipitation*.)
 from drying oils, 5335⁸.
 dust recovery in lead oxide plant, 1600⁸.
 locomotive, corrosion of metals and re-enforced concrete by, and its prevention, 4041⁸.
 metal recovery from, P 3203¹.
 from rayon works, 4064⁸.
 sulfur dioxide recovery from, 3282⁸.
 sulfuric acid formation in metallurgical, 2131².
 withdrawal from intermittent carbonizing app., app. for, P 4803¹.
- Fumigants**. (See also *Disinfectants*.) P 1483⁸, P 2530⁸.
 insecticidal efficiency of, increasing with CO₂, 4523¹.
 with lachrymator warning substance, P 3298⁸.
 for plants, P 4295².
 vapor pressure of, 1326⁸, 2238¹.
- Fumigation**. (See also *Disinfection*.)
 app. for, P 1317².
 candles for, P 2794⁸.
 of cereals, legumes, etc., with CS₂, 1983⁸.
 citrus, with liquid HCN, 4010⁸.
 of cotton *Pectinophora gossypiella* with CS₂, 1984¹.
 with cyanogen products, 227².
 of foods, 3753⁸.
 house-fly, with Ca(CN)₂, 5529⁸.
 with hydrocyanic acid, cartridge for, P 2002⁸.
 hydrocyanic acid gas detn. in expts. in, 3534⁷.
 with hydrogen cyanide, effect on fruits and vegetables, 4978⁸.
 max. wts. of various fumigants which can exist in vapor form in a 1000 cubic ft. chamber, 3534⁸.
 of *Plodia interpunctella* larvae with CS₂ in relation to revival potentialities, 467².
 soil, with CS₂, 1207⁸.
 of trees, P 3770⁸.
 of walnut nursery stock with HCN, 3294⁸.
 of wheat, effect on germination, 2237².
- Fungi** (See also *Aspergillus*; *Mildew*; *Molds* (II); *Microorganisms*; *Mushrooms*; *Oidium*; *Phoma*; *Rhizopus nigricans*.)
 acid production by mycelia of, P 3300⁸.
 of apples, 2463².
 assimilation of N of air by, 2464⁸.
 of blastomycetes type, culture medium for, 4211³.
 characterization and propagation of, significance of acid substrates for, 2741².
 coremia formation by, 3728⁸.
 cultivating edible, P 1462⁸.
 dyes from, 1127⁸.
 ergosterol extn. from, P 2780⁸.
 higher, 3005².
 hyphae, compn. of, 1435¹.
 immunizing wood, grain, etc., against, P 4793⁸.
 interaction with S, 5267¹.
 in milk, 5513².
 nephelometer in mycology, 861⁸.
 nitrogenous compds. in, and their decomposition in soil, 5489⁸.
 rotting of textiles by, 4824⁸.
 soil, 2459⁸.
 in soils in Victoria, 230¹.
 stimulation by chemicals of, with semipermeable membranes, 5485⁷.
 tannin effect on cultures of, 632⁸.
 of thrush, 1926⁸.
 tissue of, microscopic examn. of, 5211³.

- titanium in, 5217³.
 ultra-violet radiation effect on, 632⁹.
 utilization of palmitic and of stearic acids by higher, 1431⁴.
 wood-destroying, living conditions of, 1434¹.
 oxalides in, and their detection, 412⁹.
Polyporus hispidus, 3251⁹.
- Fungicides.** (See also *Bordeaux mixture*; *Insecticides*; *Sprays*.) 5537¹, (*Patents*) 065⁴, 1208⁷, 1462⁷, 1734⁷, 4011⁴, 4295¹, 4322⁷, 4368⁹, 4526⁷, 5001⁴.
 amino alcs as, P 2722⁷.
 analyses of, 466⁶.
 for apple scab from *Venturia inaequalis*, 4525⁴.
 book: Manuel-guide des traitements, des arbres fruitiers, 3049¹.
 calcium arsenate and Ca thioarsenate as, 5538⁹.
 for cercospora of sugar beets, 5055³.
 colloidal, P 1462⁹.
 combined insecticide and, in dry form, P 1208⁹.
 compn. of, 4010³.
 copper, P 1714¹.
 copper detn. in, 3534⁴.
 copper detn. in, in presence of Fe, As and Hg, 927¹.
 copper thiocyanate, 3048³.
 dust, measuring relative adhesive qualities of, 2528⁷.
 for eggplant blight and fruit rot, 4525⁴.
 for grapes, 469⁹.
 hexyl- and phenylethylresorcinol as, 1931⁷.
 for hops, soap and saponin as, 5267⁴.
 mercurochrome as, in growth of amphibian embryos, 2218⁶.
 mercury compds., P 5276².
 oils and stearoptens as, 1989⁹.
 regulations for, 3534².
 for seed grain, P 928¹.
 for seed or grain, P 470².
 for seeds, P 234⁴, P 1985².
 for seeds, plants, wood, etc., P 928¹.
 for smut of *Andropogon sorghum*, 3048¹.
 for smut of hull less barley, 4765⁹.
 for smut of oats, CH₃CO dust as, 1983⁹.
 for smut (stinking) of wheat, 233⁹.
 from spent lye from cellulose, P 670⁹.
 for *Sphaeropsis malorum* and *Macrophoma*, 3534⁹.
 stability of liquid, test for, 4163⁷.
 sulfur as, 1712⁹, 3296¹, 5267¹.
 sulfur emulsion, P 2239¹.
 for tomato mildew, 469⁴.
 toxicity of, 2528⁹.
 weatherproof paints contg., P 4089¹.
 xanthates as, P 3715⁹.
- Funnels.** P 1785⁷.
 with automatic closing device in neck, P 3603⁹.
 cathode, for Hg-vapor rectifier, P 3603⁹.
 for filling or filtering liquids into bottles, P 1017⁴.
 flat-bottomed filtering cup and, P 1782⁴.
 flow of fertilizers and other comminuted solids through, 3759⁹.
 measuring, P 1017⁴.
 with a measuring and recording discharge device, P 552⁴.
 sheet metal, with a hollow seam serving as vent tube, P 5068⁴.
- Fural.** See *2-Furaldehyde*.
- 2-Furaldehyde** (*fural*; *furfural*; *furole*; *furole*, 2 *furaldehyde*), autoxidation of, effect of As₂O₃ on, 1561⁴.
 condensation products of proteins and, P 3060⁹.
 condensation products with urea, P 1729⁴, P 4308².
 crit. soln. temp. of, in H₂O, 3539⁹.
 detn. of, 2908⁶.
 (dibromophenyl)hydrazones, 1400⁶.
 in fermentation products, 2781¹.
 heat of combustion and heat of formation of, 2968².
 in honey after heating, 4750⁷.
 inflammability of mixts. with air, 4344³.
 mixt. with PhNH₂ and CH₃(COOH)₂, reactions in, 2438¹.
 non-reinuous reaction product of, P 3783².
 oxidation of, effect of Sb, Bi and their derivs. of V on, 1803⁹.
 oxime, ionization const. of, 3681⁷.
 reaction with cystine and cysteine reagents, 3941².
 reaction with H₂S (liquid), 2092¹.
 from straw, cornsobs and cornstalks, 1969¹.
 from straw, etc., P 3098².
- 2-Furaldehyde, hydroxymethyl-, acetate,** 2175¹.
 detn. in honey, 1965⁴, 3030⁹.
- Furan** (*furfuran*), $\begin{array}{c} \text{O} \\ | \\ \text{---} \text{C} \text{---} \text{CH} \text{---} \text{CH} \text{---} \text{CH} \text{---} \text{CH} \text{---} \\ | \quad | \quad | \quad | \\ 1 \quad 2 \quad 3 \quad 4 \quad 5 \end{array}$
 derivs., from sugars, 2175¹.
 derivs., thermochemistry of, 2967⁹.
 detn. and prepn. of, 3207¹.
 heat of combustion and of heat formation of, 2968².
 mono- and dibasic acids of, review, 3926⁴.
 oxidation of, and its derivs., P 2724⁹.
 ring, rupture of, 387⁶.
 ring, velocity of formation of, from 1,4-diketones, 4448⁹.
- Furan, 2,5 - bis(*p* - bromophenyl) - 3 - methoxy-,** 5471⁷.

 doors of, machine for molding, P 4853⁸.
 doors of, operation of, P 4108⁸, P 4379⁸.
 double closure for, P 1021¹.
 draft regulators for, P 740⁸, P 1783⁸, P 4108⁸.
 for dry air production, P 4852⁸.
 efficiency detn. in boiler, P 5563¹.
 -efficiency indicators, P 2858¹.
 enameling, P 685², P 4853⁸.
 enameling, fire chamber for, P 4853⁸.
 for enamel material melting, P 3786¹.
 feeding app. for air and powd. coal or other fuel to, P 504⁴.
 feeding app. for powd. coal and compressed air to, P 1020⁸.
 filling chamber, for production of gas and coke, P 3797⁷.
 with fire-chamber bottom shaped like a trough, P 3604⁷.
 fire chamber for, P 5067⁷.
 flue gas pressure regulation in, P 552⁸.
 forge, with metal recuperators heated by blast-furnace gas, 2135¹.
 for foundries and waste metal utilization, 3880⁸.
 fuel charging app. for damp, pasty or plastic fuels, P 1783⁸.
 fuel consumption of large, 2548⁸.
 fuel feeding to, P 3833¹.
 app. for regulating, P 1251⁴, P 3131¹, P 4601¹.
 elec. control for, P 740⁸.
 galvanizing, P 3654⁸.
 gas, P 314⁸, P 1252⁴, P 2857⁸, P 3380¹, P 3604⁸, 4598¹, P 4600⁸, P 4853¹ ², P 5067⁸.
 for gas, coal-dust, etc., P 2856⁸.
 gases in, sampling of, P 1252².
 gas, for annealing or melting metals, P 4182².
 gas-mixing app. for, P 4853¹.
 for heating metal billets, P 4182².
 for heating metal plates, P 4182².
 for melting metals, 3345¹.
 regulator for air and gas in, P 2077⁴, P 3605¹.
 safety devices for, P 552⁸, P 3604⁸.
 gas-producing, P 5034¹.
 gas utilization in, device for better, P 740⁸.
 for generator gas, P 2857¹.
 glass—see Glass.
 for glass-melting tank heating, P 4035⁸.

- graphite as protective coating for interiors of, 3829³.
- for hardening, annealing, etc., of small metal articles, P 1101⁹.
- for hardening shafts, P 1101⁹.
- hearth, heated with powd. coal, P 2610⁴.
- heater for, P 3893².
- for melting blast-furnace dust, etc., P 2610⁴.
- hearth-rocking app. for, P 7¹.
- heat conservation in, P 4108⁹.
- for heating and "normalizing" thin sheets of metal, P 1863¹.
- for heating billets, etc., P 3380¹.

- nozzle, P 1316².
- with observing window, P 2856⁹.
- oil, P 3380⁴, P 4853³.
- with electrically operated burner, P 2857⁵.
- linings for small, 3329⁴.
- refractories in, 4515⁹.
- oil drawing, for treating steel gears, etc., P 3805².
- open flame stationary hearth-type, for melting Al and its alloys, 2141⁴.
- open hearth (Siemens-Martin), P 86², P 1381⁹, P 1783⁹, P 3654⁴.
- with air cooled cupola and support, P 1101⁹.
- bottoms of magnesite or dolomite for, 2400⁴.
- with control, 4173⁴.
- coordination with blast furnace and coke oven, 4912⁹.
- Cottrell-Möller plant for pptn. of blast dust from waste gas of, 1848⁹.
- economic size of, 2399⁹.
- effect of proportions of ore and slag on yield of, 3644³.
- firing with mixed gas alone and in admixt. with carburizing agents, 1373⁴.
- heat economy in, 5137³.
- heater, etc., for utilizing liquid and gaseous fuels together in, P 3893³.
- heating chamber of, as black body for optical measurement of temp., 1473⁴.
- heating with mixed blast-furnace and coke oven gas, 5562³.
- improved, 359⁴.
- inversion in SiO₂ bricks in crowns of, 2003⁹.
- large, 3648⁴.
- measurement and calcn. of pressure losses in, 1700⁴.
- for melting Al and its alloys, 3425⁴.
- in metallurgy, 2181¹.

- opening up tap holes of, P 5358⁹.
 operation of, 2399⁹.
 operation with coke-oven gas, 2134⁹.
 operation with mixed gas, 1084⁷, 3645⁴.
 permeability to gases of SiO₂ bricks, mortar joints and masonry in, 2004².
 practice, 1373⁹.
 refractories for, 3195².
 regenerative, P 590⁹, P 4665².
 regenerative, brick checker work for, P 1316².
 in Russia, 4428⁹.
 spectra-pyrometric measurements on hearth of, 1373⁹.
 for steel from pig iron of S. Africa, 1603¹.
 system of fuel and air supply, etc., for, P 87⁴.
 temp. in, and its measurement, 4912⁹.
 x ray study of zonal structure of SiO₂ brick from roof of, 4789².
 operated optionally by oil, gas or fuel dust, P 4853⁴.
 for ore treatment with heated gases, P 810⁸.
 oxy acetylene, 4106⁹.
 oxygen supplying to, app. for, P 3131⁹.
 peat, P 1252¹, P 1853¹.
 for petroleum pyrogenous decompos., P 3570⁹.
 for phosphoric acid manuf., etc., P 678¹, P 3061⁹.
 pit, for heating ingots, P 1101².
 for porcelain baking, P 495⁴.
 pot, for melting metals, P 2690⁹.
 powd.-coal-fired, 498⁹, P 552⁴, P 1315⁹, 1374⁴, P 4379⁹, 5028⁹.
 with gas-fired boilers, 3792².
 removal of ash as molten slag from, 4323⁹.
 temp. gradient and heat storage in brick work of, 3326⁴.
 powd.-fuel fired, P 367², P 1316², P 2856⁹, P 2857^{2,4}, 3829⁹, P 4609⁹.
 combustion chamber for, 5025⁹.
 walls contg. cooling pipes in, P 1783⁹.
 with powd.-fuel supplementary supply, P 3131⁴.
 for powd. or liquid fuel, P 710¹.
 producer gas as fuel for open hearth and heating, 950².
 protecting masonry of, P 1251⁴.
 pyrometers in shaft, fixing of, P 1018⁹.
 rabble arm for, P 7².
 radiation, P 2857².
 for reactions, 1781⁴, P 3761⁹.
 for recovery in sulfate and soda paper mulls, 5580².
 reduction, 2115⁷, P 2320⁶, P 3074⁴.
 reflex, 3829².
 refractories for boiler, 4545⁴.
 refractories for, burning anthracite on traveling grate stokers, 5020⁴.
 refractory coating for, P 1237⁴.
 refractory costs, reducing of, 4035⁴.
 regenerative, P 314⁴, P 552^{2,9}, P 591¹, P 3380¹, P 4379⁹, P 4852¹.
 air and gas supply for, P 3893¹.
 for annealing or similar heat treatments of wire in bundles, etc., P 2145².
 app. for keeping down the pressure in gas tubes in, P 4852⁹.
 app. for reversing and controlling, P 4380¹.
 for baking Dinas bricks, P 940².
 burners and reversing valves for, P 3202².
 for open hearths or soaking pits, P 4379⁹.
 reversible, for melting steel, etc., P 2690².
 reversing device for, P 2078¹, P 3651⁴.
 regenerative gas, P 314⁴, P 2856⁴.
 regenerative inversion, P 3833².
 regenerative reheating, for steel industry, 3425¹.
 regenerative reverberatory tilting, for foundry use, 70⁹.
 regenerative welding, P 2145².
 regenerator unit for oil-burning, 47¹.
 retort, setting for, P 3833².
 reverberatory, for heating steel bars, P 2925⁴.
 reverberatory, for smelting Al alloys, 5137⁴.
 reverberatory smelting, P 4665¹.
 reversing, P 87⁴.
 revolving tube, P 2857¹.
 revolving tube, movable nozzles in, P 4108⁹.
 for roasting and sintering, P 2857².
 for roasting ores, P 367⁴, P 1892², P 3654⁹, P 4181⁹, P 4431⁹.
 for roasting ores, etc., P 590⁹.
 for roasting S ores, etc., P 5282⁹.
 roasting, with alternate rotary and fixed hearths, P 367⁴.
 for roasting Zn blende, P 589⁹.
 for roasting Zn blende and other S ores, P 3433².
 roof for, P 2078¹, P 2329², P 2856⁴, P 3604¹, P 4601².
 roof for Siemens-Martin and fusion, P 3654⁴.
 roofs of, maintenance of, P 1783².
 roofs of, refractory bricks for, P 1188¹.
 rotary, P 314⁴, P 739⁹, P 2856⁴, P 4603⁷, P 4852².
 and accessory plant, P 740¹.
 for burning cement, etc., P 257⁹.
 for calcining lithopone, P 2050¹.
 continuous, P 740¹.
 cooling drum for, P 4042⁴.
 flue section for, P 4601².
 for heat treatments, P 5151².
 loading device for, P 4853⁹.
 for roasting S ores, etc., P 2144⁹.
 for smelting Pb or Zn ore, P 2413⁹.
 for steel, P 2925⁹.
 with tiltable trays, P 740¹.
 rotary drum, P 552⁹, P 4922².
 rotary grate, P 311⁴.
 rotary plate, P 4852².
 rotary reducing, for iron and steel manuf., P 4182².
 rotating annular-hearth, for distn. or drying, P 4108².
 salt-bath, for hardening steel, P 3202².
 Schurmann, 4428⁹.
 with a series of fixed and a series of movable rods, P 2856⁹.
 for sewage sludge, etc., burning, P 4004⁹.
 shaft, P 314⁴, P 367⁴, P 740², P 811^{2,4}, P 1382¹, P 3131⁴, P 3893¹, P 4600⁴.
 for burning lime, P 4031⁴.
 for burning lime and dolomite, P 5019¹.
 for calcining powd. limestone, etc., P 4043¹.
 charging app. for, P 740², P 4601¹.
 delivering devices for, P 1534¹, P 3605³, P 4853⁹.
 with flat fire chamber, P 2857¹.
 lining for, P 811⁴.
 operation of, P 655⁹.
 oven heated by gases from, P 1021⁴.
 preheating charge in, P 811⁴.

- for reducing ores of Zn or other metals, P 1862².
- spraying water into, and app. therefor, P 811¹.
- for treating solids with gases, P 5067⁴.

 door operation, P 4108⁹.
 elec. equipment for, for melting and refining
 of ferrous metals, 5421⁴.
 elec. equipment of arc, 5113².
 electrode-adjusting device for, P 2893¹.
 electrode arrangement, P 5120⁸.
 with electrode crane, P 47⁸.
 electrode flame protectors for, P 1828⁷.
 electrode holder and mantle for electrodes
 which are baked while in use, P 346⁹.
 electrode insulation in, P 1066⁹.
 electrode mounting and packing for, P 3636⁸.
 electrode mountings for, P 1066⁸, P 1677⁸,
 P 1828⁷, P 3174⁸, P 4151¹, P 5121².
 electrode raising in, app., P 3636⁹.
 electrode replenishing, P 3636⁹.
 electrode seal for smelting and refining, P
 1066⁹.
 electrodes for - see *Electrodes*.
 with electro-hydraulic regulation of electrodes,
 1574⁸.
 in enameling, 2796⁹.
 for enameling, etc., P 3322².
 for factory use, 2661⁷.
 for ferromanganese manuf., 5459².
 ferrosilicon manuf. in, 3168⁹.
 for firing ceramic ware, 1574⁸.
 for firing glass, 4892⁴.
 for firing majolica and glazed ornaments,
 4035¹.
 firing stained glass with, 251⁸.
 for founding, crucible mounting for, P 4899⁹.
 in foundry, 3630⁹.
 for gas reactions, P 2377⁹.
 for gas treatment, 2661⁷.
 in Germany, Austria, Hungary and Czecho-
 slovakia, 4409⁴.
 for glass annealing, 251⁸.
 for glass making, P 2262⁷, P 3065¹, P 3785⁴,
 P 4035¹.
 for hardening metals, P 2892⁷.
 for hardening steel articles, P 2892⁷.
 heat distribution in, 1060⁴.
 heating and tempering, 1575¹.
 for heating drills, forgings, etc., P 779⁹.
 for heating ends of rock drills, P 4414⁷.
 for heating high-speed steels, P 4627⁷.
 for heating liquid steel and other metals,
 P 569⁹.
 for heating metal articles in non-oxidizing
 atm., P 5121¹.
 heat-treating, 42¹, P 569⁷, P 1066⁸,
 2369⁹, P 2668⁹, P 3863¹, P 4414⁸, P 4627⁸.
 in heat-treating automobile parts, 3884⁸.
 for heat-treating metal or ceramic ware, etc.,
 P 3413⁸.
 for heat-treating metal rivets, bars, etc., P
 779⁹.
 for heat-treating small articles, etc., P
 5424⁴.
 in heat-treating steel, 3168¹, 3857⁹, P 4414⁷.
 for heat-treating transmission parts, 2888⁹.
 for heat-treating wire, P 1102¹.
 for heat treatment and remelting of cast Fe,
 2682¹.
 for heat treatments in a non-oxidizing gas,
 P 2668¹.
 heat treatment with, 2888⁹.
 Héroult, energy losses of a 15-ton, 2106¹.
 energy losses of a 7-ton, 2106¹.
 lining, 1354².

high-frequency, P 347¹, P 2110⁷, 3409³, 5421³.
 coils for induction, 4147¹, P 4627⁴.
 for heat treatment of metal disks, etc., P 347³.
 melting steel in, 2661¹, 2662³.
 review on, 3857⁶.
 variable-frequency induction, with rotary spark gap, 1060⁹.
 high-frequency, induction, crucible, P 4151⁷.
 high-frequency, induction, valve-maintained, 1060⁹.
 high-frequency vacuum, for lab. use, 1571⁴.
 for high temps., 4603⁹.
 high-tension arc, P 5121².
 induction, (*Patents*) 569⁸, 779², 1069³, 1357², 1862⁹, 2377², 3636³, 3863¹, 4151⁴, 4627⁴, 4899⁴, 5120⁹.
 cooling means for, P 1063¹, P 2378³.
 for fusing or annealing, P 2077⁴.
 for melting and reheating, etc., P 2378³.
 melting chamber for, P 4627⁴.
 for melting Cu, etc., P 3636³.
 for melting light metals, P 4899⁴.
 for melting metals, P 87¹, P 2377².
 industries in Italy, 5113⁹.
 iron and steel production in, 4109⁶.
 for iron refining, P 2892⁶.
 for iron, steel or steel alloy production, P 1577².
 for light metals, P 347².
 load test, for refractory materials, 2796³.
 for magnetizable metal, P 4414⁴.
 manuf. of C₂H₂, etc., in, P 1828³.
 manuf. of, plant at Chateau Feuillet for, 3168⁹.
 for melting metals, P 779², P 3636³, P 4151⁷.
 in melting of soft metals, 5421³.
 in metal industries, 2061³.
 with metallic heating wires or bands directly in atm. of heated chamber, P 347².
 metallurgical, P 1066³, P 2377², P 2892⁶.
 metallurgical, for reducing ores in a single fusion, P 3636³.
 metallurgical, of high- vs. low-frequency, 1084⁹.
 metallurgy in iron free high frequency induction, 1354³.
 for metals and alloys, P 2377².
 for metal treatment, P 3636³.
 in mine foundries, 1059⁹.
 muffle, for heat treating steel or other metal articles, P 4899⁴.
 open, P 47⁴.
 phosphoric acid manuf. in, P 780⁹.
 for phosphorus manuf., P 5121².
 pot or crucible, P 2663².
 for producing glass, water glass, cement or phosphates, P 4414⁴.
 recovering reaction gases from, P 780⁹.
 regulating, P 348¹, P 2667².
 regulation of, app. for thermostatic and time-interval, P 3361⁴.
 regulators for, P 570¹, P 2110⁷.
 regulator (ultra-rapid) for, 3168⁹.
 resistors for, P 47⁴, 1575¹, P 3863¹.
 review on, for heating and tempering, 44¹.
 reviews on, 341⁴, 774⁴, 1353⁹, 2369⁴, 2888², 3857⁶.
 rotary, for producing wrought Fe, P 1066³.
 with rotatable charge supporting platform, P 3863¹.
 rotating, for ores, etc., P 3636³.

salt-bath, P 346⁹.
 with sep. longitudinal chambers, P 2377².
 for silica fusion, P 2378².
 for silica glass article manuf., P 1487¹, P 4038².
 small-capacity, 3168⁹.
 spark-gap generator for high-frequency, 41⁹.
 steel finishing in, P 47⁴.
 for steel melting and refining, P 3863¹.
 for steel normalizing and annealing, 41⁹.
 for steel works, 3857⁶.
 tapping electrode, etc., for, P 4151⁷.
 for tempering metals, etc., P 2892⁶.
 thermoregulator for, P 1828³, 3857⁶.
 tilting, P 569⁸, P 5461⁷.
 for tungsten carbide manuf., P 3863¹.
 tunnel, P 1577².
 vacuum, P 5121².
 vacuum, with C-resistor tubes and its operation, 3857⁶.
 zinc vapor condenser, P 3636³.

Furniture polish. See *Polishing materials*.

Furo[*b*]diazole. See *1,3,4-Oxadiazole*.

Furoic acid. See *Pyromelic acid*.

Furoin (1,2-di-2-furyl-2-hydroxyethanone), detection of, 4944².
 oxidation of, 4944².

α -Furole. See *2-Furaldehyde*.

Furo[*a*]monazole. See *Isaxazole*.

Furo[*b*]monazole. See *Oxazole*.

Fuopyridine,

Furo[3,4-*b*]pyridine-1,3-dione. See *Cinchonine anhydride*.

Furo[3,4-*b*]pyridin-1,3-one, 3,3-diethyl-*t*, 2976⁹.

Furo[3,4-*b*]pyridin-3-one, 1,1-bis-hydroxyphenyl-*t*, as a dye, 5320⁹.
 —, 1,1-diethyl-*t*, 2976⁹.

Furoxan (2,3-epoxy-2,3-dihydrofuran).

—, 4-*p*-anisyl-3-methyl-, mol. wt. determ. of, 1788⁴.

—, 4-(bromo-*p*-anisyl)-3-methyl-, mol. wt. determ. of, 1788⁴.

—, 4-(*p*-bromophenyl)-3-methyl-, mol. wt. determ. of, 1788⁴.

—, 3-methyl-4-(nitro-*p*-anisyl)-, mol. wt. determ. of, 1788⁴.

—, 3-methyl-4-phenyl-, mol. wt. determ. of, 1788⁴.

—, 3-(and 4)-phenyl-, constitution of so called, 4447¹.

—, phenyl-*o*(*m* and *p*)-tolyl-, 2709¹, 4447¹.

—, 3-(and 4)-*p*-tolyl-, 4447¹.

Furs, bleaching, P 1290⁴, P 3419⁴.

book, 3283⁷.

dye for, 3317⁴.

dyeing, P 1759⁴, P 2306⁷, P 3584³, P 4090³.

— with spots or mottled designs, P 4083³.

— with ursoles, 281⁴.

dyeing soft hats of wool and, 987⁴.

emulsions in prepn. of, 1770¹.

mothproofing, P 3112⁷, P 4581⁷, P 5049⁹.

protecting from insects, P 2306⁷, P 3112⁷.

protection against action of alk. or acid agents, P 1759⁴.

scouring, P 5332⁴.

Fur substitutes, from textiles, P 905⁹.

Furyl alcohol. See *2-Furancarbinol*.

- Fusain**, 5029³.
 of banded coals of Ruhr dist., 3791^{4,5}.
 as cleaning product of fine coal, 5029⁴.
 detn. in bituminous coal, 4325⁴.
 formation of, P and, 2677².
 origin of, 1244⁴.
- Fusanols**, in sandalwood oil of western Australia, 474⁹.
- Fusarium**, *balates*, control for, 3769⁹.
 hyphae of, compn. of, 1435¹.
 reduction by, 636².
vasinfectum, 412⁹.
 wilt of, soil reaction and, 1435².
- Fusel oil**, compn. of, sepd. as vapor, 4527⁹.
 detection in abs. alc. and spirit, 2532².
 detn. in alc. solns., 1209².
 detn. in brandy, 1986².
 furfuroles in, 2781².
 higher-boiling constituents of, 3537¹.
 manuf. of, P 4768¹.
 palmitic acid in, 1715⁴.
 sepn. of, from 1st distillate, 2781².
 soly. and emulsifying property of mixts. contg., 3388⁹.
- Fuses**. (See also *Electric fuses*)
 blasting, P 1752², P 2297^{4,5,6}, P 4822².
 detonating, of pentaerythritol tetramitate nitroglycerin, 516⁹.
 electrically fired, heads for explosive, P 2827².
 for exploding bombs to be dropped into water, P 2036⁴.
 projectile, of bakelite or similar moldable compn., P 3102¹.
- Fusibility**, of elements, electronic nos. and, 1320⁹.
- Fusion**. (See also *Heat of fusion*, *Melting*)
 alkali, oxidation in, 827³, 3678⁹, 4462⁹.
 curves represented in a special system of coordinates, 3149⁴.
 -pressure curve, 2640⁹.
- Gadolinite**, yttrium sepn. from, 1072⁹.
- Gadolinium**, spectrum (Rontgen) of, 32².
- Gadolinium boride**, prepn. of, 4893³.
- Gadolinium chloride**, hydrate of GdCl₃, spectrum of, 3159⁹.

 enrichment of, P 4049^o.
 generator, controls for, P 2558^o.
 generator, feeding device for, P 4331^o.
 generator fuel, P 2811^o.
 generator fuel, soft coal as, 4550^o.
 generators, app. for automatic periodic reversal of valves of, P 1252^o.
 generators, coke for, 263^o.
 generators for, 3073^o, 4799^o; (*Patents*) 505^o, 6911^o, 6931^o, 1252^o, 1497^o, 1741^o, 2022^o, 2278^o, 2812^o, 5034^o, 5307^o.
 generators, steam production for, P 2023^o.
 heating and hydrogenation with, P 2022^o.
 hydrocarbon synthesis from, 814^o, 1245^o, 2810^o, 4553^o.
 hydrogenation of, P 2555^o.
 indene and styrene from condensates from carbureted, 1129^o.
 manuf. in quenching coke, P 3333^o.
 manuf. of, 1246^o, 2810^o; (*Patents*) 689^o, 692^o, 693^o, 1221^o, 1481^o, 1497^o, 2812^o, 3074^o, 3333^o, 5308^o.
 metallized coke as fuel for manuf. of, P 5306^o.
 from natural gas, P 3564^o.
 oil industry and, 950^o.
 from oil shale, P 3797^o.
 operation of small works, 4047^o.
 Orsat app. for analysis of, 1781^o.
 plant, app. for automatic control of, P 5034^o.
 plant at Vancouver, 4047^o.
 plant for producing and carbureting, P 1252^o.
 plants, control system for valves of, P 260^o.
 plants for, P 1497^o, P 2278^o, P 2558^o, P 3564^o, P 4049^o, P 4331^o, P 4805^o.
 from powd. coal, 3560^o.
 from powd. fuel, P 5034^o.
 from powd. fuel, app. for generating, P 3333^o.
 for production of synthetic motor fuel, 267^o.
 regenerative app. for production of, P 2278^o.
 in U. S., 5561^o.
 welding with, 2921^o.
 withdrawing from interior of blast furnaces, app. for, P 5464^o.
 from wood for treatment of Ag ores, 4799^o.
 from wood, producers for, P 1252^o.
 from wood, shavings or sawdust, producer for, P 692^o.
 from wood waste, review on, 3789^o.
 yield, tests for, 2269^o.
Gas, natural. (See also *Burners*)
 analyses of, in plant operation, 1744^o.
 analysis of, review on, 965^o.
 analytical sepn. of, 4562^o.
 analyzer for, 2286^o.
 benzene from, 1737^o.
 book: Elements of Geophysics as Applied to Explorations for, 798^o.
 in Canada, 267^o.
 changing from manuf. gas to, 4555^o.
 combining with hydrocarbon oil for gasoline production, app. for, P 1502^o.
 comm. rept. on, 4326^o.
 compression of casinghead, 5311^o.
 cracking, into H and C black, 3793^o, 4555^o.
 gasoline—see *Gasoline*.
 gasoline absorber, detn. of efficiency of, 5664^o.
 gasoline absorption by, 1255^o.
 gasoline—, analyses before and after treatment, 5561^o.
 gasoline content of, as detd. by charcoal test and by analysis, 2285^o.
 gasoline detn. in, 4562^o.
 gasoline recovery from, P 5568^o.
 German, 2273^o.
 heat losses in flue gases in firing boilers with, calen. of, 4798^o.
 heat value of, on basis of analytical results, 2552^o.
 helium recovery from, P 677^o.
 helium-rich, origin of, 5449^o.
 of Hungary (Karcag), 956^o.
 hydrocarbons and alc. from, P 3333^o.
 hydrocarbons (recoverable) from, and their relation to compn. of motor fuel, 3793^o.
 hydrogen sulfide removal from, 3793^o.
 ignition of mixts. with air by induction-coil sparks, 1271^o.
 of India, 5443^o.
 industry, 5309^o.
 loss in withdrawal of tools from wells, prevention of, P 4567^o.
 methane sepn. from, by liquefaction, P 910^o.
 neon and He detn. in, 5562^o.
 nitrogen in, 4798^o.
 noble gas content of, 581^o.
 oxidation of, P 5308^o.

- oxidation of, by air catalyzed by nitrogen oxides, 41867.
 Polish, 2273¹, 4555¹.
 purification of, P 654¹.
 recovery of gasoline, etc., from, P 4339¹.
 removal from wells, app. for, P 3796⁹.
 research on, problems in, 3793².
 resources of U. S. in 1927, 2016⁹.
 review on, 4555¹.
 sampling and coring of, 159³.
 sepg. constituents of, by liquefaction, app. for, P 5067⁹.
 sepg. oil, sand, water and, app. for, P 737¹.
 sepn. from liquid at oil wells, trap for, P 969⁶.
 from oil, P 4815⁸.
 from oil and water, app. for, P 2075⁸.
 from oil, app. for, P 3832², P 5065⁷.
 from oil at wells, trap and pipe system for, P 510¹.
 solvents from, 454⁸.
 as source of H and N for NH₃ synthesis, 477⁹.
 storage of, 4326².
 thermal decompn. of, app. for, P 1331⁴.
 thermal treatment of, 5302⁶.
 transmission lines, leakage from, 689².
 treating by Koppers soda ash process, 956¹.
 water gas manuf. from, P 3564³.
- Gas black.** See "black" under Carbon.
- Gases.** (See also *Cyclotron*; *Condition equation*; *Fumes*; *Kinetic theory*; *Orsat apparatus*; *Respirators*; *Smoke*.)
 absorbed, thermal and magnetic investigations on, 1550¹.
 absorbents for—see *Absorbent*.
 absorbing noxious substances from combustion, P 3806⁸.
 absorption—see also *Absorption apparatus*.
 absorption of, P 4514⁸.
 by liquids, P 2513⁷.
 by liquids, prevention of, P 3997¹.
 by metals and alloy, 2101¹.
 absorption of Hertzian waves in ionized, 4403⁶.
 acetylene removal from, P 3997¹, P 4514⁸.
 activating with elec. waves, app. for, P 3635⁹.
 activation of, P 249³.
 adsorbed mols., dipolar nature of, 1330⁹.
 adsorbed, recovery of, P 1970².
 adsorbents for—see *Adsorbent*.
 adsorption of—see *Adsorption*.
 analysis of, 4905⁸.
 acetone as control substance for app. for, 3941⁸.
 app. for, P 551⁸, 734¹, P 739³, 1015⁸, P 1022², P 1317², P 2076¹, P 2330⁶, 3128⁸, 3182², P 3831⁸, P 3832², P 4107¹, 4718⁸, 5206¹, 5356⁸.
 app. for use of, absorbents in, 311⁸.
 and app. therefor, 5206¹.
 correction for aq. tension in, 790³.
 device for adjusting leveling bulb on app. for, 5356¹.
 electromagnetic balance for, 3385¹.
 by fractional distn. of liquefied gas, app. for, 3128⁸.
 by high-dispersion infra-red spectroscopy, 1614².
 leveling bottle for app. for, P 4601⁸.
 pipet for, 3831¹.
 analysis of CO₂-contg., app. for automatic recording of, P 3006².
 analysis of combustion, P 1498².
 app. for abstracting an aliquot part of a stream of, P 1022².
 app. for storing and circulating, 1530².
 behavior in thin foams, 11¹.
 blast furnace—see *Gas, illuminating and fuel*.
 blood—see *Blood*.
 books: 758³; *Physik der Gasentladungen*, 565⁹, *Verdichtete und verflüssigte*, 1701⁸, *The Conduction of Electricity through*, 1821¹; *Factors Affecting the Distribution of, in the Animal Body*, 1950¹, *Conduction of Electricity through Gases*, Vol. I. *General Properties of Ions, Ionization by Heat and Light*, 2661⁸, *Traité théorique et pratique des distributions et canalisations de gaz*, 2771², *The Industrial Production of Gases (in Czech)*, 3035⁸; *Cours de thermodynamique des*, 3152¹, *Gas Analysis*, 4423⁶, *Dielectric Phenomena Elec. Discharges in*, 4891⁷, *Die Ionenleitung in*, 5112⁸.
 burets for, stopcock for, 4598⁴.
 carbon dioxide sepn. from, P 1740⁷, P 3997¹.
 cleaning of, 3282².
 "cleaning up" residual, in vacuum tubes, P 1019¹.
 collecting and measuring, app. for, 4850².
 collection from refinery oil tanks, etc., 275⁸.
 compressed—see also *Cylinders*.
 compressed, app. for storing, P 553⁷.
 app. for supplying, from vessels containing liquefied gases, P 5066³.
 container for, P 551⁸, P 1785¹, P 2330⁶, P 4380², P 4852³.
 formation of congealed condensate in exit pipe of holder for, prevention of, P 4982².
 storage of, P 654⁸, P 4982¹.
 transferring heat from, to other gases, P 4755¹.
 compression system, 5064⁷.
 conduits for, P 3831⁷.
 contact with liquids, app. for effecting, P 2513⁷, P 5066⁹.
 contact with solids, app. for effecting, P 5358⁸.
 container for dispensing of compressed or liquefied, P 5066⁴.
 containers for, P 3600⁹.
 containers for storing and transporting liquid, of low b. p., P 2330¹.
 conversion to standard conditions, chart for, 318⁹.
 cooling, P 2513⁷.
 cooling app. for—see *Cooling apparatus*.
 density of—see *Density*.
 detection in atm., diffusion app. for, P 5066¹.
 detection of decompn., P 3997¹.
 detector (portable) for combustible, 481⁸.
 detrn. of, app. for, 625⁹.
 in fermentations, 5208¹.
 in metals, 2905³, 4640⁹.
 by radiation measurements, P 456⁸.
 in solids and app. therefor, P 3190⁶.
 detrn. of inert, 5438⁸.
 detrn. of mol. forces from viscosity of, 507⁹.
 diamagnetism of, anomaly of, 3137², 5088⁸.
 dielectric const. of—see *Dielectric constants*.
 diffusion of electrons through, theory of, 4403².
 diffusion of, through metals, 4861⁴.

- direct transition from ohmic to spark conduction in highly ionized, at high pressure, 2356³.
- dissocn. of, effect of high-frequency discharges on, 5423³.
- distribution under pressure by means of liquefied gas, app. for, P 5066⁴.
- drying, P 1188³, P 2513⁷, P 3284¹.
- drying app. for, P 1022³, P 3760⁹.
- dust detn. in, app. for, P 3603⁴.
- dust removal from, app. for, P 654⁴, P 4982¹.
- effect of foreign, on optical excitation of Hg, 766⁷.
- effect of inert, on gaseous explosive reaction at const. pressure, 516¹.
- effect of occluded, on soln. of Al-Cu alloys in HCl, 4662⁷.
- effect on photoelec. sensitivity of C, 562⁷.
- effect on pressure of a vapor, 4607³.
- elec. arc in, at low pressures, 1049⁹.
- elec. breakdown in, 2358⁹, 3155⁶.

effect of petroleum cracking catalysts on, 4559¹.

elec. cond. of, effect of increasing xylene and xylidene contents of, 2287¹.

ethyl, CO from automobiles using, 2287¹.

lead poisoning from, 966¹.

PbEt₄ detn. in, 1257¹, 3793¹, 5566¹.

regulations for, 695¹.

evapn. losses, detn. of, 2284¹.

from storage tanks, scrubber for preventing, P 3381¹.

treating to prevent, P 1452¹.

filter and clarifier for, P 4815¹.

filters for, P 698¹, P 1017¹, P 2030¹, P 2608¹, P 4060¹, P 5314¹, P 5568¹.

flushing, 4562¹.

fractionation of, P 2290¹.

kum in, 2286¹, 4334¹.

from heavier hydrocarbon oils, P 510¹.

hydrocarbon classes in, detn. of, 2814¹.

hydrocarbons in, detn. of various, 964¹, 965¹, 3800¹, 3802¹, 5566¹.

hypochlorite refining, 4055¹.

hypochlorite treating plant, 3336¹.

increasing yield of, by recycling second cut, 3799¹.

inflammability of shale-oil, 3803¹.

as larvicide in wells, etc., 4003¹.

manuf. P 970¹, P 4567¹.

manuf. of, by low-temp. carbonization of solid fuels, P 2811¹.

miscibility of castor oil with hydrocarbons of, 267¹.

mixts. with air, analysis of "exhaust gases" in detg. efficiency of, 4563¹.

with alc. and C₆H₆, analysis of, 1737¹.

with C₆H₆, vaporization of, 2561¹.

mol. wt. detn. of Grozny, 2285¹.

natural-gas, absorption app. for, P 698¹.

absorption of oil by, 4056¹.

absorption oils for, 2280¹, 3800¹.

absorption plants for, 1745¹.

analysis of, 965¹, 1745¹.

app. for fractionation of, 2282¹.

and app. for making, P 698¹.

cold blending in tanks and cars, 2285¹.

compn. of, 4055¹.

compression plants, 269¹.

detn. in natural gas, 4562¹.

detn. of efficiency of the absorber, 5564¹.

distn. app. for manuf. of, 3336¹.

distn. of, 2285¹.

distn. of blends of, 4561¹.

effect of temp. on liquid absorption of, 963¹.

extn. from gas, 2286¹.

fractionation of, 4559¹.

gaging and sampling of, 4811¹.

in gas as detd. by charcoal test and by analysis, 2285¹.

grades of, 4056¹.

hypochlorite treatment of absorption, 4562¹.

industry, 5309¹.

operation of absorption plant for, 4337¹.

recovery of, app. for, P 4339¹.

recovery with adsorb., 268¹.

Reid vapor pressure test for, 269¹.

resources of U. S. in 1927, 2025¹.

specifications of Natural Gasoline Assn. for blended, 965¹.

stabilizing app. for, 965¹.

S compds. in, and their detection, 965¹.

vaporization of, 5519¹.

from natural gas and hydrocarbon oil, app.

for producing, P 1502¹, P 2030¹.

natural gases, analyses before and after treatment, 5561¹.

nitric acid action on Polish, 1257¹.

paraffins in, steam distn. problems of, 4280¹.

plant in Baku, 4334¹.

prepn. from pressure distillates, 964¹.

prepn. of finished, in one operation, 965¹.

pump for, P 313¹.

purifying, P 510¹, P 968¹, P 970¹, P 1502¹.

app. for, P 5314¹.

used for dry cleaning, P 4354¹.

recovery from field and refinery gases, 267¹.

from gas, P 5568¹.

from gases, app. for, P 3806¹.

from natural gas or similar mixts., app.

for, P 3342¹.

 ceramic, P 684, P 1732, P 4316.
 cold, suitable for gilding, P 946.
 copper oxide behavior in, 3618.
 copper ruby, 2261, 4314.
 dental, 1478.
 effect of ZnO , rutile and fluor spar on, 4787.
 effect on insulator strength, 2261.
 effect on quality and breakage of porcelain insulators, 2795.
 expansion of, by heat, 2260.
 firing of, elec. furnace fur, 4035.
 increasing resistance to chemicals, P 4316.
 lead in red, 5555.
 leadless borosilicate, contg. NiO , 2261.
 melting behavior of china, of system: $\text{SiO}_2\text{-B}_2\text{O}_3\text{-Al}_2\text{O}_3\text{-Na}_2\text{O-CaO-PbO}$, 4034.
 org. agents as aids to adhesion and suspension of, 2543.
 sandblast abrasion test, app. for, 3551.
 slips, 2543.
 slips, effect of particle size of ZnO on consistency of, 5554.
 smoky, 4034.
 soly. of refractory soda-lime-silicate, in hot water as function of compn., 4787.
 terra-cotta, consistency of, 5553.
 terra cotta, lepidolite in, 5553.
 for tiles, etc., P 5292.
 titanium crystal, 2261.
Glazing, salt, 4314.
 salt, on ceramic ware, P 5291, 5554.
Gladin, adsorption of coloring matters by, 1180.
 dicarboxylic amino acid in, 614.
 glutenin and, 912.
 hardening, P 1482.
 rye and wheat, 912.
 tyrosine content of, 211.
Glicidia, manurial value of leaves, stems and branches of, 4293.
Globin, and its denatured product, 1918.
 effect on colloidal $\text{Fe}(\text{OH})_3$, 3722.
 in hemoglobin of horse, N distribution in, 1948.
 immunochem. studies on, and derivs., 1957.
 nitration and iodation of, 5204.
Globulins. (See also *Englobulin*; *Pseudoglobulin*.)
 absorption of ultra-violet light by, of eggs and blood serum, 2656.
 -albumin relations of serum in tuberculosis, 5230.
 from beans, peas and lentils, tryptophan-tyrosine content of, 211.
 in blood and urine in nephrosis, 1172.

- of blood plasma, antigenic nature of, 5508⁷.
 of blood serum, alkali bound by, 424⁴.
 breakdown by dil. alkali, dil. acid, pepsin-HCl and pancreatic enzymes, 157⁵.
 chem. characterization of, 4955⁸.
 in complement fixation, 1679¹.
 effect of denaturation and coagulation on acid- and base-binding power of, 4952⁸.
 effect of H-ion concn. on salt flocculation of, 4956¹.
 at high altitudes, 636³.
 mol. wt. of, 622⁹.
 in scurvy, 2482⁹.
 sex differences of, 1423¹.
 state of iodine in, 5204⁷.
 S content of, 5479⁴.
 in blood serum and urine, 3508⁶.
 in cerebrospinal fluid under normal and pathol. conditions, 640⁹.
 definition of, 614⁹.
 detn. in blood serum, 626⁷, 1149³.
 hemolytic properties of, from hemolytic serum, 3480⁷.
 refractive index of horse-serum, 406⁴.
 soly. of, 5386¹.
- Globus pallidus**, siderosis of, 2481³.
- Glomeruli**, effect of diuretics and other drugs on, 3987⁴.
- Gloss**, of paper—see *Paper*.
- Glossosiphonia paludosa**, pigmentation in, 443⁹.
- Glow discharge**. See *Electric discharge*.
- ψ -Glucal, triacetyldihydro-***, 3671¹.
- Glucemia**. (See also *Blood sugar*; *Hypoglycemia*.)
 adrenal, 903⁹, 4266⁶
 effect of amino acids and derivs. on, 2762⁹.
 effect of ephedrine on, 1178⁶.
 adrenaline effect on, 4268⁹.
 alimentary, 3010⁶.
 acetylcholine effect on, 428³, 5237¹.
 in carbohydrate feeding and deprivation, 4970⁸.
 combined sugar during, 5220⁷.
 ergotamine effect on, in normal and diabetic subjects, 1441⁴.
 in phlorhizin diabetes, 192⁷.
 relation to pancreatic function, 425⁴.
 in anaphylaxis, 1958⁹.
 asphyxial, in fishes, liver and, 2220¹.
 atropine, after splanchnectomy, 1680⁹.
 blood coagulation and, 4735⁶.
 body temp. and, 645¹.
 calcium effect on, 894⁸.
 decrease by antituberculosis vaccination, 2754⁴.
 of depancreatized female dogs, effect of folliculin on, 643⁹.
 of diabetes, 4257¹.
 diabetic, genesis of, 3267⁷.
 diuretin, 3987⁶.
 effect of feeding *d*-glucose and EtOH separately and in combination on, 1164³.
 effect on external secretion of pancreas, 645⁷.
 effects of anesthesia, operation and other factors on, 4258⁹.
 emotional, prepotency of medulliadrenal influence in, 2470¹.
 ergotamine effect on, 203¹, 1441⁴.
 from ergotamine tartrate, 903⁹.
 as function of blood diln. after mercurial defecation of blood, 627⁴.
 glucose, effect of polysaccharides on, 2761⁴.
 from glucose ingestion, 197⁴.
 hemorrhage, 2455¹.
 in hydrophobia, 194⁴.
 in infants with dyspepsia, 896⁹.
 insulin, 4265².
 in joint diseases and in sciatica, 1952⁷.
 kidney filter and, 2473⁹.
 liver and, in frogs, 4273¹.
 from morphine, 906⁷.
 nervous system and, 3741⁹.
 in normal and in diabetic man, 896⁴.
 of ovariectomized dogs, effect of folliculin on, 643⁹.
 of ovariectomized dogs, reciprocal influence of folliculin and insulin on, 205⁴.
 oxalic acid excretion in, 4504³.
 partition of blood sugar between corpuscles and plasma in diabetic and in alimentary, 1950⁸.
 pilocarpine, mechanism of, 3513⁹.
 potassium salts and, 4742².
 after splenectomy, 1957³.
 substances in blood causing, 4735³.
 after sucrose ingestion in fractional doses, 1164⁶.
 sulfur (colloidal) action on, in relation to pilocarpine, ergotamine and atropine, 2212⁵.
 synthalin effect on, 906¹.
 time of beginning, after intraduodenal administration of glucose, 5232³.
- Glucemin**, 1144².
 discharge from liver after ligation of pancreatic duct, 878⁹.
- Glucic acid**, 1877⁶.
- Glucides**. (See also *Carbohydrates*; *Glucoxydes*.)
 in blood plasma, 3936⁴.
 of blood plasma, permeability of red blood cells to, 3936⁴.
- Glucinum**. See *Beryllium*.
- β -Glucochloralose***, constitution of, 1391⁸.
 — — —, trimethyl-, 1391⁷.
- Glucoseptulitol**, α -, 373⁷.
- Glucoseptulose**, α -, 373⁷.
- Glucolysis**. (See also *d-Glucose*.)
 aerobic, specificity for tumors, 1058¹.
 arresting, P 3772⁴.
 of blood, effect of insulin on, 900².
 blood sugar fate during, 4728⁴.
 catalyst of, Cu in cancer cells as, 3271³.
 in cerebrospinal fluid, 5499⁶.
 effect of pancreatic ext. on, 3256⁹.
 effect of tumor exts. on, 1675⁴.
 of erythrocytes, effect of Hofmeister series on, 420⁴.
 in fertilized and non-fertilized eggs of sea urchin, 5511⁴.
 hemolysis and, 169⁴.
 by kidney of newborn, 2468¹.
 of liver and spleen, effect of blocking of reticulo-endothelial system on, 2751⁴.
 methylglyoxal as intermediary substance in, 4247¹.
 methylglyoxal formation in, of animal tissue, 5204³.
 in muscle and other tissues, 3937³.
 optical activity of normal and diabetic blood before and after, relation of lactic acid to, 971⁴.
 phosphoric acid in blood and, 881⁷.

- by polynuclears, 5223¹.
- of trypanosomes, 1151².
- by tumors and effect of insulin, 3736⁷.
- of tumor tissue, rate of, 3016⁷.
- Gluconeogenesis**, insulin and, 4267⁸.
- Gluconic acid**, P 4230¹.
- and calcium salt, P 2988².
- calcium salt of, as emulsifying agent, 5382³.
- calcium salt of, solns. of, P 2534³.
- citric acid formation from, by molds, 179⁷.
- d*-, prepn. of, 3665², 4929².
- fermentation by molds, 179⁸.
- formation of, by *Aspergillus niger* strains, 1794⁸.
- from 5-ketogluconic acid by *Bacterium xylinum*, 1924⁹.
- in oxidation of glucose, 1664⁷.
- manuf. of, by fermentation, P 5004³.
- oxidation of, 2700¹.
- prepn. of, 3902¹.
- reducing power of, on alk. solns. of K₂HgI₄, 4909².
- salts of, optical properties of, 4386¹.
- sodium and Ca salts of, oil-in-water and water-in-oil emulsions of, 3388⁹.
- Gluconic acid, 2-keto-**, ultra-violet absorption by, 2656².
- , **5-keto-**, gluconic acid formation from, by *Bacterium xylinum*, 1924⁹.
- Gluconolactone, tetraacetyl-**, 2942¹.
- Gluconolactone, 2,3,5,6-tetramethyl-**, conversion of, into 2,3,5,6-tetramethyl γ mannolactone, 2423².
- Gluconolactone, 2,3,4,6-tetramethyl-**, conversion of, into 2,3,4,6-tetramethyl- δ -mannonolactone, 2423².
- l*-, prepn. of, and its phenylhydrazide, 2423².
- Glucosamine**, decompn. of, in dil. alkali soln., 2155².
- hydrochloride, piezoelectricity of, 2863⁷.
- Glucosana**, absorption of ultra-violet light by, 2363⁹.
- formation of, in decompn. of hexoses, 4063¹.
- Glucose**, from cellulose substances, P 4071⁷.
- degradation products of starch, analysis by selective fermentation, 540⁹.
- detn. in sirups, 1299⁴.
- dielec. consts. of glassy and liquid, 3838¹.
- fermentation (selective) of fructose and, by brewer's yeast, 2354².
- ion salt removal in making, P 541⁷.
- manuf. of, P 540⁹, 2595¹.
- purifying and clarifying, P 728⁷.
- purifying, app. for, P 4363³.
- purifying solns. of, P 541¹.
- sirup, detn. in presence of sucrose and invert sugar, 3520¹.
- from starch, P 541⁹, P 1301⁴.
- d*-Glucose (dextrose)**. (See also *Blood sugar*; *Glucemia*; *Glucolysis*; *Glucose*; *Glucosuria*; *Hypoglycemia*; *Saccharification*; *Sugar*, analysis.)
- absorption of, from alimentary tract with vitamin-B diet, 1935⁹.
- effect of alc. on, 1175².
- by erythrocytes, 400⁹.
- from intestinal tract, 4729⁴.
- absorption of ultra-violet light by, 4094⁷.
- acetylation of, 2425⁹.
- acyl derivs. of, 2943⁹.
- addn. of, in perfusion expts. on muscles, 4735⁹.
- adsorption by fuller's earth and norite, 616⁹.
- α , β -, rotatory dispersion of, 821⁶.
- antagonism to insulin action on gastric, pancreatic and biliary secretion, 4730¹.
- antiketogenic effect of, 419⁹.
- behavior of, in H₂SO₄ solns., 5166⁷.
- blood sugar and respiration after simultaneous administration of insulin and, 809¹.
- carbon- and O-N ratios in urine after peroral feeding of, 420⁹.
- catabolism of, 3019⁶.
- chloral derivs., 1391⁶.
- combination with dipeptide or peptone, 619¹.
- corn as source of, 1969¹.
- crystn. of, P 541⁴, P 728⁸, P 1007⁴, P 2844⁸.
- decolorizing agent for, P 3075⁹.
- deriv. of, in animal cells affecting oxidation-reduction equil., 5205⁹.
- derivs., 1400⁶.
- di- and tri-saccharides from, 107⁵.
- as diet, 4501⁶.
- diffusion of, into blood of fetus from mother, 3257⁷.
- through muscle, 2996¹.
- in solns. of proteins or amino acids and glucose, 4236¹.
- through wall of living and dead intestine, 3939¹.
- effect of feeding, alone and with EtOH on glucemic and alcoholic curve, 1164².
- effect of feeding, on acid-base equil. of blood in pregnancy after CHCl₃ anesthesia, 2472⁴.
- on blood sugar, 3258¹.
- on sugar of urine and blood, 3743⁷.
- effect of feeding 1000 g. of, 197⁴.
- effect of freshly crystd., on blood sugar curve, 5227¹.
- effect of injecting, on irritability after removal of liver, 2474¹.
- effect of intravenous injections of, on blood sugar, 893⁶.
- effect of Na butyrate and, on "acetone bodies," 2764¹.
- effect on activity coeffs. of acid-base indicators, 2871⁷.
- on blood sugar at high and lower altitudes, 3260⁴.
- on blood vessels, 4268⁹.
- on extracellular toxin-producing enzymes of *Clostridium botulinum*, 4963⁷.

 driving means for, P 1783⁷.
 of endless-chain type, P 552⁹, P 741^{1,2}.
 operating device for, P 3605⁴.
 swing closure for discharge end of, P 1021⁴.
 trough-shaped furnace, P 1783⁴.
Gravel. (See also *Calculi*.)
 abrasion of, tests of A. S. T. M. for, 1440⁴.
 colloid formation by abrasion of greywacke, 1845¹.
 filter, specifications for, 4288¹.
 resources of U. S. in 1927, 1477⁹.
 for roads, specifications of A. S. T. M. for, 1448⁹.
 sepg. lignite from, screening and washing app. for, P 4557⁹.
 testing, for roads, 5558⁹.
Graves' disease. See *Goiter*.
Gravimolecular pressure, 2621⁹.
Gravitation, electricity and, new theory of Einstein on relation of, 2351⁴.
Gravimeter, 3602¹.
Grease. See *Fats*; *Lubricants*.
Greenhouse centipede. See *Scutigera im-maculata*.
Greensand, potash from, of N. J., 2253³.
Green sarsen. See *Rulabaga*.
Grenadin, active-principle content of, effect of Th X on, 1723⁶.
Grey, Egerton Charles, obituary, 2729¹.
Griess, Peter, biography, 5320².
Grignard reaction, factors influencing yields in, 1107⁹.
Grignard reagents. (See also *Magnesium compounds*.)
 carbonates from, 4925⁴.
 constitution and disocn. of, 5468¹.
 constitution of, 5159⁷.
 detection of, 1869¹, 4188⁴.
 from *p*-dibromobenzene, 4458⁴.
 formation of, effect of pressure on, 4188¹.
 factors affecting, 1868³.
 relative times of, 4188³.
 mercury compds. from, 1870⁴.
 oxidation of, 93⁴.
 prepn. of, 4442¹, P 5194¹.
 effect of rate of addn. of halide on yield in, 2934¹.
 free radical formation in, 2953⁹.
 Mg-Cu alloys for, 4458³.
 yields in, 1107⁹, 2934¹.
 reaction of aromatic, with As₂O₃, 2955¹.
 reaction of mixed, with *N*-disubstituted crotonamides, 2697².
 reactions of, 1869⁴.
 reaction with C₂H₂, 90⁴.
 with acyl halides, 4464⁹.
 with anhydrides of asymmetric poly-carboxylic acids, 2976⁴.
 with aromatic nitro compds., 1887⁷.
 with carbonyl compds., 2420¹.
 with carboxylic esters, 5181³.
 with chloramine, 1385¹.
 with di- and triphenylmethane attempted, 3215⁹.
 with dihydroxymethylene ethers, 1889⁹.
 with α -diketones, 1615⁶.
 with *N*-disubstituted cinnamanilides, 2697⁴.
 with ethyl cyanoacetate, 4191³.
 with liquid H₂S, 3148¹.
 with HgBr₂, 1870⁴.
 with *N*-methylsuccinimide, 1408⁹.
 with pinene oxide, 4463⁷.
 with salts, 1868⁹.
 reducing action of, 5159⁹.
Grinding. (See also *Ores*, *treatment of*.) 2227⁹.
 compn. for, P 2002¹.
 fine, theory of, 3996¹.
 particle-size distribution in, 653⁴.
Grinding apparatus. (See also *Abrasives*, *Crushing apparatus*; *Mills*; *Pulverizing apparatus*.) P 1023^{3,4}, 2074⁹, P 3831⁹.
 centrifugal, P 738⁹.
 centrifugal, for ores, etc., P 4181³.
 evaluating, graphic method for, 1187¹.
 for foundry sand, P 4182⁴.

- for horn, casein, resins, cellulose derivs., glass, etc., P 2771⁹.
- for inks and colors, P 1293³.
- for inks, paints, dyes or pharmaceutical products, etc., P 1025³.
- lab., P 550², 3127⁴.
- for minerals, P 3130⁹.
- for ores, cereals, etc., P 1785¹.
- for ores, coal, etc., P 2075².
- for paints, P 1516⁹.
- for rubber, P 2324³.
- for rubber scrap, etc., P 2604⁶.
- for viscous materials, P 4380⁹.
- Grippe.** See *Influenza*.
- Grog,** refractory, for making glass tank blocks, etc., P 4789⁹.
- resistance to slags or glass fluxes, detn. of, 4787⁹.
- Grossularite,** 1368⁴
- of Australia (western), 4167⁹.
- solid solns. with pyrope, almandite and andradite, 1083⁴.
- Growth.** (See also *Plants, Vitamins*)
- of albino rat, evolution in, 1159⁹.
- autocatalysis and, 1655⁹.
- calcium carbonate effect on, 1165².

 chemistry of, 191⁴.
 chromatin and, 3506¹.
 coagulation of, by EtOH, C₂H₅OH and M. CO, 3144¹.
 coagulation of, by MeOH, EtOH, PrOH and Et urethan, 1333⁴.
 colloidal chemistry of, 855¹.
 concn. of, in nucleated erythrocytes in anemia, 645¹.
 content of blood, quant. relation to O supply of body, 1160⁴.
 copper in, 4732¹.
 correction of sedimentation of blood corpuscles to, in internal diseases, 2754¹.
 Dalton's law applied to solns. of, in presence of salts, 323⁴.
 decompn. of, 3719¹.
 detn. of, 407⁴, 627¹.
 detn. of, colorimeter for, P 4106⁴.
 detns. of, 861⁴.
 diet and, 1167¹.

- diffusion of, in gelatin, 2453¹.
 effect on colloidal Fe(OH)₃, 3722¹.
 effect on growth of fibroblasts, 1168¹, 1681¹.
 of fishes (marine), 3275¹.
 formation of, Cu as supplement to Fe in, 2742².
 effect of storage of Mn and Cu in animal body on, 4972².
 Mn-Cu-Fe complex and, 1160².
 manganese in, 422².
 in rats, effect of proteins and vitamins on, 3734².
 heat of ionization of, 3939².
 hemopoietic action of, 3261².
 increase at high levels, 2161².
 ionic charge of, hydration and, 857².
 iron in, state of, 5479².
 linkage between protein and prosthetic group in, 3238².
 in *Macropus*, 4731².
 maintenance of, on synthetic diets, 3491².
 mol. conversion index of, 2729².
 mols. of, structure of, 1948².
 mols., radius and wt. of, 5205².
 in muscle during growth as influenced by diet, 3734².
 of muscle (smooth and striated) of fowl, 3961².
 nature of, 1668².
 in newborn, 858².
 output in anemia, effect of Cu salts on, 188².
 oxidative changes in iron-contg. component of, 178².
 oxygen capacity of, in health and disease, 3738².
 precipitin reaction of, in blood investigation for forensic purposes, 2753².
 precipitin sp. for, production of, 3737².
 prepn., prepn. and evaluation of, 476².
 in red blood cells in cattle, esp. during fetal life, 3504².
 in red cells, surface area and, 4248².
 regeneration of, effect of feeding wheat on, 1499².
 regeneration of, effect of iron prepn. on, 189².
 renal threshold in dog, 3721².
 role in blood, 3494¹.
 Rontgen ray examn. of, 4715¹.
 sodium salt, thermodynamics of, 2196².
 sol. of gases in solns. of, 4248¹.
 specificity of, Kruger reaction and, 4234².
 after splenectomy, 1168², 2469².
 sulfur content of, 857¹.
 therapeutic products from compts. of, P 1777¹.
 a transport agent, 3481².
 in urine in scurvy, 2482².
 in vitamin B deficiency, 4501².
Hemoglobinuria, paroxysmal, 1438².
 paroxysmal, from cold, 191².
Hemolysin, action in hemolysis, 434².
 after adrenalectomy, effect of adrenal on, 4263².
 compd., action of, 5501².
 glycerolated antisherp, stability of, 1953¹.
 individual variations in, and effect of lipid feeding, 1173².
 iso., 4262², 5233², 5504².
 nature of, 5506².
 neutralization of toxin and of, by antitoxin, 1679².
 normal, 1173².
 prepn. of, from phosphatides, 4956².
 production of, after adrenalectomy, effect of Na salts and of glucose on, 4263².
 by *B. typhosus* through action of bacteriophage, 3727².
 effect of parenteral injections of lipoids on, 1172².
 by injection of red blood corpuscles into normal and tumor tissues, 2753².
 proteus, 4963¹.
 for sheep corpuscles, human serum as source of, 5233².
 in human serums of all isoagglutinative groups, 4261².
 in precipitin serums from rabbits, 4261².
 specific adsorption of, 193².
 streptococcal, effect of lecithin on, 4739².
Hemolysis (See also Complement, and "hemolytic" under Blood serum.)
 by albumin and globulin from hemolytic serum, 3480².
 amboceptor of, effect of excess of, on min. hemolytic dose of complement in Wasser mann reaction, 1956¹.
 amboceptors, effect of leucocytosis on production of, 1172².
 anemia from bleeding and, 897².
 antihemolytic action of liver in therapy of anemia, 1438².
 by blood serum of red cells changed by bacteria, 5502².
 by brilliant green and serum, 432².
 by α -bromo soaps, 862².
 by chem. agents, inhibition by serum, 5233².
 complement activity mechanism of, 5235², 5500².
 by decompn. products of lecithin, lecithides and phosphatides, 4956¹.
 distant punctate, of blood agar by staphylococci, 631².
 effect of, before and after splenectomy on bile secretion, 2474².
 enzyme studies on, 3272², 4740².
 glucolysis and, 169².
 hematoporphyrin, 3243².
 hypotonic, 1170¹.
 inhibition of saponin and taurocholate, by sucrose, 4260².
 as lipase action, 2996².
 liver changes in, 4259².
 mechanism of, 434².
 by mixts. of saponin, taurocholate and oleate, 3258².
 opsonic power of serum in relation to, 2481².
 -producing substance in pneumococcus culture broth, 4963².
 quinine, and effect of CO₂, 2192².
 by radiated ergosterol and cholesterol, 166².
 rate of, detn. of, 3942².
 rate of, effect of light on, 1438².
 of red blood corpuscles by bile salts and inhibiting action of normal serum and egg albumin with reference to permeability change of stroma, 1956².
 resistance of corpuscles to, in scurvy, 3010².
 reversion of, 1170¹.
 review on, 1438².
 saponin, 4249².
 effect of H-ion concn. on, 4739².
 of reticuloocyte-contg. blood, 4249².
 serum effect on, 2483².
 by snake venom, effect of Ca salts on, 3965².
 by soaps, 4488¹.
 solanine, effect of H-ion concn. on, 5236².

- by sparteine sulfate, effect of Na salicylate on, 905².
specific, 193⁴.
specific, electroösmosis as principal factor in, 1678¹.
spleen and, 1170¹, 5222².
in sucrose soln., 5234².
by taurocholate, saponin and oleate, effect of sucrose on, 3258².
time-diln. curves in, 2640⁴.
viscosity and, 891².
- Hemophilia**, blood in, electrolyte distribution in, 643¹.
- Hemophilus influenzae** (*Bacillus influenzae*), anaerobic cultivation of, 3727¹.
effect of meat exts. and of vitamin-contg yeast exts. on growth of, 4725².
isolation with *Penicillium* cultures, 4961².
- Hemorrhage**, control of, 3961².
effect on CO₂ content of brain, 4251².
on H-ion concn. of cerebrospinal fluid, 3963².
on reflex activity of spinal cord, 4733¹.
restitution of fluid after, 883².

- Hydrazinedicarboxamide**. See *Biurea*.
- Hydrazinedicarboxamide**. See *Biurea*.
- Hydrazino**, α -benzoyl-, β, β -diaryl derivs., 4938².
- , β, β - diphenyl - α - picryl-, spectrum of, 123⁷.
- Hydrazobenzene**, detection of, 3445⁷.
- , 2,5 - dibromo-, 824².
- Hydrazo compounds**, bis-semidine inversion in aromatic di-, 2187⁷.
- Hydrazole acid**, decompn. of, heat of, 4400⁴.
- , photosensitized band fluorescence of, 771⁴.
- , prepn. of, and salts, 5547⁴.
- , reduction with H in presence of colloidal Pd, 5427¹.
- , thermal decompn. of, 4617².
- Hydrazomethylene**, 1 - α - naphthylazo-2 - phenyl - 1,3 - endoxy-*, and -HCl, 4939⁴.
- , 1 - phenylazo - 2 - allyl - 1,3 - endoxy-*, and -HCl, 4939⁴.
- , 1 - phenylazo - 2 - 1,3 - endoxy-*, and derivs., 4939^{2,3}.
- , 1 - phenylazo - 2 - ethyl - 1,3 - endoxy-*, and -HCl, 4939⁴.
- , 1 - phenylazo - 2 - α (and β) - naphthyl - 1,3 - endoxy-*, 4939⁴.
- , 1 - phenylazo - 2 - phenyl - 1,3 - endoxy-*, 4939².
- , 1 - phenylazo - 2 - *vic* - *m* - xylyl - 1,3 - endoxy-*, 4939².
- , 1 - *p* - tolylazo - 2 - allyl - 1,3 - endoxy-*, and -HCl, 4939⁴.
- , 1 - *o* (and *p*) - tolylazo - 2 - phenyl - 1,3 - endoxy-*, 4939⁴.
- , 1 - *o* - tolylazo - 2 - *o* - tolyl - 1,3 - endoxy-*, 4939⁴.
- , 1 - *vic* - *m* - xylylazo - 2 - phenyl - 1,3 - endoxy-*, 4939⁴.
- Hydrazones** (Individual hydrazones are indexed in light face type under the names of the corresponding aldehydes and ketones) 4679².
- , nitrophenyl, spectra of, 2429².
- , phenyl-, reaction with $\text{BzCH}_2\text{CO}_2\text{Et}$, 3469¹.
- , of quinones, relation to *p* - hydroxyazo compds., 4679².
- , reaction with bromine, 3680¹.
- , reaction with PhNCO , 3681².
- Hydrazonium ion**, equil.: $\text{N}_2\text{H}_3^+ + \text{NH}_3 \rightleftharpoons \text{NH}_4^+ + \text{N}_2\text{H}_4$, 5084².
- Hydrides**, mols. of, electronic state in, 4142².
- , quantum nos. for electrons in diat. mols. of, assignment of, 5407².
- Hydrindene**. See *Indan*.
- Hydrindone**. See *Indanone*.
- Hydriodic acid** (See also *Hydrogen halides*.)
- , anhyd, prepn. of, 4418⁴.
- , elec. cond. of, 3146⁴.
- , formation of, from I and water in presence of charcoal, 4158².
- , heat capacity and heat of vaporization of, 3150².
- , oxidation of, by H_2SO_4 , 3181².
- , oxidation of, in the dark and in the light, 3856².
- , pharmaceutical prepn. contg., 5545².
- , reaction with HIO_3 , velocity of, 753⁴.
- , with strychnidine, 3710².
- , with H_2SO_4 , 5427².
- , with tetraphenyl - 2 - butene - 1,4 - diol, 1386², 4678².
- , systems: Et_2O -, and Me_2O -, 1868².

- acetylene, P 3713⁷.
addn. reactions of di-, 4439⁴, 5156⁴.
additive properties of α -di-, 2931³.
 α -di-, 2930².
from epidibromohydrin, 4925¹.
prepn. and hydrogenation of, P 1135⁴.
thermochemistry of, 3808².
from acetylene, app. for mfg., P 3232².
adsorption (selective) by silica and silicates, geological consequences of, 4426¹.
alcs. and aldehydes from, P 846¹.
aluminum chloride action on hexahydroaromatic and satd. aliphatic, 5564⁴.
analysis of mixts. of, 4523¹.
autoxidation of, 2694³, 4437⁹.
from berginization residual gases, P 692⁴.
from bituminous sand or sandstone, P 1501⁴.
boiling ps. of, 4389².
boiling ps. of satd., at reduced pressures, calcn. of, 3390⁴.
catalytic treatment of C and H for the production of, P 247⁷.
chlorinated, formation from unsatd., cracked gases, 4333⁴.
chlorination of, P 3713⁴, P 4228⁴, P 4482⁴.
in coal exts., 499⁴.
of coal, oil yield of, 953³.
combustion of, P 1747⁷, 4667⁴, 4795².
compds. with tetryl, 3214².
condensation products of aromatic, P 2257⁴.
conversion of, P 274³, P 2818⁴, P 4557⁴.
in presence of catalysts, 2284⁴.
in reduction of ores, P 85¹.
cracked, partial oxidation of, P 1260⁴.
cracking, P 696⁴, P 968⁴, 1499⁴, P 1501⁴, P 1748⁴, 2560⁷, P 2565⁴, P 3804⁴, P 4059⁴, P 4337⁷, P 4338⁴, P 4565⁴, P 4814⁴, P 5312⁴.
alkali metal cyanides and formates as catalysts for, P 4565⁹.
app. for heat recovery in, P 4338⁴.
catalysts for, P 4565⁹.
- cyclic, formation of, 3914⁴, 4946⁹.
cyclic, structure of, 2148⁷.
cyclic unsatd., catalysis of, 2960².
decompn. by heat, P 2028⁹, P 2278⁴.
alloy for app. for, P 4184⁴.
manuf. of H and C by, P 4059⁹.
dehydrogenation of, P 1747⁷.
dehydrogenation (partial) of, for rendering, suitable for agglomeration of coal, 1244².
depolymization of, app. for, P 1748⁴, P 4228⁴, P 5193⁴.
and derivs., P 3796⁷.
derivs. contg. O or S, P 4802⁴.
by destructive hydrogenation and dehydrogenation, P 1739⁹.
from destructive hydrogenation residues, P 503⁴.
detn. in benzines, 1744⁴.
in coal, 4045¹.
in rubber, 307¹.
detn. of aromatic, in gasolines produced by straight distn., 5566⁴.
detn. of constituent classes of, in gasoline, 2814⁴.
- detn. of unsatd. and aromatic, in gasoline, 3802⁷.
detn. of unsatd. and aromatic, in light oils and motor spirits, 3802².
detn. of unsatd. aromatic and naphthenic, in gasoline, 5566¹.
detn. of unsatd., in gases, 2675⁴.
detn. of unsatd., in mixts., 3900⁴.
distillates of, purifying of, P 1747⁷.
distn. app. for, P 1748⁴, P 2818⁷.
distn. app. for, in sand and sandstone, P 1748⁴.
distn. of, P 4228⁴, P 4565⁴, P 4814⁴.
from distn. gases, P 4329⁴.
distg. and other heat-treatment of, app. for, P 2565⁹.
distg. and sepg. plant for, P 3079².
effect of elec. discharge on gas contg., 3861³.
effect of electric (semi-corona) discharge in gaseous, 4924⁷.
effect of optically excited Hg atoms on, 3206⁴.
elec. cond. of, and their halogenated derivs., 5088¹.
elec. treatment of, app. for, P 3173⁴, P 4628².
electrosynthesis of, 3632⁷.
empirical formulas of, detn. of, 2279⁷.
emulsifying, agents for, P 2821².
emulsions of, and their industrial uses, 2052⁴, 4358².
emulsions of aromatic, P 2986¹.
emulsions of satd. or unsatd., agents for prepg., P 222⁷.
from ethylene, P 2188⁷, 2929⁷.
extn. from gas and vapor mixts., gas washer for, P 3132⁴.
extn. of benzenoid, from coal gas, P 1740⁴.
flame in mixts. with air, effect of antiknock materials on speed of initial uniform movement of, 1506².
for fuel use, P 2020⁷.
gasoline, miscibility of castor oil with, 267⁴.
halogenation of side chains of aromatic, P 4226¹.
halogen derivs. of, P 847⁹, P 2189⁴, P 4050².
halo-, reactivity of, 4188⁹.
hardening, P 969⁴.
heat of combustion of gaseous satd., and their mixts., 5404².
heats of vaporization of, calcn. of latent, 3622⁷.
of high b. p., P 4050⁴.
high-temp. treatments of, app. for, P 2566².
hydrogenating and purifying liquid and gaseous, P 274⁴.
hydrogenation of, P 2555⁷, P 2986⁴, P 4328⁴.
catalysts for, P 3060².
after gasification, P 698¹.
inflammability of, 3802⁹.
knock ratings of, 2561⁴, 2813⁴, 3337³, 3803².
as lacquer solvents, injury to health by, 2049⁴.
light, P 3306⁴.
light reflected by surface of aromatic, intensity of, 10⁷.
magnetic birefringence of, 5075¹.
manuf. of, P 500⁴, P 694⁴, P 610⁴, P 1135⁴, P 2722⁴, P 2811⁴, P 3476⁴.
from C oxides, P 1415⁴.
by hydrogenation, P 690⁴.
by low-temp. carbonization of solid fuels and app. therefor, P 2811⁴.
manuf. of aromatic, P 5193².

- manuf. of liquid, by simultaneous cracking and hydrogenation, 4553⁹.
- from methane, 1119⁹, 1866⁹, 3212⁹, 3213⁹.

- treating with alginate acid, P 5568⁹.
- unsatd., addn. of SnCl₄ and of SnCl₂ to, 4227².
- from coal, tars, mineral oils, etc., P 504⁹.
- in fats, review on, 1423⁹.
- manuf. of, P 394⁹, P 605⁹, P 846².
- from triacontane by oxidation, 1866⁹.
- unsatd. aliphatic, P 4050¹.
- unsatn. of, periodicity of optical properties in relation to, 2093¹.
- vapor-liquid equil. in complex mixts. of, 4052¹.
- viscosity control of substances contg. unsatd., P 3804².
- viscosity increase by elec. treatment, P 1577².
- volatile, P 604⁷.
- in volcanic rocks, 1844⁹.
- from waxes, P 4711⁹.
- wax-like products from halogenated satd., P 3548⁹.
- from zinc alkyls, 1386².
- Hydrocarboastyril** (1,4-dihydro-2(1)-quinolone), and derivs., cleavage of, 125⁹.
- Hydrocellulose**, Röntgen-ray spectrography of, 3080⁹.
- Hydrochalcane** See *Propiophenone*, β -phenyl.
- Hydrochloric acid**. (See also *Hydrogen halides*)
- acidity of, 4200⁹.
- activity coeff. of H ion in, 1556⁷.
- adsorption of, 5380⁹.
- by hide powder, 1038¹.
- by SnO₂, 1332¹.
- by wool, 5080⁹.
- alloys resistant to, 5251².
- angle of slipping of quartz particles in sedimentation on an inclined surface from dil. solns. of, 14¹.
- antidotes for, 3522⁹.
- books: I catalizzatori, gli, 3152¹; Encyclopédie technologique et commerciale, 3312¹.
- as catalyst for esterification in alcoholic soln., effect of added compds. on availability of, 4684².

- as catalyst in esterification of fatty acids with glycol, 4191⁷.
- combination with gelatin, 4393⁴.
- compn. for producing, P 486⁴.
- compds. with ether and acetone, 2871².
- as condensing agent in prepn. of phenol-HCHO condensation products, 2963¹.
- const.-boiling, analysis of, 2675².
- containers for, P 5016¹.
- corrosion by, prevention of, 3777².
- corrosion of steels by, in relation to C, Ni and Cr contents, 2411⁶.
- cotton cellulose hydrolysis by, velocity of, 1559⁹.
- demonstration expt. with, 3133⁴.
- density, viscosity and elec. cond. of aq. solns. of, at diff. temps., 2632³.
- detrn. of, 356⁴.
- detrn. of, in stomach contents, 405⁴.
- diamagnetism of, 4385².
- dipolar length of, 1028⁴.
- effect on ciliary movement in actinians, 439².
- on deliming of hides, 2846⁴.
- on glycol action on cotton, 5572¹.
- on ζ -potential of cellulose-water boundary, 748⁴.
- on seedlings, 4495⁹.
- on sparking voltage of small tubular electrodes, 4135⁹.
- on swelling of colloids, 5387³.
- elec. cond. of, 3146⁴, 4715⁴, 5087⁴.
- effect of a high-potential direct current on, 2635⁹.
- effect of glycine on, 1043⁷.
- in glycerol-H₂O mixts., 3843⁷.
- elec. moment of mols. of, 1322².
- equil. of, law of, 4396⁴.
- extinction coeffs. of solns. of CuCl and, variation with temp., 1351⁴.
- formation in stomach, theories of, 3497⁴.
- heat of diln. and heat capacities of solns. of, 2614⁴.
- heat of diln. of, 2645⁴.
- hydrogen-ion concn. of, effect of tannin on, 2596².
- ionic equil. with CdS, 3618².
- Lae-gang ring formation from NH₃ and, 5385².
- lithium chloride solns., ds. and viscosities of, 1335⁴.
- magnetic susceptibility of, effect of elec. field on, 2616².
- manuf. of, (*Patents.*) 6741^{1,2}, 6753², 1224², 1727², 1908⁴, 3055², 3779¹, 4026², 4782², 5150¹, 5279².
- manuf. of, app. for, P 4781¹.
- and app. therefor, P 936¹.
- furnace for, P 678⁴.
- review on, 5594¹.
- medicinal prepn. for liberating, in stomach, P 1216¹.
- mixt. with HNO₃ of Brit. Pharm., 480².
- mols. of, capture of electrons by, 762¹.
- electron attachment to, 2357⁴.
- energy functions of, 5363².
- optical polarizability of, 4402⁴.
- pancreatic secretion produced by, with a blocked and unblocked vagus, 876⁷.
- permeability of dry collodion membranes to gaseous, 4394⁷.
- photosynthesis of, at low pressures, 2661².
- purification of, P 1451⁴.
- purification of Wood's metal for, cathodes with, 1575².
- Raman effect in, 2365^{2,3}, 3628², 5419².
- reaction: $4\text{HCl} + \text{O}_2 = 2\text{H}_2\text{O} + 2\text{Cl}_2$, 3610⁹.
- reaction of nascent, with Ca₃(PO₄)₂ and other insol. salts, 163².
- reaction of stannates in aq. solu. by change of H-ion concn. with, 3147⁷.
- reaction with alc., velocity of, 4398², 4873⁷.
- with BaSO₄, equil. const. for, 4126⁴.
- with 3-ethyl-2-pentene, 815⁴.
- with olefins of high mol. wt., 3659².
- with SeO₂ and with TeO₂, 1074⁷.
- with Na₂S₂O₃, formation of a compound of S and H₂SO₃ in, 352⁹.
- with Na₂S₂O₃ in presence and absence of As₂O₃, 352⁴.
- with unsatd. cracked gases, 4333⁴.
- reactivity of *D*-glucose in presence of, 5469².
- refractivity of solns. of, effect of concn. on, 559².
- secretion in stomach, effect of insulin and synthalin on, 3025⁹.
- secretion of, into stomach, 2472⁹.
- in smoke, damages to vegetation by, 2463⁴.
- sol. of, ferrous materials in, effect of N on, 2342⁴.
- soln. of Al and of Cd in, kinetics of, 3396¹.
- of Al-Cu alloys in, effect of occluded gases on, 4662⁷.
- of Al in, effect of chlorides on, 4869⁴.
- of Cd in, kinetics of, 558¹, 4124⁴.
- of CaO in, heat of, 5093⁴.

 heat transfer through, 3137².
 homopolar union in excited mols. of, 11⁴.
 ignition (spark) of mixts. with air, 2826².
 in industrial operations, 485⁷.
 in industry, 4024¹.
 inflammability of, 2572⁹.
 inflammability of, reducing, P 1999⁹.
 interconversion of 2 modifications of, 5071⁴.
 ionization in, 3155².
 ionization in, by positive-ion impact at 7000 volts, 2098⁹, 3851¹.
 ionized mols. of, 4881⁴.
 ion mobilities in, effect of an homologous series of amines on, 2357⁹.
 effect of Br on, 5407⁹.
 effect of Cl on, 3401⁹.
 ions (gaseous) of, as cause for appearance of photoelec. spectral selectivity of K, 1050⁹.
 photoelec. activation of K by, 5410³.
 scattering of x rays by, and distribution of electrons in, 5411⁷.
 wave function of, 4129³.
 iron carbonyl formation on storage of com. under pressure, 934⁹, 1536⁹.
 kindling temps. of mixts. with air, 1046¹.
 liquefaction app. for, 2623⁴.
 manuf. and new uses of, 341⁴.
 manuf. of, 1477⁴, 3793⁹, 4780⁹. (*Patents* 213⁹, 240⁴, 488⁷, 676⁹, 677⁴, 1225⁴, 1481⁴, 1909⁹, 2255⁹, 2539⁴, 3058⁹, 3059¹, 3074⁹, 3314⁴, 3781⁹, 3782¹, 4030⁹, 4303⁹, 4307¹, 5016¹, 5282⁴).
 manuf. of, from coal for NH₃ synthesis, P 1739⁹.
 for cooling steam turbo generator sets, P 2514⁴.
 by decompn. of hydrocarbons with steam, catalytic app. for, P 2609⁹.
 in elec. treatment of hydrocarbons and fatty oils, P 1577⁷.
 by electrolysis, P 2377⁴, 3860⁹, 4410⁹.
 P 4413⁹, 5117⁴.
 by electrolysis, app. for, P 46⁴, P 1356⁹.
 P 1577¹, P 2376⁹, 2854⁹, P 3635⁴, P 4150¹, P 4626⁹, P 4899⁹.
 by electrolysis, base load central station in relation to, 3160¹.
 by electrolysis, current and watt efficiencies in, 3169¹.
 by electrolysis from hydrocarbon containing gases, P 2377⁴.
 by electrolysis, plants for, 4147⁴.
 by electrolysis, review on, 341⁴.
 by electrolysis under pressure, 4147⁹.
 by electrolysis using high-voltage arc, with a. c., 342⁹, 3109².
 filter-press electrolyzer for, P 4150⁹.
 from hydrocarbons, P 1728⁹, P 4059⁹.
 by iron-steam process, utilizing water-gases in, P 942⁹.
 in Poland, 5278⁴.
 from water, P 941¹.
 melting curve of, up to 245 kg./sq. cm., 2084⁴.
 -mercurous chloride electrode for detg. H₂ concn., 1558⁷.
 -metal electrodes, 3411³.
 in metals melted in a vacuum, 5073⁹.
 methane formation from CO₂ and, 814⁷.
 methyl ether from, and CO, 5158⁴.

- microelectrode, 4377⁸.
 in mine gases, 579⁸.
 mixts. with CO₂ and air, explosion regions of, 5595².
 with CO₂, inflammability of, 4344¹.
 with CO, action of Fe catalysts on, 2094², 3620⁸, 5091¹.
 with CO, app. for manuf. of, P 4030¹.
 of CO, equil. combustion of, 2624².
 with Cl, Br or O at diff. pressures, explosion temps. of, 983⁹.
 with C₂H₄, deviations from Dalton's law of partial pressures of, 2338¹.
 with He, pressure of, 3140⁹.
 with Hg, spectrum of, 1570⁹.
 with CH₄, action of Co in, 2116¹.
 with CH₄, effect of elec. discharge on, 3861².
 with N, P 675⁹, P 691⁶, P 3782¹.
 with N, activation by electrons and by K ions in formation of NH₃, 4408⁹.
 with N and CO₂, utilization of, P 1188⁷.
 with N, detn. of CO and CH₄ in, 1811².
 with N for NH₃ synthesis, P 486⁹, P 487¹, P 1225⁹, P 1479⁶, P 1726⁹, P 3333⁹, P 4804⁷.
 with N for NH₃ synthesis, drying of, P 1726⁹.
 with N for NH₃ synthesis, reducing gases for use in, P 2811⁹.
 with N for NH₃ synthesis, removal of C₂H₂ from, P 3097⁴.
 with N for NH₃ synthesis, volumetric and thermal study of, 1907².
 with N, purification of, P 3062².
 with N, removing catalyst poisons and other impurities from, P 3060⁹.
 with O, photochemistry of, in presence of ZnO, 2367⁴.
 with O, relation between ionization and chem. reaction in, 4622².
 mol. beams of, reflection of, 2886⁷.
 mol. force of, 5078¹.
 mol. ion of, electronic levels of, 5406³.
 mols. of, change of antisym. into sym. ones, 2613⁹.
 crit. potentials of, 750¹.
 energy functions of, 5363⁴.
 means free path of, 2886⁷.
 mean square angular momentum and diamagnetism of, 4878⁹.
 as mixt. of para- and orthohydrogen, 3382⁹.
 perpendicular deflection of slow electrons by, 3154⁹.
 quantum mechanics of, 4402⁴.
 in relation to electromagnetic quantum theory, 3854¹.
 in sunspots, 1345⁹.
 sym. and antisym., 745⁹.
 transformation of ortho- into para-, detection by measurement of sp. heat, 5071⁴.
 2 quantum excited states of, 4878⁹.
 nascent, use of affinity of Al for O in lab. prepn. of, 5125⁹.
 -nitrogen bond, infra-red absorption by, 3855⁴.
 nitrogen oxide removal from, reactivating catalysts used for, P 4307¹.
 occluded, effect in electrode potential of Ni, 3393⁴.
 ortho-, 2614², 3382⁹, 4383².
 overpotentials produced by films of, less than 1 mol. thick, 1802¹.
 overvoltage in electrolytic Zn refining, effect of foreign elements on, 2107¹.
 overvoltage with alloys, 2091⁹.
 oxidation of uric acid under influence of acceptors of, 401².
 para-, 2614², 3382⁹, 4383², 5361⁴.
 para-, sp. heats of solid, liquid and gaseous, 5071⁴.
 penetration of, into metal cathodes and its effect on tensile properties of metals and their resistance to repeated stresses, 2663⁴.
 permeability of colloids to, 18².
 of dry collodion membranes to, 4394⁷.
 of Ni, Fe and Pt to, 2338¹.
 of rubber mixings to, 5350⁹.
 petroleum hydrocarbon synthesis from CO and, at ordinary pressure, 5035².
 photochem. equil. with Br and HBr, 3856⁹.
 pos. rays of, Doppler effect in, 5413¹.
 intensity decay of, 1055⁹.
 polarization of light from, 1569⁷, 4406⁹.
 pressure, relation to filament resistance in tube contg. glowing W, 5373¹.
 pseudo-components of, 4855².
 purification of, P 223¹, 671⁴, P 672⁹, P 940⁶, P 1481⁴, P 1999⁷, 2536¹, P 3284², P 4781⁶.
 radiometer effect in, 770⁹.
 Raman effect in, 3406⁷, 3628⁹, 4407⁴.
 rays—see Rays.
 reaction: CO + 2H₂ = CH₃OH, free energy of, 2350².
 reaction: Cl₂ + H₂ = 2HCl, 3610⁹.
 reaction: 2H₂ + O₂ = 2H₂O, promoter action of Cu and CuO on, 2873⁹.
 reaction (homogenous) with O, 2346¹.
 reaction (photochem.) with Cl, 2366⁹.
 with Cl at low pressures, 2661².
 with Cl in glass capillary tubes, rate of, 1819⁹.
 with Cl, part played by vessel wall in, 3856⁹.
 with halogens, 3856⁷.
 with O, velocity of, 2887⁴.
 reactions at high temps. and pressures. iron app. for, P 1318¹.
 reaction with CO—see also *Methanol*.
 with CO, catalysts for, P 4306⁹.
 with C₂H₄ and satd. hydrocarbons under influence of excited, 5419¹.
 with N by silent discharge, ionization in relation to, 4622².
 with O, catalysis by Ag, 4874¹.
 with O, effect of NO₂ on, 1338⁹, 3620².
 with O, kinetics of, 2870⁴.
 with O on Pt, 5398⁹.
 with O under elec. discharges, 41².
 with O under influence of cathode rays, 774².
 recovery from gaseous mixts., P 4541⁴.
 recovery from metals in elec. furnaces, 4641².
 reduction of glasses in, 5277⁹.
 of hydrazoic acid with, in presence of colloidal Pd, 5427¹.
 of Na₂WO₄ with, 4633⁴.
 of thoria by, 5091⁴.
 of WO₃ by, 2875⁴.
 Röntgen-ray, scattering by, 4883⁹.
 sepn. from CO₂, P 2255⁹.
 sepn. from coke-oven gas or lighting gas by liquefaction, P 223².

- sepn. from gaseous mixts., app. for, P 1188³.
 sepn. from gaseous mixts. by partial liquefaction, P 5519².
 in soldering and welding, 364⁴.
 soly. and diffusion of, in metals, 1850².
 soly. and invasion coeff. of, in water, 1042².
 soly. in Al and in Al-Cu alloy, 4917¹.
 spectrum in ultra-violet excited by active N, 768⁴.
 spectrum of, 26³, 34³, 37¹, 38⁴, 339⁴, 564⁴, 772², 1052², 1053^{1,3,5}, 1054⁴, 1353⁴, 1564⁴, 1567¹, 1813³, 1814⁴, 2096⁴, 2656⁴, 2883³, 2884⁴, 2885³, 3162^{1,4,5}, 3163³, 3405⁴, 3629^{1,3}, 4401⁴, 4403⁴, 4406², 5102⁴, 5103⁴, 5104⁴, 5105⁴, 5361⁷, 5415⁴, 5417³.
 spectrum of, effect of elec. field on, 2652⁴.
 effect of Hg on, 5106⁷.
 in solar atm., 5095².
 Stark effect in, 767³, 1351⁴, 2363⁴, 2883^{4,7}, 4406⁴, 5107^{4,5}.
 Stark effect (second-order) in Balmer series of, 3626⁷.
 in Staassfurt K salt mines, 4603¹.
 swells in canned prunes, effect of exhausting on formation of, 1965⁷.
 symmetry of mols. and atoms of, 2097³.
 system: $\text{NH}_3(\text{l})$ - $\text{NH}_3(\text{g})$, $\text{H}_2(\text{g})$, $\text{N}_2(\text{g})$, soly. in, 2621⁴.
 system: MeOH - CO -, 3148⁴.
 system: O_2 - H_2O -, 4127⁴.
 system: Pd-, magnetic susceptibility of, 4856².
 system: Pd-, x-ray study of, 4137⁴.
 tar pyrogenous decompn. in presence of, 4327³.
 thermal cond. of, and its mixts., 3140⁴.
 transfer of, between org. compds., 4671⁴.
 treating hydrocarbon oils with, P 3569².
 treatment of semi-coke and lignite with, effect of a liquid dispersion medium on, 3559⁷.
 virial coeff. (2nd) of, 4387³.
Hydrogen, analysis. (See also "combustion" under *Analysis*.)
 detection in mine gases, 579⁴.
 detection of O, app. for, P 552⁴.
 detn., 51², 1587⁴, 3871¹.
 app. for, 53⁴, 1015⁴.
 furnace for, 3182³.
 detn. in coal, 2268⁴.
 in fuels, 2010⁴.
 in gas, app. for, 5302¹.
 in gases, 3328⁴, P 3841⁴.
 in org. substances, 579⁴, 3875⁴.
 in O, P 580⁷.
 in steel, 3182³.
 in volatile, explosive and easily carbonizable org. liquids, app. for, 1530⁴.
 detn. of exchangeable H in soils, 1109⁴.
 detn. of H emitted by gl.s.s, 5287⁴.
 detn. of O, P 580⁷.
 detn. of O and app. therefor, 3183¹.
 detn. with Orsat app., 4906¹.
Hydrogen arsenide. See *Arsine*.
Hydrogenation. (See also *Reduction*.) P 3034⁴, P 3997⁴, P 4756¹, 5398².
 of acetals (aliphatic), 3900⁴.
 alcs. from products of, P 4050⁴.
 of amines, (aromatic), P 846⁴, P 1907⁷, P 3934^{1,7}, P 4228¹.
 of aniline homologs, P 1420⁴.
 antiknock motor fuels produced by destructive, P 4568².
 app. for, 734⁷, P 3606¹.
 app. with heating device for, P 3605⁷.
 of aromatic compds., and decompn. during, 2174⁴, 3697¹, 3926¹.
 Bergius process, spontaneous decompn. reaction of, 1499⁴.
 of bituminous materials, P 2022³.
 of bituminous substances, fuel, etc., P 1251¹.
 books: *I combustibili liquidi per i motori endotermici. Il processo Bergius*, 689⁴.
Contribution à l'étude du mécanisme de l'catalytique des oximes, 3231⁴.
 of brown coal, 4325⁴.
 of carbonaceous materials, P 264^{4,5}, P 503^{3,4,5,6,7,8,9}, P 3074¹, P 3341¹, P 3796⁴, P 4050⁴, P 4328^{3,4,5,6,7,8,9}, P 4329¹, P 5562⁴.
 of carbon oxides, P 2000⁴.
 of carbon oxides, sepn. of products of, P 1907⁴.
 catalysis of, theory of, 2872⁴.
 catalysts for, (*Patent*.) 247³, 940⁴, 1227⁴, 2276^{1,2}, 3060³, 3073³, 3782⁴, 4542⁴, 4709^{4,4}.
 cathode-ray app. for, P 3379⁴.
 charging app. for use in destructive, P 457⁴.
 of cinchona alkaloids, P 4300⁴.
 of coal, P 690⁴, P 691¹, 1491⁷, P 1496⁴, 1736⁴, P 1740⁴, 2806³, P 2810⁴, 3070⁴, P 3073⁴, 3791¹, 4045^{4,4}, 4323³, P 5022³.
 of coal, app. for charging vessels in, P 3605⁷.
 detn. of temp. for, 3791¹.
 effect of compn., pressure, temp. and catalysts on, 1243⁴.
 extn. of oils, etc., from residues from, P 4558⁴.
 liquid hydrocarbons from residual gases in, P 692⁴.
 oil recoveries from English coals by, 2271².
 pyrogenous decompn. of products of, P 2278⁴.
 in relation to its adsorptive capacity, 3070⁴.
 in relation to origin of petroleum, 1742⁴.
 reviews on, 206⁴, 1245¹, 2015¹, 2015¹, 3557¹.
 of coal (Eocene), 4796⁷.
 of coal, etc., oil extn. from residues in, P 3332⁷.
 of coal of Australia, review on, 2548¹.
 of coals of Spain, 1491⁴.
 of coal sol. products, P 3332⁴.
 coal suspensions or pastes for, P 1496⁴.
 of coal, tar, oils, etc., P 265¹, P 502⁴, P 690⁴, P 691¹, P 1496⁴, P 1739⁴, P 1740⁴, P 2022³, P 2276¹, 2284⁴, P 2555^{1,2,3,4,5,6,7,8,9}, P 3331⁴, P 3563⁷, P 3796⁴, P 4329¹, P 4330¹, P 4557⁴, P 4802^{4,4,4,4}.
 of conjugated compds., 2482².
 in conversion of heavy fuel oil, 4561¹.
 of cyclic compds., 131⁴, 132¹.
 of esters, P 2986⁷.
 of esters of aromatic carboxylic acids, P 1496⁴.
 of ethers of phenol and naphthol, 3673¹.
 of ethylene compds. with the formation of two asymmetric carbon atoms, 385⁴.
 of ethylene on Cu catalyst, kinetics of, 4397⁴.
 of ethylenic esters, 2422^{3,4}.
 of fats, P 3997⁴.
 of fuel such as lignite, P 4557⁴.
 of gaseous products from heavy hydrocarbons, etc., P 698¹.
 gases for, P 1282².

- of hemins and porphyrins, 1414⁴.
 at high temp. and high pressure, 2267⁹.
 hydrocarbon derivs. contg. O or S from, P 4802⁴.
 hydrocarbon manuf. by, P 690⁶, P 1739⁸, 4553³, P 5306^{4, 5}.
 of hydrocarbon oils, P 697².
 of hydrocarbon oils, app. for, P 274³, P 2820⁴.
 hydrocarbon oil sepn. from products of destructive, P 4566².
 of hydrocarbons, P 274³, P 2086⁴.
 hydrocarbons of high b. p. from products of, P 4050⁴.
 of imidazole derivs., 388⁷.
 improving perfumery ingredients by, P 4778⁹.
 of δ -lactones, 3211¹.
 of lignite and tar in Germany, 2266⁹.
 of linseed oil, 4839⁶.
 of liquids, agitating app. for, P 4108².
 lubricating and insulating oils by, P 4814⁹.
 of methyl esters of highly unsatd. acids with Pt black, 2586⁹.
 of methyl esters of oleic and linolic acids, 534⁴.
 of mixts. of oil and de-ashed carbonaceous material, P 1740⁴.
 of 2-naphthoic acid, 2172¹.
 of nitriles and oximes, P 2446⁴.
 of nitrogen compds., P 4483⁹.
 of oil and coal products, P 274³.
 oil residues from, distn. of, P 4049⁹.
 of oils, 2842⁹.
 effect of air on activity of catalysts for, 4839⁶.
 fatty acids from, 3822⁸.
 Ni as catalyst for, 4839⁶.
 of oils and brown coal tar, P 5037².
 oils from, sepg. solids from, P 3341⁴.
 of oils from shale, etc., app. for, P 4815⁴.
 of org. compds., P 1135⁷, P 4227⁸, P 5192⁹.
 of org. compds., catalysis with Ni, 5090⁹.
 of oxidized oils, 3362².
 paraffin wax decompn. by heat in, 4812⁹.
 of petroleum, P 2291⁴, P 3340⁹, 3798⁴, P 4815⁴.
 extn. of resin from residues left after distg. products of, P 2313⁹.
 review on, 268³.
 of petroleum, etc., P 4059³, P 5568⁶.
 of petroleum, tars, etc., or their distn products, P 5312^{4, 5}.
 of phenol-ketone condensation products, P 1421².
 of pitch, 3561⁴.
 of polyhydroxy compds., P 3232⁹.
 under pressure in presence of Ni salts, 4694⁴.
 pre-treatment of coal, tar, mineral oils, etc., for, P 1249⁹.
 process of I. G. Farbenindustrie A.-G., 4323¹.
 under reduced pressure in presence of catalysts, 2421^{3, 4}.
 of rubber by Bergius process, 5349⁹.
 of semi-coke and lignite, effect of a liquid dispersion medium on, 3559⁹.
 semi-, of C_2H_2 compds. and dependence of constitution of the C_2H_2 compds. on reaction velocity, 384¹.
 of silico-org. compds., 3661⁷.
 of solid fuels, 1736⁴.
 of soy-bean oil, 534³, 1003².
 stirring app. (spiral) for, P 1784⁴.
 of sunflower oil, effect of temp. on, 4839⁶.
 of tar oil, P 506⁴.
 of tars, 2018⁷.
 of transformer oils, 2815².
 ultra-violet or other short radiations in, P 2540⁹.
 of unsatd. compds., 2432².
 of unsatd. Me esters with Pt catalysts, 1872⁷.
 waste gases from, of coal, tars, mineral oils, etc., prepn. of oxygenated, sulfurized hydrocarbons from, P 3796⁴.
 of wood tar, 3567⁴.
Hydrogen bromide. See *Hydrobromic acid*.
Hydrogen chloride. See *Hydrochloric acid*.
Hydrogen compounds. (See also *Hydrides*, etc.)
 dissoen. of mols.: CH, NH and OH, heat of, 4856¹.
 electronic states and band spectra of CaH, ZnH and CdH, 770¹.
 electronic states and band spectra of OH, MgH and HgH, 769⁹.
 with oxygen (OH), formation by thermal decompn. of water vapor, 5402¹.
 spectrum of, 4139⁶.
 temp. of under-water spark as computed from distribution of intensity of absorption bands of, 1812⁷.
 in water-vapor discharge tube, 4136⁴.
 photosensitized band fluorescence of OH, HgH and NH, 771¹.
 Raman effect of, 4143⁶.
Hydrogen cyanide. See *Hydrocyanic acid*.
Hydrogen dioxide. See *Hydrogen peroxide*.
Hydrogen halides, addn. products with salts of heavy metals, 575⁴.
 elec. cond. of, 3391⁴.
 magnetic rotation of aq. solns. of, 3391⁴.
 reaction with acetylene gas, 4678⁷.
 salts with inorg. halide salts of aniline, 2427¹.
Hydrogen iodide. See *Hydroiodic acid*.
Hydrogen ion. (See also *Hydrogen-ion concentration*; *Landolt reaction*.)

- Hydroxylamineisosulfonic acid**, sulfate, 2372².
- Hydroxyl group**, effect on reduction potentials of phenanthrenequinones, 5472⁸, elec. moments of, in phenol and in aliphatic alcs., 5364¹, in flames, 1353⁴, origin of, 772⁸, reactivity of, in alcs., 5156⁸, replacement (isomorphous) of Cl by, 2164², replacement of, in esters of hydroxy acids by Cl, 2153⁹.
- Hydroxyl ion**, adsorption by oxides, 1036⁹, catalytic coeffs. of, in mutarotation of glucose, lactose and tetramethylglucose, 1338⁸, concn. of, expression of, 558¹, concn. of, iodosobenzene electrode for detn. of, 311³, decompn. of nitrosotriacetoneamine in presence of, 754², detn. of, salt error of indicators in, due to standard alk. buffers, 4160⁹, equil. with methoxide ion in MeOH:H₂O mixts., 5392², inversion of photovoltaic effect by, 3626¹, mobility of, 3843², 4395², 5389⁹, spinal medulla and, 4253⁹, thermal dissocn. of steam into H and, 5092²
- Hydrus platurus**, venom of, 3743⁸.
- Hygiene** (See also *Swimming pools*) books. Public Health and, 1710¹, Handbuch der hygienischen Untersuchungsmethoden, 2457¹, Cours d', 5205², Handbuch der biol. Arbeitsmethoden — Hygien. Methoden d. Luftuntersuchg., 5211⁴.
- Hygrine**, formation of, 1883⁹
- Hygrometers**, condensation, 2⁸ wet and dry-bulb, P 550⁹
- Hygroscopicity**, of coal (fine), 5028⁴, detn. of, of building materials, app. for, P 1489⁹ of fertilizers and mixts., 2236⁷, of fibers from viscose, 4076⁸, of glass, 5380²
- Hygroscopic substances**, storing, P 5001²
- Hyla**, cutaneous secretions of *H. faber*, *H. albomarginata* and *H. crepidosila*, 3763³
- Hylemyia, antiqua**, control of, 5539², insecticides for *H. brassicae* and *H. antiqua*, Hg salts as, 3295¹
- Hymatomelanic acid**, in low-grade coals and lignites, 1492²
- Hymenomycetes**, enzymes of fungus, 4488¹
- Hydrosychoic acid**, systems, 4226².
- Hyosine**. See *Scopolamine*.
- Hyoscyamine**, decompn. of, in aq. soln., 5006¹, detn. in belladonna leaves and their ext., 472⁴ in *Hyoscyamus* leaves infected with *Peronospora* and mildew, 474⁴, in *Hyoscyamus reticulatus*, 472⁸, narcosis by, and effect of Et₂O, 207¹, pharmacol. synergism of, 1684⁴, poisoning with, 4271⁸, reactions of, 3455¹, standardization and stabilization of, 5515¹
- Hyoscyamus, alba**, atropine content of, 476⁸, alkaloid content of leaves infected with *Peronospora* and mildew, 474⁴, assay of leaves, 4775¹, *niger*—see *Henbane*, *reticulatus*, alkaloids of, 472⁸, solanaceous leaves in, and their recognition, 3773¹, stabilization of leaves, exts. and tinctures of, with hydrocarbons, 4021³.
- Hyperchloremia**. See *Chloremia*.
- Hypercholesterolemia**. See *Cholesterolemia*

- Hyperglobulia vera**, effect of spleen exts. on, 4730⁹.
- Hyperglobulism**, in voluntary apnea, 3500⁹.
- Hyperglucemia**. See *Glucemia*.
- Hypericum**, cultural expts. with, 474⁴.
- Hyperinsulinism**, 4258⁹.
- Hyperlactacidemia**. See *Lactacidemia*.
- Hyperplasia**, production in alveolar epithelium of lung, 1680⁶.
- Hypersecretion**, 4740¹.
- Hypersensitiveness**. See *Anaphylaxis*.
- Hypersusceptibility**. See *Anaphylaxis*.
- Hypertension**. See *Blood pressure*.
- Hypothermy**. See *Body temperature*.
- Hyperthyreosis**, diagnosis, pathology and therapy of, 3510⁶.
- metabolism in, effect of endocrine preps on, 3085⁶.
- metabolism in, effect of suprarenal preps on, 3500⁶.
- Hyperthyroidism**, calcium and P metabolism in, 3497¹.
- detection of, Reid Hunt reaction for, 4731⁴.
- fate of thyroid hormone in body in, 1949⁶.
- insulin sensitivity in, 3743⁷.
- metabolism in, effect of diathermy of thyroid on, 886¹.
- relation of thyroid to parathyroid in, 1673¹.
- Hypertonic solutions**, of glucose, effect on excretion of water and chlorides by kidney, 202⁴.
- physiol. action of, chem. basis of, 881².
- vol. changes of red blood cells of cows and fetuses in, 879⁶.
- Hypertony**, climacteric, 3501⁹.
- Hypervitaminosis**, 1937¹, 4501⁵, 5492^{2,4}.
- D, from irradiated ergosterol and from cod-liver oil, 5220⁷.
- from irradiated ergosterol, 1942⁶.
- in rickets therapy, 4724⁶.
- Hypheae**, fungus, compn. of, 1435¹.
- Hyphantria cunea**, insecticides for, Pb salts as, 3295¹.
- Hypnal**, constitution of, 141¹.
- Hypnotics**. (See also *Notonal*) P 2534¹.
- from barbituric acid, P 483¹, P 5012⁶.
- barbituric acid derivs. as, 5508⁶.
- benzylated, synthesis of, 2245¹.
- effect on fish of genus *Gobius*, 911³.
- ester of brominated valeric acid as, 4973⁹.
- isobutylallylbarbituric acid deriv., P 3776⁶.
- isobutyl- π propylbarbituric acid, P 5012⁶.
- ureide, 1471².
- urides of bromovaleric acids as, 375⁷.
- Hypobromites**, decompn. of solns. of, by charcoal, 2867⁴.
- Hypobromous acid**. (See also *Bromine water*) compd. with benzidine, 2118¹.
- Hypocalcemia**, from bacterial toxins in para-thyroid insufficiency, 895¹.
- intestinal permeability in, from oxalates and phosphates, 895¹.
- lesions of intestinal mucosa in, from oxalates and phosphates, 895¹.
- Hypochloremia**, in nephritis, 1951⁴.
- vomiting and, 4504².
- Hypochlorites**. (See also *Bleaching: Bleaching agents*.)
- chlorine detn. in, and app. therefor, 3182⁶.
- detn. of, 870¹.
- effect on strength of textiles, 5044⁹.
- generator (lab.) for making, 4367⁴.
- oxidation potentials of solns. of, 2345⁹.
- petroleum treatment with, 4054¹, 4055¹.
- solns. of, compn. for producing, P 3781⁷.
- Hypochlorous acid**. (See also *Chlorine water*.)
- antidotes for, 3522⁴.
- compd. with benzidine, 2118¹.
- prepn. of, 2937¹.
- reaction with aromatic hydrocarbons, 1399¹.
- as reagent in microanalysis, 1836⁷.
- thermochemistry of, and salts in aq. soln., 5403⁹.
- Hypoglucemia**. (See also *Blood sugar; Glucemia*.)
- alimentary, 640⁹.
- from bile acids, effect of hormones, parasympathetic drugs, alkaloids and salts on, 203².
- from colloidal S, 3741⁶.
- death by, in acute trypanosomiasis, 435⁷.
- effect on external secretion of pancreas, 645⁷.
- guanidine structure and, 2209⁶.
- hydroxymethylglyoxal effect on, 4974⁹.
- insulin, 3976⁷, 4266³, 4267⁹.
- effect of dihydroxyacetone on, 199⁴.
- effect on higher nerve centers, 904⁶.
- eye pressure in, 899⁶.
- of lactation, 640⁴.
- in nursing young of albino rat in vitamin-B deficiency, 3957⁴.
- from pancreatic ext., 2190⁶.
- in rabbits, 431⁹.
- spontaneous, 640⁶.
- spontaneous coma of, 637⁹.
- substance in oysters causing, 3718⁶.
- substances in blood causing, 4735¹.
- substances producing, 2425¹.
- substances producing, in cereals and legumes, 3740⁹.
- Hypoidites**, decompn. of solns. of, by charcoal, 2867⁴.
- Hypoidous acid**, compd. with benzidine, 2118¹.
- Hypoparathyroidism**, calcium and P studies in idiopathic, 5231⁷.
- α -**Hypophamine** (*oxytocin*), 3540¹.
- antidiuretic action of, 4734⁴.
- effect on blood, 3983⁶.
- effect on blood pressure, 4264⁶.
- pharmacol. action of, 1440⁶.
- β -**Hypophamine** (*avopressin*), 3540¹.
- antidiuretic action of, 4734⁴.
- effect on blood, 3983⁶.
- effect on blood pressure, 4264⁶.
- pharmacol. action of, 1440⁶.
- Hypophosphites**, addn. products of hydrazides and, 575⁴.
- Hypophosphoric acid**, 2383⁶.
- detn. of, 355⁶.
- mol. wt. and constitution of, 1584⁴.
- prepn. of, 3416⁶.
- Hypophosphorous acid**, reaction with Bi salts, 4631⁷.
- synthesis of, 1584⁷.
- Hypophysectomy**. See "extirpation of" under *Pituitary body*.
- Hypophysin** (*pituglandol*), effect on amnion of hen and goose, 206⁴.
- effect on kidneys, 2764⁴.
- on water and chloride exchange, 2496¹.
- on water exchange in muscle, 2496⁶.
- Hypophysis**. See *Pituitary body*.
- Hyporit**. See *Caporite*.
- Hypostase**, in Onagraceae ovule and its function, 183⁷.
- Hyposulfites**, detn. of, 4161¹.

- dyes contg., destruction of wool by, 1753⁴.
 effect on muslin, 519².
Hyposulfurous acid, 3147³.
Hypotension. See *Blood pressure*.
Hypothalamus, diabetes insipidus and, 189⁴.
Hypothyreosis, metabolism in, effect of diathermy of thyroid on, 886¹.
Hypothyroidism. See *Hypothyreosis*.
Hypotonal, effect on blood vessels, 4268⁸, 4493³.
Hypotonic solutions, effect on cerebrospinal fluid, 3965⁴.
Hypoxanthine, in muscle, 886³.
 oxidases of xanthine and of, effect of As on oxidation-reduction of, 162⁸.
Hyssopin, constitution of, 2431⁴.
Hyssopus, *crelaccus*, oil from, 2248⁸.
 cultural expts. with, 474⁴.
 officinalis, oil from, 1717¹, 1722².
Hystazarin (2,3 - dihydroxyanthraquinone), addn. compd. with NH₃, 380⁸.
 —, 1,1' - (α - amino - β - hydroxyethylene) bis(4-(aminomethyl)-, di-HCl, 2174³.
 —, 1,4-bis(phthalimidomethyl)-, 2173⁸.
 —, 1,4 - bis(trichloroacetamidomethyl)-, 2173⁸.
 —, 1-methoxy-, and esters, 4697⁴.
Hysteresis, adsorption, 5380⁹.
 in iron-Ni alloys, stability of, 5459².
 magnetic—see *Magnetic hysteresis*.
 in phys.-chem. systems, 2640⁸.
 in pos. ion emission from hot Pt, 1347⁴.
 resistance, of Sn, Pb, In and Tl at low temps., 2337³.
 in standard cells, 4894⁶.
Ianthinite, refractive index of, 4648⁹.
Ice, 4288².
 books: Engineering, 1701⁴; Water for Ice-Making, 4290².
 condensers for manuf. of, 917⁹.
 crystal structure of, 1033⁴, 5361¹.
 dry—see *Carbon dioxide*.
 friction along gliding planes of crystals of, effect of pressure on, 1790⁸.
 heat cond. of, 5088⁴.
 loosening accumulations of, "thermal mine" for, P 681².
 Raman effect in cryst., 338⁸.
 recrystn. of, 5376⁴.
 water purification for freezing, P 3524¹.
Ice cream, coned. mix for, and app. for making, P 1185¹.
 consistency of mixts. for, 216⁴.
 contg. cocoa butter and chocolate, P 2510⁴.
 density of, 1181².
 effect of gelatins on, 1694⁹.
 effect of salts on phys. properties of mixes for, 2507³.
 emulsions in manuf. of, mech. stabilization of, 3756⁴.
 homogenizing and reducing viscosity of mixes, P 454¹.
 lactose soly. relations in, 1334⁴.
 nutritive value of, 3956⁸.
 sanitary control of, 3756³.
 Sterculia gum in manuf. of, 4978⁴.
 studies on, 2507².
 vanilla in, freezing out of, 2507⁴.
Iceland moss, of German Pharm., 236⁴.
Ice substitutes, for skating rinks, P 4031⁴.
Ichthargan, behavior in aq. soln., 3305⁷.
Ichthyol, density of, in comparison with that of cacao butter, 481¹.
 ointments contg., antiseptic power of, 1212⁹.
 slate contg., in Canton Ticino, 5009².
Icos-. See *Eicos-*.
Icterus. See *Jaundice*.
Idiocy. See *Mental disorders*.
Idraprid, soly. and emulsifying property of mixts. contg., 3388⁹.
Igneous rock. See *Rocks*.
Ignition. (See also *Combustion*; *Inflammability*.)
 of carbon monoxide, effect of steam and of H₂ on, 954⁸.
 of coal and of pure C, 2012⁸.
 of detonating gas, 5374⁴.
 of detonating gas by H atoms, 1792⁹.
 elec., for coal-dust burners, P 4628⁸.
 in engines, effects of knock-suppressing and knock-inducing substances on, 4335².
 in engines of injection type, compn. for, P 690².
 of fire damp, 55947⁸.
 of fire damp by explosives, 2825³.
 gas burner with automatic, P 4601⁴.
 of gas by spark, 1046¹, 1271⁸, 2296⁴, 3329⁷.
 of hydrogen-air mixt. by spark, 2826².
 of olefin and air mixts. in a closed spherical vessel, 2416⁸.
 of phosphine, pressures for, 5072⁴.
 spontaneous, of benzine, 1275⁴.
 of coal, 5299⁷.
 in coal seams, air analyses as index to, 4344⁸.
 of coals in relation to their adsorptive capacity, 3070⁷.
 delay period in, 2827².
 temp. of, detn. of 1449⁸.
 of fuels, 950⁷.
 of fuels, temp. of, variation in presence of diff. compds., 5311².
 of liquid fuels, temps. of, 1242⁸.
 of oily textile fibers, prevention with negative catalysts and 2-naphthol, 1519⁹.
 of semi-coke from brown coal, 2548³.
 temps. of, of flammable liquids, 2296⁸.
 temps. of, of mixts. of pure substances and of gasolines, 3566⁹.
 temp. of, of aromatic nitro explosive, 3575².
 of mixts. of air and H, 1046¹.
 of mixts. of CO and air, 3810⁹.
 of powd. coal, 5028⁴.
 tip for cigars and cigarettes, P 1730⁴, P 4074⁴.
 velocity of, of inflammable substances in air, 2035⁸.
Insulin. See *Insulin*.
Ilex. See *Holly*; *Malé*.
Illicium. See *Star anise*.
Illinium, concn. of, 4157⁸.
 review on, 3137⁴.
Illumination. (See also *Lamps*.)
 for colorimeter (Stammers'), 1314¹.
 for microscopes, device for, P 1024⁷.
 for ultramicroscope, app. for, P 4601⁹.
Ilmenite, of Australia (South), 5446¹.
 electrolytic recovery of Fe and TiO₂ from, 341⁴.
 helium content of, 4654⁸.
 in magnetite, 4425⁴.
 metallization of Fe oxide in, 3194⁸, 5452¹.
 titanium production from, 87⁴.
Imbibition, by muscles, effect of alkali and alk earth ions on, 3263⁹.
 water of, of paper, detn. of, 4069².

Imhoff tanks. See *Sewage*.

Imidazole (1,3-diazole; *glyoxaline*),

cleavage of ring in, 1639^a.

derivs., 4216³.

derivs., hydrogenation of, 388⁷.

Rung-Behren-Pinner reaction with derivs. of, 602⁸, 2977⁹.

—, **2-benzoyl-5-phenyl-***, so-called, of Pinner, 602⁸.

—, **1-butyl-**, and picrate, 1638⁸.

—, **dibromo-2,4,5-tricyclohexyltetrahydro-**, -HBr, 389².

—, **1,2-diethyl-**, prepn. of, 1638⁷.

—, **4,5-dihydro-2,4,5-triphenyl-**. See *Amarine*.

 pharmacol. action of, administered by stomach, 2498⁷.
 photochem. reactions with Na citrate and, with Na malate, 3856¹.
 photochem. reaction with acetone in aq. HCl solns., effect of variation of incident energy on velocity of, 340⁹.
 photochem. reaction with Me₂CO, 772⁹.
 photochem. reaction with Na lactate, 2887¹.
 in plants, increasing, 1712⁷.
 poisoning by, after pyelography with umbrenal, 898⁹.
 radioactivity of, in relation to isobars of neighboring elements, 1808¹.
 reactions in infra-red, 5414³.
 reaction: $2KBrO_3 + I_2 \rightleftharpoons 2KIO_3 + Br_2$, 503⁹.
 reaction with H₂O₂ and iodide ion, 753⁹.
 with H₃PO₄ and with Na₂PO₄, rate of, 2092³.
 with KNO₃ in the dark and in the light, kinetics of, 337⁹.
 with Na deriv. of dimethyl chloromalonate, 3211³.
 with Na lactate and with Na tartrate, effect of light intensity on rate of, 4144⁷.
 with SrO and its hydrates, 1834¹.
 with thiosulfates, effect of nonelectrolyte on rate of, 2092³.
 recovery from sodium nitrate, P 3059⁹.
 Röntgen-ray absorption by free, and by combined, 5412⁴.
 salt contg., 5248⁹.
 in sea foods of Pacific Coast, 1697³.
 in seaweed, 4780⁷.
 sepn. from solns. of CHI₃ in CHCl₃ with x-rays, 5112⁹.
 sepn. of, thiosulfate process of, 4903⁹.
 sodium flame, 319⁷.
 in soils and plants, 2233⁹.
 soly. in EtOH, 668⁹.
 soly. of, effect of alkali and alk. earth halides on, 5084³.
 soly. of, in solns. of halides, 2860⁹.
 solns. of, P 940⁹.

- solns. of, constituents of, 3856^a.
 spectrum of, 32^a, 30^a, 2097¹, 2655⁷.
 in spinach, loss in cooking, 4978^a.
 survey of Nebraska, 4505^a.
 systems: Me_2CO -, AcOEt -, EtOH -, and Et_2O -, 1868^a.
 therapeutic use of S and, 3020^a.
 therapy, 2213^a.
 thermal equil. with C_2H_4 and $\text{C}_2\text{H}_4\text{I}_2$, 4401².
 thyroid gland activity and, 623^a.
 in thyroid gland, seasonal variations of, 1668⁷.
 in thyroid glands of Uruguian cattle, 668^a.
 in thyroid of domestic animals, 3501⁴.
 in thyroid of *Rana laevis*, *R. erinacea* and haddock, 3277⁴.
 in thyroid preps., biol. activity and, 1990¹.
 thyroid secretion action and, 3495².
 in thyroids in health and disease, 3000^a.
 in thyroxine, role of, 911⁴.
 tincture, antiseptic power of, 1212⁷.
 chem. changes on storage, 470^a.
 effect on yeast, 4241².
 incompatibility of cherry laurel water and, 2758⁴.
 KI detn. in, 236^a, 1467^a.
 as skin disinfectant, 3249^a.
 ultra-violet absorption by, 5107¹.
 in water of N. Carolina, 4757^a.
 in water, relation to goiter in Finland, 638¹.
 in waters in goitrous dists., 3037^a.
 in water supplies of Mass., 1871^a.
Iodine, analysis. (See also *Iodides*.)
 detection, 2390¹, 4645².

- Iron salts**, acidity of, effect of age and temp. on, 4365⁴.
 activation of galena by, 4890⁷.
 as aldehydases and as oxido-reductases, 169¹, 2.
 in animal organism, changes in sol. ferrous, 8911¹.
 for briquetting Fe ores or blast-furnace dust, P 2414¹.
 as catalysts for oxidation of carbohydrates and polyhydric alcs., 1116¹.
 colloidal nature of scale, 4535⁹.
 effect on CO_2 assimilation by plants, 2201⁴.
 ferric-ferrous electrode, oxidation-reduction potentials of, 1802¹.
 as fertilizer in preventing bush sickness, 4010².
 Herschel effect with, 1359².
 hydrolysis of, mechanism of, 4122⁴.
 imbibition by walls of cerebral capillaries in proximity to old hemorrhagic foci, 191¹.
 light action on citric acid in presence of, 1059².
 poisoning of fishes by, 4273¹.
 reaction with $BrCN$ and with HCN , 3868⁵.
 removal from starch materials, P 541¹.
 tanning with, P 5059².
- Iron silicate**, inclusions in steel, 801¹.
- Iron sodium sulfate**, 3149⁹.
- Ironstones**, of South Africa, 1083⁷.
- Iron sulfates**, $FeSO_4$, from aniline waste liquor, 4823⁴.
 $FeSO_4$, as catalyst in oxidation of anisole and phenol, 1630⁹.
 chlorinated, as water coagulant, 211¹, 5525⁴, 5526⁹.
 effect of x rays on solns. of, 3160⁹.
 effect on alkali soil, 229⁹, 3531².
 effect on rats on vitamin-A free diet, 4498⁵.
 extinction coeffs. of solns. of I and variation with temp., 1351².
 as fungicide for *Erysiphe graminis* and *Puccinia dispersa*, 2528⁵.
 hemitritramethyl alcoholate, 4860⁹.
 injury from feeding, 1158¹.
 reaction with I in infra-red, 5414⁹.
 soil treatment with, effect on alkalinity content of pomegranate, 465¹.
 soly. in H_2O , 3616⁹.
 spectrum of, in explosive gaseous mixture, 5103⁴.
 stability of solns. of, and their use in standardizing $KMnO_4$, 1839⁹.
 system: $Na_2SO_4-H_2O$ -, 3149⁹.
 titration of solns. of, with $K_2Cr_2O_7$, 2675².
 $Fe_2(SO_4)_3$, liquor ferri persulphatis, limit for Fe in, 5274⁴.
 reaction with CuS , 2383¹.
- Iron sulfides**, FeS , coloring of glass by, 200¹.
 FeS , detection in Fe, 578¹.
 fusion with Na_2S , 4914⁴.
 inclusions in iron, 78¹.

- reaction with magnetite in Cu reverberatory furnace, rate of, 1374⁴.
 system: Fe-, 361⁴.
 system: MnS-, 1045⁴.
 systems: PbSiO₃-, Cu₂SiO₃- and NiSiO₃-, 2642².
 world stock of, 4025⁴.
 FeS₂, colloidal, prepn. of neg., 3841³.
 FeS₂, crystal structure of, 2084⁷.
- Iron thiocyanate**, photochem. decomn. of, 2887¹, 4144⁴.
- Iron tungstate**, crystal structure of, 2619¹.
- Irritability**, of pigment, muscle and glandular cells, physicochem. principles of, 3239⁴.
 in relation to metabolism of gas and sugar, 1174⁴.
- Irritants**, effect of non-sp., on capillaries and white blood picture in tuberculosis, 5510⁴.
- Ismamine blue**, therapy of malignant tumors with, 910².
- Isatide**, constitution of, 2969⁴.
- Isatin** (2-hydroxy-3-pseudoindolone) (See also *Pseudoisatin*.)
 derivs., P 1143¹, P 1512¹.
 derivs., and their isomerization to quinalone, 2970⁴.
 derivs., water-sol., P 2723³.
 as dye, 280⁴.
 reaction with CH₃N₂, 2441¹, 2442⁷.
 reduction of, P 3582².
 sodium deriv., reaction with esters, 2970⁴.
 , 4 (and 6)-chloro-5-methyl-, P 2725⁴.
 , methyl-, P 2725⁴.
- Isatin-3-aml***, isomerism of, 4469⁴.
- Isatin pinacol***, 2970².
 , diacetyl-, 2970¹.
- Isatogen**, nitro-2-phenyl-(?), 2969⁴.
 , 3-(nitrophenyl)-(?), 2969⁴.
 , 3-phenyl-, 2969⁴.
- Isatogenic acid**, derivs., isomers of, 3690⁴.
- Ischemia**, outlying acidosis due to functional, 1958¹.
- Ishikawite**, helium content and age of, 4654¹.
- Isoagglutination**. See *Agglutination*; *Hemagglutination*.
- Isoagglutinins**. See *Agglutinins*.
- Isoamyl alcohol**, effect of fractional dose and of single dose of same amt., 206¹.
 heats of wetting and adsorption of, in aq. soln. by charcoal, 5404⁴.
 sepn. from isobutyl alc., P 4712⁴.
 surface tension of solns. in, 1330⁴.
- Isoamyl bromide**. See *Butane*, 1-bromo 3-methyl.
- β*-Isoamylene**. See *2-Butene*, 2-methyl.
- Isoamyl ether**, mixts. with phenetole, azeotropy of, 4616⁴.
- Isoamyl sulfide**, compds. with HgCl₂, 4925¹.
- Isoantigens**. See *Antigens*.
- Isoapiole** (2,3-dimethoxy-4,5-methylenedioxy-1-propenylbenzene), reaction with diazonium compds., 598⁴.
- Isoapiolol***, and derivs., 1890⁴.
- Isoarginine** (4-amino- α -guanidovaleric acid), 1621⁴.
- Isoazole**. See *Iso pyrrole*.

- Kekulé, August**, 4854⁸, 5465⁸.
- Kelp**, *Macrocystis pyrifera*, alginic acid from, 3475¹.
 paper from, P 515⁸.
- Kelvin's law**. See *Laws*.
- Kenaph**. See *Hemp*.
- Kendal green**, ancient, 518⁸.
- Kepler problem**, one dimensional relativistic in wave mechanics, 2878⁹.
- Keramolit**, 1233⁹.
- Keratin**, compn. of, 2907¹.
 enzymic hydrolysis of, by crop juice of *A. sativum* and Arabian culture, 327⁸.
 fate in mammalian organism, 4736².
 hydrolyzates, absorption of Br by, 161⁸.
 splitting of, 4487².
- Kernite**, boron compds. contg., minin. of, P 941².
- Kerosene**. (See also *Petroleum refining*)
 battery of regenerative type, 4811⁸.
 burner for, attachment to widen and direct the flame in, P 2078².
 comparison of Soviet and American, 2283⁸.
 continuous treatment of, 1490⁹.
 cracking, P 696⁸.
 decolorizing, P 698⁸.

- decompn. of, 4559¹.
 detn. of unsatd., aromatic, naphthene and paraffin hydrocarbons in, 3800².
 distn. app. for gasoline and, 4562⁶.
 distn. of, test of A. S. T. M. for, 4332⁹.
 gasoline from cracked, action of H_2SO_4 on, 4811⁷.
 hypochlorite treatment of, 4055³.
 ignition and partial combustion of, effects of knock-suppressing and knock-inducing substances on, 4335².
 naphthenic acids from Nishiyama, 1390⁷.
 naphthenic soaps in alkali sludge of, 1500⁴.
 oxidation of, catalysis of, P 1259⁴.
 plant in Baku, 4334⁴.
 refining, conversion of S compds. in, P 695¹.
 from Sakhalin crude oils, 507⁷.
 specific heat of distillate of, 4807⁷.
 sulfur content of, 2283³.
 sulfur removal from, 1742¹, 2816⁶.
 sweetening, 3337¹.
 vapor pressure of, at high temps., 4051⁸.
Kerr constant, detn. of, of a poorly insulating substance, 339⁹.
 of nitrobenzene, 2334⁷.
Kerr effect. See "double refraction" under *Re*.
Kerzinite, 1081².
Kessoglycerol³, 3455⁷.
Kessoglycol³, 3453⁷.
Kessotriketone³, and trisemicarbazone.
Kessyl alcohol, and acetate, 3455⁷.
Ketchup. See *Catsup*.
Ketene ($H_2C:CO$), catalytic prepn. from $(Me)_2CO$, 2094².
 dimeric diaryl derivs. of, free radicals, 3916⁴.
 manif. of, P 1142², P 4485⁷.
 , di-*p*-tolyl-, 2950⁹.
Ketimines. (*Cyclic ketimines, in which the carbon of the group C : NH is a ring member, are entered under names analogous to the corresponding ketones, e. g., Quinonimine. Other ketimines are treated as derivatives of the most suitable imine, as Benzalimine*)
 pyrrolines from, 2438⁹.
Ketiponitrile, α , β -di-*p*-anisyl-, 1128⁶.
Ketonicidosis, alk. reserve of plasma in, 4263³.
Ketoaldehydemutase, stereometric specificity of, 619¹.
Ketogenesis, diet producing, in migraine, 1165⁴.
Keto group. See *Carbonyl group*.
Ketole. See *Indole*.
Ketols, aromatic, as reducing agents for nitro compds., 2428⁶.
 manif. of, P 3477¹.
Ketone, aminomethyl 2-methyl-3-indyl, and derivs., 3928⁴.
 , amyl phenyl. See *Caprophenone*.
 , anisyl 3 (and 6)-hydroxy-2-naphthyl, P 2187⁴.
 , anisyl 2-hydroxy-3,6-xylol, P 2187⁴.
 , anthryl ethyl, P 715⁷.
 , anthryl methyl, P 715⁷.
 , 8-benzyl-1-naphthyl phenyl, 3923¹.

- Lakes**. (See also *Dyes; Pigments*.) P 993^a, P 1283^a, P 3110³, P 3355¹, P 3583^a, P 5329⁹.
 alizarin red, effect of anions of mordant on shade of, 518^a.
 aluminum, of red dyes for cosmetics, P 1475³.
 of aurintricarboxylic acid, 4075².
 azo dyes for producing, P 2833².
 blue, Fe compds. forming, P 718^a.
 books. Colour, 1275², *Kunstliche org. Pigmentfarben und ihre Anwendungsgebiete*, 2840⁹.
 colors of, analysis of, 3576^a.
 in cotton dyeing, 4823⁹.
 of *m*-dgallic acid, 986³.
 formation of, phys. chemistry of, 1036^a, 1037³.
 phosphomolybdenum compds., P 1512^a, P 5550³.
 removing agents, 5320⁹.
 wetting out quality of, increasing, P 717⁹.
- Lalona**. See *Wrenmannia*.
- Lambert-Beer law**. See *Laws*.
- Lamblick**. See *Beer*.
- Laminaria**, iodine in, evolution of, 413³.
 iodine liberator from, 2465³, 4967³.
 laminarin from, 4244³.
- Laminarin**, from *Laminaria*, 4244³.
- Lampblack**. (See also "black" under *Carbon*.)
 with asphalt in soln., microscopy of, 3567¹.
 density of, 485^a.
 from liquid carbonaceous material, P 1508³.
 manuf. of, P 4029⁹.
 prepn. and uses of, 1726¹.
 prepn. of, cooling flask for, P 2850¹.
 in rubber manuf., comparison with acetylene black and gas black, 5351³.
 for rubber mixts., gas black vs., 306^a.
- Lamps**. (See also *Safety lamps*.)
 for heating thermo-batteries, P 740^a.
- Lamps, electric**. (See also *Filaments*.)
 app. for concg. light from a "quartz burner," etc., P 570^a.
 arc, with connections for directing gas currents along electrodes, P 348^a.
 electrodes for, P 571¹.
 for spectroscopy, 3411³.
 bulbs, P 1827^a.
 app. for making, P 4313^a.
 blown-glass, app. for melting off waste portion of, P 494⁷.
 coating inner surface of, P 4315^a.
 coating of, P 3321^a.
 coloring glass for, P 3553³.
 coloring inner surface of, app. for, P 4315^a.
 coloring, on inner surface, 4310⁹.
 frosting inside of, P 4315^a.
 glass for, manuf. of, 3551¹, 4544^a.
 marking, app. for, P 1318³.
 translucent, P 3321^a.
- cadmium**, new type of, 5118².
 cadmium-vapor arc, 2370¹.
 cathode-ray, of Lenard, P 1068³.
 clean up material for, misc. metal as, P 741⁷.
 cong. ionizable gases, P 3414^a.
 daylight, 1575^a.
 electron, P 1068³.
 electron emission, cathode for, P 1783¹.
 filament lamps, P 47³, P 1827³, P 3414⁷, P 3864³, P 4153¹, P 5121^a.
 brass caps of, protecting from oxidation, P 570⁹.
 burn-out of, 2374³.
 caps of, P 1578¹.
 chemistry in manuf. of, 5423⁹.
 displacing harmful and adsorbed gases from, P 1068^a.
 double, P 348^a.
 Edison's first com., 3171^a.
 evacuating app. for, P 348^a.
 with filling of inert gas to prevent decomposition of carbide, P 348^a.
 with filling of pure A, P 348⁷.
 gas filled, P 48¹.
 getters for, P 570⁹.
 history of, 343^a, 776^a, 1825⁷, 2665⁹, 3633¹.
 pickling of metal parts of, 4410¹.
 residual gas removal from, 5118¹.
 white enamel for, P 2545⁹.
- filament supports**, machines for forming and inserting, P 570¹.
- high emission**, P 2076².
 for high-intensity projection, P 2379⁹.
 high vacuum, P 3864³.
 high voltage gaseous conductor, 776².
 leading wires for, P 781³, P 2379¹.
 leading in wires of Cu, treatment of, P 4315⁷.
 mercury vapor, P 47³, P 348³, P 570¹, 1063¹, P 1827³, P 2893³, P 4152³.
 aging in, 2607⁷.
 amalgams for electrodes of, P 570³.
 burner for, P 2856¹.
 contg. A, P 1786³.
 as detector in food industries, 3753^a.
 deterioration of, 771⁹.
 glass and quartz bulbs for, P 781¹.
 as ionizers, 2358¹.
 passage of current through, 3403⁷.
 for producing ultra violet rays, P 1534³, P 1786¹, P 4900¹.
 spectrum of light emitted by, 5413^a.
 use in rubber factory, 2067¹.
 using Cd amalgam, P 1786².
- neon**, low-voltage, 776⁹.
 neon, new type of discharge in, 5423⁹.
 for photomicrography, 2375³.
 ultra-violet ray analysis, of Hanau and of Muller, 734¹.
 for ultra-violet ray production with a C arc, P 2106².
 for ultra-violet spectra production, 3^a.
 vacuum production in, P 2893³.

- vacuum-tube, P 780⁹, P 1019², P 2856^{2,3}, P 3834⁴, P 4152^{5,7,8}.
- Landolt reaction**, effect of concd. ZnCl_2 on, 2882¹.
- Langbeinite**, in potash deposits, formula for, 795⁹.
- Lange's colloidal gold test**, 4259⁷.
gold prepn. for, 405¹, 2190⁹, 5082¹.
hydrogen-ion concn. in, 3484⁴.
phys. chemistry of, 1677⁵.
theory of, 894⁴.
- Lanolin**. See *Wool fat*.
- Lanthanum**, effect on smooth muscles, 5239⁶.
energy levels of, 1345⁴.
spectrum of, 2102⁹, 2653⁴.
- Lanthanum argentocyanide**, prepn. of, 4902⁴.
- Lanthanum aurocyanide**, prepn. of, 4902⁴.
- Lanthanum boride**, prepn. of, 4893⁹.
- Lanthanum chloride**, adsorption by crystals, 4391¹.
thermal expansion of, 747².
- Lanthanum fluophosphate**, soly. of, 4903⁹.
- Lanthanum iodate**, soly. in salt solns., 5085⁴.
- Lanthanum nitrate**, acetone solns. of, inter ionic attraction theory as related to b. p. of, 4855⁷.
systems: $\text{Mn}(\text{NO}_3)_2\text{-H}_2\text{O}$ - and $\text{Mg}(\text{NO}_3)_2\text{-H}_2\text{O}$ -, 4157⁷.
- Lanthanum oxides**, spectrum of, 2103⁷, 4887⁹.
visible radiation of, 2100⁹.
 La_2O_3 , crystal structure of, 5075⁹.
 La_2O_3 , spectrum of, 5414⁷.
- Laphygma frugiperda**, poisons for, 469⁷.
- Lappa**. See *Burdock*.
- Larch**, bark of Siberian, as tannin source, 1302⁴.
as tanning material, 2845².
turpentine oil from, 4813⁷.
- Lard**, astra fat as substitute for, in pharmacy, 5011⁴.
cooling and washing app. for, P 1185⁴.
density of, 2507⁷.
fat & tn. in, 2507⁴.
luminescence of, 1002⁷, 3989⁹.
rancid, treating with clay, 4090⁹.
thiocyanate no. and satd. glycerides in, 293⁹.
ultra-violet examn. of, 3278⁴.
vitamin E in, 1158⁷.
- Larkspur**. See *Delphinium*.
- Larnite**, 5442².
- Larsenite**, calcium, fluorescence of, 1082².
of Franklin, N. J., 1083⁷.
- Larvae**. (See also *Tadpoles*.)
amphibian, effect of thyroid gland and hypophysis on growth and development of, 5511².
of *Anopheles* (Italian), resistance to salt in waters, 2503⁷.
oxidation-reduction potential in, of *Galleria mellonella*, 4745⁷.
oxidation-reduction potential in, of *Phormia regina*, 5242⁴.
- Larvicides**. (See also *Insecticides*.)
gasoline as, in wells, etc., 4003⁹.
for *Haemaphysalis molesna*, 3296⁹.
mosquito, oil mixts. as, 5259⁷.
mosquito, Paris green as, 5259¹.
Paris green vs. paraffin oil as, 1977⁹.
sugar-cane waste as, 4294¹.
- Laserpitium hispidum**, geraniol contg. oil from, 5543⁷.
- Laserwort**. See *Laserpitium hispidum*.
- Lasioderma serricorne**, chemotropism of, 3276⁷.
control of, in upholstered furniture, 4538⁹.
- Laspeyresia molesta**, baits for, 3297⁴.
control of, 3297⁷.
digestive enzymes of, 440⁷.
eggs of, effect of linseed oil on, 4523⁴.
larvae control with talc and mica dusts, 1207¹.
larvicides for, 3296⁹.
repellents of, 3298¹.
sprays for, $\text{Ca}(\text{OH})_2$ in, 4538⁹.
- Lassar zinc paste N. F.**, antiseptic power of, 1212⁹.
- Latent image**. See *Photography*.

- coating, P 4369¹.
- coating and filling compn. from disintegrated, P 5285⁸.
- coatings for, P 1304⁸.
- coating with metal foil, P 3062⁹.
- colloid chemistry of, 4367².
- coloring, with nitrocellulose lacquers, 4592².
- color of vegetable tanned, effect of H⁺ concn. on, 3593⁹.
- colors and finishes for, manuf. of, 2065⁹.
- composite sheet material of, for book cover etc., P 5019⁸.
- compns., P 5353².
- curing, compn. for, P 1523⁶.
- decorating unfinished, P 2066⁸.

- density, percent voids and "pile-up" of, 1767⁷.
- dressings compns. for, P 5349⁴.
- drying, P 2320³, 4006³.
- drying app. for, P 2610¹.
- dyeing, P 543⁵, P 1009⁴, P 3817², P 3827⁵, P 4347⁶, P 5059⁷, 5348⁴, 5609⁷.
- dyeing and finishing hat, 2846⁵.
- dyeing, compn. for, P 3126⁶.
- dyeing of gloving, 3594¹.
- dyes for, P 1511³, P 2045³, P 2579³, 3347⁵, P 5045⁹, P 5610¹.
- emulsions for treatment of, P 1453⁶.
- emulsions in prepn. of, 1770¹.
- enzymes in manuf. of, review on, 4843³.
- fat detn. in, 1767⁷, 4368¹.
- fat, manuf. from waste from treating hides, 5348⁷.
- finishing, P 1009⁴, P 3594¹.
- from fish skins, P 3594¹.
- glazed kid, manuf. of, 4368¹.
- glazing, P 2541³.
- greasing, P 2320³.
- heat effect on wetted vegetable-tanned, 1768¹, 2596⁹, 4367².
- histological structure of skin in relation to quality of, 4363⁶.
- hydrogen-ion concn. in manuf. of, 4843³.
- impregnating, P 1770¹, P 2598³, P 2603³.
- impregnating in mineral tanning, P 303⁹.
- jointing with rubber, 1770¹.
- lacquers for, P 1294¹, 2846⁵.
- light, wet work in manuf. of, 5609⁷.
- lining of scrap for making glue, 5348¹.
- manuf. of, P 3827⁵, 5609⁷.
- metallic appearance on, P 2066⁶.
- mixts. with rubber, terpene product for use in prepn. of, 3372².
- moistening, oiling and embossing, P 2066⁶.
- oils and fats for, analysis of, 4843³.
- oils and fats in manuf. of, bibliography on, 1764⁴.
- oils for, P 3827⁵, 5602¹.
- pigment application to, 4096³.
- pigment finishes for, 4367².
- polish for, P 249¹, P 2277⁵.
- polishing, and app. therefor, P 1483⁷.
- powd., agglomerate, P 2598³.
- prepn. of, 2065⁶.
- preserving, P 3827⁵.
- properties of, comm. rept. on, 1767⁷.
- protective agents for, P 937².
- proteins of, 5347¹.
- removal of cracks and faults in, P 3370².
- roller, for spinning of cotton, 3826⁷.
- rubber in manuf. of, 5602¹.
- rubber joined to, vulcanization of, P 548³, P 4104¹.
- salt stains on, 4364¹.
- scrap utilization, 2319⁸.
- shoe, temper and break of, 2597⁵.
- shoe, treatment of, P 4369⁴.
- sole, measurement of properties of, 4367¹, 5609⁷.
- resistance to wear of, 1768¹, 4096³.
- vegetable-tanned, 5009⁷.
- water absorption and penetration tests for, 730², 1768¹.
- standards in industry, 2595⁷.
- stiffening, P 1231³, P 4369⁴.
- sulfonic acids in manuf. of, P 849⁷.
- sulfuric acid in vegetable-tanned, 4367¹.
- tensile strength of dry, effect of temp. on, 5348⁴.
- treatment of, P 1009⁴, P 5059⁷.
- compn. for, P 1009⁴.
- to prevent mildew, etc., P 543¹.
- washable printing on, P 3827⁵.
- washing, P 4832⁶.
- water action on vegetable-tanned, 3369¹.
- water in, 4368¹.
- waterproofing, 541¹, P 1304⁸, P 1523⁷, 4096³.
- waterproofing and coating, P 248⁷.
- waterproofing and preserving compn. for, P 2047⁷.
- water-solubles in, tanned with wattle-bark ext. and their detn., 541¹.
- wetting agents for, P 937², P 1228⁶, P 3112².
- wetting and impregnating, P 3817⁹.
- Leather substitutes**, 5348⁷; (*Patents*) 730², 1009⁴, 1268⁵, 1304⁸, 1305¹, 1523⁷, 2320³, 2598³, 2847¹, 3126⁶, 3370², 3594¹, 4096³, 4369⁴, 4831⁴, 4845¹, 5332², 5349⁶.
- cellulose ester compns. for, P 704⁸, P 1267².
- coating compn. for making, P 4593⁸.
- glace kid, 4096³.
- manuf. and dyeing of, 303⁷.
- patent leather, P 1014¹.
- rubber compns. for producing, P 5353².
- suede, P 5349⁶.
- Leavening agents**, book: Baking Powder and Other, 3280¹.
- Leaves**. (See also *Respiration, plant*; and *Henbane*; etc.)
- acidity of, in relation to vigor of wheat plants grown at diff. temps., 5488⁹.
- aging in, 2463⁸.
- analysis of, diagnosis of nutrient condition of plant by, 3730².
- apple, compn. of, 2461¹.
- assimilation by dead, 2741⁵.
- of cabbage (white), compn. of cell wall in, 182⁶.
- calcium in lemon and orange, 632³.
- carbohydrate content of detached, partially shaded, 5214⁹.
- carbohydrate metabolism in evergreen, during the year, 2464¹.
- carbon dioxide administration to, 3250⁹.
- chem. investigation of, in detg. nutrient requirements of grape vines, 2778⁹.
- chlorophyll content of, in relation to oil sprays, 3295⁴.
- chlorophyllous assimilation of CO₂ by green, in elec. field, 5216¹.
- compn. of, in lime induced chlorosis, 5000⁶.
- conifer, catalase in, 2459³.
- conifer, metabolism of, 2459².
- curing and dyeing, P 3548⁷.
- dropping after frost, 2201⁶.
- evergreenness of, of 3 medicinal plants, 3005².
- fiber or cellulose from, P 4084¹.
- green-bean, soil type in relation to Ca and Mg contents of, 4909⁹.
- influx of nutritive salts from outflow and inflow water relative to, 3489⁴.
- lemon, effect of sulfate on, 1155⁶.
- lipids from green, unsaponifiable fraction of, 2740⁶.
- mangold, compn. of, 1433⁷.
- migration of substances in, 864⁴.
- mineral content of, effect of K, N and P fertilizing on, 526⁵.
- oak, decompn. of, 4994⁹.
- oil penetration in citrus, after spraying, micro-technic for observing, 664⁷.

- pine—see *Pine needles*.
 pineapple, 2462⁴.
 plasmolysis of, in sugar and salt solns., 3003¹.
 preserving with varnishes, P 2050⁴.
 protein N in, of beech trees during 8 months, 2465².
 sap expression from, 3005⁴.
 spray (arsenical) adherence to apple, 466⁴.
 sprayed, app. for obtaining measured areas of, 4294¹.
 sugar-beet, fodder value of dried, 4979⁴.
 sugar-beet, sprayed with Cu compds., Cu and H₂C₂O₄ content of, 3769⁴.
 tobacco—see *Tobacco*.
 tomato growth as correlated with org. N and carbohydrates in, 1155¹.
 zinc in etiolated, 1696².
- Lében**, 647⁴.
Lébné, 647⁷.
- Lecithides**, hemolytic action of decompn products of, 4956⁴.
Lecithin, adrenal tissue action on, 1147⁷.
 blood, after splenectomy and effect of adrenaline, 896³.
 in blood, effect of malignant tumor on, 4263⁴.
 in blood in cancer, partition of, 4740¹.
 in blood of animals living in a lab and living out-of-doors, 2473¹.
 of blood serum, effect of adrenaline on, 3720⁴.
 in butter in summer and in winter, 912².
 cadmium-, effect of lipase of castor oil on, 1656².
 cell permeability and, 400¹.
 colloidal, effect on blood vessels, 3720⁴.
 combinations with amino acids, 1652⁴.
 commercial, and preps of, 237⁴, 2533⁴, 3306³.
 in dairy products, effect on butter fat detns., 1182¹.
 detn. in blood and tissues, 3941⁴.
 digestion by pancreatic enzymes, 645⁴.
 double salt with CdCl₂, prepn of 1655⁴.
 effect of, alone and with cholesterol esters on protein metabolism, 4726⁴.
 effect on carbohydrate metabolism, 2763¹.
 on fat metabolism, 3264⁴.
 on life of animals after removal of liver, 2474¹.
 on no. and resistance of red bloodcells, 2492².
 on streptococcal hemolysin, 4739⁴.
 on working capacity of muscle, 4254⁴.
 as emulsifying agent (oil/water) in physiol model, 4253⁴.
 emulsions of, in aq. glycerol, P 1905⁴.
 emulsions of, stabilizing and reducing viscosity of, P 5013⁴.
 as fat liquor material in tanning, 1766⁴.
 fat liquors contg., 4843⁴.
 formaldehyde effect on, 2192².
 hemolytic action of decompn products of, 4956⁴.
 hydrolysis of, 520⁴.
 hydrolysis of, with *Ricinus* lipase, 3480⁴.
 in liver in P poisoning, 5505⁴.
 mesophases of, 4860².
 metabolic action of, alone and with cholesterol, 4726².
 mixts. with lutein and cholesterol esters, effect on thyroid, suprarenals and liver, 3264².
 mixt. with palm-kernel oil, P 3052⁴.
 in organs, 1668⁴, 5229⁴.
- pharmacol. action of, esp. on cholesterol in blood, 4745¹.
 pharmacol. action of mixts. of lutein, cholesterol ethers and, 1683⁴.
 phosphatide from egg-yolk, carbohydrate from, 5205¹.
 plant, 477⁴.
 preps. of, P 1216⁷.
 reaction with octahydroanthracenesulfonic acid, 402².
 from soy-bean oil wastes, P 5054³.
 ultra-violet ray emission by, after irradiation 4488⁷.
 wasp poison action on, 906³.
 weight and cytometric studies of guinea pig treated with injections of, 2204⁴.
- Lecithoprotein**, evaluation of, 1469⁴.
Le Clanché cells. See *Cells, voltaic*.
Lecture experiments. (See also *Laboratory experiments*.)
 on detn. of C_p/C_v, 2612¹.
 for general chemistry, 8⁴.
 with hydrogen chloride, 3133⁴.
 for law of multiple proportions, 5070⁴.
 on water electrolysis, cell for, 2854¹.
- Ledol**, in *Sphaele parviflora*, 1213⁴.
Leech, effect of amines on smooth muscle, 439¹.
 purinolytic enzymes of, 1180¹.
- Leeks**, zinc content of root-free, 2505¹.
Leer. See *Annealing, Glass*.
Legal chemistry, nitrite demonstration in, concerning shooting, 2734¹.
Legumelin, in soy beans, 1932⁴.
Legumes, acidity changes in stored seed 4970¹.
 acid tolerance of, 4993⁴.
 alimentary value of, 5218⁴.
 hypoglycemic substances in, 3740⁴.
 increasing soil fertility in Ceylon with, 2235⁴.
 nitrogen fixation by, detn. of, 4967⁴.
 nitrogen in, during growth, 5216¹.
 seedlings, effect of x rays and subsequent mutilation of stem from root on, 182⁴.
- Leg weakness**, hexosediphosphatase in, 4961⁴.
 in poultry, 3253⁴.
- Leishmania tropica**. (See also *Kala-azar*.)
 berberine effect on, 2488⁴.
 metabolism of, 4963⁴.
 test for antibodies in infections with, 4961⁴.
- Lemna**, growth of, interaction of factors in, 3487⁴.
Lemonade, antimony poisoning from, made in enameled buckets, 219⁴.
 saccharin detection in, 2508⁴.
- Lemongrass oil**, 2533⁴, 3773⁴.
Lemon juice, differentiation of artificial and natural, 1180⁴, 3277².
 isovaleric acid detection in, 4244⁴.
 preservation of, 1979⁴.
 preservatives for, 5274⁴.
 zinc content of, 1696¹, 2505¹.
- Lemon oil**. See *Oils*.
Lemons. (See also *Citrus*.)
 calcium in leaves of, 632⁴.
 citric acid from, P 4712¹.
 compn. of whole fruit, ext. and pulp, 1964⁴.
 leaves, effect of sulfate on, 1155⁴.
 zinc content of pressed peel and residue of, 2505⁴.
- Lenard tubes**, cathode-particles from, detn. of, 3850⁴.
Lens, crystalline. See *Eyes*.

- Lenses**, composite spectacle, P 2797⁴.
 machine for cutting glass, P 6837.
 manuf. of fused bifocal spectacle, 2543¹.
 polishing pad for, P 943⁴.
 for telescope reflector, making of, 45447.
- Lens esculenta**. See *Lentils*.
- Lentils**, globulin from, tryptophan-tyrosine content of, 211⁴.
 potassium and Na content of, 863².
 vitamin B value of, 5219⁴.
 zinc content of, 1696³, 2505⁴.
- Leonhardtite**, Russian, 51327.
- Leonils**, in wool industry, 282².
- Leonite**, in potash deposits, formula for, 795².
- Leopoldina piassaba**, fiber from, dyeing of, 709⁴.
- Lepargylic acid**. See *Azelaic acid*.
- Lepidine** (4-methylquinoline), picrate, P 607².
- Lepidinium compounds**, 1-(carboxymethyl) bromide, Et ester, physiol. action of, 30222.
- Lepidocrocite**, 3136⁴.
 crystal structure of, 2393³.
 identity with hydrated Fe₂O₃, 4858².
 thermomagnetic analysis of, 4167⁴, 4642.
- Lepidolite**, effect on terra cotta glazes, 5553¹.
 in Manitoba, 65¹.
 uses of, 2396⁴.
- Lepidoptera**, cholesterol and fatty acids in chrysalides of, 3274⁴.
- Lepidosteus osseus**, body fluids of, compn. of, 3274².
- Leprosy**, blood Ca in, 1956².
 blood cholesterol in, 1956⁴.
 blood in, 3269².
 blood serum in, phytopharmacol. and photo pharmacol. studies on, 3020⁴.
 blood serum in, surface tension, of, 3269².
 chaulmoogra oil derivs. in, oral administration of, 646².
 fibrolysis use in, 5238⁷.
 iodine Sb treatment of, 2211¹.
 sodium hydnoearpate treatment of, 2210².
 tellurium therapy in, 3745².
 treatment with Cu chloride-*p*-diazaminobenzene HCl, Succinol and Fibrolysin, 2759².
 treatment with Na hydnoearpate and Bruschettini vaccine, 2211⁴.
- Lepsius, Bernhard**, biography, 1535².
- Leptinotarsa decemlineata**. See *Potato bug*.
- Leptomitus lacteus**, in sulfite liquor, 557².
- Leptosira**, elec. phenomena of, 2457².
 resistance to outside influences, 1152¹.
- Lettuce**, growth of, muck-soil reaction and, 461¹.
 iodine in, 914¹.
 nitrate requirement of, 1201².
 vitamin A content of green and white leaves of head, 5219¹.
 vitamin A content of leaf, soil fertility in relation to, 3732².
 vitamin E in fresh and dried, 3954⁴.
 vitamins B and C in, 3012², 3.
 zinc content of, 1696³, 2505⁴.
- Leucaena glauca**, analyses of, 5215².
- Leucemia**, amino acid content of blood in, 4506¹.
 cholesterol in plasma in, 3966⁴.
 circulating proteins in, 893⁴.
 metabolism in, 3966⁴.
- Leucine** (α -aminoisocaproic acid), color reactions of, 2908⁴.
 glycerides, 4673².
- l*-, and derivs., 1017⁴.
l-, ionization and optical rotation of, 4193².
 oxidative deamination of, by adrenaline, 3723¹.
 prepn. of, from hydrolyzed blood corpuscle paste, 2099⁴.
 -----, *N*-acetyl-, ethyl ester, 5161⁴.
 -----, *N*-alanyl-, from hair, 1147⁴.
 -----, *N*-(β -aminobutyryl)-, 1389¹.

- density and other properties of, 1327⁴.
density of, detn. of, 1793⁴.
density of, relation to d. of elements thereof, 4861⁴.
density streaks in mixing 2, of differing optical d., 1034².
dielectric constants of—see *Dielectric constants*.
dielec. polarization of, 3835⁴.
dipole theory applied to binary mixts of, 559⁴.
discharging app. for, from containers under low pressure into containers with higher pressure, P 1024⁹.
distributing on filter beds, app. for, P 1978⁹.
distributing to filter beds, etc., app. for, P 2608⁹.
distribution on filter beds, cooling ponds, etc., P 4290⁴.
distributor for, P 1023³.
drying of, 320⁴, 4388⁶.
drying of, effect on inner equil., 1327⁴.
effect on molded cellulose hydrate, 3842⁴.
elec. arc (a. c.) in, 563¹.
elec. cond. of—see *Conductivity, electric*.
equil. of, with their vapors, 2623¹.
Euler form of equation for viscous, significance of superposition law of deformed finite elastic continuum in, 5375².
expansion coeff. of, effect of temp. of, 3611².
extn. from easily fusible products, P 223¹.
films of, theory of formation of, 5378¹.
filtration of—see *Filters, Filtration*.
flow of—see *Flow*.
foam removal from centrifuged, P 1784⁴.
freezing, by evapn. of hydrocarbons, P 3524¹.
hazards of, classification of, 2769⁴.
heaters for—see *Heaters*.
heating, P 5253¹.
heating, by elec. current, P 47¹.
heating in open wood vats, calcul. of heating surface and steam consumption for, 1450².
impregnating with gases, app. for, P 2610⁴, P 2855⁷, P 3381¹.
interfacial tension of—see *Interfacial tension*.
interference fringes in light rays passing over surface of, 2883⁹.
intermol. forces in, x-ray evidence for, 4385⁴.
introducing or eliminating substances for reactions from artificial, P 1702⁴.
irradiating, app. for, P 1317⁴.
irradiating with ultra-violet rays, P 1231¹, P 2106¹, P 4628⁷.
irradiation of, Scholl's app. for, 1532².
Kerr effect in viscous, due to radio frequency oscillating field, 4142¹.
kinetic theory of, fundamental equation in, 3385².
layer of, left in centrifuge after discharge of material, 2511².
level—see *Level*.
light reflected from surface of, contg. polar groups, intensity of, 10².
light scattering in, effect of mol. form and association on, 321⁴.
light scattering in, theory of, 2361⁷.
liquid drops on same surface of, 4118⁹.
loss of head in passing through filter beds, etc., app. for indicating, P 2608⁹.
measurement of, in tanks, 1699⁹.
measuring app. for—see *Measuring apparatus*.
meniscus in small tubes, method for observing, 121¹.
miscibility of 2, of diff. ds., expt. demonstrating slow, 2085⁶.
mixing—see *Mixing; Mixing apparatus*.
mixts. of, app. for withdrawing bottom layers of, P 3603⁴.
mol. state of, 556⁴.
oiliness of, app. for measuring, P 4093⁴.
optical properties of, effect of x-rays on, 4409¹.
photoluminescence of, 3625⁴.
phys. consts. of, relations between, 2338⁹.
polarization field in, anisotropy of, 5106⁴.
purification of, P 223¹, P 446¹, P 5253².
app. for, P 3033⁹, P 3403⁷, P 4107⁴, P 5065³.
centrifuge for, P 4378⁹.
by osmosis, P 3761¹.
purifying, tending to emulsify and app. therefor, P 1189⁹.
Raman effect of, 4889⁹.
reactions with gases, app. for, P 1188⁴.
reactions with gases or vapors, app. for, P 5064³.
removal from containers, app. for, P 1784⁴.
removal from wells and app. therefor, P 1190².
removal of dissolved gases from, by vacuum sublimation, 4861¹.
revivifying, app. for, P 1785⁴.
Rontgen ray diffraction in, 30⁴, 1440⁴, 3625⁴, 4118⁹, 5411³.
Rontgen ray diffraction of, in relation to their constitution, 1348².
Rontgen-ray haloes, effect of temp. on, 24¹, 4143⁹.
sampling—see *Sampling; Sampling apparatus*.
sepn. of—see *Separation; Separators*.
solidifying, P 3284⁹.
solubilizing, P 1190².
spraying, in reactions, P 3284⁹.
spreading of, 3142¹.
sterilization of—see *Sterilization*.
storing, porous material for, P 2254⁴.
subjecting to dark elec. discharges, app. for, P 2076⁹.
superheating and intensive drying of, 3611².
surface tension of—see *Surface tension*.
testing, by measuring elec. cond. before and after action of reagent, P 4755⁴.
testing or compn. control of, app. for volumetric, P 4151¹.
treating gases or vapors with, in contact flow, bubbling app. for, P 1022⁴.
treating gases with, P 1188⁴.
treating gases with, app. for, P 3380⁹.
treating solids with reagent, P 456².
treating with gases, P 2514⁷, P 4281¹.
with gases, rays or chem. emanations, spraying device for, P 4378⁹.
with Rn, app. for, P 4622⁹.
with reagents, app. for, P 1021⁴.
treatment of bands or strips with, app. for, P 315¹.
ultrasonic velocities in, detn. of, 508⁹.
undercooled—see *Undercooled liquid*.
viscosity of—see *Viscosity*.
volume chemistry of homogeneous, 410⁴.

 elec. cond. of mixts. of compressed salts contg., 1034^o.
 free energy of formation of fused, 558^o.
 as insecticide for larvae of Japanese beetle in soils, 4523^o.
 reaction with ketones, 1108^o.
 salts with benzenediazonium iodide, 3213^o, 3214^o.
 salt with aniline-HI, 2427^o.
 spectrum of, 5110^o.
 system: CdI_2 -, 5401^o.
 system: $\text{HgCl}_2\text{-HgO}$ -, 2876^o.
 system: KI-acetone -, 2384^o, 5127^o.
Mercury ion, disinfectant power of, relation to activity, 1809^o.
 reactions with NH_4 molybdate, Na nitrophosphomolybdate or Na tungstate, 3186^o.
Mercury ores, in Canada, 65^o.
 concg. oxidized, P 2689^o.
 occurrence of, zone of, 3191^o.
Mercury oxides, Hg_2O , analysis of dry, methods of A. S. T. M. for, 1449^o.
 HgO , in anti-fouling paints, fineness of particles of, 291^o.
 colloidal, changes in viscosity and H-ion concn. during gelation, 4869^o.
 crystal structure of red and yellow forms of, 745^o.
 soly. of, effect of alkali and alk.-earth halides on, 5084^o.
 titration of, diphenylcarbazono as indicator in, 576^o.
Mercury oxycyanide, compds. with org. acids, action on gonococcus, 1115^o.
 detn. of, 3186^o.
 tablets, assay of, 1211^o.
Mercury perchlorate, $\text{Hg}(\text{ClO}_4)_2$, refractivity of, 5388^o.
Mercury phosphate, $\text{Hg}_2(\text{PO}_4)_2$, compds. with HCl and HBr , 575^o.
Mercury potassium iodides, 2384^o.
 as antiseptic for tissues, 3946^o.
 reducing power of polybasic acls. on alk. solns. of, 4909^o.
Mercury preparations. (See also *Germisan; Mercury compounds, contents, USP-Index*.)
 analysis of, 5007^o.
 disinfection of seeds with, permeability of plant cells in relation to, 5267^o.
 hydrargyrum cum creta, keeping properties of, 4299^o.

- titration of, 5543^a.
triturated, 932¹.
- Mercury pump.** See *Pumps*.
- Mercury salicylate**, Hg(CN)₂ compd., action on gonococcus, 1115^a.
prepn. and constitution of, 473^a.
- Mercury salts**, action of light on, 3415¹.
electrolysis of solns. of, with dropping and steady Hg cathodes, 3859¹.
manuf. of, P 4305¹.
poisoning of fishes by, 4273¹.
reaction with alkyl sulfides, 4925^a.
reaction with Fe(CO)₅, 351², 4417².
as soil insecticides, 3295¹.
of stearic, palmitic and oleic acids, prepn. of, 2243¹.
- Mercury sulfates**, Hg₂SO₄ compd. with HCl, 575^a.
Hg₂SO₄, condensation of C₂H₄ under the influence of H₂SO₄ in the presence of, and CuSO₄, 2929^a.
cryst., prepn. of, 4894^a.
hydrolysis by CdSO₄ soln. in Weston normal cell, 4624¹.
-mercury electrode, effect of air on potential of, 4125^a.
HgSO₄, compds. with HBr, 575^a.
- Mercury sulfides**, colloidal, pectrography of, 5385¹.
HgS, colloidal, effect of light on, 4865^a.
- Mercury tetraborate**, as insecticide for larvae of Japanese beetle in soils, 4523^a.
- Mercury thallium chloride**, 2671^a.
- Mercury thiocyanate**, manuf. of, P 3781¹.
- Mercury vapor lamp.** See *Lamps, electric*.
- Meriandra bengalensis**, and its oil, 4018^a.
- Merica**, "Paul D.", award of James Douglas Medal to, 1371².
- Meriquinoid compounds**, of the phenarsazine series, 3708¹, 4474^a.
- Merluccius merluccius**. See *Haddock*.
- Merodon equestris**, insecticide for, Ca CN₂ as, 3294^a.
- Mersaly**, 4775^a.
- Merulius iachrymans**, dry rot in wood from, 2740^a.
- Merwinite**, 5442².
- Mesaconic acid** (*methylfumaric acid*), from cabbage, 5163¹.
- Mesembryanthemum edule**, uses of, 240^a.
- Mesentery**, circulation of, effect of adrenaline on, 1179².
- Mesitol** (2,4,6-trimethylphenol).
---, α¹, α², α³, α⁴, α⁵, α⁶ - hexaphenyl-, 1633¹.
---, α¹, α², α³, α⁴ - tetraphenyl-, 1632¹.
- Mesitylene** (*1,3-trimethylbenzene*).
compd. with 5-nitro *m* benzenedisulfonyl chloride, 2428¹.
diffraction of x-rays in, 5411¹.
Röntgen-ray haloes of, effect of temp. on, 4144¹.
spectrum of, 4139^a.
---, 2-bromo-, 5469^a.
---, 2-cyclohexyl-, 4936^a.
---, iodonitro-, 1406^a.
---, 2,4,6-tribromo-, 4937¹.
- Mesityl oxide**. (For deriva. see under Δ²-Pentenone.)
4-carvacrylsemicarbazone, 5470¹.
condensation with phenols, 4471¹.
---, acetyl-. See Δ²-2,4-Heptenedione, 6-methyl-.
- Mesoacetoxyhemim***, deriva., 5190^a.
- Mesochlorohemin***, acetate*, 5190^a.
- Mesochlorohemin anhydride***, 5190^a.
- Mesoetiochlorophyllin**, 1413^a.
- Mesohemin**, catalytic action of, 3395^a.
- Mesolite**, Russian, 5132¹.
soly. of, 5442^a.
- Mesomorphic states**, 3138¹.
- Mesomorphic substances**, crystn. of, magnetic field, 1795^a.
- Mesophases**, 4387¹, 4860^a.
---, comparative configurations of, 4607^a.
- Mesoporphyrin**, acetate*, and its Cu compd. 5190^a.
and dimethyl ester, hydrogenation of, 141¹ of heart and skeletal muscle, 1653^a.
reaction with H₂SO₄ and H₂O₂, 844¹.
synthesis of, 2185².
synthesis of isomers and derivs., 1134¹.
- Mesoporphyrin anhydride***, 5190^a.
- Mesorhodin**, acetate*, 5190^a.
and derivs., 1414¹.
- Mesotartaric acid**. See "*Meso*" under *Lactic acid*.
- Mesothorium**, detection and detn. of, living persons, 3154¹.
gamma radiation and evolution of heat, and its detn. in Ra salts, 1566^a.
luminosity of, decrease in, 1346¹.
-radium poisoning, 3852¹.
- Mesovalency**. See *Valency, meso*.
- Mesoverdin**, and salts, 1414¹.
- Mesoxalic acid** (*ketomalonic acid*), diethyl ester, reaction with CH₃N, 2442¹.
esters, synthesis of, 5972¹.
oxidation of, with H₂O₂, 1877^a.
- Mesoxanthoporphinogen**, ethyl ester, 1414¹.
- Mespilus germanica**. See *Medlar*.
- Mesquite**. See *Prosopis*.
- Meta**, as prefix, history of, 4854^a.
- Metabolism**. (*Animal metabolism*.)

Methanesulfonyl bromide, tribromo-, 5127¹.
Methanesulfonyl chloride, trichloro-, 5126¹.
Methanesulfonic acid, derivs., P 3714⁴, P 3715¹.
Methanesulfonamide, derivs. prepn. of, 2427⁵.
 —, *N,N*-dibutyl-, 2427⁶.
 —, *N,N*-diethyl-, 2427⁶.
 —, *N,N*-dipropyl-, 2427⁶.
 —, *N*-menthyl-, *l*-, 2427⁶.
 —, *N*-1(and 2)-naphthyl-, 2427⁶.
 —, *N*- δ -phenoxybutyl-, 2427⁶.
Methanesulfonanilide, 2427⁶.
 —, *N*-benzyl-, 2427⁶.
 —, *p*-bromo-, 2427⁶.
 —, *N*-butyl-, 2427⁶.
 —, *N*-sec-butyl-, 2427⁶.
 —, *o* and *p*-chloro-, 2427⁶.
 —, 2,6-dichloro-, 2427⁶.
 —, *N*-ethyl-, 2427⁶.
 —, *N*-methyl-, 2427⁶.
 —, *N*-propyl-, 2427⁶.
o-**Methanesulfonanilide**, 2427⁶.
p-**Methanesulfonanilide**, 2427⁶.
Methanesulfonic acid, compds. with *m*-alkylaminobenzoic acid, P 2252¹.
 iodine salt of, 1835⁴.
p-**Methanesulfonophenetide**, 2427⁶.
 nitration of, 2704⁷, 4668².
 —, 2,6-dinitro-, 2704⁷.
 —, 2-nitro-, 2704⁷.
 —, 2,3,6-trinitro-, 2704⁷.
o-**Methanesulfonotoluide**, 2427⁶.
 —, *N*-ethyl-, 2427⁶.
p-**Methanesulfonotoluide**, 2427⁶.
 —, *N*-ethyl-, 2427⁶.
Methanetetra-carboxylic acid, tetramethyl ester, crystal structure of, 5369⁹.
Methanetrinitrile, and silver deriv., 1583¹.
 —, bromo-, 1583¹.
Methanol. (For derivs. see *Carbinol*.)
 absorbed films of, on glass, optical study of, 2866⁴.
 acetic anhydride titration in mixts. of H₂O and, 4647⁷.
 assocn. consts. of, 5078⁶.
 in beverages, 5540⁶.
 from carbonizing waste wood and peat, etc., P 5314¹.
 coagulation of casein, hemoglobin and egg albumin sols by, 1333³.
 compds. with metal sulfates, 4869¹.
 compd. with α -allyl- β -phenylthiourea, 3215¹.
 compd. with hexacyanocobaltic acid, 4193³.
 compd. with olivul, 5188⁸.
 decompn. of, 90².
 decompn. of, with Cu catalysts, 1342².
 dehydration of, P 397⁷.
 detection and differentiation of acetone, iso-PrOH and, simultaneously in galemicals, 2246⁷.
 detection of, 1593⁴, 5129⁹.
 in alc. preps., 4165⁴.
 in EtOH, alc. beverages, tinctures, etc., 793².
 detection of, German Pharm. methods for, 3305¹.
 detn. of, 3188³.
 in drugs in presence of EtOH, 4772¹.
 in EtOH, 2124¹.
 in gentian brandy, 3771⁷.
 in paper pulps and pulpwoods, 976¹.
 dielec. consts. of, in C₆H₆ and in CCl₄, 4605⁴.
 displacement of spectral rays by mol. diffusion in, 3405⁶.
 effect of acetylcholine splitting in blood, 1179¹.
 effect on leucocytes, 2193⁴.
 effect on reaction velocity of C₆H₅N with EtI, 143³.
 electrolytic oxidation of, in alk. soln., 2371⁴.
 equil. between methoxyl and hydroxyl ion, in mixts. of H₂O and, 5392³.
 equil. with CO and H₂, 1337².
 formation from CO and H₂, catalyst. of Cu and Zn for, 1342².
 formation in autolysis of fresh tobacco leaves, 183³.
 from fuel gases, 3337².
 heat capacity, entropy and free energy of, 1344⁵.
 hydrate of, 2865⁷.
 inflammability limits of, effect of temp. on, 5319⁴.
 as internal combustion fuel, 3789⁷, 5297⁴.
 light-scattering in, effect of mol. form and association on, 321⁴.
 manuf. of, 4068⁷; (*Patents*) 155⁴, 397⁴, 846¹, 851¹, 1141¹, 1188¹, 1426¹, 1651¹, 1910¹, 2440², 3235¹, 3716¹, 4484¹, 4949¹, 5196¹.
 and app. therefor, P 3283⁹.
 catalysis in, P 247⁴.
 catalysts for, P 1227¹.
 MetO as by-product in, 2150¹.
 review, 3898⁴.
 melting p. curve in H₂O, 2344⁷.
 mixts. with CHCl₃, *t*-p. diagram, and latent heats of vaporization of, 2641¹.
 mixts. with EtOH, pharmacol. action of, 4264⁷.
 mol. wt. of, 4118².
 oxidation (catalytic) of, 4926¹.
 from oxidation of natural gas, P 5308⁷.
 partition of acetone between H₂O and, 2623¹.
 pharmacol. action of vapors of, 908².
 photochem. behavior of, 2366⁷.
 photochem. reaction with Br, 340⁹, 772².
 purification of, P 3236⁹.
 Raman effect in, 1812¹.
 reaction with Br in infra-red, 5414².

- reaction with Cd-Mg alloys, 2410¹.
 reactivity of OH group in, 515¹.
 recovery in delignification of Tripoli woods, 3339¹.
 recovery in paper-pulp manuf., 4068¹.
 recovery of solvent, 1969¹.
 relation between surface energy and satn. vapor tension of, 1542¹.
 specific heat of, at low temps., 2095¹, 3846¹.
 spectra due to secondary radiation in, 37¹.
 in sugar beets, 1521¹.
 synthesis and decompn. of, catalysts for, 810¹, 5157¹.
 synthesis of, 1385¹, 1867¹.
 catalysis of, P 456¹, 816¹.
 in France, 3328¹.
 free energy of, 2350¹.
 and its theoretical basis, 5157¹.
 review of, 3661¹.
 system: o-cresol-H₂O-, 2343¹.
 system: diethyl phthalate-, vapor pressure in, 1793¹.
 system: H-CO-, 3148¹.
 system: H₂O-, vapor pressures of, 1342¹.
 in tobacco smoke, isolation of, 3747¹.
 wetting of charcoal and glass powders in aq solns. of, heat of, 4609¹.
- Methemoglobin.** (See also *Fluoromethemoglobin.*)
 in cadaver, 4491¹.
 Laue photographs of, 4715¹.
 micelle, thickness of H₂O envelope about, 3615¹.
- Methenamine** See *Hexamethylaminetetramine.*

 alc. coagulation of, effect of neutral salts on, 4977⁹.
 alkalis in, significance of, 4977⁹.
 alkali value of, 4509⁹.
 anemia from diet of Fe and, as due to Cu deficiency, 4725⁴.
 antineuritic and antipellagic potency of, in winter, 417².
 antirachitic activation of liquid or powd., with ultra-violet rays, P 3031⁴.
 bacteria in, 2457³.
 bacterial count in plating out, effect of distd water on, 1431².
 bacterial counts in control of, 4278².
 bacterial counts of pasteurized, 3991⁴.
 bacterial counts of raw and pasteurized, effect of H-ion concn. of agar media on, 2161¹.
 beverage with cocoa, P 4513¹.
 as biologically balanced food, 4276⁹.
 books: La question du, 3031⁴. Contributo allo studio del contenuto in grasso e del residuo magro nel latte di vacca nelle diverse mungiture della giornata, 3280⁹. loyal et les laits hors du commerce, 3991⁴. au point de vue colloidal, 5249⁹.
 bottles, sterilization in soaker-type washers, 4278².
 buffer action of, 2221⁷.
 buffer intensities of, and its constituents, 4487⁹.
 butterfat in, from cows of Flemish breed, 447⁴.
 calcium and P secretion in, 2466⁹.
 calcium phosphate soly. in, 5515¹.
 canning, app. for, P 3995².
 "caramel" flavor in, bacteria production, 5482⁴.
 casein splitting by starters in chalked sterile, 1695³.
 centrifuging, pasteurizing and degasifying, app. for, P 654⁹.
 change from colostric to fresh milk period, 3991⁴.
 chemistry of, review on, 451⁴.
 chlorides and nitrates in, 110⁹.
 chlorine and Na content of, of various animals, 891⁹.
 chlorine and Na elimination in, and adulteration by addn. of Na salts, 447⁴.
 chlorine index of goat, 4977⁹.
 -chocolate compn., P 220⁶.
 choline in, in summer and in winter, 912⁹.
 coagulation of, by electrolytes, 2196⁹.
 by heat as function of acidity, 4509⁹.
 by pepsin, effect of fluorides and iodides on, 162⁹.
 by soap, 4488⁹.
 coliform organisms in certified, 1924¹.
 compn. and flavor of, soy-bean hay and ground beans in relation to, 1181⁹.
 compn., d and n of CaCl₂ serum of, 551⁴.
 compn. of, 4277¹, 5264⁴.
 from cow with tuberculous of udder, 5514⁴.
 from diff. quarters of udder, 892¹, 519⁹.
 effect of feeding with mangels and with dried sugar beet pulp on, 5514¹.
 effect of grazing on, 1438⁴, 4724⁴.
 in foot-and mouth disease, 4977⁹.
 nutritive requirements of milch cows in relation to, 5491¹.
 of region of Sées (Orne), 3759⁹.
 seasonal and monthly variations in, 2221⁴.
 condensed (sweetened), 448⁴, P 1184⁹.
 coagulating in thin homogeneous layers, app. for, P 652³.
 containers for, P 4752⁹.
 cooling and aerating, app. for, P 3031⁴.

- cooling and filtering app. for, 1550^a.
cooling and pasteurizing in bulk, app. for, P 738^a.
cooling app. for, P 652¹.
copper content of, effect of diet on, 4732^a.
corrosion of Ni and Monel metal by, 5246⁷.
cysteine, cystine and their derivs. in boiled, 2998^a.
definitions and standards for, 3516².
definitions of preserved products, 2766⁷.
degasifier for, flow regulator for, P 4279⁸.
density of, flowing through dispensing app., etc., registers for, P 61.
diet of, anemia from, 1939^a.
diet of, supplementary value of inorg. Fe and Cu in, 3733^a.
dry, P 220^a, 647^a.
 antirachitic value of irradiated, 3956².
 bacterial content of, 1181^a.
 nutritional value of Cu in, 1939⁷.
 phys. and chem. properties of, 5515^a.
 pieces of compressed baked, P 220³.
 research organization of Am. Dry Milk Inst., 3759².
 scurvy from, 4726⁸.
drying app. for, P 2076^a, P 3905^{1,2}, P 4378^a.
dry skim, in baking, 647^a.
 effect on fermentation and H-ion concn. of doughs, 1693^a.
 effect on water absorption of doughs and plasticity of flour suspensions, 2766^a.
 growth of trout on, 2218⁹.
dry wt. of, calen. of, 2222².
effect of age of cow on yield and quality of, 5514¹.
effect of breast, and modified cow milk on excretion of volatile acids in feces, 3491¹.
effect of change from dry feeding to pasture and of addns. of Ca salts on, 2222².
effect of feeding Bovita and wheat bran on quality of, 4751².
effect of feeding cod-liver oil on, 5221¹.
effects of atm. germs on, 219².
elec. cond. of, 4977^a.
elec. treatment of, app. for, P 652¹.
in emulsion prepn., P 222⁷.
energy power of, detn. of, 5514^a.
enriching, with peanut oil or sesame oil, P 3280^a.
evapd. (unsweetened), 2766^a.
 antigenic properties of, 3517².
 effect of temp. and time of forewarming on heat stability of, 1604¹.
 heat coagulation of, as affected by mixing diff. grades of raw milk, 1181¹.
 packaged, P 3994^a.
 and relation to public health, 4277^a.
evaporators for, P 2510^a, P 4379¹.
of ewes (Hungarian), 3991².
ewes, simplified mol. const. and f. p. of, 215¹.
fat and sugar formation in, role of carbohydrates in, 3953^a.
fat of—see also Butter.
fat of, and mixts. with cacao butter, 3990⁷.
fat of, bull substance of globules of, 4277^a.
Federal import milk act, 3517^a.
feeding stuffs for production of, evaluation of, 1445^a.
feeding to pigs, 2203⁹.
feeding value of grass for production of, 1966^a.
fermentation of, effect of freezing on, 1963⁹.
 fermenting yeast, 1430⁷.
filaments from skim, treated with *B. ladii viscosi*, P 1483^a.
filters for, P 738^a, P 1017^a, P 2855^a, P 4279^a.
fluorescence of, in ultra-violet light, 1181⁷, 3990⁹.
foam on skimmed, app. for breaking down, P 1024².
food contg. almonds and, P 4513^a.
food value of, effect of cow's ration on, 1157^a.
of France (Department of Orne), 215^a.
freezing of, P 654², P 3543².
freezing of, effect on compn., 1694¹.
freezing point of, 5513^{a,6}.
frozen products of, P 3280⁷.
frozen, sepn. of components by fractional melting, 3755².
fungi in, 5513².
grading of, at condenseries, evapd. and dry milk plants, 5245^a.
grading of, by reductase test, 5515^a.
halogen action on, and its constituents, 447^a.
heat effect on, 5513⁷.
heating to ripen for churning, device for, P 2768^a.
heat treatment of, in cans, P 4513¹.
human, alc. in, of drinking women, 5210⁷.
 bactericidal action of, 4959^a.
 compn. of, 874^a, 3265⁷.
 gastric lipase in babies fed with, 4737^a.
 of irradiated mothers, 4970^a.
hydrocyanic acid binding by, 3029^a.
hygiene, review on, 446^a.
increasing production of, with salt, 5249^a.
industry, review on, 647^a.
for infant feeding, P 4513^a.
in infant feeding, 3253⁹, 4726⁷.
infant feeding with, growth-producing amino acids and, 3492¹.
inorg. constituents of, 1694².
inspection of, educational aspects of, 5512⁷.
iodine compds. in, 4277^a.
iodine content of, its dependence on I content of feeding plants and soil and its relation to goiter, 1438^a.
iodine in, mode of combination of, 3242¹.
iron (inorg.) in, 890².
iron (inorg.) in, fate of, 890^a.
irradiated, effect on Ca and P metabolism in artificially fed infants, 3254².
irradiated, toxic action of, 4728¹.
irradiation of, P 4512⁹, 5491¹, 5515^a.
 app. for, P 652¹, P 1317^a, P 1446⁷.
 in C¹⁴ atm., app. for, 4278².
irradiation of cow udder and cow's food with ultra-violet rays, 2222⁷.
judging quality of, 5513².
keeping quality of, bacterial content and, 1181^a.
lactic acid fermentation in, effect of bile salts on, 3248⁷.
lactose in, effect of insulin and of pilocarpine on secretion and quantity of, 901¹.
malted, and its flavored products, photomicrographs of, 3518⁷.
malted, effect of enzymes of malt on milk solids during manuf. of, 3518¹.
maturing curds of, P 1446⁷.
medical science and, 2506^a.
metal, effect on, 5512⁷.

- Moths**, fats of *Arctia caja* effect of *p* on, 3514¹.
 -proofing, P 2906⁷, P 1231¹, - 2306⁸, P 3112⁷, P 3818¹, P 4085¹, P 4581⁷, P 5049⁷.
 -proofing compns., P 997², P 1483⁸, P 2257⁷, P 3316³.
 repellents against larvae of clothes, *p*-di-chlorobenzene and naphthalene as, 4538⁸.
- Motion**, measuring, with oscillograph, 1312¹.
 of viscous, incompressible fluids, 5079¹.
- Motors**. See *Electric motors; Engines; Fuels*.
- Mountain mahogany**. See *Cercocarpus parvifolius*.
- Moureu, Charles**, obituary, 4381⁶.
- Mouth**, acidity detection in, P 3945¹.
 acid, treatment of, 1172⁸.
 bacteria in, effect of cigaret smoking on, 629⁷.
 disinfectant for, Silargel contg. chewing gum as, 2189¹.
- Mouth wash**. (See also *Dentifrices*.) P 1724³.
- Mowrah seed**, aqueous ext. of, for killing earth worms, P 2530¹.
- Mucic acid**, esters, 4193⁷.
 manuf. of, recovery of N oxides in, P 3932¹.
 reducing power of, on alk. solns. of K₂HgI₄, 4009¹.
- Mucilage** (See also *Adhesives*.) P 3316³.
 from cotyledons of *Anagyris foetida*, 930¹.
 examn. of exts., etc., contg., 2212⁷.
 extn. of, from oils and fats, P 5603¹.
 of Irish moss, hydrolysis of, 4968⁸.
 of Irish moss, pptn. by alkaloïds, 5008⁸.
 of *Polygonatum officinale* rhizome, 1929¹.
- Mucin**, from soy-bean oil wastes, P 5054¹.
- Muck**, analyses of, 5536¹.
- Mucoids**, in follicular liquid, 3965⁸.
- Muconic acid** ($\Delta^1,3,4$ butadienedicarboxylic acid).
 , β -methyl-, isomer, 4480⁶.
- Mucor, maurus**, enzymic dismutation of keto-aldehyde by, 619⁷.
tolonifer see "nigricans" under *Rhizopus*.
- Mucous membranes**, dipeptidase and polypeptidase from intestinal, specificity of, 4235¹.
 extraction of urotropine through gastric, 3501⁸.
 glycogen in intestinal, of embryo, 4255⁷.
 glycogen in, of alimentary canal, 4255⁸.
 halogen content of intestinal, duodenal and gastric, 157⁷ 1).
 lesions of intestinal, in hypocalcemia from oxalates and phosphates, 895².
 nucleic P content of, of fundus ventriculi, 5228⁷.
 proteases of gastric, 1653¹.
 urea content of intestinal, during autolysis, 5228⁸.
- Mucus**, phospholipides of intestinal, role in fat absorption, 3496⁸.
- Mucyl chloride**, tetraacetate, 4193⁷.
- Mud**, coal, drying app. for, P 5033¹.
 from colored rain, 5133⁷.
 mineral, compn. of binding substances of, 3192².
 sepn. of, app. for, P 554¹.
 volcanoes, origin of petroleum and, 797⁷.
- Mud bath**, Slovakian, 4533⁸.
- Mudite**, use in coal mines to limit or prevent widespread explosions, 2573¹.
- Muffles**, electrically heated, P 779⁶, P 4627¹.
 gas, 4850⁸.
 improved Hempel, 3378⁷.
 lab., for metal recovery, P 2925⁸.
 for ore-sintering app., P 589⁸.
- Mugil japonicus** protamine from sperm of, 3242⁹.
- Mugline β** , 3243¹.
- Müller-Ballings reaction**, 188⁸.
- Müllerite**, 1082¹.
- Mullite**, crystn. of, effect of impurities on, 1232¹.
 in kaolin after firing, 492⁶.
 phys. structure of, 682¹.
 in refractory materials and their failure at very high temps., 2543⁹.
 structure of, 2126¹.
- Multiflorin**, 3230⁸.
- Multiflorinotin**, 3230⁸.
- Multiple proportions**, law of, expt. to illustrate, 5070³, 5360⁷.
- Multiplicative properties**, of homogeneous systems of 2 or more components, 2080¹.
- Mumetal**, and its magnetic properties, 2135¹.
- Mumia**, ancient medicinal uses of, 240⁸.
- Mummies**, enzymic activity of muscle of, 4713⁸.
- Mung bean**. See *Beans*.
- Munitions**. See *Explosives; Projectiles*.
- Munjistin**, constitution of, 1897⁸.
- Munroe, Charles E**, biography, 4821².
- Muntz metal**, heat treatment of, 2140¹.
- Murex**, phosphoric acid in foot muscle of, 210¹.
- Musca domestica**. See *Flies*.
- Muscarine**, effect on amnion of hen and goose, 206².
 effect on blood sugar, 3741⁹.
 effect on prepn. of intestinal muscle, 208⁸.
 poisoning by, heart activity in, 2212¹.
- Muscle extract**, effect of hypophysis ext. and, on diuresis, 2497².
 glycolysis of, effect of pancreatic inhibitor on, 3256⁸.
 lactic acid formation in, 5225³.
 non-sp. pressor, 2450⁸.
- Muscles**. (See also *Exercise; Fatigue (physiological); Tissue, animal; Work*.)
 acetaldehyde formation from pyruvic acid in autolysis of red and white, 2748⁸.
 acetaldehyde formation in, of normal, avitaminosed and starved pigeons, 421⁷.
 acetaldehyde production in, effect of temp. on, 4255¹.
 acetylcholine contraction of, 1177⁸.
 acidification or fatiguing of, role of Mg and Ca in, 192¹.
 acid production in, work and, 3505².
 activity of, 2207⁸.
 activity of, decompn. of creatinephosphoric acid and, 877⁸.
 adenosinephosphoric acid and inosic acid from, dissov. consts. of, 853¹.
 adenylic acid and, 1945¹.
 adenylic acid of, 2727³.
 adrenal ext. effect on, 2490⁴.
 adsorption of hemoglobin by, 4734².
 ammonia content of, effect of sympathetic nerve on, 427¹.
 ammonia formation in, and its relation to changes in function and state, 3000¹.
 ammonia production in activity of, 3937⁸.
 asnerine of avian, 4233⁸.
 argininephosphoric acid in, of invertebrates, 910⁸.
 barium chloride effect on, 896¹.
 blood supply and metabolism of, in surviving extremity and in heart-lung prepn., 3504⁸.
 bronchial, effect of phenylethylmalonylurea,

- cicutine and arsenobenzene derivs. on, 5237².
- bronchial, effect of sympathetic and parasympathetic excitants on, 5237².
- bronchial, pharmacol. studies on, 4266².
- calcium content of, during parathyroid tetany, 5233².
- carbohydrate and cholesterol of, effect of irradiated saponin and irradiated ergosterol on, 1178⁴.
- carbohydrate and fat utilization by, during work, 1150².
- carbohydrate and glycogen of, effect of insulin on, 208².
- carbohydrate and lactic acid of skeletal, in rabbits, 1170².
- carbohydrate metabolism of, effect of strychnine, adrenaline and insulin on, 3504².
- carbohydrates in, effect of insulin and synthalin on, 3262².
- carbon dioxide diffusion into, rate of, 1654².
- of carp, seasonal change of compn. of, 5511².
- chem. processes in, 3962¹.
- cholesterol and unknown unsaponifiable substances in voluntary and involuntary, 1654².
- chronaxic of, in insulinized frog, 438².
- clam, decompn. in acid soln., 3277².
- contractility and irritability of, 1169².
- contraction of, 1949².
- by bromoacetic acid, effect of work on, 887².
- by histamine and by exts. of feces and urine, 1955¹.
- identical source of work and heat in, 1671².
- simultaneous automatic recording of elec. potential and, 2455².
- contraction of denervated, effect of guanidine on, 3975².
- creatine content of, in fishes, 3274².
- creatine content of, in starvation, 1942².
- creatine in, after oral administration, 2210¹.
- creatinephosphoric acid content of, 160².
- creatinephosphoric acid content of, effect of adrenaline on, 2762².
- creatinephosphoric acid content of white and red, in scurvy and in polyneuritis, 1641².
- creatinephosphoric acid, creatine and lactacidogen content of white and red, 160².
- creatinephosphoric acid decompn. in relation to activity of, 4254².
- creatinine and phosphate content of striated, effect of sympathetic nerves on, 882².
- creatinine detn. in, 1920².
- degeneration of, on rice diet, 3014².
- dehydrogenases of frog and fish, effect of poisons on, 4249².
- destruction of acetoacetic and β hydroxybutyric acids in, 862².
- drug action on, 3025².
- dystrophy of, carbohydrate tolerance in, 1959².
- effect of garlic exts. on smooth, 2487².
- of fatigue products on, 2466².
- of HCN poisoning on, 909².
- of insulin on free sugar of, of normal and diabetic heart, 3744².
- of internal secretions and of poisons on, 1179².
- of lecithin and cephalin on working capacity of, 4254².
- of plicarpine, atropine and adrenaline on, 3977².
- of plasons on intestinal, of tench, 141.
- of toxins of *Ascaris lumbricoides* on tonic, of smooth, 3023².
- of work and exhaustion on, 2479².
- effect on blood sugar in incubation, 4732².
- effect on tonus and reflexes of alc. appl. to femoral nerve of decerebrate cat, 3976.
- energy changes of skeletal, in contraction under high pressure, 2207².
- enzymic activity of mummy, 4713².
- enzymic deamination in, 853¹.
- fatty acid degradation in, 2746².
- glucose diffusion through, 2096¹.
- glycogen and lactic acid in, effect of anesth. and of decerebration on, 4251².
- glycogen change in, during shortening produced by tetanus toxin, 4248².
- glycogen content of, in depancreatized, effect of dextrose and dihydroxyacetone on, 4975¹.
- glycogen content of skeletal, effect of thyroxine on, 1176².
- glycogen detn. in, 3262².
- glycogen formation in macerated, effect of insulin on, 4256².
- glycogen in, effect of adrenaline and insulin on, 1174².
- glycogen in, effect of insulin on, 1684².
- glycogen in, effect of synthalin on, 906².
- glycogen in, in dehepatized dog and effect of insulin, 4250².
- glycogen in striated, during tonic contraction, 3504².
- glycogen-lactic acid breakdown in, free energy of, 2467².
- glycogen of, 3256².
- glycogen removal from living, 3256.
- glucolysis in, 3937².
- glucolysis of, effect of pancreatic secretion on, 3256².
- halogen content of, 1571².
- heart, focal calcification of, 2481².
- heart, prepn. of ppig. serums with 896².
- heart, tonus of, 1176².
- of heart ventricle, effect of ions and in acid soln. on strip of inner and outer layers, 2781¹.
- heat of combustion of, 3255².
- heat production in smooth, 2207².
- hem in wing, of bees and its detn., 419².
- hemoglobin concn. of, during growth, influenced by diet, 3734².
- hemoglobin of smooth and striated, of cat, 3964².
- hexosephosphoric acid of, sugar reaction, 4714².
- hydrogen-ion concn. and striated, 1163.
- inhibition by, effect of alkali and alk. earth ions on, 3263².
- insulin effect on, 2486².
- insulin effect on damaged heart, 3741².
- intestinal, behavior of plexus contract. and plexus-free prepn. of, 208².
- intestinal, effects of histamine, C.H.O. and anaphylaxis on responses to elec. stimulation, 2212².
- iodine content of, of fish from east and west coasts of U. S., 3751².
- ionic effects on aging in press. juice of, 1946².
- iron-cong. pyrophosphate in, and its extn., 1669².
- iron (inorg.) in, fate of, 890².
- irritability of cells of, physico-chem. principles of, 3239².

- lactacidogen cleavage in contraction of, 870⁷.
 lactic acid and glycogen in adductor, of oyster, 4274¹.
 lactic acid content of, after permanent shortening, 424².
 lactic acid detn. in, 859⁴.
 lactic acid diffusion through, 872⁶.
 lactic acid formation in contraction of, rate of, 870^{4, 8}.
 lactic acid formation in, of *Octopus duria*, autolysis, 2501³.
 lactic acid formation in, pancreatic exts in relation to, 162¹.
 lactic acid formation in, phospho-organic intermediate compd. in, 1914².
 lactic acid-glucose cycle, 4729¹.
 lactic acid in, 174².
 lactic acid in fish and crustacean, 4272².
 lactic acid in, of inkfish, 2501³.
 lactic acid in, oxidation of, 5225³.
 lactic acid passage from working, into blood stream, effect of sympathetic nerves on 3263².
 lactic acid production of, effect of fluorides on, 3513¹.
 lanthanum effect on smooth, 5239⁶.
 lecithin, cholesterol and fatty acids in, effect of lecithin feeding on, 3264².
 of leeches, effect of amines on smooth, 439².
 of marine animals, comparative pharmacol and physiol. studies with, 210².
 metabolism of heart, 5495².
 metabolism of, in activity, 4730².
 metabolism of, in circulatory insufficiency, 2479².
 methylguanidine detection in, 1920².
 mineralization of, in edema, 644².
 mitogenetic radiation of, 855², 1947².
 nerve lesion in diabetes, 887².
 nerve prepn., effect of Mg on chronaxia of, 3482².
 nerve prepn., effect of hydroquinone on, 4973².
 nuclear-plasmic ratio of, during hunger, 1937².
 optical activity of mixts. with insulin, glucose and NaCl and with glucose and NaCl and effect of H-ion concn., 620².
 oxygen absorption by fatigued, as function of H-ion concn., 5493².
 perfusion expts. on, behavior of carbohydrates in, 4735².
 permeability of striated, to ions, 1169¹.
 permeability to electrolytes during work and in repose, 3502².
 permeability to K and effect of sucrose, 3505².
 pharmacol. study with nerve-free smooth, 206².
 pharmacology of crop, 3981².
 phosphagen decompn. in, 1167².
 phosphagen distribution in, 854².
 phosphagen in, effect of strychnine and of dissection of nerves on, 1175².
 phosphagen in gastric, of birds, 4735².
 phosphagen in juice of, behavior of, 2471².
 phosphagens in striated, 877².
 phosphate content of resting, 424².
 phosphate (inorg.) in, and its diffusion, 1671².
 phosphatase of, mechanism of action of, 4987².
 phosphatide content of, and its detn., 3961².
 phosphocreatine and inorg. phosphate detn. in, 4732².
 phospholipides of smooth and skeletal, 3496².
 phosphorus compds. (acid-sol.) in, during parathyroid tetany, 5505².
 phosphorus compds. of, effect of training on, 5494².
 phosphorus distribution in, during delayed relaxation, 3257².
 phosphorus (inorg.) of, 2470¹.
 phosphorus, lactacidogen and glycogen of pectoral, of normal, fasting and avitaminosis pigeons, 1946².
 phosphorus of, 1654¹.
 phosphorus of, in relation to lactacidogen and phosphocreatine, 3963².
 phosphorus poisoning and, 615².
 potassium and Na contents of skeletal, 2749².
 potassium content of dried and fresh thigh, 1168².
 potassium fixation in, 3748⁷.
 previously undetected constituent of, 4972².
 protein extn. from rabbit, 1918².
 protein metabolism of, of animals living under reduced pressure, 4736².
 proteins of, cysteine and cystine in, 4489⁷.
 cystine content of, 5202².
 denaturing, 2997².
 of rabbit and chicken, color reactions of, 170².
 sex differences of, 1422².
 of various animals, 2193².
 purine metabolism of, and mother substance of NH₃ occurring in muscle, 2467².
 purines of, 886².
 pyridine effect on, 197².
 pyrophosphate in, and its transformation, 2471².
 reaction change in postmortem, due to lactic acid, 165².
 red pigment of skeletal, 1653².
 respiration of, effect of toluene on, 5163².
 respiratory quotient of exercising, 4252².
 reversible loss of excitability in amphibian voluntary, 3939².
 rigor mortis, behavior of earthy phosphates in acid or alk., 192².
 sartorius, effect of veratrine and of nicotine on, 3746².
 seat of action of strychnine, veratrine and Ba in striated frog, 3748¹.
 sodium fluoborate and perchlorate action on, 5241¹.
 sodium perchlorate effect on striated, K ion in relation to, 3978².
 succinodehydrogenase and fumarase of, effect of phosphate and other factors on, 616².
 sugar content of, in physiol. and pathol. conditions, 893².
 sulfide (volatile) from, 1670².
 sympathetic influence on skeletal, physico-chem. analysis of, 3263².
 tetrodotoxin effect on skeletal, effect of some stimulating poisons on, 2217².
 thymus and activity of, 221¹.
 training, effect on blood compn., 871².
 training, effect on liver glycogen, 870².
 tryptic hydrolysis of haddock, 4510².
 urea content of frog, 4746².
 urea formation in, and effect of fasting and of antiseptic autolysis, 5228^{2, 3, 4}.
 urobilin in, 885².
 uterine, during puerperium, physiology and pharmacology of, 431².

- water exchange in, 2496⁴.
Muscone, P 16487, 1906⁹.

 max. wt. of, which can exist in vapor form in a 1000 cubic ft. fumigating chamber, 3535.
 mol. wt. of, cryoscopic detn. of, 20.
 oxidation of, P 612, P 845.
 by bacteria, 1431.
 promoters for V_2O_5 as catalyst in, 3621.
 plant tolerance to vapors of, 3295.
 poisoning by, and its prevention, 987.
 purification of, P 3236, P 5193.
 Raman effect in, 3623.
 reaction with HClO_4 , 1399.
 reaction with maleic anhydride, P 1416.
 recovery and purification of, 5029.
 recovery from coke-oven gas, P 1741.
 recovery in distg. tar, P 3334.
 removal from gas, P 1252, 4046, 4555, P 5308.
 as repellent against clothes moth larvae, 4539.
 Röntgen-ray examn. of, 3897.
 sepn. from shale oils, 3386.
 soly. in C_6H_6 , toluene, xylene and tar oils at various temps., 954.
 spectrum of, 3627.
 stoppages in gas mains, 4553.
 sulfonation of, 4944.
 symmetry of, 2433.
 synthesis of, from C_{11}H_4 , 2694.
 system: β -naphthol-azobenzene-stilbene-, 2348.
 system: 2,4,6-trinitro-*m*-xylene-, 2349.
 thermal expansion of, 747.
 treatment of sugar-beet seeds with, 2528.
Naphthalene, acetyl- See *Acetonaphthone*.
 —, acrylyl- See *Acrylonaphthene*.
 —, 1-benzoyl-8-benzyl-, 3923.
 —, 1,8-bis(methylmercapto)-, 1634.
 —, 1,8-bis(methylmercapto)-, 1357.
 —, 1-bromo-, adsorption by C from solns. in EtOH , 4120.
 —, 1(and 2)-bromo-, Grignard reagent formation with, 4185.
 —, chloro-, manuf. of, P 1420.
 —, 1-chloro-, 4944.
 manuf. of, 1407.
 nitration of, 1407.
 prepn. and industrial use of, 3923.
 sulfonation of, 1896.
 —, chlorodecahydro-, 1407.
 —, chloro-2,6-dimethyl-, P 613.
 —, 1(and 4)-chloro-4,5(and 1,5)-dinitro-, melting-point curves of, 3923.
 —, 1(and 2)-(chloromercuri)-, 5172.
 —, 1-chloro-2-methyl-, P 613.
 —, 1-chloro-4(5 and 8)-nitro-, melting-point curves of, 3923.
 —, 1(and 2)-cyclohexyl-, 4936.
 —, cyclohexyl - 1,2,3,4 - tetrahydro-, 4936.
 —, decahydro-. See *Decalin*.
 —, diamino-. See *Naphthylendiamine*.
 —, 1,8-dibenzoyl-, P 1137.
 —, 1,5(and 1,8)-dibenzoyl-, P 1417.
 —, 1,8-dibenzoyl-, bis(phenylhydrazone), 3923.
 —, 1,5-dibenzoyl - 4,8-dimethoxy-, 832.
 —, 1,5-dibenzoyl - 2,6-dimethyl-, and ring formation with, 3915.
 —, 1,8-dibenzoyl-2,7-dimethyl-, and ring formation with, 3915.
 —, 7,7-dibenzyl-, 3220.
 —, 1,8-dibenzyl-, 3220.
 —, 1,4(and 1,5)-dichloro-, prepn. of, 1897.
 —, 1,5-dichloro-2,6-dimethyl-, P 613.
 —, dicyclohexyl-, and picrate, 4936.
 —, dihydrodiketo-. See *Naphthoquinone*.
 —, dihydroketo-. See *Naphthalenediol*.
 —, 1,4-dihydro-1,2,4-triphenyl-, 3920.
 —, dihydroxy-. See *Naphthalenediol*.
 —, 1,5(and 2,6)-dimethyl-, heat action on, in presence of H under pressure, 3697.
 —, 1,4(and 2,3)-dinitro-, 4212.
 —, 1,5(and 1,8)-dinitro-, dipole moment of, 4856.
 —, 1,8-di-*o*-toluyl-, and ring formation with, 3915.
 —, 4a,8a-epoxy-1,2,3,4,5,6,7,8-octahydro-, 4466.
 —, hexabromo-, 4037.
 —, hexahydro-, 4466.
 —, 1-(hydroxymercuri)-, 1870.
 —, 2-(1-indanyl)-, 2707.
 —, 3-(1-indanyl)-, 2707.
 —, isopropyl-, P 1421.
 —, 1,1'-mercuribis-. See *Mercury di-naphthyl*.

- , 2 - methoxy - 3,6 - bis(methylmercapto)-, 1129^a.
 , methyl-, operating vapor engines with, P 920^a.
 , 1-methyl-, electrochem. oxidation of, 1899^a.
 , 1 (and 2)-methyl-, heat action on, in presence of H under pressure, 3697^a.
 , phenyl-, derivs., stereochemistry of, 3694^a.
 1,2,3,4-tetrahydro-. See *Tetralin*.
 1,2,3,4-tetrahydro-2-phenyl-, 2710¹.
 1,2,3,4 - tetrahydro - 1,2,4 - triphenyl-, 3920^a.
 trimethyl-, from gypsogenin, 5189¹.
 1,2,4-triphenyl-, 3920^a.
2 - Naphthaleneacetamide, 1 - methyl-, 3699^a.
2 - Naphthaleneacetic acid, homologs of, from o-quinamines of naphthalene series, 3698^a.
 —, 6-bromo-1-methyl-, 3699^a.
 —, α ,1-dimethyl-, 3699^a.
 —, 1-methyl-, 3699^a.
1-Naphthalenebutyric acid, 3703^a.
2-Naphthalenebutyric acid, 3703^a.
1-Naphthalenecarbamic acid, β -chlorobutyl ester, 4444^a.
 dibenzylphenyl ester, 2955¹.
 esters, 100^a, 1876^a, 2422^a, 2423¹.
2-Naphthalenecarbamic acid, anhydride with dithio-2-naphthalenecarbamic acid, 2953¹.
 —, dithio-, anhydride with 2-naphthalenecarbamic acid, 2953¹.
1-Naphthalenecarbinol, α -(α -aminobenzyl)- α -phenyl-, 1-, 4693^a.
Naphthalenecarboxylic acid See *Naphthos acid*.
Naphthalenediamine, rhythmic crystn. of, 1797^a.
1,5 - Naphthalenediamine, *N, N'* - bis(hydroxyphenyl)-, P 2044^a.
2,7 - Naphthalenediamine, *N, N'* - bis(hydroxyphenyl)-, P 2044^a.
1,8 - Naphthalenedicarboxylic acid. See *Naphthalic acid*.
2,3 - Naphthalenedicarboxylic acid, 1,2,3,4-, 5,6,7,8 - octahydro - 5,8 - dimethyl-, 3692^a.
2,3 - Naphthalenedicarboxylic anhydride, 1,2,3,4,5,6,7,8 - octahydro - 5,8 - dimethyl-, 3692^a.
1,2 - Naphthalenediol, 1,2,3,4 - tetrahydro-, *cis*- and *trans*-, heats of combustion of, 2095^a.
2,3 - Naphthalenediol, P 1139^a.
 comps. with trivalent Fe, with Al and with arsenic acid, 1362^a.
 dibenzoate, 2435^a.
 —, 1,2,3,4-tetrahydro-, *cis*- and *trans*-, heats of combustion of, 2095^a.
2,6 - Naphthalenediol, 1,8 - dibenzoyl-, 832^a.
2,7 - Naphthalenediol, 4466^a.
1,3 (and 1,4) - Naphthalenedione. See *Naphthoquinone*.
1,5 - Naphthalenedisulfonic acid, di-Me ester as alkylating agent, 2160^a.
1,6 - Naphthalenedisulfonic acid, 8-amino-3-*p*-methoxyanilino-, sultam, P 609^a.
 —, 8-amino-3-*p*-toluino-, sultam, P 609^a.
2,7 - Naphthalenedisulfonic acid, 4 - (4-anilino - 5 - sulfo - 1 - naphthyl-azo)-5-hydroxy-, as indicator, 1837^a.
1,5 - Naphthalenedisulfonyl chloride, P 2192^a.
 prepn. of, 2160^a.
Naphthaleneglycolic acid, α -naphthyl-. See *Glycolic acid*, *dinaphthyl*-.
1 - Naphthaleneglyoxylic acid, 2 - acetyl-, and methyl ester, 1899^a.
2 - Naphthaleneglyoxylic acid, 1 - acetyl-, and methyl deriv., 3466^a.
2 - Naphthalenepropionitrile, β - imino-1,4-diketo-, and derivs., 3874^a.
Naphthalene series, chem. constitution and properties of isomers, 4197^a.
 o-quinamines of, and homologs of 2-naphthaleneacetic acid from, 3698^a.
1 - Naphthalenesulfonic acid, 8,8' - dithiobis-, 1357^a.
2 - Naphthalenesulfonic acid, 1 - bromo-, 2172^a.
2 - Naphthalenesulfinyl chloride, 1 - bromo-, 2172^a.
1 - Naphthalenesulfonamide, 4 (and 5)-chloro-, prepn. of, 1897^a.
 —, 4,8-dibenzyl-, 3923^a.
1 - Naphthalenesulfonanilide, 4 (5 and 8-amino-, 3909^a.
 —, 4 (and 5)-chloro-, prepn. of, 1897^a.
2 - Naphthalenesulfonanilide, 5 (and 8-amino-, 3909^a.
Naphthalenesulfonic acid, chlorine deriv., P 4349^a.
 —, cyano-, transformation products of, P 288^a.
1 - Naphthalenesulfonic acid, alkyl esters, prepn. of and alkylation with, 2160^a.
 bornyl and menthyl esters, decompn. and hydrolysis of, 128^a.
 1-bornyl ester, optical rotation in various solvents, 121^a.
 ultra-violet optical properties of, 3404^a.
 —, 5 - (*p* - acetamidophenylazo) - 8-anilino-, as indicator, 1837^a.
 —, 4-amino-. See *Naphthos acid*.
 —, 8-amino-, sultam—see *1,8 - Naphthosultam*.
 —, 5-(*p*-aminoanilino)-, sodium salt, 3679^a.
 —, 8 - anilino - 5 - (4 - sulfo - 1 - naphthylazo)-, as indicator, 1837^a.
 —, 8,8' - *p* - biphenylenedisazobis(8-anilino-, as indicator, 1837^a.
 —, 4 (and 5)-chloro-, prepn. of, 1896^a.
 —, 4,8-dibenzyl-, aniline salt, 3923^a.
 —, 8,8'-dithiobis-, and disodium salt, 1357^a.
 —, 8-sulfinio-, and sodium salt, 1357^a.
2 - Naphthalenesulfonic acid, alkyl esters, prepn. of and alkylation with, 2160^a.
 bornyl and menthyl esters, decompn. and hydrolysis of, 128^a.
 1-bornyl ester, optical rotation in various solvents, 121^a.
 condensation products of benzoin est. P 3060^a.
 praseodymium salt, spectrum of, 4140^a.
 ultra-violet optical properties of, 3404^a.
 —, 4-amino-8-(β -aminoethylamino)-, P 848^a.
 8-(*p*-aminoanilino)-, 3679^a.
 7-(β -aminoethylamino)-, P 848^a.
 7-(*p*-aminoethylamino)-, P 848^a.
 8-chloro-, prepn. of, 1896^a.
 4 - (4,8 - acetylmino) - 1,4 - dihydro-1-keto-, 3451^a.

- , 4 - (3,5 - dibromo - 4 - hydroxy-phenylimino) - 1,4 - dihydro - 1 - keto-, 3451¹.

Nickel hexacyanorhodate, 2671².
Nickel hydride, 4632².
Nickel hydroxides, colloidal, prepn. of pseudo morphic, 1798².
 manuf. of, by electrolysis, P 4626².
 Ni(OH)₂, constitution of, 350².
 Ni(OH)₂, crystal lattice const. of, and solid solns. with other hydroxides, 1557¹.
 Ni(OH)₂, manuf. of, P 674².
Nickel ion, hydration of, in soln., 3110².
 magneton value of, 3383².
 reaction with Na nitrophosphomolybdate, 3186².
Nickel nitrate, hydrate of, dissociation of, 3416².
Nickel nitrite, compds. with pyridine, 3179².
Nickel ores, briquets of, P 4432².
 copper-Pt., on Lower Shebandown Lake, Ont., 4168².
 in norite complex in Pilansberg dist., Transvaal, 2910², 4425².
 of North Carolina (Webster), 4169¹.
 of Ontario (Lake Savant area), 4168².
 precious metals in Sudbury, and their recovery, 1087².
Nickel oxalate, as catalyst in hydrogenation of coal, 1243².
Nickel oxides, colloidal catalysts and adsorbents contg., P 941².
 NiO, as catalyst for decompos. of KMnO₄, 322².
 reactions: $2\text{NiO} + \text{NiS} \rightleftharpoons 3\text{Ni} + \text{SO}_2$
 and $3\text{NiSO}_4 + \text{NiS} \rightleftharpoons 4\text{NiO} + 4\text{SO}_2$, 2641².
 system: CaO-, 4124².
 systems: CoO-, MgO-, MnO-, and CdO-, 4128².
 systems: MgO-, and CoO-, x-ray examn. of, 5372².
 Ni₂O₃, as catalyst in hydrogenation of coal, 1243².
 Ni₂O₃, hydrated, P 3780¹.
Nickel phosphate, compds. with HCl and HBr, 575².
Nickel salts, adsorption of, effect of NH₃ on, 4864².
 as catalysts in hydrogenation under pressure, 4694².
 compds. with o-phenylenediamine, 5172².
 manganese detection in, 5118¹.
 o-phenylenediamine in compds. with, space requirements of, 4390².
 reactions with oximes, 4692².
 refining, for electroplating, 5422².
Nickel selenate, prepn. of, 3053².
Nickel silicate, origin of, at Webster, N. C., 4169¹.
 system: FeS₂ and PbS₂, 2642².
Nickel silver. See *Copper alloys* or *Nickel alloys*.
Nickel sodium sulfate, 3149².
Nickel stannate, solns. of, effect of change of H-ion concn. on, 3147².
Nickel sulfate, color of solns. of, effect of H₂SO₄ on, 1815².
 effect on coagulation and coalescence of *Hevea* latex, 3594².
 equil. with alc., 4869².
 heat of formation of, 2641².
 hydrate of, piezoelectricity of, 2863².
 hydrates of, transition point of, 4874².
 reaction: $3\text{NiSO}_4 + \text{NiS} \rightleftharpoons 4\text{NiO} + 4\text{SO}_2$, 2641².
 spectrum of, 32².
 system: Na₂SO₄-H₂O-, 3149².
 system: H₂SO₄-H₂O-, 4614².
Nickel sulfides, Ni₃S₂, fusion with Na₂S, 4914².
 NiS, colloidal, lowering of vapor pressure of liquid A by, 2341².
 colloidal, prepn. of neg., by means of tartaric acid, 3841².
 coloring of glass by, 250².
 equil. with silicates, 2642².
 reactions: $2\text{NiO} + \text{NiS} \rightleftharpoons 3\text{Ni} + \text{SO}_2$ and $3\text{NiSO}_4 + \text{NiS} \rightleftharpoons 4\text{NiO} + 4\text{SO}_2$, 2641².
 reduction (electrochem.) of, 42².
Nickel tetraethylphosphonium sulfate, 2673².
Nickel tungstate, crystal structure of, 2619¹.

 free energy of aq. solns. of, 1042⁸.
 heat of diln. of, 2645⁴.
 manuf. of, (*Patents.*) 6724⁵, 936⁵, 1222³, 1479¹, 1701³, 1726⁴, 1998^{1,2}, 2253⁷, 3307⁸, 3312⁴, 3779¹, 4026⁷, 4539⁴, 4781⁵, 5279⁴.
 from NH_3 , stainless iron for app. for use in, 3053⁵.
 from NH_4 , steels resistant to corrosion in, 3649⁸.
 from NH_4NO_3 , 2787³.
 Fausser process for, 1475⁸.
 by oxidation of NH_3 under pressure, 242⁹.
 manuf. of, and salts, P 2537².
 mixts. with H_2O and H_2SO_4 , analysis of, 4907⁹.
 mixt. with HCl of Brit. Pharm., 480².
 mixt. with H_2SO_4 , reaction with chamber coke, 3562⁵.
 partition of, between NaOH and KOH , 2345⁷.
 Raman effect of, 565¹.
 reaction with bile acids, 2985¹, 4482¹.
 with Cu, effect of curvature on, 5391³.
 with F, 5124³.
 with H_2S , 5426⁹.
 with HNO_2 and NO , kinetics of, 1340².
 with NaOH or NH_3 , vol. changes in, 4397².
 stainless Fe for, industry, 2919⁷, 3649⁸.
 strength of, 1319⁴.
 synthesis of, 3543⁹.
 system: $\text{Fe}(\text{NO})_2\text{-KNO}_3\text{-H}_2\text{O-}$, 4614⁷.
 system: $\text{Fe}(\text{NO})_2\text{-H}_2\text{O-}$, 4400³.
 system: $\text{HNO}_2\text{-}$, behavior in oxidation, 2871³.
 system: $\text{KNO}_3\text{-Al}(\text{NO}_3)_3\text{-H}_2\text{O-}$, 3777⁹.
 system: $\text{KNO}_3\text{-H}_2\text{O-}$, 757³.
 system: $\text{H}_2\text{SO}_4\text{-H}_2\text{O-}$, viscosity in, 1542⁹.
 transportation of, 2824⁹.
 as weed destroyer and fertilizer, P 1209⁸.
Nitric oxide. See *Nitrogen oxides*.
Nitridation, of manganese, 4504⁷.
 of metals, P 2924⁴, P 4666⁸.
 of steel, 2918⁷, 4658⁷.
 of steel, effect of various elements on, 2139⁴.
 steels for case, 81².
 in surface hardening of steel, 1606⁸, 2131⁷, 3888².
 of vacuum cleaner parts, 4915⁷.
Nitrides, decompn. pressure of, 1343⁶.
 formation of, cathodic atomization in, 5099⁴.
 by nitrogen fixation, P 1223².
Nitricification, in bog soil, production of, 3043⁹.
 of calcium cyanamide in some Indian soils, 2778⁷.
 of dried blood or $(\text{NH}_4)_2\text{SO}_4$ in soil, effect of MnSO_4 and MnCl_2 on, 3295².
 effect of C:N ratios of org. material on, 5263⁴.
 at high salt concns., 3917⁴.
 in manures, 1205⁴.
 of manures and fertilizers and of tea prunings, 1982².
 in orchard soils, 4996⁷.

- in sandy loam, 1202¹.
in soils, 4519⁷, 4521⁷.
 effect of high concn. of org. or ammoniacal N on, 3044⁹.
 effect of tillage on, 2521⁵.
in soils and effect of cover plants, 5535¹.
tests on soils, 4994⁴.
in wooded soil, 2528².
- Nitriles**, anthraquinone, P 5194⁶.
esters from, 2165⁹.
halogenated, P 4050².
 α -hydrocarboxylic acids from, P 3478¹.
hydrogenation of, P 154⁴, P 2446⁶.
hydrolysis of, with H_3PO_4 , 3217⁷.
o-(hydroxymethyl)aryl, as anthelmintics, P 1724⁵.
iodo-, of phenol ether type, P 852³.
manuf. of aromatic, P 1651³.
mols. of, structure and stages of excitation of, 1815².
reduction of, 599⁷, 4463⁵.
salts of aromatic, 828⁴.
tertiary, P 396³, P 2987⁶.
- Nitrites**, 4150⁴.
alkyl—see *Alkyl nitrites*.
biol. formation of, in org. media, 3948⁹.
colorimetry of, 4635¹.
comps. with pyridine, 3179⁹.
demonstration of, in forensic judgment of damage from shooting, 2734¹.
detection in water, 3037⁴, 3763³.
detn. in cuprammonium hydroxide solns., 4637⁵.
detn. of, 1079⁴.
effect on blood vessels, 3023⁹.
effect on capillaries of skin in high arterial pressure, 899³.
formation from NH_3 and O on alk. surfaces, 1044⁹.
- Nitrocellulose**. (See also *Collodion*; *Explosives*; *Pyroxilin*.)
amorphism of, 971³.
articles of, P 704⁵.
beating of, 5039⁴.
book: e applicazioni, 3346⁴.
bronze compn., non-living, P 909⁴.
cellulose conditioning for production of, P 5593².
cellulose prepn. for making, P 979⁴, P 1503³, P 1504³.
chrome steel as material for use in making, 5251¹.
for coating fabrics, P 2034¹.
coating metals with, P 4436⁴.
coatings contg., softening agents for, 4593⁷.
for coatings, etc., P 5317¹.
coating with cellulose acetate compn. and, P 3099⁹.
colloidal, behavior in polarized light, 1334⁴.
colored solns. or paints contg., P 1293¹.
coloring, P 1749⁴, P 5330⁴.
composite sheets of glass and, P 3096¹.
compn. of, variability in, 2572².
compns. from, P 704⁵.
corrosion prevention in plant making, 4180⁴.
decorative sheet material contg., P 1750⁴.
dehydration of, P 1750⁴.
diffusion of, 2031².
digestion of, app. for, P 3807¹.
effect of light on, 8342⁷.
- films**, lacquers, plastic compns., etc., contg., P 4872¹.
films of, on Hg, formation of, 2630⁷.
orientation and pseudo crystn. from traction in, 4393⁹.
use of Cr-surfaced rollers, etc., in finishing, P 277⁹.
forms of, 699⁴.
gunpowder coated with a film of, P 4074¹.
Italian, during the war, 516².
lacquers—see *Lacquers*.
for lacquers or enamels, P 5051⁴.
for lacquers or for molding, etc., P 982⁴.
low-viscosity, 2821⁴.
manuf. and properties of, 1292².
manuf. of, P 1266⁴, P 1268⁴, P 1501⁴, P 4071⁴.
displacement vs. dipping process in, 5594².
intermediates for, P 2034¹, P 4342⁴.
for lacquers, 4355⁴.
membranes of, 1035⁴.
from mercerized cotton wool, prepn. of, 4817².
metallic complexes of, in industrial filter, 2031⁴.
moldable compn. contg. phenol-aldehyde condensation product and, P 3061¹.
mol. condition of, 1706⁵.
nature of, 1264⁴.
paints—see *Paints*.
plastic, P 2822².
plastics contg., manuf. of, 1476³.
prepn. of, 4570².
properties of, effect of nitration temp. on, 4816².
review on, 276⁷.
solns. of, P 4819⁴.
solvents for, P 980⁷, P 2187², P 3514⁴, 3820⁴.
solvents for, relation of compn. to properties of, 1762⁴.
specifications and tests of A. S. T. M. for sol., 4340⁴.
stability of, 5043⁵.
stability of, detn. by detns. of H-ion concn., 4074².
structure of, 1264⁴, 2031⁴.
Tyndall light of solns. of, change in polarization angle on standing, 4610⁴.
varnishes—see *Varnishes*.
viscosity of, detn. of, 699⁴.
viscosity of solns. of, 4817¹.
viscosity of solns. of, effect of thinner on, 4817¹.
viscosity reduction, etc., of, P 4071².
yielding solns. of low viscosity, P 703⁴.
- Nitro compounds**, acryl.,—see *Isocyanate compounds*.
aliphatic, formation of, and alkyl nitrite, 816⁴.
analysis by chromic acid combustion, 5449⁴.
cleavage of nitro group from tertiary, 1927⁴.
detection of, 2157¹.
ionization of aromatic, in liquid NH_3 , 1559⁴.
nitrogen detn. in, 2902⁴.
poisoning by, and its prevention, 987⁴.
poly-, of aromatic amines, P 4950⁴.
reactions with liquid H_2S , 3148¹.
reaction velocity of, with $MeONa$, 4204⁴.
reduction (neutral) of, with Zn and NH_4Cl , 5154⁴.
reduction of, P 155⁴, P 605⁹, 1119⁴, 2128⁴, P 2447¹, 4938¹.
reduction of aromatic, P 846⁴, 4198¹.
with Orignard reagents, 1867⁷.
with sulfonic acids, P 2724¹.

reduction of org., 2171⁴.

sulfuric acid contg., decompu. pressure of, 320⁴.

tautomerism of o-, 1126³, 4461⁴.

Nitrogen. (See also *Azolemia*; *Fertilisers*; *Nitrogen fixation*.)

absorption and retention in scurvy, 1675⁶.

absorption by Mn and Cr, 3196³.

absorption in elec. discharge in N atm. between Fe electrodes, 5099⁴.

absorption of, by metals and alloys, 2401³.

absorption of Hertzian waves in ionized, 4403⁷.

activation by elec. discharge, 2368⁴.

activation by electron impact, 2105⁴.

active, 1053⁴, 3407⁵, 5110⁹.

band spectra in extreme ultra-violet excited by, 768³, 2656⁴.

detection of unstable intermediate products in, 3627⁹.

excitation of aurora green line in, 2654⁷.

infra-red radiations of, 2364⁷.

iron nitride formation in Fe-N arc, 2368¹.

metastable mols. in, 2647².

nature of, 771⁷.

spectra excited by, 1812⁹.

spectra of alkali metals excited by, 5118⁹.

time function of light rays of, 773².

adsorption by glass and charcoal, 557³.

by SiO₂ and CeO₂, 2612⁹.

by silicic acid gel, heat of, 3387¹.

by solid NaCl and in its aq. soln., 2087².

affinity for org. radicals, 1637¹.

after-glow, 2367⁹.

decay of, 3166⁹.

spectrum of, 1817⁴.

agronomic effects of, 230⁹.

amide, of blood and effect of exercise, 1946³.

in apple leaves, new growth and reproductive organs of bearing spurs, 2461⁴.

in apple shoots, movement of, 2201⁹.

assimilation by blue algae, 1434².

by *Clostridium pasteurianum* and related organisms, 3947⁴.

by lower plants, 2464⁹.

by plants, intermediate substances formed in, 413³.

asym. atom, 1641³, 5171¹.

atomic nucleus of, disintegration by α -particles, 3851³.

atomic nucleus of, effect of addn. of an α -particle on, 1807¹.

atomic wt. of, occluded in fergusonite, 1320¹.

atom of indole, secondary valence forces of, 3224⁷.

atom of pyrrole, secondary valence forces of, 2068⁴.

atoms, collision processes in combination of, in active N, 4408⁹.

configuration of tervalent, 1887³.

electronic structure of, 2878³.

barley yield with seed of same stock but of varying content of, 4496⁴.

in bile and its relation to N in urine, 4737⁹.

blood, distribution of residual, 4246³.

effect of immunization on, 3969³.

in pregnancy, ratio of urea to non-protein, 3506³.

in sensitized animals, 2755³, 3508⁴.

in blood serum in pneumonia, 4739⁹.

books: 3398³; Stickstoffwirtschaft; Rückblick und Ausblick, 1726³; Les industries

de 4303³; Stickstoff-Assimilation niederer Organismen, 5205⁷.

in brewing, 5002¹.

-carbon ratio in urine, effect of Ca feeding on, 3974².

effect of pituitary exts. on, 426³.

effect of RaBr₂ on, 201³.

in phlorhizin diabetes, relation to "vacat O/N" ratio, 1172⁹.

of rats deprived of one or both factors of vitamin B, 4723¹.

in starvation and deficiency of factor B, 1166⁷.

-carbon ratios of org. material, effect on mineralization of N, 5263⁴.

in coke-oven gas and its sepn., 4798⁷.

comparison with O according to law of corresponding states, 4387⁹.

compressibility of, 3385¹.

condition equation for, 1032⁹.

condition equation for, α and β of, 2622⁴.

in cotton plant, transport of, 3486⁴.

crystal structure of, 5360⁶.

cycle, biochemistry of, 2729⁷, 4235³.

density (normal) of, 1033².

diffusion coeffs. of, in H₂O and their temp.

dependence, 4870¹.

diffusion of cathode rays in, 4879⁹.

disintegration products of, range of, 561⁷.

dissoen. of, heat of, 332⁴, 2101³, 2876⁷, 4128¹, 2.

distribution in developing hen's egg, 4725¹.

distribution of non-protein, in blood, effect of insulin on, 2200⁷.

effect of high concn. of org. or ammoniacal, on nitrification in soil, 3044³.

effect on alloy steels, 4430⁷.

on elec. charges developed by heated metals, 4104³.

on explosion regions of mixts. of CO and air, 3101³.

on graphitization of cast iron, 1952³.

on iron, 3420⁹, 4430⁷.

on magnetic properties of iron single crystals and groups of crystals, 5073¹.

on soly. of ferrous materials in HCl, 2342⁴.

on sparking voltage of small tubular electrodes, 4135⁹.

on special steel and a method of surface hardening with N, 1855².

on spectrum of Hg, 1055³.

on steel, 2139¹, 2016³, 3426⁹.

on thermionic emission from W filament in Cs vapor, 5420⁹.

elec. furnace with atm. of H and, 485⁴.

electrodeless discharge in, 3627¹.

electrolysis of dil. solns. of H₂SO₄ and NaOH in presence of, 2889³.

electron scattering in, 1346³, 4881³.

elimination while breathing O, calcul. of circulatory rate from, 2455¹.

energy relationships of, 5078².

entropy of, 2337³.

exchange in green plants, 3488⁴.

excretion of, through bile, 3025⁹.

effect of Co on, 5241².

of hogs on velvet-bean rations, 3733³.

in normal and thyroidectomized rabbits, effect of avitaminosis on, 420³.

in urine, 4971⁴, 7.

in urine, effect of yeast on, 2213².

in urine in strenuous sport at high altitudes, 5223⁴.

- filtration of ppts. in atm. of, app. for, 2325¹.
 fluorescence of, 1817¹.
 in gelatin, 2452¹.
 in gooseberries, effect of fertilizers on, 4764¹.
 in growing cultures of *Mycoderma* and of *Saccharomyces cerevisiae*, 1666¹.
 in growth of *Oedogonium pluriale*, 410¹.

in comb. of *Xylocopa circumrolans*, 4272².
compn. of, in relation to morphol. and physiol. characters of plant, 3117¹.
for condensation pump, 967².
consumption in grinding of pigments, 1291³.
cooler for, P 2611³.
for cooling motors of automobiles, P 1483³.
copal, and copal condensation oil, 5050⁷.
copal, constituents of Congo, 3216⁹.
in copra of Malay, 4585².
coriander, extn. of, 3538⁸.
formation of, 4969¹.
grain size and yield of, 1722⁶.
corn—see *Corn oil*.
cottonseed—see *Cottonseed oil*.
cracking vegetable, P 969², P 2291³.
cracking vegetable and fish, as motor-fuel source, 4808⁸.
creosote—see *Creosote oil*.
croton, absorption of halogens by, and by its fatty acids, 4837².
from *Curcuma aromatica* rhizomes, 949⁶.
from *Curcuma zedoaria* rhizomes, 1717¹.
cutting—see *Lubricants*.
cuttle-fish, glycerides from, 4928⁸.
cyclamen, nerol and farnesol in, 5272².
of *Cydonia vulgaris*, 3364².
of *Cyperus rotundus*, 3301⁸.
detection of neutral, in soap or fatty acids, 5602².
deterioration of, 3823¹.
detn. in avocados, 2053⁷.
detn. in seeds, 4091⁹.
dill-plant, 1716³.
distn. of, condenser for use in, P 5068⁴.
dolphin, antirachitic effect of, 3011⁴.
drawing off, in measured quantities from a reservoir, app. for, P 2843⁶.
drying, 4354².
bituminous compns. contg., P 5314².
effect of age on gain in wt. of films of, 5335⁸.
fumes from, 5335⁴.
improving durability of coatings with basis of, P 3113³.
I no. of, 3358⁴.
modifying, P 4836⁴.
oxidation of, P 2584⁴, P 2840⁹.
drying of, P 1453⁴, 3357².
app. for, P 2328⁹.
in atm. of CO₂, 4834⁴.
theories of, 723⁴, 1291³, 1764⁴, 4834⁴.
drying or semi-drying, P 4356⁴.
drying or semi-drying, treating with chromic acid, P 1293³.
edible, regulations in industry, 2587².
edulcorating, P 1766⁴.
effect of high-frequency current on, 2053².
effect of wasp poison on, 906⁹.
effect on rayon, 821⁴.

- elasmobranch, unsaponifiable matter in, 3702¹.
- elec. characteristics of, 1543⁴.
- elec. cond. of films of, 5081¹.
- elemi, of Columbia, 4532².
- emulsifiers and stabilizers for, P 3806⁴.
- emulsifying app. for, P 553⁴.
- emulsions and suspensions of, products from suint or its fatty acids for making, P 3825¹.
- emulsions of, P 4339⁶.
- in agar medium, 4964².
- app. for sepg. constituents by elec. treatment, P 348⁴.
- for softening and oiling textile fibers, P 5330⁹.
- in water, P 1502⁴.
- emulsions of ethereal, agents for prepg., P 222⁷.
- emulsions of water and Hg in, dielec. const. of, 4120⁸.
- emulsions (oil-water and water-oil), effect of soap concn. in both phases on action of, 3615⁴.
- emulsions or colloidal suspensions of, P 4282⁴.
- emulsions (transparent) of essential, 931¹, 5005⁴.
- emulsions with acacia or tragacanth, H-ion concn. and, 3389¹.
- enanthaldehyde and similar compds. from vegetable, P 1139⁹.
- from *Erucastrium elongatum* seeds, 4839⁷.
- essential, analysis of, comm. rept. on, 4770⁴.
- antiseptic action of, 2247⁵, 2737⁴.
- Australian plants yielding, 5543².

 structural viscosity of aq. solns. of, 5375⁹.
 S detn. in, 2842⁹.
 sulfonation of, P 536⁹, P 1520⁹, P 1766¹, P 2057⁹, P 2589⁹, P 4982⁶.
 sulfonation of sol., calcn. of degree of, 2053¹.
 sulfuric acid compds. of, P 1297⁹.
 sulfurization and oxidation of, 2323¹.
 sulfur, manuf. of, 5006¹.
 sunflower, effect of temp. on hydrogenation of, 4839⁴.
 fatty acids of hydrogenated, 3822⁴.
 oxidation and polymerization of, 2583¹.
 sapon. of, 533⁷.
 in soap industry, 3590⁴.
 thiocyanate no. and satd. glycerides in, 2941¹.
 in sunflower seeds, content of, 4830⁴.
 tall—see *Tall oil*.
 tar—see *Tar oils*.
 tempering materials bearing, before oil expression, app. for, P 4567⁴.
 testing, simplification of, 1295⁶.
 textile, P 996⁹, P 4580⁷.
 for textile, leather and pharmaceutical industries, P 1297⁹.
 textile, resistance to MgSO₄, 988⁹.
 of *Thaagra chalcogramma*, glycerides from, 4928⁷.
 thickened, P 3118⁷.
 thickening, for lacquers, 4835³.
 thiocyanogen no. of fatty, and its uses, 4838⁹.
 from *Thlaspi arvense*, 2313¹.
 of *Thuja* species from the Caucasus, 2247².
 of *Thuja* species from the Crimea, 1717².
 thyme, Caucasian and Crimean, 3049⁹.
 of Hungary, 3773⁹.
 of *Thymus odoratissimus*, 2248¹.
 titer and refraction coeff. of, 4838⁹.
 train—see also "whale" below.
 train, extn. of, and app. therefor, P 2313⁹.
 transformer—see *Transformer oils*.
 treating, P 536⁹, P 727¹, P 4586⁹.
 treating fibrous materials with, P 5597⁸.
 treating, for making varnishes, linoleum, etc., P 722¹.
 treating volatile, to prevent evapn. losses, P 1452⁹.
 of tuberose (*Polyanthes tuberosa*), 478¹.
 tung—see "wood" below.
 Turkey-red—see *Turkey-red oil*.
 turpentine—see *Turpentine oil*.
 as two phase systems, 2089⁷.
 unsaponifiable matter in, detn. of, 723¹.
 utilization of fatty, given parenterally, 3955³.
 of *Valeriana officinalis* var. *latifolia*, constituents of, 3455⁷.
 varnish and paint, P 5051³.
 varnish formation from, 1291⁹.
 vetiver, 477⁴.
 viscosity increase by elec. treatment, P 1577⁷.
 viscosity of, detn. of, 3359¹.
 viscosity of, estn. from solidification points, 1543¹.
 viscosity of vegetable, 1295⁷.
 vitamin-A content of stored, effect of hydroquinone on, 416⁹.
 vitamin or enzyme production in, with ultra violet rays, P 1698⁶.
 vitamin transference from one, to another, P 5013⁴.
 vulcanization of, 1526⁹.
 vulcanized, 749⁹.
 walnut, compn. of, 2054⁹.
 washing, P 1453¹.
 water emulsifying agents in physiol. model, albumin, lecithin and Na oleate as, 4253⁹.
 Wecker patent, 5341⁷.
 whale, absorption of halogens by, 4837⁸.
 acids obtained by hydrogenating, 556⁹.
 effect of feeding, on depot fat of white rat, 4490⁶.
 glycerides from, 4928⁷.
 wheat-germ, effect on fertility of rats fed fat-free rations, 4498¹.
 in protecting against feeding FeSO₄, 1158⁷.
 vitamin A in, 1911⁴.
 of wintergreen, detn. in dubhang, 303⁹.
 wood (*Wuag*), 1291⁹, 1761⁹, 2049¹, 4087¹, 5599¹.
 absorption of halogens by, 4837⁸.

- catalytic effect of O on, 4087.
 coagulation of, 2051.
 compn. of, 5050^a, 5160^a.
 cooking of, 5336^a.
 crazing and folding during drying of films of, 1516^a.
 as a crystalloid and its autoxy-polymerization during drying, 291^a.
 density at high temps., 531^a.
 detn. in paints, 2307^a.
 effect of boiling on, 721^a.
 Florida project, 3113^a.
 formation of wrinkles in films of, 5330^a.
 halogen addn. to, to multiply unsatd. fatty acids, 3360^a.
 heat polymerization of, 531^a.
 incorporation into varnishes, 1761^a.
 phthalic acid detection in, 3358^a.
 reclaiming with glycerol, 4087^a.
 specifications for, 1448^a, 3358^a, 3586^a.
 and its substitute, 3358^a.
 thiocyanate no. and satd. glycerides in, 293^a.
 from wood spirit, P 2821^a.
 for wool, 988^a, 1275^a, 1754^a.
 wool, mixts., detn. of unsaponifiables in, 2054^a.
 wormwood, contg. l-camphor, 5542^a.
 of yarrow—see "*Achillea millefolium*" above.
 yield of, effect of pressure on, 4839^a.
 from *Ziziphora clinopodioides*, 1719^a.
- Oil shale.** See *Shales*.
- Ointments.** (See also *Salves*.) P 2552^a, P 2780^a.
 antiseptic power of mercury and thymol iodide, 1212^a.
 antiseptic power of, of ZnO, ichthyol, resorcinol, tar, and Lassar Zn paste N. F., 1212^a.
 base for, tegin as, 5006^a.
 bases for, colloidal metals for, P 3776^a.
 and bases therefor, 5011^a.
 bromine-I no. of, and its detn., 1980^a.
 iodine, absorption and antiseptic properties of several types of, 482^a.
 lead-subacetate, paraffin in, 5274^a.
 mercurial, 4020^a, 4775^a, 5005^a.
 analysis of, 5007^a.
 chemistry of, 473^a.
 prepn. of, 480^a.
 titration of, 5543^a.
 ophthalmological, bases for, 4020^a.
 sproetin and spraetin, compn. of, 472^a.
 titanium oxide-contg., 4745^a.
- Okra,** analyses of, 5215^a.
- Oldhamite,** copper mat contg., 2900^a.
- Oleander,** capillary analysis of, 3302^a.
- Oleates,** hemolysis by, effect of sucrose on, 3258^a.
 hemolytic behavior of, 5233^a, 5234^a.
- Olefin oxides,** manif. of, P 1415^a.
- Olefins,** addn. reactions of, partial polarity of double bond in relation to, 1538^a.
 alcs. and ethers from, P 606^a.
 chloro and nitro derivs. of, 372^a, 2150^a.
 constitution of phenyl derivs. of, 3907^a.
 detn. in cracked gasoline, 964^a, 965^a.
 detn. of, 3207^a.
 di-, aliphatic, 3430^a.
 manif. of, P 2447^a, P 4228^a.
 polymerization of, P 3232^a, P 4228^a.
 sepn. from gas mixts., P 4482^a.
 formation of, in decompn. of quaternary NH₄ compds., 2419^a.
- inflammation of mixts. of air and, in close spherical vessel, 2410^a.
 isomerid, production of, in dehydration of alcs., 2894^a.
 manif. of, P 1136^a, P 1415^a, P 2722^a, P 2986^a, P 3715^a, P 4483^a.
 manif. of, furnace for, P 3713^a.
 mercury complexes of, 3898^a.
 miscibility of castor oil with, 268^a.
 from mixed petroleum products, P 5568^a.
 oxidation by bacteria, 1431^a.
 poly-, detn. of no. of double bonds in, 4949^a.
 polymerization of, 90^a, P 1648^a.
 reaction of high mol. wt., with H₂SO₄, HCl and air, 3659^a.
 reaction with AlCl₃, 1384^a.
 reaction with H₂SO₄, 2148^a, 2932^a.
 rearrangements and addn. compds. of, 2694^a.
 in tar oils (primary), 5012^a.
 thermal reactions of, review on, 2560^a.
- Oleic acid,** absorption of halogens by, 4837^a.
p-aminazobenzene compd. of, 2311^a.
 analysis of, 63^a.
 calcium salt, effect of narcotics on, and assocn. of, 535^a.
 copper salt, pectograms of colloidal, and their prepn., 2089^a.
 decompn. of, by bacteria, 1431^a.
β, *β*'-dichloroisopropyl ester, 3913^a.
 dispersion in liquids, P 1190^a.
 distn. of, 2311^a.
 effect of water on gel formation by K and Na salts of, 719^a.
 as emulsifier for petroleum, 1255^a.
 ethyl ester, depolarization of, 318^a.
 films of, 4119^a.
 latent heat of, 3361^a.
 lead salt, mol. structure of, 3404^a.
 mercury salt, prepn. of, 2243^a.
 mesophases of K and Na salts of, 4860^a.
 methyl ester, hydrogenation of, 531^a, 2122^a.
 mol. length of, 5378^a.
 overfeeding with, 419^a.
 oxidation of, 4102^a.
 oxidation of, with H₂O₂, 1386^a.
 prepn. of pure, 4190^a.
 reaction with N₂H₄, 4443^a.
 Röntgen-ray examn. of, 1348^a.
 in rubber compounding, 4594^a.
 sapon. of, effect of narcotics on, 531^a.
 sodium salt, adsorption at air water interface, 3143^a.
 adsorption of soap at contact surface between CaH₂ or toluene and oil soln. of, 3117^a.
 complement fixation with, 1679^a.
 compn. of substances adsorbed by various adsorbents from solns. of, 3318^a.
 crystn. of hydrosols of, 3144^a.
 distn. of, 1613^a.
 effect of narcotics on dissociation of, 500^a.
 as emulsifying agent, 2627^a.
 oil-in-water emulsions of, 3388^a.
 as oil/water emulsifying agent in physical model, 4263^a.
 Röntgen-ray diffraction in solns. of, 4116^a.
 structure and particle count of clear soln. of, 2089^a.
 superficial solns. of, 5379^a.
 systems: linoleic acid-erucic acid, and linoleic acid-linoleic acid-, mixed analysis of, 5053^a.

- titration with Ba(OH)₂, 2312².
 toxic and anticoagulating effects of, 206².
 transformation into ketostearic acid by micro-organisms, 629².
 treatment of, for use as Turkey-red oil substitute, P 1298².
 triethanolamine salt for oil sprays, 3760².
 unsatn. in, 1745².
- Olein**, absorption of rays by, in short wave-length x-ray region, 3157².
 analyses of, 294².
 analysis of, 2586².
 of cacao butter, 5052².
 α-caprylo-γ-myristo-β-, 1110².
 β-caprylo-γ-myristo-α-, 1110².
 γ-caprylo-β-myristo-α-, 1110².
 α,γ-di-, salicylate, 4685².
 distillate and sapon., 3116².
 fireproofing, 725².
 monomol. film formation by tri-, by its vulcanization products and by fatty acids from sapon. of the products, 750².
 - myristo-α-, 1110².
 Röntgen ray diffraction by tri-, 5100².
 sulfonation of, P 1298².
 thiocyanate no. of, 1005².
 thiocyanometry and, 3116².
 vulcanization of tri-, 1526².
- Oleomargarine**. See *Margarine*.
Oleoresins. See *Resins*.
Oleosylvic acid, constituents of, 5188².
Oleothesia, respiration in, 3490².
Olfactology. See *Odors; Perfumes*.
Oligist. See *Hemalite*.
Oligoclass, fine structure of, 1368².
Oligodynamic action, 2457².
 in acetic acid fermentation, 4295².
 book. Neue Wege zur Wassersterilisierung, 4518².
 of copper "activated" water, effect of salts on, 5510².
 of copper, neutralization by solns. of electrolytes, 2485².
 of metallic powders, 4286².
 of metals on bacteria, 177².
 oxygen in, of metals, 180².
 plant disinfectant contg. metallic Cu, P 665².
 resistance of diff. leptospiras to, 1152².
 of silver, 1685², 2214², 4508².
 of silver on distd. water, 1441².
 silver soly. in H₂O in relation to, 3616².
 sterilization by, P 1702², P 3997², P 4082².
 in sterilization of liquids with Katadyn, 3280², 5524².
 in tuberculosis treatment, 4743².
 in water purification by means of catalytic Ag, 4985².
- Olive oil**, absorption of halogens by, 4837².
 acid detn. in green, 5341².
 acids of, synthesis of glycerides from, 621².
 analysis of, 1003².
 compn. of, in relation to morphological and physiol. characters of plant, 3117².
 decantation of, app. for, P 536².
 decompn. under influence of vital activity of some microorganisms, 620².
 detection in refined vegetable oils, 3580².
 detection of, 2313².
 detection of, extd. from residue from pressing, 3590², 5602².
 detection of refined in virgin, 4585².
 detn. in olives, 2054².
 effect on hile secretion, 3743².
 emulsions with Mg oleate, H-ion concn. and, 3389².
 extn. of, 1296², P 3118², 5053².
 app. for, P 3365², P 3824², P 5343².
 by CS₂, 1296².
 compn. of residues, 3823².
 fatty acids of, 294².
 fluorescence of, 3028², 3115².
 halogen no. of, 725².
 impurity detn. in green, 5340².
 iodine no. and its relation to source and age of, 5053².
 liposis from, effect of colloidal Ag on, 637².
 moisture detn. in green, 5340².
 overfeeding with, 419².
 oxidation of, and effect of previous irradiation, 724².
 oxidation on heating, 1754².
 paints contg., 4833².
 peanut oil detn. in, 1003².
 prepn. of, app. for, P 3590².
 press cake, extn. with CS₂, 2587².
 purity of, color reaction for, 724².
 Röntgen-ray diffraction by, 5100².
 sapon. of, effect of narcotics on, 534².
 specifications for, 5273².
 and its substitutes, 534².
 sulfonation of, P 1298².
 thiocyanate no. and satd. glycerides in, 293².
 virgin, 2053².
 viscous of, 1295².
- Olives**, curing ripe, P 916².
 oil detn. in, 2054².
 ripe, of Calif., 914².
 tree, effect of U rays and of ionization of air on, 5186².
- Olivil**², and derivs., 5188².

 of cod-liver, linseed and olive oils and effect
 of previous irradiation, 724⁶.
 of colloidal sulfides of As, Sb and Cu, 4392⁶.
 of copper at higher temps., 3149⁹.
 of copper, velocity of, 2673⁹.
 definition of, 2080¹.
 of depolarizer in prep. standard cell,
 4624².
 detonation and, 3808¹.
 disturbances in C metabolism in pregnancy,
 3962⁹.
 of disulfide acids in animal organism, 161¹.
 of drying oils, P 2584¹, P 2840⁹.
 in dyeing textiles, skins, hair, etc., P 3355².
 effect of pre-, on primary distn products of
 coal, 5300².
 electrochem., of anthracene to anthraqui-
 none, electrode for, 4411⁴.
 of toluene, 4806⁹.
 of 1,3 - xylene - 4 - sulfonic acid, 4412¹.
 of electrodes of Pb storage battery, 3860¹.
 electrolytic, of alic., 2372¹.
 of CH_2O in alk. soln., 1043⁹.
 of MeOH in alk. soln., 2371⁴.
 in presence of some gases, 2880¹.
 of some org. compds., 4411⁹.
 electronic interpretation of, 4855⁹.
 enzymic, of oxalic acid by higher plants,
 2991².
 of ethane, kinetics of, 5394⁴.
 of ethylene, catalysis by metallized SiO_2
 gels, 1341⁴.
 of ferrous hydroxide in NaOH soln by air,
 1337².
 with fluorine, 2386¹, 4113¹, 5124¹.
 of gases, catalysts for, P 5282⁹.
 of glucose and glycol with alk. Cu solns.,
 3240².
 of glucose in phlorhizin glucosuria, 5505¹.
 of glucose to acid, enzymic catalysis of,
 160¹.
 of glucose with chloramine, 160¹.
 of glutamic acid in animal organism, 3261⁴.
 of halogen acids by H_2SO_4 , 3181¹.
 of hexane, 323².
 of hydrazine by ferricyanide, velocity of,
 4615⁴.
 of hydriodic acid in the dark and in the light,
 3850⁹.
 of hydrobromic acid by chromic acid in
 presence of salts, rate of, 2638⁷.
 of hydrocarbon oils, app. for, P 1136¹,
 P 4060².
 of hydrocarbons, P 509⁹, P 3078², P 5474¹
 by air, 4186⁷.
 catalysts for, P 679⁹.
 at low temps., 3436⁶.
 of hydrogen peroxide by $Ce(SO_4)_2$, 3181⁶.
 of β -hydroxybutyroclastic system, intensity
 of, 618⁹.
 induced, 5091².
 of inorg. catalysts, effect of protein on,
 3241².
 of iodide ion by acid dichromate solns in
 presence of neutral salt, kinetics of,
 4397⁷.
 of iodide ion by persulfate ion, 2870⁹.
 of iron and steel at high temps., 3196¹.
 of iron and steel by heat, 5141⁹.
 of iron, catalysis of, 1044⁴.
 of iron in magnetite, 4167¹.
 of iron salts, theory of, 3868⁹.
 of jelutong, 4815⁴.
 of lactic acid by Br water, O as neg. catalyst
 in, 2887⁴.
 of lactic acid in muscle, 5225³.
 of lead (ground), etc., app. for, P 249².
 length and state of, classification of org.
 compds. on basis of, 1882².
 of light metals, 3652¹.
 of linseed oil paints, 5049⁹.
 low-temp., in clay sewerpipe manuf., 3784².
 of lubricating-oil bottoms, 4335⁹.
 mechanism of, 3619¹, 4918⁶.
 of mercuric cyanide by $NaBrO$, 4421⁹.
 of mercury in presence of incandescent Pt,
 1045¹.
 of methane by means of O, catalysts for,
 3620⁹.
 of naphthalene, promoters for V_2O_5 as catalyst
 in, 3621².
 of natural gas, P 5308².
 neg. catalysis in induced thermal, 1339¹.
 of nitrogen dioxide, ionization in, 334².
 of octanes in vapor phase, 3436¹, 3897⁶.
 of oils, 2323¹.
 of org. compds., P 815⁶, P 1135⁶, P 2185⁹, P
 2721⁹, P 2985⁷, P 4482⁷.
 app. for catalytic, P 2078⁹, P 4851².
 catalysts for, P 2256⁶.
 of org. halogen compds., 4197².
 of oxalic acid, Co as catalyst for, 4418¹.
 of paraffins, 3337¹, 3897⁶, 4561⁷.
 of paraffins, fatty acids from, P 3118¹.
 of paraffin wax, etc., P 1748⁷.
 partial, of cracked hydrocarbons, P 1260¹.
 by permanganate, effect of neutral salts
 on velocity of, 4873².
 of petroleum, 4052⁹.
 of petroleum, dibasic acids and salts from
 products of, P 4567⁷.
 of petroleum, etc., P 4567⁷.
 of petroleum hydrocarbons, catalysis of,
 P 1250¹.
 of phosphine at low pressures, 5373⁴.
 of phosphorus vapor in O, 5072².
 photochem., of alic. by dichromate ion,
 5157⁴.
 alic. in presence of ketones, 2660¹, 3619⁴.

- of anthraquinone, etc., 40⁸.
- of cellulose, 3080⁶.
- with $K_2Cr_2O_7$, 4621⁸.
- of zymosterol in oil soln., 4953⁸.
- of platinum complex compds., 5427⁸.
- of polyhydric alcs., 1116¹.
- of porcelain and ball clays, rate of, 1485².
- potentials, application of logistic function to, 3382³.
- effect on multiplication of protozoa and alteration of their species, 439⁶.
- of hypochlorite solns., 2345⁵.
- of tyrosinase system, 4236⁵.
- with powd. reagents, P 3034¹.
- promoted by ultrasonic radiation, 1573².
- of pyrite from coal from Ravine seam, 3879².
- quant., with $Ce(SO_4)_3$, 4635¹.
- in rail manuf. by Thomas and Martin processes, 4429³.
- reduction, in animal cells, glucose deriv. affecting, 5205⁵.
- effect of quinine on dynamics of, 2493⁵.
- indicators, 2674⁵, 3450².
- isomeric rearrangements and, 1106⁹.
- in sterile bacteriol. media, 1929¹.
- reduction potential, of animal cells, regulation by O, 3274³.
- effect of neutral salts on, 2639².
- of egg of sea urchin, 3514².
- of ferric-ferrous electrode, 1802¹.
- for germination of spores of *B. tetani*, 4960⁴.
- of glucides, 2635¹.
- of glucose solns., 1336⁴.

 soly. in Al and in Al-Cu alloy, 4917¹.
 soly. in Fe and in FeO, 5456².
 soln. velocity of, in H₂SO₄ soln., 2638⁹.
 specific heat of, 3385⁴.
 specific heats of condensed, 3610¹.
 spectrum (green line) in night sky, intensities of light of, 1813⁹.
 spectrum in ultra-violet excited by active N, 768⁹.
 spectrum of, 337⁹, 1569², 1570¹, 2098⁴, 2361², 2651⁴, 2653⁴, 2656⁹, 3629⁴, 4130⁹, 5418⁹.
 spectrum of atm., and electron levels of O mol., 32⁹.
 spectrum of, in atm., 2657⁴.
 spectrum of, in solar atm., 5095⁹.
 in steel and its influence on structure, 3886¹.
 stratification of, in lakes, 3036².
 supplying for respiration, app. for, P 1702².
 supplying to furnaces, app. for, P 3181⁴.
 supply of body, relation to hemoglobin content, 1160⁹.
 supply tank, P 5358⁹.
 system: Ca-S-, 4400¹.
 system: C-Fe-, 2086¹, 2137².
 system: H₂-H₂O-, 4127⁹.
 systems: chabasite-, and charcoal-, magnetic susceptibilities of, 4856⁹.
 systems: Co oxides-, 4417⁹.
 systems: Co-S-, and Ni-S-, 2641⁹.
 tension, effect on *Cl. sporogenes*, 1432⁹.
 tension, effect on rate of O consumption in marine fishes, 4273⁴.
 tension for mitosis of certain embryonic and neoplastic cells, 1681¹.
 thermal cond. of, and of its mixts., 3140⁹.
 treatment of infantile tetany with atm. enriched by, 2494².
 in urine, 5206².
 effect of As on, 202⁶.
 tension of, 3964².
 in water of mountain streams, 1703⁹.
Oxygen, analysis, detection and detn. in lungs and intestinal gases of cadaver and its application to forensic detn. of breathing in newborn, 1921⁹.
 detection in H₂ app. for, P 552⁹.
 detection with bacteria, 1661⁴.
 detection with luminous bacteria, 185⁴.
 detn., 4906².
 detn. in atm., 1592².
 in cast iron, 578².
 in flue gases, absorption tube for Orsat app. for, 3⁸.
 in gas, 4163⁹, 5302².
 in H₂, P 580².
 in iron, 5128⁹.
 in iron and steel, 1078¹, 2121⁹, 4640⁹.
 in lung and intestinal gases of cadaver, 3725².
 in mixts. with CO₂ and neutral gas, app. for, 3725².
 in N and H and app. therefor, 3183¹.
 in NaOH soln., 4064⁴.
 in steel, 2905², 3183⁹.
 in urine, 5206².
 detn. of active O in mixts. of persulfuric acid and H₂O₂, 2391¹.
 detn. of dissolved O and of O demand in wastes from pulp and paper mills, 975⁹.
 detn. of dissolved O in water, 1194¹, 1973⁹, 2773¹, 4758².
 detn. of H₂, P 580².
Oxygenase, tyrosinase and, 1145⁹.
Oxygen compounds, active, P 568⁹, P 677².
 heterocyclic, reactivity of O in, 2182¹.
 with hydrogen (OH), electronic states and band spectrum of, 769⁹.
 formation by thermal decompn. of H₂O, 5402¹.
 heat of, dissocn. of mol., 4856¹.
 photosensitized band fluorescence of, 771⁹.
 spectrum of, 4139⁹.
 temp. of under-water spark as computed from distribution of intensity in absorption bands of, 1812².
 in water-vapor discharge tube, 4736⁴.
 manuf. of org., P 3231⁴.
 with nitrogen, P 3779⁹.
Oxyhemoglobin, amphoteric property of, temp. effect on, 3495².
 carbon dioxide-binding capacity of, 881¹.
 denaturation of, by acid, 2729⁹.

- diamino acids in, 2994³.
 disocn. of, 858⁸.
 hematin formation from carbonylhemoglobin and, by dil. acids, 1425⁸.
 spectrophotometric studies on, 626⁸.
 transformation into cathemoglobin, rate of, 4234⁸.
- Oxymel of squill**, 4534⁷.
Oxymethylenes. See *Polymethylenes*.
Oxyneurine. See *Betaine*.
Oxyuns, of fish oils, hardening with Ni, 3362¹.
Oxyproteic acids, of blood, compn. of, 165².
Oxytocics, basic ethers of resorcinol as, P 2987³.
Oxytocin. See *α-Hypophamine*.
Oyamalite, occurrence of, 4650⁸.
Oysters, adulteration of, 4508⁷.
 blood and pericardial fluid of, 4275⁷.
 body fluids of, H-ion concn. and CO₂ content of, 4274⁸.
 chlorination of, 1705⁴.
 copper content of, 3757⁴.
 digestive enzymes of, 4276¹.
 glycogen content of seasonal variation of, 4274².
 iodine content of, of Pacific Coast, 1697¹.
 lactic acid and glycogen in adductor muscles of, 4274¹.
 pollution of, 2507⁹, 3529⁴.
 purification of contaminated, by O₃, 1972⁸.
 respiration in, 4275⁹.
 substance in, causing hypoglycemia, 3718⁸.
- Ozocerite**, decolorizing, 4561⁸.
 formation of, in rock fissures, 2282.
 hardening low m. p. substances from, P 969⁶.
 mixts. with "Agerite," effect on aging of rubber, 3371⁶.
 purification of, P 3341⁶.
- Ozone**. (See also *Water, purification of*.)
 absorption of ultra-violet radiation in, 2361⁸.
 in atmosphere, altitude of layer of, 1819¹.
 in atmosphere and its relation to other geophys. conditions, 2612¹.
 chem. Constitution of org. compds. detd. by means of, 2420⁷.
 as combustion product of CH₄, 1539⁷.
 compn. for supplying Cl and, for inhalation, P 4777¹.
 compd. with tetramethylammonium hy. droxide, 4905⁷.
 decompn. by heat at low pressures, 3396², 3846².
 decompn. by heat, ionization in, 334⁹.
 depolarizing action of, 3861¹.
 detn. in air, 3183⁹.
 in detn. of chem. constitution of unsatd. compds., 3900⁸.
 effect on temp. of upper atm., 2080⁹.
 effect on transformation of initial to final positive ions in air, 762⁸.
 electrolytic prepn. of, P 2377⁸.
 formation and decompn. by cathode rays, 774².
 formation and decompn. of, 4604².
 formation of, 4605¹.
 under alpha radiation, 5112¹.
 by cathode rays, 773².
 by elec. discharge of high frequency, 2889⁷.
 in elec. discharges at pressures below 3 mm., 2665⁹.
 by ultra-violet rays, 2660⁴.
 in upper atm., 5095⁹.
- in lower and upper atm., 5071⁴.
 magnetic susceptibility of, 2332⁹.
 manuf. of, 43⁸, P 3034².
 oxidation of biosterol by, 1423⁶.
 prepn. and purification of, app. for, 2149.
 reaction with alkali azides, 3179³.
 with 1,1 - dimethyl - 3 - methylenecyclohexane and its derivs., 4453².
 with N₂O₅, 2636⁸, 2871².
 seasoning wood with, app. for, P 687⁹.
 spectrum of, 1570¹.
 sterilizer, P 74.
 treating materials with, P 348², P 2111⁸.
 in upper atm., 4603⁴, 5071⁴.
 uses of, 2789⁸.
- Oxonides**, rearrangements of, 595⁶.
Ozonization, of fenchenes, 3693⁸.
 of hydrocarbons (mixed liquid), P 275⁶.
 of unsatd. hydrocarbons, 2149⁹, 5155⁹.
- Ozonizers**, P 3481², P 741⁶, P 1067², P 1577², 2108⁴, P 2377⁸, P 4109², P 4112², P 4380⁷, P 4627⁸.
 lab., 4849².
- pu* See *Hydrogen-ion concentration*.
- Pachira aquatica**, oil of, 3360⁸.
Packing effect, 1027².
 nuclear size and, 328⁶.
 stability and abundance of occurrence of atoms in relation to, 1807².
- Packing fraction**, significance of, 3152⁹.
Packing industry, chem. and bacteriol. control in, 1964⁴.
 waste from, disposal by irrigation, 1709⁹.
- Packing materials**. (See also *Filling materials*.)
 acid-proof, for absorption towers, 1015².
 acid resistant, for use with H₂SO₄, etc., P 1230⁷.
 for bottle seals, P 490⁸.
 for compressors of refrigerating app., P 656².
 for gas washing towers, 1781⁴.
 metal foil, P 1383⁹.
 for steam turbines, etc., P 1230⁸.
 stone, to produce spiral movement in stream passing tubes, P 2078⁶.
 for stuffing boxes, etc., P 1230⁸.
 for towers, Monel metal and Al as, 1781⁴.
- Paederus fuscipes**, skin poisoning by, active principle of, 2762⁹.
- Paeonia peregrina**. See *Peony*.
- Pain**, producing action of K ion, 1438⁸.
- Paint**. (See also *Coating(s)*; *Detergents*; *Driers*; *Lacquers*; *Turpentine substitutes* and "drying" under (Oils).)
 681², 908², 1293¹, 1763⁴, 2300⁸, 258², 3113⁸, 3587⁸, 3820⁹, 4355⁹, 4582².
 absorption of oil by, additive quality of, 5333⁹.
 aging of films of, 2048⁷.
 on aluminum alloys, 5333⁸.
 aluminum, as primer for wood, 5333⁴.
 aluminum bronze powder for, specifications of A. S. T. M. for, 1448⁸.
 analysis and control in manuf. of, 458².
 analysis of, 4905⁹.
 analysis of materials for, 291¹.
 analysis of mixed, 5333⁸.
 analysis of white linseed-oil, 291¹, 1449⁹.
 anti-fouling, 291¹.
 anti-fouling, specifications of A. S. T. M. for toxic ingredients in, 1448⁸.

- app. for emulsifying, mixing or grinding, P 1025⁵.
- asphalt emulsions for use as, P 5337⁵.
- binding agent for, P 721⁴.
- bituminous, 2687⁴, P 2840⁵, P 4088⁵.
- bituminous materials for, aqueous pastes from, P 1262⁵.
- blistering of, on concrete under water, 5293⁵.
- books: Outlines of, Technology, 998¹; Formulas and Processes for Mfg., 3359⁷; Taschenbuch für die Farben- und Lack-industrie sowie für den einschlägigen Handel, 3359⁷; Vernis et amaux cellulose-siques, 3820⁵.
- by-product recovery, P 4835⁵.
- carbon blacks for prepn. of, P 4029⁵.
- casein-contg., 3585⁵, 4086⁵.
- cellulose, P 721⁴, P 1763⁵.
- from cellulose *N*-alkyl thiourethans, P 1268⁵.
- for cement and concrete, P 4836¹.
- chalk as component of, 5598⁴.
- chalking of, 530⁵.
- chemist's duties in plants for manuf. of, 2917¹.
- chromate detn. in, 2839⁵, 4833⁵.
- chromium compds. for anti-rust, P 487¹.
- from clays (colored), 5445⁴.
- cleaning, fatty substances sol. in water for, P 536⁵.
- coagulation in siccatve oil-contg., preven-tion of, P 1516⁷.
- coarse particles in, tests of A S T M. for, 1449⁵.

 cobalt, Pb and Na in, 4731⁸.
 diabetes. See *Diabetes*.
 diet of, value for blood regeneration in nutritional anemia, 3957⁸.
 digestive enzymes in so called, of *Balanus perforatus*, 5243⁸.
 effect on catalase action of blood, 889¹.
 effect on creatine metabolism, 2473⁸.
 enzyme activity of, in diabetes mellitus, 1673⁸.
 enzyme formation in cells of, effect of x-rays on, 170⁸.
 enzymes of, in bates 5009
 breakdown of casein, serum globulin and serum albumin by, 157
 digestion of lecithin by, 615²
 fats and lipoids in, after vagotomy, 5224¹
 fistula of, cause of death from, 5229⁸
 function of, 4258¹, 4730¹
 function of, relation of alimentary glucemia to, 425²
 function test of island app., 191²
 halogen content of, 157¹
 hormone content of, 3494¹
 hormone of, mineral metabolism and, 888², 4973³.
 insulin from whale, 4730⁸
 lipase of, activation in serum with leucyl glycyglycine, 1890⁸.
 effect of quinine salts on, 399⁸
 effect of various substances on velocity of hydrolysis by, 3937²
 stereochem. specificity of, 1917¹
 metabolism regulation by, 433²
 nucleic acids of, 617², 5228⁸
 phosphagen absence in, 406²
 physiology of, 4733¹
 physiopathology of, in relation to diastases of blood, urine and excrements, 646¹
- proteases of, effect on benzoyl- and phthalylglycylglycine, 169⁸.
 secretin of, behavior at boiling temp., 158⁸.
 effect of boiling temp. on, 158⁸.
 specificity of, 1424⁸.
 secretion by, effect of MgSO₄ on, 3743⁸.
 secretion (external) of—see *Pancreatic juice*.
 secretion (internal) of, 4245⁸.
 secretory excitants for, in blood during fasting and after feeding, 884⁸.
 in sprew, 1956⁷.
 trypsinogen in, of fetus, 5222⁸.
 trypsin prepn. from powder, sepn. of enzymes with diff. acids in, 3238¹.
 urobilin in, 885⁷.
- Pancreatectomy**, acetoneuria in fasting and phlorhizined dogs before and after, 1670⁶.
 blood sugar after, effect of pituitary ext. on, 4734¹.
 glucemia after, in female dogs, effect of folliculin on, 643⁹
 glycogen content of muscle after, effect of dextrose and dihydroxyacetone on, 4975¹
 phenylbutyric acid fate in dogs after, 1669⁸
 resorption of albuminoid food and of fats after, 1670⁶.
- Pancreatic ducts**, effect of ligation of, on diastase behavior in blood, urine and feces, 4245⁸.
 sympatheticotony after ligation of, interpretation of cessation of chem. processes detd. by, 878⁸.
- Pancreatic extract**. (See also *Insulin*)
 casein digestion by, effect of (NH₄)₂SO₄ on, 5347⁹
 effect of lecithin on, 1652⁸
 effect on glucolysis, 3256⁸
 hypoglycemic action of, 2490⁸.
 lactic acid formation in muscle in relation to, 162².
- Pancreatic juice**. (See also "secretion" under *Pancreas*), 4245⁸.
 acetylcholine effect on, 5237¹.
 acid base compn. of, 1170⁹
 compn. of, and effects of its loss on compn. of body fluids, 5236⁸.
 in disturbed gastric secretion, 4258⁸
 dye excretion in, 4733¹
 effect of continued loss of, on body fluids, 1171¹
 humoral regulation of, 4730¹
 pharmacol. action of, 2497⁸
 protein digestion by, 617¹.
 from secretin with unblocked vagus and with vagus blocked with stavame, 3965¹.
 secretion of, in disturbed gastric secretion, 430⁸.
 effect of glucemia and hypoglycemia on, 645¹.
 effect of histamine on, 2492¹.
 effect of insulin and other drugs on, 1441¹.
 effect of secretin and of phloretine on, 2475⁸
 secretion produced by HCl with a blocked and unblocked vagus, 876⁸.
 soln. of egg albumin and digestion of fibrin by, with and without CaCl₂, 875⁸
 trypsin, amylase and lipase in, and their detn., 2475⁸.
- Pancreatin**, in pharmaceutical preps., 4776⁸.
- Panicum**, *maximum* (Guinea grass), compn. of, 651⁴.
miliaceum—see *Millet*.

- Pantopon**, effect on amnion of hen and goose, 206^a.
 effect on blood vessels, 4268^a.
 effect on skin sensory qualities, 4742^a.
Pantosept, disinfectant value of, in relation to Cl content, 3539¹.
Papain, 4299^a.
 action on gelatin, 615¹.
 casein-splitting action of, and its acceleration by HCN, 2874^a.
 natural activation of, 2726^a.
Papaver. See *Poppy*.
Papaverine (6,7 - dimethoxy - 1 - methylisoquinoline), detection of, 5271¹.
 effect on amnion of hen and goose, 206^a.
 on blood vessels, 4493¹.
 on crop muscles, 3981¹.
 on gall bladder, 1690².
 on intestinal muscle of tench, 1442^a.
 on pulmonary edema produced by injection of adrenaline, 1689^a.
 on uterus and adnexa uteri, 2765¹.
 formation of, 1883¹.
 microcrystn. of, 1469².
 salts of, P 4300¹.
Papaw, 4299^a.
 vitamin B in, 3012^a.
Papayotin. See *Papain*.
Paper. (See also *Paper pulp*; *Stencils*; *Laps*.)
 absorption of water by, app. for testing, P 3100^a.
 aluminum sulfate in manuf. of, 3091^a.
 analysis and classification of, 3094^a.
 analysis in examn. of effect of wastes on streams, 975^a.
 analysis of, 5585^a.
 app. for drying, carbonizing or oxidizing, P 4581¹.
 "art paper," P 3809².
 from bagasse, 5586^a.
 bakelized, elec. properties of, 1575^a.
 from bamboo, 3091^a.
 bibliography for 1928 on making of, 3091^a.
 with bituminous constituent, P 2571¹.
 bituminous emulsions for use in making, P 2568^a.
 bleach and caustic soda plant for mills, 4068^a.
 blueprint—see *Blueprints*.
 book, deterioration in, and its prevention, 3343¹, 5592^a.
 books: Die Papierherstellung der Feldmühle, Papier- und Zellstoffwerke Aktiengesellschaft, 979¹. Bibliography of Pulp and Making, 1749^a. Reading List on Papermaking Materials, 1749^a. Manuf. of, 3097^a, 4070¹; Bibliography of Periodical Publications on, Making and Allied Subjects during 1927, 2293¹. Essays on, Making and Paper, 2293¹. Modern, Making, 2293¹. Theorie des Antriebs und Kraftbedarfs von Papiermaschinen. Theorie der Harzleimung, 2293¹; Chemistry of Pulp and Making, 2821¹; Technik und Praxis der Papierfabrikation—Die Geschichte des Papiers, die Roh- und Halbstoffe der Papierfabrikation mit Ausnahme des Holzzellstoffes, 3343¹. Musterbuch der deutschen Papier-Erzeugung, 1928, 3343¹. Lexikon der Papierbearbeitung. Bd. 2. Arbeitsverfahren. Lfg. 3, Bog. 9012. Begaben-Einfasser, 4818^a. Papier-Prüfungen, 5316¹.
 for bottle caps, P 5318^a, P 5593^a.
 brittleness test for, 3094¹.
 bulk of, measuring of, 4341^a, 5585^a.
 bursting strength of, app. for testing, 2611¹.
 calendering app., P 279¹, P 983¹.
 calendering rolls, temp.-indicating device for use on, P 5593^a.
 Canadian Pulp and Paper Inst. at Montreal 2032^a.
 carbon—see *Carbon paper*.
 casein coating on, detn. of, 277¹.
 catalog, detn. of relative percentage of sulfite and groundwood in, 4065^a.
 cathode ray action on, 3408^a.
 cellulose-ester coatings for, P 4818^a.
 cigaret, manuf. of, 4068^a.
 for cigaret mouthpieces, P 2035¹.
 clays for filling and coating, 5588¹.
 cleaning and dyeing compns. for, P 536^a.
 coated, for window signs, etc., P 4073¹.
 coating, and app. therefor, review on, 3091^a.
 cogon grass and rice straw as materials for, 4818^a.
 colloids in making, 3091^a.
 colored, fastness to light of, 3095^a.
 coloring, P 2305¹, 3095¹, 4067¹, P 4098^a.
 coloring in heater with aniline dyes, etc., of size and alum on, 5588^a.
 coloring, sizing, impregnating, etc., on, P 1507¹, P 2291^a, P 4821¹.
 colors for, P 5319¹.
 colors for printing, P 2571¹.
 composite sheet material of, for book covers, etc., P 5019¹.
 composite sheets of, P 4785^a, P 5284^a.
 compn. of commoner grades of, 4068^a.
 containers or wrappings of, coating of, P 4300¹.
 continuous sheets of, app. for forming, drying, P 4073^a.
 contrast ratio of opaque and translucent, detn. of, 5591^a.
 corrosion by, 5591^a.
 corrosion in, mills, 975^a, 3094¹.
 for "cutter crush" process for show cards, etc., P 1507¹.
 detection of starch, glue and casein in, upon, 5588^a.
 deterioration of, 3095^a.
 dielectrics of, prevention of ionization in, 3032^a, 4981^a.
 discoloration of, 4067^a.
 dissolving old, app. for, P 2571¹.
 drying app. for, P 514^a, P 554¹, P 700¹, P 1751¹, P 3100^a.
 absorption chest for, P 4820¹.
 system for heating and supplying air to, P 1022¹.
 drying app. with roll doctors for, P 4073^a.
 drying cylinders for, P 4343¹, P 5042^a.
 app. for removing air from, 3091^a.
 removal of condensate from revolving, 3091^a.
 drying of, effect on rosin sizing of heat on, 3092^a, 3093¹.
 in folio, P 515^a.
 on steam-heated cylinders, P 983¹.
 durability of, 978^a.
 durability of printed, 978^a.
 dyeing, effect of "Saffbraun," on strength, 5589^a.
 dyeing goldenrod shades, 5590¹.

- dyeing, mordanting, etc., app. for, P 5048⁹.
 dyeing tissue in waterproof tints, P 5580⁹.
 effect of liquids on, 3095⁹.
 elastic compn. from, P 4784⁹.
 elastic, machine for making, P 5154⁹.
 elec. a.-c. motors in, industry, 30914⁹.
 elec. cond. and H-ion concn. of, detn. of, 40684⁹.
 felt, P 12711⁹.
 felt, wool detn. in, 5590⁹.
 fiber analysis, dot-count method of, 55841⁹.
 fiber for, treatment of, P 15067⁹.
 fiber recovery from liquids, P 38083⁹.
 fibers for, 30963⁹.
 filler retention in, 30957⁹.
 fillers for, detn. of particle size of, 55881⁹.
 filter—see *Filter paper*.
 fine, manuf. of, 55851⁹.
 finishing, P 43434⁹.
 fireproofing, P 2569⁹, 30945⁹, P 3100⁹.
 fireproofing compn., P 4911⁹.
 fixing metallic sheets on, P 17521⁹.
 for food containers, 911⁹.
 formation and strength of, in relation to pulp hydration, 5586⁹.
 freeness, 55884⁹.
 freeness testing, 40671⁹.
 gas removal from solid and liquid materials in stock for, app. for, P 2034⁹.
 glassine, P 33451⁹.
 glazed on one side, app. for prep., P 3100⁹.
 glossing, P 33451⁹.
 gloss of, detn. of, 55891⁹.
 with glossy surface of regenerated cellulose, P 2034⁹.
 greaseproof, manuf. of, 40684⁹, P 4573⁹.
 gum coating machine, 5590⁹.
 gummed, P 40731⁹.
 with high finish or glaze, P 982⁹.
 humidity and, 55864⁹.
 hydrogen-ion concn. control in manuf. of, 55874⁹.
 hydrogen-ion concn. control in sizing, and recovery of material from white water, 1969⁹.
 hydrogen-ion concn. of, detn. of, 7021⁹.
 impregnated corrugated packing, P 4343⁹.
 impregnated, for recording impressions by elec. currents, P 4309⁹.
 impregnating, for bag manuf., etc., P 35751⁹.
 phenolic resinous product for, P 1000⁹.
 with rubber, P 26031⁹.
 with rubber, etc., P 22947⁹.
 with synthetic resin, P 10021⁹.
 with synthetic resins, app. for, P 52961⁹.
 increasing elasticity and shrinkability of, P 5154⁹.
 industry, cooperation of university with, 33431⁹.
 industry in 1928, 48181⁹.
 ink removal from, P 22944⁹, P 26714⁹, P 53191⁹.
 and app. therefor, P 9834⁹.
 emulsions for use in, P 35481⁹.
 inspection and sorting of, photometric app. for, P 13181⁹.
 inspection of, 55841⁹.
 insulating, for cables, 30824⁹, 49814⁹.
 insulating, tests of A.S.T.M. for untreated, 1449⁹.
 kaolin and, 55881⁹.
 from kelp, P 5154⁹.
 kraft, 5579⁹.
 kraft, manuf. of, 30944⁹.
 light sensitivity of artists' drawing and water-color, 40687⁹.
 light-weight, P 43431⁹.
 lithographing of, 30951⁹.
 loss of fiber in white water in manuf. of, 30681⁹.
 lubricants for, mills, 5590⁹.
 machines for making, (*Patents*) 2794⁹, 5154⁹, 7064⁹, 9824⁹, 9831⁹, 12701⁹, 15064⁹, 20344⁹, 25704⁹, 28244⁹, 31004⁹, 33444⁹, 33744⁹, 38094⁹, 40734⁹, 45734⁹, 48204⁹, 53184⁹.
 machines for making, agents for washing and cleaning felts and wires of, 55904⁹.
 app. for controlling drying by, P 9832⁹.
 app. for raising sieves of rotary cylinders, washing drums and pressure wheels in, P 15061⁹.
 app. for regulating consistency of "stuff" used by, P 28244⁹.
 app. for testing wires of, 55911⁹.
 beater roll for, P 28244⁹.
 color-depositing app. for, P 28244⁹.
 "consistency meter" for, P 15064⁹.
 control systems for, P 2794⁹, P 7064⁹, 9774⁹, P 9831⁹, P 25704⁹, P 53184⁹, 55904⁹.
 "doctor" for, P 9831⁹.
 felt sheet for, P 9831⁹.
 Fourdrinier, P 53184⁹.
 multi-motor drive for, 30917⁹.
 recorders for, 40691⁹.
 rolls for, 9774⁹, 55904⁹.
 slice for, P 50422⁹.
 suction app. for, P 2794⁹, P 7064⁹, P 12701⁹, P 15064⁹, P 17514⁹.
 toothed rollers for, P 5154⁹.
 wire gauze for, P 25704⁹.
 machines for prep. pulp and rags for, P 5041⁹.
 making-cylinder, mold for, P 7064⁹.
 from mangrove, 30921⁹.
 manuf. of, P 15061⁹, P 23101⁹, P 25704⁹, P 38094⁹, P 40734⁹, P 48204⁹, P 55934⁹.
 manuf. of, and app. therefor, P 45734⁹.
 membranes of various kinds of, 10354⁹.
 from mercerized fiber, P 15061⁹.
 metal-coated, P 20354⁹, P 30624⁹, P 30631⁹, P 40734⁹.
 meters and instruments in mills, 9754⁹.
 microscopy of, 33484⁹, 55841⁹.
 mill losses, 40681⁹.
 mineral-coated, P 40734⁹.
 mixing app. for stock, P 12704⁹.
 moisture content of, on paper-making machines, app. for controlling, P 45734⁹.
 moisture detn. in, app. for, P 3134⁹, P 25711⁹.
 moisture in webs during manuf., app. for indicating, P 7064⁹.
 mulch, 55851⁹.
 multi-ply sheets in continuous lengths, app. for forming, P 40734⁹.
 newsprint, P 7071⁹.
 humidity and, 9781⁹.
 manuf. in Canada, 55841⁹.
 non-glare writing, P 45734⁹.
 opacity detns. with Ives tint photometer, 9784⁹.
 ornamental, P 48211⁹.
 papyrus from Rhodesia as material for, 55861⁹.
 paraffin wax detn. in, 48184⁹.
 parchment, P 50424⁹, P 53191⁹.

- patents (U. S.) on manuf. of, 977³, 4067³, 5584³.
 from peat, P 4573³.
 permeability to liquids, 3005⁹.
 photographic—see *Photographic paper*.
 from pine (maritime), 3091⁹.
 from *Pinus hamiltoni*, 3092¹.
 pitch troubles in mills, 5587¹.
 plastics in manuf. of, 3088⁹.
 printing, compn. of, evolution in Italy since introduction of wood pulps, 5584⁹.
 printing, defects in, 5584³.
 pulp detn. in, 5585³.
 purified wood fibers as material for, 3096³, 5585³.
 purifying materials for, centrifuge for, P 1270⁶, P 3100³, 5040¹.
 reeds from Rhodesia as material for, 5586¹.
 refining, P 707¹.
 research, 3091², 4067².
 at Bur. of Standards, 4068¹, 5584².
 in Canada, 3089¹.
 at Forest Products Lab., 5584².
 at McGill Univ., 5583⁹.
 in Norway, 3088⁹.
 at Pulp and Paper Research Inst., Montreal, 5584¹.
 of Svenska Pappers-och Cellulosa-Industrierna Foreningen, 5584².
 from residue from grasses, reeds, etc., P 1699³.
 resinous oils from manuf. of, reclaiming of, P 4343¹.
 reworking used, P 2034².
 rollers for treating, app. for removing condensate from steam heated, P 2823¹.
 rolling machine (hydraulic) for, P 4820².
 rolls of, app. for making coreless, P 1270³, P 3100⁹.
 rolls of, app. for tightening loosely wound, P 1270⁶.
 roofing, P 3069⁹.
 roofing, coating of, P 3556¹.
 safety, P 707¹.
 manuf. of, 5592².
 system of marking with substances to disclose use of ink "eradicators," P 279¹.
 seasoning and "rectifying" stock for, app. for, P 5042².
 seasoning by treatment with elec. heated air, app. for, P 3100³.
 sensitized, manuf. of, 4068³.
 sheets of, P 1229¹.
 sheets of, app. for forming, P 2034².
 sheets of uniform thickness, 5576².
 shredding and screening stock, app. for, P 2823¹.
 shrinkage of, 5590².
 size losses, control of, 4069³.
 sizes and coatings for, from N alkyl thio urethans of cellulose, P 1268¹.
 sizes for, P 489⁹, 5584³.
 analysis of rosin, 3093³.
 from oxidized petroleum wax, P 510³.
 rosin deterioration in, due to heating moist sheet, 970².
 sizes on, dependence of hardness of, on degree of heating, 3090⁹.
 sizing of, P 2571¹, P 3574³, P 3575¹, P 5318⁹.
 with bakelite, 5580¹.
 Delthirna process of, 3092², 4069³, 5588³.
 with rosin, 977³, 3093², 5588³.
 with rosin, theory of, 977³.
 U. S. patents on, 5588³.
 sizing strength, dependence on degree of beating, 702¹.
 detn. of, 2032⁴.
 effect of beating on, 5589³.
 slime in making, and its prevention, 5590³.
 slime treatment with Cl, 4068⁹.
 softening, P 1507¹.
 spectroscopy (reflection) of, colored with azo dyes, 4406³.
 steam and power supply in mills, 511³.
 steels for, industry, 5591².
 from straw, corn cobs and corn stalks, 1963¹.
 from straw, esparto, reeds, etc., P 706¹, P 3807⁴.
 from straw, maize stalks, hemp, etc., P 2294³.
 strength of, detn. of, 2292².
 effect of drying on, 5587⁴.
 effect of fiber character and beating on, 977².
 strength of sheets of, effect of pressing on, 3096³.
 sulfonic acids in manuf. of, P 849¹.
 surface characteristics of, 978¹.
 swelling tendency of, reducing, P 2823¹.
 tearing test app. (Elmendorf), detn. of action of, 5589².
 testing in sheets, weighing and reduction, app. for, P 1507¹.
 tests for, 3094³, 5584³.
 tests for printing, 5584³.
 tests for raw material as such and in case of prepn. of, 3092².
 tests for, value of, 5584¹.
 thermoplastic water resistant, P 4072².
 tracing, P 983⁹.
 translucence of, 5591².
 transparent, real and imitation, 978¹.
 transparent wrapping, P 2035¹.
 turbines (Bergmann) for, industry, 314¹.
 two sidedness of, 3096³, 5585¹.
 viscosity control for suspensions in making, 4341¹.
 wall, colors for, P 2821¹.
 washing app. for, after parchmentizing, etc., P 515¹.
 washing of old, 4069³.
 waste from mills, damage to fish by, 1988¹.
 disposal of, 5529¹.
 treatment of, 1700⁹, 3042³, 3529³, 4289¹.
 waste heat in, mills, 5557⁴.
 waste, working up of, 4069³.
 water for mills, iron elimination from, 975¹.
 water in manuf. of, economical use of, 5587¹.
 water of imbibition of, detn. of, 4069³.
 water permeability of cement sacks of, 4791¹.
 water power in industry in Canada, 973¹, 4570³.
 waterproof, P 983³, P 2294³, P 4573³.
 waterproof and flame resistant building, P 3550³.
 waterproof drinking cup of, P 2002¹.
 waterproofing, P 704³, P 1270², 4068², P 4573².
 waterproofing and coating, P 248².
 waterproofing, emulsified waxes for use in, P 5343³.
 waterproofing for conduits or tubing, etc., of, P 3549².
 waterproofing sacks, etc., of, P 5319¹.
 waterproofing sheets of, app. for, P 4820².

- water removal from, P 5042¹.
 water supplies and waste in mills, 3092⁶.
 waxed, pattern effects on, P 334⁸.
 wetting, detergent or emulsifying agents for, P 937².
 white high-gloss, P 518⁶.
 whiteness of, photocolormeter for detg., 5590².
 wood, from 18th century, 3094².
 wrapping, P 1752¹.
 wrapping, for apples, 449⁸.
 from *Zizania latifolia* straw, 4068¹.
Paperboard. (See also "wallboard" under *Building materials.*)
 asphalt (infusible) for treating, P 4321⁴.
 chip, use requirements of, 5592².
 coated with resinous varnish for elec. purposes, 3522².
 coatings for, from oxidized petroleum wax, P 510⁶.
 containers, service requirements of, 5592².
 containers, test liners for making, 5592².
 contg. "ti tree" material, P 982⁶.
 from corn stalks, 5592².
 from corn stalks, app. for making, P 4820
 corrugating, for fiber containers, 5592
 drying, 3093⁹.
 drying app. for, P 3100⁷.
 finishing, P 4343⁴.
 fire resisting, P 279⁴.
 from hemp waste, P 3112⁶.
 impervious, 4068¹, P 4073².
 impregnating with rubber, P 2603².
 inspection and sorting of, photometric app. for, P 1318¹.
 lined, P 1241².
 manuf. of, 978⁹, P 1270⁶, P 2035², P 3574², P 1073⁸, P 4820⁶.
 manuf. of, app. for, P 279⁴, P 3100⁷.
 multi-ply, P 279⁴, P 5593².
 playing cards of, from compns. of cellulose esters or ethers, P 4819².
 press for treating, of alkali cellulose, etc., P 513².
 from residue from grasses, reeds, etc., P 1699².
 sized liner, buffer process for, 5592².
 stiffening, P 1231¹.
 vulcanized, 3097⁴.
 waste treatment, P 1260⁶, P 1078⁹.
 waterproof, P 515², P 1270⁶, P 4785².
Paper-like material, highly porous, P 3809²
Paper pulp (See also *Cellulose; Sulfite liquor*)
 (Patents) 982⁹, 2294¹, 2570², 2823⁹, 3344¹, 3574², 3809², 4070⁶, 4095², 4343¹, 4573², 5040², 5041¹, 5593¹.
 acid accumulator in manuf. of, 4066¹.
 acid disintegration processes, cause of failure of, 5574⁹.
 by acid sulfite process, P 1270¹.
 alk. cooking process, 974⁹.
 chem. reactions in, 3090².
 reaction products of, 5583⁶.
 alk., mill control problems, 975⁴.
 alkali sol. components of sulfite, 3089².
 analysis in examn. of effect of wastes on streams, 975⁴.
 analysis of, 976², 5588⁶.
 app. for draining, drying and molding, P 3574².
 app. for maintaining a const. concn. of, P 5318⁹.
 app. for mech. prepn. of, P 5041¹.
 from bagasse, 5318⁹.
 baking pan from, P 1271².
 from bamboo, P 5041¹, 5583⁶.
 from bamboo, etc., app. for digestion of, P 1270⁶.
 baryta resistance of, 4067¹.
 beater and assoc. app. for treating, P 1506⁹.
 beating app. for, P 279⁴, P 5151², P 708⁶, P 1270¹, P 3100⁷, P 3341², P 3809², P 4343¹, P 5318⁶.
 beating of, 5589².
 under control, 4069².
 in the hollander, 5589².
 from beech (red) and white birch by sulfite process, 5582⁶.
 beechwood sulfite process, 4067¹.
 bleachability of, made by Ritter-Kellner process, 5576².
 bleached sulfite, detn. of reducing impurities of, 971⁴.
 bleaching, 974², P 1506⁷, P 2294⁴, P 5593¹.
 bleaching, by Thorne system, 971⁶.
 bleaching-hollander liquors, detn. of chlorates in, 5589².
 bleaching liquor prepn. with liquid Cl, 971⁴.
 Bleaching of kraft, 3082⁶.
 bleaching of sulfite, 702⁶, 3089¹.
 bleaching temp., fiber strength and, 4069².
 books. Forest Products, Their Manuf. and Use, 979². Farm Products in Industry, 1749⁶. Bibliography of Pulp and Paper Making, 1749⁶. Manuf. of, 3097⁴, 4070¹.  au point de vue colloidal, 5249⁹.
 bottles, sterilization in soaker-type washers, 4278².
 buffer action of, 2221⁷.
 buffer intensities of, and its constituents, 4487⁸.
 butterfat in, from cows of Flemish breed, 447⁴.
 calcium and P secretion in, 2466⁹.
 calcium phosphate soly. in, 5515¹.
 canning, app. for, P 3995².
 "caramel" flavor in, bacteria producing, 5482¹.
 casein splitting by starters in chalked sterile, 1695³.
 centrifuging, pasteurizing and degasifying, app. for, P 654².
 change from colostric to fresh milk period, 3991¹.
 chemistry of, review on, 451³.
 chlorides and nitrates in, 440⁹.
 chlorine and Na content of, of various animals, 801⁸.
 chlorine and Na elimination in, and adulteration by addn. of Na salts, 417².
 chlorine index of goat, 4977⁸.
 -chocolate compn., P 220⁸.
 choline in, in summer and in winter, 912⁹.
 coagulation of, by electrolytes, 2196⁸.
 by heat as function of acidity, 4509².
 by pepsin, effect of fluorides and iodides on, 162⁹.
 by soap, 4488⁸.
 coliform organisms in certified, 1924⁸.
 compn. and flavor of, soy-bean hay and ground beans in relation to, 1181⁸.
 compn., d. and n of CaCl₂ serum of, 5515¹.
 compn. of, 4277¹, 5264⁸.
 from cow with tuberculosis of udder, 5514⁴.
 from diff. quarters of udder, 802², 5497¹.
 effect of feeding with mangels and with dried sugar beet pulp on, 5514¹.
 effect of grazing on, 1436⁸, 4724⁸.
 in foot-and-mouth disease, 4077⁸.
 nutritive requirements of milch cows in relation to, 5491¹.
 of region of Sées (Orne), 3755⁹.
 seasonal and monthly variations in, 2221⁴.
 condensed (sweetened), 448⁸, P 1184⁸.
 coagulating in thin homogeneous layers, app. for, P 652¹.
 containers for, P 4752⁹.
 cooling and aerating, app. for, P 3031⁸.

- cooling and filtering app. for, 1 550^o.
 cooling and pasteurizing in bulk, app. for, P 738^o.
 cooling app. for, P 652¹.
 copper content of, effect of diet on, 4732^o.
 corrosion of Ni and Monel metal by, 5246^o.
 cysteine, cystine and their derivs. in boiled, 2998^o.
 definitions and standards for, 3516^o.
 definitions of preserved products, 2766^o.
 degasifier for, flow regulator for, P 4279^o.
 density of, flowing through dispensing app., etc., registers for, P 61.
 diet of, anemia from, 1939^o.
 diet of, supplementary value of inorg. Fe and Cu in, 3733^o.
 dry, P 220^o, 647^o.
 antirachitic value of irradiated, 3056^o.
 bacterial content of, 1181^o.
 nutritional value of Cu in, 1939^o.
 phys. and chem. properties of, 5515^o.
 pieces of compressed baked, P 220^o.
 research organization of Am. Dry Milk Inst., 3759^o.
 scurvy from, 4726^o.
 drying app. for, P 2076^o, P 3995^{1,3}, P 4378^o.
 dry skim, in baking, 647^o.
 effect on fermentation and H-ion concn. of doughs, 1693^o.
 effect on water absorption of doughs and plasticity of flour suspensions, 2766^o.
 growth of trout on, 2218^o.
 dry wt. of, calen. of, 2222^o.
 effect of age of cow on yield and quality of, 5514¹.
 effect of breast, and modified cow milk on excretion of volatile acids in feces, 3491^o.
 effect of change from dry feeding to pasture and of addus. of Ca salts on, 2222^o.
 effect of feeding Bovita and wheat bran on quality of, 4751^o.
 effect of feeding cod-liver oil on, 5221¹.
 effects of atm. germs on, 219^o.
 elec. cond. of, 4977^o.
 elec. treatment of, app. for, P 652¹.
 in emulsion prepn., P 222^o.
 energy power of, detn. of, 5514^o.
 enriching, with peanut oil or sesame oil, P 3280^o.
 evapd. (unsweetened), 2766^o.
 antigenic properties of, 3517^o.
 effect of temp. and time of forewarming on heat stability of, 1694^o.
 heat coagulation of, as affected by mixing diff. grades of raw milk, 1181^o.
 packaged, P 3994^o.
 and relation to public health, 4277^o.
 evaporators for, P 2510^o, P 4379¹.
 of ewes (Hungarian), 3901^o.
 ewe's, simplified mol. const. and f. p. of, 215^o.
 fat and sugar formation in, role of carbohydrates in, 3953^o.
 fat of—see also Butter.
 fat of, and mixts. with cacao butter, 3990^o.
 fat of, bull substance of globules of, 4277^o.
 Federal import milk act, 3517^o.
 feeding stuffs for production of, evaluation of, 1448^o.
 feeding to pigs, 2203^o.
 feeding value of grass for production of, 1966^o.
 fermentation of, effect of freezing on, 1963¹.
 -fermenting yeast, 1430^o.
 filaments from skim, treated with *B. lactis viscosi*, P 1483^o.
 filters for, P 738^o, P 1017^o, P 2855¹, P 4279^o.
 fluorescence of, in ultra-violet light, 1181^o, 3990^o.
 foam on skimmed, app. for breaking down, P 1024^o.
 food contg. almonds and, P 4513^o.
 food value of, effect of cow's ration on, 1157^o.
 of France (Department of Orne), 215^o.
 freezing of, P 654^o, P 3543^o.
 freezing of, effect on compn., 1694^o.
 freezing point of, 5513^o.
 frozen products of, P 3280^o.
 frozen, sepn. of components by fractional melting, 3755^o.
 fungi in, 5513^o.
 grading of, at condenseries, evapd. and dry milk plants, 5245^o.
 grading of, by reductase test, 5515^o.
 halogen action on, and its constituents, 417^o.
 heat effect on, 5513^o.
 heating to ripen for churning, device for, P 2768^o.
 heat treatment of, in cans, P 4513¹.
 human, alc. in, of drinking women, 5210^o.
 bactericidal action of, 4959^o.
 compn. of, 874^o, 3265^o.
 gastric lpase in babies fed with, 4737^o.
 of irradiated mothers, 4970^o.
 hydrocyanic acid binding by, 3029^o.
 hygiene, review on, 416^o.
 increasing production of, with salt, 5249^o.
 industry, review on, 647^o.
 for infant feeding, P 4513^o.
 in infant feeding, 3253^o, 4726^o.
 infant feeding with, growth producing amino acids and, 3192^o.
 inorg. constituents of, 1694^o.
 inspection of, educational aspects of, 5512^o.
 iodine compds. in, 4277^o.
 iodine content of, its dependence on I content of feeding plants and soil and its relation to goiter, 1438^o.
 iodine in, mode of combination of, 3242¹.
 iron (inorg.) in, 890^o.
 iron (inorg.) in, fate of, 890^o.
 irradiated, effect on Ca and P metabolism in artificially fed infants, 3254^o.
 irradiated, toxic action of, 4728¹.
 irradiation of, P 4512^o, 5491^o, 5515^o.
 app. for, P 652¹, P 1317^o, P 1446^o.
 in CO₂ atm., app. for, 4278^o.
 irradiation of cow udder and cow's food with ultra-violet rays, 2222^o.
 judging quality of, 5513^o.
 keeping quality of, bacterial content and, 1181^o.
 lactic acid fermentation in, effect of bile salts on, 3248^o.
 lactose in, effect of insulin and of pilocarpine on secretion and quantity of, 901¹.
 malted, and its flavored products, photo-micrographs of, 3518^o.
 malted, effect of enzymes of malt on milk solids during manuf. of, 3518¹.
 maturing curds of, P 1446^o.
 medical science and, 2506^o.
 metal, effect on, 5512^o.

 of water of crystn. of Sr(OH)₂·8H₂O, 3178¹.
 at zero abs., 5071³.
- Molecular weight.** book: Halbmikromethoden zur ebullioskopischen Molekulargewichtsbestimmung, 1806³.
 density of liquids and, 5372²
 detn. of, 1556¹.
 by depression of f. p. with trichloroacetic acid as solvent, 5160⁹
 ebullioscope for, 2853⁷.
 ebullioscopic method of, 1335⁴, 1800⁸
 of liquids, 4389².
 from lowering of transition points of compds. of org. solvents and salts, 20⁶.
 of proteins, 324¹
 in vapor state from vapor pressure and evapn. data, 3610⁷.
- Molecules.** activation of, if pressure changes continually, 1032².
 adherence time of, measurement by entrainment expts., 2084⁹
 adsorbed gas, dipolar nature of, 1330⁹
 adsorbed layer of free, of solid adsorbents in thermal agitation, 1036².
 arrangement in crystals, detection of porous regions in, 1540².
 arrangement of, on fresh surfaces of Hg, 5374².
 atomic and ionic, 743¹.
 attractive mass of, 4388².
 of benzene, thickness of, 1348².
 bonds in polyat., strength of, 4113².
 books: Infra-red Analysis of Mol. Structure, 2369⁴; Polar, 3151³, 3622².
 with central symmetry with both single and double-bonded C atoms, 1540².
 change undergone by gaseous, between 2 consecutive collisions, 3140².
 cohesion of, 550¹.
 collisions with electrons, 3851⁴.
 conservation of, in passing through change of state, 5367².
 deflection of neutral, in elec. or magnetic field, 3624¹.
 deformation of, 1028².
 diam. of, expansion of n and optical rotation separately in form of a series in, 3137⁹.
 diams. of, of vapors of org. compds., calcn. from kinetic theory of gases, 5075².
 diams. of, zero vols., parachors and, 5071³.
 diat., electronic states and band spectrum of, 769², 4879².
 diat., structure of multiplet S-states in, 2361².
 diat., σ -type doubling and electron spin in spectra of, 4878⁷.
 diffusion of, broadening and displacement of spectral rays by, 3405⁷.
 dimensions of diat., 5363².
 dimensions of, of org. compds., 4114¹
 dimensions of, superficial films on water and, 5378⁶ ?
 dipole moment of, 2333²
 dipole moments of, additive nature of, 4856²
 dipole moments of org., 2081⁹
 dipole nature of, 4610⁶
 dipole, polarization of, 5365¹.
 dipole, with singly and doubly bound O, 5364¹.
 dislocation of, 3619⁹.
 Dulong and Petit rule applied to, 757²
 effective cross section of gas, against alkalis of 1-30 v. velocity, 333².
 effect of state of aggregation of, on Raman effect, 401².
 elec. moments of, 1322².
 elec. moments of, and intermol. force, 1789⁹.
 elec. moments of, and their detn., 4114¹
 elec. moments of, detn. of, 5071³.
 electron action on gas, share of "reflection" in total effect of, 3849³
 electron attachment to, of HCl and NH₃, 2357⁴.
 electron capture by, 762¹
 electron deflection by gas, 3154¹.
 electron energy levels of, 561².
 electronic constitution of, of complex compounds of cobaltamine type, 2650⁹
 of electronic isomers, mol. susceptibility and, 4857¹
 electronic state in, hydrides of, 4142⁹
 electron levels of O, 32²
 electron transitions in diat., nuclear motion associated with, 2646⁷.
 electrostriction by dissolved dipolar, 4114¹
 energy relations in, 5363².
 ether of space in relation to, 91².
 excited, in fluorescing water solns., absorption of, 2886¹.
 fields of, 5074².
 films (monomol. and polymol.) of, 3142²
 films (monomol.) of, dark-field microsc., of, 5378⁶.
 equil. with a vol. phase in connection with spontaneous surface increase of microscopic particles, 7487².
 formation by triolein, by its vulcanization products and by the fatty acid from sapon. of the products, 750²
 of myristic acid, surface tension produced by, 4610¹.
 of oleic acid, 4119⁹.
 solute at surface of solns., 3143¹ ?
 stability of, 4609¹.
 in films of fatty acid, 3847⁹.
 fluorescence decay, 3624¹.
 forces between atoms and, 3383⁴, 4855⁴.

- forces between, in liquids, x-ray evidence for, 4385⁹.
- forces between, in org. compds.] calcul. of, 743⁹.
- forces between, of He and H, 3140⁹.
- of formaldehyde, structure and activation of, 1818⁹.
- form and size of, detd. from films on H₂O, 5378⁹.
- formation of, 564⁴.
- formation of, electron exchange and, 758⁹.
- formation of, quantum theory and, 561¹.
- formation, predissoc. and dissocn. of, as explained by analysis of vibration spectrum of SO, 4130⁹.
- form of, effect on light-scattering in liquids, 3214⁹.
- of gases in neighborhood of a wall, 2337⁴.

 creatinine and phosphate content of striated, effect of sympathetic nerves on, 882².
 creatinine detn. in, 1920².
 degeneration of, on rice diet, 3014².
 dehydrogenases of frog and fish, effect of poisons on, 4248².
 destruction of acetoacetic and β -hydroxybutyric acids in, 882².
 drug action on, 3025¹.
 dystrophy of, carbohydrate tolerance in, 1955².
 effect of garlic exts. on smooth, 2487².
 of fatigue products on, 2466².
 of HCN poisoning on, 909².
 of insulin on free sugar of, of normal and diabetic heart, 3744².
 of internal secretions and of poisons on, 1179².
 of lecithin and cephalin on working capacity of, 4254¹.
 of pilcarpine, atropine and adrenaline on, 3977².
 of poisons on intestinal, of tench, 1442².
 of tadpoles of *Ascaris lumbricoides* on tonicity of smooth, 3023².
 of work and exhaustion on, 2479².
 effect on blood sugar in incubation, 4732².
 effect on tonus and reflexes of alc. applied to femoral nerve of decerebrate cat, 3976².
 energy changes of skeletal, in contraction under high pressure, 2207².
 enzymic activity of mummy, 4713¹.
 enzymic deamination in, 853¹.
 fatty acid degradation in, 2746³.
 glucose diffusion through, 2996¹.
 glycogen and lactic acid in, effect of anesthesia and of decerebration on, 4251⁶.
 glycogen change in, during shortening produced by tetanus toxin, 4248².
 glycogen content of, in depancreatized cats, effect of dextrose and dihydroxyacetone on, 4975¹.
 glycogen content of skeletal, effect of thyroxine on, 1176².
 glycogen detn. in, 3262².
 glycogen formation in macerated, effect of insulin on, 4256².
 glycogen in, effect of adrenaline and insulin on, 1174².
 glycogen in, effect of insulin on, 1684².
 glycogen in, effect of synthalin on, 906¹.
 glycogen in, in dehepatized dog and effect of insulin, 4250².
 glycogen in striated, during tonic contraction, 3504².
 glycogen-lactic acid breakdown in, free energy of, 2467².
 glycogen of, 3256¹.
 glycogen removal from living, 3256¹.
 glucolysis in, 3937².
 glucolysis of, effect of pancreatic inhibitor on, 3256².
 halogen content of, 157².
 heart, focal calcification of, 2481².
 heart, prepn. of pptg. serums with, 896².
 heart, tonus of, 1178².
 of heart ventricle, effect of ions and Ringer soln. on strip of inner and outer layers of, 2761¹.
 heat of combustion of, 3255².
 heat production in smooth, 2207².
 hem in wing, of bees and its detn., 4495¹.
 hemoglobin concn. of, during growth, influenced by diet, 3734².
 hemoglobin of smooth and striated, of fowl, 3964¹.
 hexosephosphoric acid of, sugar residue in, 4714².
 hydrogen-ion concn. and striated, 4953¹.
 imbibition by, effect of alkali and alk. earth ions on, 3263².
 insulin effect on, 2485².
 insulin effect on damaged heart, 3741².
 intestinal, behavior of plexus-contg. and plexus-free preps. of, 208².
 intestinal, effects of histamine, CH_2O and anaphylaxis on responses to elec. stimulation, 2212².
 iodine content of, of fish from east and west coasts of U. S., 3751².
 ionic effects on aging in press juice of, 1946².
 iron-contg. pyrophosphate in, and its extn., 1653².
 iron (inorg.) in, fate of, 890¹.
 irritability of cells of, physico-chem. principles of, 3239².

- lactacidogen cleavage in contraction of, 870⁷.
 lactic acid and glycogen in adductor, of oyster, 4274¹.
 lactic acid content of, after permanent shortening, 424².
 lactic acid detn. in, 859⁴.
 lactic acid diffusion through, 872⁶.
 lactic acid formation in contraction of, rate of, 870^{4,4}.
 lactic acid formation in, of *Octopus duri*, autolysis, 2501³.
 lactic acid formation in, pancreatic exts. in relation to, 162¹.
 lactic acid formation in, phospho-organic intermediate compd. in, 1914⁸.
 lactic acid-glucose cycle, 4720⁴.
 lactic acid in, 174¹.
 lactic acid in fish and crustacean, 4272⁷.
 lactic acid in, of inkfish, 2501³.
 lactic acid in, oxidation of, 5225³.
 lactic acid passage from working, into blood stream, effect of sympathetic nerves on, 3263³.
 lactic acid production of, effect of fluorides on, 3513¹.
 lanthanum effect on smooth, 5239⁶.
 lecithin, cholesterol and fatty acids in, effect of lecithin feeding on, 3264⁴.
 of leeches, effect of amines on smooth, 439².
 of marine animals, comparative pharmacol and physiol. studies with, 210¹.
 metabolism of heart, 5495⁸.
 metabolism of, in activity, 4730².
 metabolism of, in circulatory insufficiency, 2479⁶.
 methylguanidine detection in, 1920⁷.
 mineralization of, in edema, 644⁶.
 mitogenetic radiation of, 855³, 1947⁴.
 -nerve lesion in diabetes, 897².
 nerve prepn., effect of Mg on chronaxia of, 3482⁵.
 nerve prepn., effect of hydroquinone on, 4973⁸.
 nuclear-plasmic ratio of, during hunger, 1937⁸.
 optical activity of mixts. with insulin, glucose and NaCl and with glucose and NaCl and effect of H-ion concn., 620².
 oxygen absorption by fatigued, as function of H-ion concn., 5403².
 perfusion expts. on, behavior of carbohydrates in, 4735⁹.
 permeability of striated, to ions, 1169¹.
 permeability to electrolytes during work and in repose, 3502⁴.
 permeability to K and effect of sucrose, 3505⁵.
 pharmacol. study with nerve-free smooth, 206⁴.
 pharmacology of crop, 3981⁴.
 phosphagen decompn. in, 1167⁴.
 phosphagen distribution in, 854⁶.
 phosphagen in, effect of strychnine and of dissection of nerves on, 1175⁹.
 phosphagen in gastric, of birds, 4735⁴.
 phosphagen in juice of, behavior of, 2471².
 phosphagens in striated, 877².
 phosphate content of resting, 424².
 phosphate (inorg.) in, and its diffusion, 1671⁷.
 phosphatase of, mechanism of action of, 4957¹.
 phosphatide content of, and its detn., 3961².
 phosphocreatine and inorg. phosphate detn. in, 4732².
 phospholipides of smooth and skeletal, 3496⁸.
 phosphorus compds. (acid-sol.) in, during parathyroid tetany, 5505⁶.
 phosphorus compds. of, effect of training on, 5494².
 phosphorus distribution in, during delayed relaxation, 3257⁴.
 phosphorus (inorg.) of, 2470¹.
 phosphorus, lactacidogen and glycogen of pectoral, of normal, fasting and avitaminosis pigeons, 1946⁹.
 phosphorus of, 1654¹.
 phosphorus of, in relation to lactacidogen and phosphocreatine, 3963⁴.
 phosphorus poisoning and, 615².
 potassium and Na contents of skeletal, 2749⁸.
 potassium content of dried and fresh thigh, 1168².
 potassium fixation in, 3748⁷.
 previously undetected constituent of, 4972¹.
 protein extn. from rabbit, 1918⁷.
 protein metabolism of, of animals living under reduced pressure, 4736⁷.
 proteins of, cysteine and cystine in, 4489⁷.
 cysteine content of, 5202⁹.
 denaturing, 2997².
 of rabbit and chicken, color reactions of, 170².
 sex differences of, 1422⁶.
 of various animals, 2193⁹.
 purine metabolism of, and mother substance of NH₃ occurring in muscle, 2467⁴.
 purines of, 886².
 pyridine effect on, 197⁹.
 pyrophosphate in, and its transformation, 2471⁴.
 reaction change in postmortem, due to lactic acid, 165⁹.
 red pigment of skeletal, 1653⁶.
 respiration of, effect of toluene on, 5163².
 respiratory quotient of exercising, 4252⁷.
 reversible loss of excitability in amphibian voluntary, 3939¹.
 rigor mortis, behavior of earthy phosphates in acid or alk., 192⁴.
 sartorius, effect of veratrine and of nicotine on, 3746⁹.
 seat of action of strychnine, veratrine and Ba in striated frog, 3746¹.
 sodium fluoborate and perchlorate action on, 5241¹.
 sodium perchlorate effect on striated, K ion in relation to, 3978⁹.
 succinodehydrogenase and fumarase of, effect of phosphate and other factors on, 616⁴.
 sugar content of, in physiol. and pathol. conditions, 893².
 sulfide (volatile) from, 1670¹.
 sympathetic influence on skeletal, physico-chem. analysis of, 3263².
 tetrodotoxin effect on skeletal, effect of some stimulating poisons on, 2217⁴.
 thymus and activity of, 2211⁴.
 training, effect on blood compn., 871⁷.
 training, effect on liver glycogen, 870⁶.
 tryptic hydrolysis of haddock, 4510⁹.
 urea content of frog, 4746⁴.
 urea formation in, and effect of fasting and of antiseptic autolysis, 5228^{2,4}.
 urobilin in, 885⁷.
 uterine, during puerperium, physiology and pharmacology of, 431².

- water exchange in, 2496⁴.
Muscovite, P 1648⁷, 1906⁹.
 odor of, constitution and, 2728³.
Muscovite, 5442⁴.
 compn. of, 1084⁶.
 pegmatites, 5132⁴.
Musculus, Frédéric Alphonse, biography, 5344¹.
Museum, for industry and trade in Vienna, 2225⁶.
 of Thomas Morson and Son, 481⁴.
Mushrooms, *Agaricus campestris*, effect of H-ion concn. on growth of, 185³.
 compost for, P 469⁷, P 665³.
 ergosterol in *Cortinellus shiitake*, 1942⁹.
 soil for cultivating, P 3770².
 trehalose in, 4486⁶.
 zinc content of, 1606³, 2504⁹.
Musk, book: Produits à odeur de, 4536⁴.
 compn. of, review, 2185³.
 odor of, constitution and, 2728³, 4953³.
Muskmelons. See *Cantaloupe*.
Muslin. See *Textiles*.
Mussels, poisoning from, in Calif., 451⁸.
 purinolytic enzymes of fresh-water, 1180¹.
Mustard, active-principle content of black, effect of Th X on, 1723⁶.
 carbohydrate (available) in greens, 217⁹.
 compn. of greens and losses of Fe in cooking, 4511⁶.
 compn. of plants and oil accumulation, 3950⁶.
 emasculation, effect on, 633⁹.
 growth of, muck-soil reaction and, 461¹.
 oil content of seeds in relation to bulk d., size and color, 4771⁶.
 soil reaction for, 4907⁷.
Mustard gas. See *Sulfide*, bis-(β -chloroethyl).
Mustard oil, 1718², 2245⁶, 4771⁶.
Mustelus canis. See *Dogfish*.
Musta, Algerian, of 1928 vintage, 1985⁹.
 apple, SO₂ detn. in, 4751⁴.
 copper detn. in, 5270³.
 medicinal, 2249⁹.
 sucrose_{4n}, 4528⁹.
Mutarotation. See *Optical rotation*.
Mutase, effect on acetaldehyde, inhibition by phenol, 1918⁷.
 ketone-aldehyde, of *B. subtilis*, enzymic dismutation through, 2738³.
 in placenta, 396⁶.
Mycobacterium, leprae (*Bacillus leprae*), bactericides for, P 848⁹, P 1908⁹, 2421⁴.
leprae, effect of Rn on, 5483⁹.
phlei, compn. of, 1926⁸.
tuberculosis—see under *Bacillus*.
Mycoderma, nitrogen in growing cultures of, 1666⁷.
variabilis, 2239⁹.
Mycology. See *Fungi*.
Mycorrhiza, formation in connection with seedlings of *Pinus sylvestris* in diff. kinds of crude humus, 1203¹.
Mycosterols, biol. inertness of irradiated, 1927⁴.
Mydratics, standardization and stabilization of, 5545⁹.
Myelin, in brain ext., sex and, 3497⁴.
Myeloma, multiple, urine proteins in, 3271⁴.
 multiple, with Bence-Jones protein in pleural effusion, 2481⁶.
Myogen, activity of diff. salts of, 1426⁷.
 in denatured muscle proteins, 2997².
 sex differences of, 1423¹.
Myosin, in denatured muscle proteins, 2997².
 sex differences of, 1423¹.
Myotics, standardization and stabilization of, 5545⁹.
Myricetinsulfonic acid, monomethyl -*, 2181⁴.
Myristaldehyde, odor of, 4926³.
Myristic acid (*tetradecanoic acid*), β , β' -dichloroisopropyl ester, 3913⁵.
 esters, and their addn. compds. with deoxycholic acid, 4926⁷, 4927¹.
 films (monomol.) of, surface tension produced by, 4610¹.
 mol. length of, 5378⁶.
 surface tensions and ds. of, at various temps., 1549¹.
 —, α -bromo-, 3664¹.

Nickel, absorption of H by, 2401⁸

adsorbed on charcoal, magnetic properties of, 1330⁹.

adsorption of H, C₂H₄ and ethane by catalytic, isotherms of, 4615⁷.

anodes of, P 4152².

atomic magnetic moment of, 1320².

atomic radius of, 1788³.

atomic wts. of terrestrial and meteoric, 3835².

atoms of, crit. potentials of, in soft x-ray region, 2882⁴.

in automobile industry, 2920¹.

bactericidal action of, 177⁴.

beer and wort in connection with, 5003⁹

books: *Les métaux usuels*, 4180⁹, *Lehrbuch der Metallhüttenkunde*, 5147⁷.

as catalyst alone and with kieselsguhr in decompn of CH₄, 1866⁷.

as catalyst in CO reduction, 756⁹, 3844⁴

in decompn. of CH₄, 1867¹.

for hydrogenation, 2421^{2, 5}.

for hydrogenation of fluorene, 131¹.

for hydrogenation of oils, 4839⁴.

in hydrogenation of org. compds., 5090³.

for reduction of geraniol and citronellal, 1867⁴.

for splitting off of alcs. from acetals, 2416⁹.

catalysts, P 1226⁹, P 1227³, P 1728⁹.

app. for reducing, 535³.

area of activated contact, 1341¹.

for hydrogenation, P 940⁴.

prepd. from NiCl₂, 4616⁴.

regeneration of Ni from, 4839⁴.

catalytic power of, 4633².

coating Cu cables, etc., with, to protect against S, P 345².

coating elec. conductors with, to prevent chem. action of S in insulators, P 2415⁹.

coating iron or steel with Cu, Ag, Cr or W and, P 2692¹.

coating on ferrous metals to prevent corrosion, P 369¹.

coating with, P 4924¹.

colloidal, effect on heart, blood vessels and intestine, 2760⁹.

condensation of electrons on, heat of, 3155¹.

contact potential between 2 plates of, 5074¹.

copper-plating of steel over a thin deposit of, 3410⁹.

corrosion (atm.) of, 4918⁹.

corrosion (intercryst.) of, 1859⁷.

corrosion of, 5251⁹.

at high temps., electroplating of Cr for retarding, 1823⁹.

by milk, 5246⁷.

in sea water, 2687⁴.

by SnCl₂, 806⁷.

corrosion of cast Fe contg., 4180².

corrosion of steels in relation to content of, 2411¹.

crit. potentials of, for simultaneous transitions, 1809⁸.

crystal size and magnetic properties of, 2614⁹.

crystals of, reflection and refraction of electrons by, 29².

crystals (single) of, d. of, 2339⁷.

electron diffraction by, 3626⁹.

electron reflection and diffraction at surfaces of, 3402⁹.

magneto-resistance effect in, 1546⁹.

magnetostriction of, 362⁷.

soft x-rays from, 3853⁴.

crystal structure of, 2620¹, 5369⁹.

Curie points for, 4384⁸.

as diffraction grating of corresponding x radiations, 2100².

diffraction of electrons in crystals of, potential of, 332⁴.

drop hardness of, relation to temp., 1379⁶

as dyeing machine material, 2829⁴.

effect on AcOH fermentation, 4295⁷.

on annealing of hardened steel, 1854⁸.

on bearing metals, 4430⁸.

on cast iron, 72⁴, 2136^{1, 2}, 2915⁹, 3647¹, 5139⁸.

on combined C in gray Fe, 3647³.

on growth of gray cast Fe, 2681⁴.

on soy-bean oil, 5340⁶.

on steel, 2139¹.

on structural steel, 5457⁴.

elec. condition of hot surfaces of, during adsorption of gases, 4609¹.

elec. cond. change of Cu wire coated with, and of Ni wire coated with Cu, 5084⁷.

elec. cond. of, change in magnetic field, 2860⁹.

elec. current d.-tension curves of electrode of, 1558⁹.

electrodeposition of, P 46², P 568², 1353⁹, P 1576³, P 3173⁹.

electrodeposits of, 5391¹.

causes and prevention of pitting in, 2663⁹.

on Cu, crystallographic orientation of, 317⁴.

electrode potential of, 1558², 5088⁸.

electrode potential of, effect of occluded H on, 3393⁴.

electrode, single potential of, 3410¹.

electrodes of, for H prepn., 4410⁹.

electrolytic baths, purification of, P 4898⁹

electrolytic cell for use with, P 2667².

electroplating annular articles with, app. for, P 4413⁷.

electroplating baths at high c.ds., cathode efficiencies in, 3850⁹.

electroplating of Cr with intermediate plate of, 3170⁴.

electroplating solns., 2663¹.

electroplating solns., detg. H-ion concn. in, 4623⁹.

electroplating with, P 344⁹, 776¹, P 1827⁹, P 2891¹, 5422².

alone and with Zn, 3171⁴.

as corrosion preventative, 2663¹.

effect on tensile properties, 2663¹.

- periodic method for, 1062¹.

- as railroad electrical material, 4180¹.
- refining, P 4665².
- refining (electrolytic) of, P 2111¹.
- reviews, 1601¹, 2684¹.
- ruthenium-W-, P 5465¹.
- soldering, P 371¹.
- sulfur in, reduction of, P 2926⁴.
- thermal cond. of, 4400².
- tungsten-, P 1103¹, P 1611⁷.
- tungsten carbide-contg., for tools, P 4923³.
- tungsten-, composite plates of, P 1101¹.
- uses in electrotechnology, 3199¹.
- welding (arc) of, P 4185².
- zirconium-, 2684¹.
- Nickel bromide**, analysis of, 3835².
- Nickel carbide**, as catalyst for CH₄ synthesis, 1100².
- Nickel carbonate**, precipitation of, effect of temp. on, 2789¹, 4633¹.
- Nickel carbonyl**, P 2639¹, P 3314¹, P 3547¹.
- diamagnetism of, 2680².

- prepn. of, 4417¹.
 reactions of, 4674³.
 recovery from industrial gases, Φ 4541¹.
Nickel chloride, reaction with CO, 787⁴.
 reaction with hexamethylenetetramine, 2896⁶.
 spectrum of, 32².
Nickel chromite, 2385⁴.
Nickel compounds, of *o*-amino and *o*-hydroxy-azo compds., 3460¹.
 amines of Ni nitrite, 4156⁶.
 amino-, 788⁷, 1363¹, 4633⁶.
 corresponding to double oxalates, 1361⁷.
 corresponding to double salts of bromide class, 1362¹.
 magnetic properties and electronic constitution of, 2650³.
 resolution of, 2384⁹.
 with aniline and NH_4CNS , 4420⁶.
 of azo dyes, P 2579².
 with cysteine, 4954².
 of dimethylglyoxime, 3417⁴.
 with hexamethylenetetramine, 2896⁷.
 ions of complex, magnetic moment of, 3156⁴.
 methyl pyridyl ketoxime, 4703¹.
 with methyl salicylate, 829².
 pyrrolypyridine, 4698⁶.
 $\text{Ni}_2(\text{NiP}_2\text{O}_4) \cdot 12\text{H}_2\text{O}$, 1584⁷.
 sulfur-NO compds. of univalent Ni, constitution of, 3867⁴.
 of triazinetricarboxylic acid, 490⁴.
 with univalent Ni, 3177⁹.
Nickel cyanide, compds. with NH_3 and amines, 2418⁶.
Nickel dichromotetramminecobaltiate, 3180⁷.
Nickel ferrite, 2385⁴.
Nickel fluoride, fluorine tension and heat of formation of, 1320⁶.
Nickel hexacyanorhodate, 2674².
Nickel hydride, 4632².
Nickel hydroxides, colloidal, prepn. of pseudo morphic, 1798⁶.
 manuf. of, by electrolysis, P 4626⁴.
 $\text{Ni}(\text{OH})_2$, constitution of, 350⁶.
 $\text{Ni}(\text{OH})_2$, crystal lattice consts. of, and solid solns. with other hydroxides, 1557¹.
 $\text{Ni}(\text{OH})_2$, manuf. of, P 674⁶.
Nickel ion, hydration of, in soln., 3410³.
 magneton value of, 3383⁷.
 reaction with Na nitrophosphomolybdate, 3186⁷.
Nickel nitrate, hydrate of, disocn. of, 3416⁹.
Nickel nitrite, compds. with pyridine, 3179⁹.
Nickel ores, briquets of, P 4432⁴.
 copper-Pt., on Lower Shebandown Lake, Ont., 4168⁹.
 in norite complex in Pilansberg dist., Transvaal, 2910⁷, 4425⁶.
 of North Carolina (Webster), 4169¹.
 of Ontario (Lake Savant area), 4168⁹.
 precious metals in Sudbury, and their recovery, 1087⁴.
Nickel oxalate, as catalyst in hydrogenation of coal, 1243⁶.
Nickel oxides, colloidal catalysts and adsorbents contg., P 941⁷.
 NiO , as catalyst for decompn. of KMnO_4 , 322⁷.
 reactions: $2\text{NiO} + \text{NiS} \rightleftharpoons 3\text{Ni} + \text{SO}_2$ and $3\text{NiSO}_4 + \text{NiS} \rightleftharpoons 4\text{NiO} + 4\text{SO}_3$, 2641⁷.
 system: CaO -, 4124⁶.
 systems: CoO -, MgO -, MnO -, and CdO -, 4128⁶.
 systems: MgO -, and CoO -, x-ray examn. of, 5372⁷.
 Ni_2O_3 , as catalyst in hydrogenation of coal, 1243⁶.
 Ni_2O_3 , hydrated, P 3780¹.
Nickel phosphate, compds. with HCl and HBr, 575⁶.
Nickel salts, adsorption of, effect of NH_3 on, 4864².
 as catalysts in hydrogenation under pressure, 4694⁴.
 compds. with *o*-phenylenediamine, 5172².
 manganese detection in, 5118¹.
o-phenylenediamine in compds. with, space requirements of, 4390².
 reactions with oximes, 4692⁴.
 refining, for electroplating, 5422⁵.
Nickel selenate, prepn. of, 3053².
Nickel silicate, origin of, at Webster, N. C., 4169¹.
 system: FeS -, and PbS -, 2642².
Nickel silver. See *Copper alloys* or *Nickel alloys*.
Nickel sodium sulfate, 3149⁶.
Nickel stannate, solns. of, effect of change of H-ion concn. on, 3147⁹.
Nickel sulfate, color of solns. of, effect of H_2SO_4 on, 1815⁹.
 effect on coagulation and coalescence of *Hevea* latex, 3594⁶.
 equil. with alc., 4869³.
 heat of formation of, 2611⁹.
 hydrate of, piezoelectricity of, 2863⁷.
 hydrates of, transition point of, 4874⁶.
 reaction $3\text{NiSO}_4 + \text{NiS} \rightleftharpoons 4\text{NiO} + 4\text{SO}_3$, 2641⁷.
 spectrum of, 32².
 system $\text{Na}_2\text{SO}_4\text{-H}_2\text{O}$ -, 3149⁶.
 system $\text{H}_2\text{SO}_4\text{-H}_2\text{O}$ -, 4614⁶.
Nickel sulfides, Ni_3S_2 , fusion with Na_2S , 4914⁶.
 NiS , colloidal, lowering of vapor pressure of liquid A by, 2341².
 colloidal, prepn. of neg. by means of tartaric acid, 3841⁷.
 coloring of glass by, 250⁶.
 equil. with silicates, 2642².
 reactions: $2\text{NiO} + \text{NiS} \rightleftharpoons 3\text{Ni} + \text{SO}_2$ and $3\text{NiSO}_4 + \text{NiS} \rightleftharpoons 4\text{NiO} + 4\text{SO}_3$, 2641⁷.
 reduction (electrochem.) of, 42⁴.
Nickel tetraethylphosphonium sulfate, 2673⁶.
Nickel tungstate, crystal structure of, 2619¹.
Nicotiana tabacum. See *Tobacco*.
Nicotinamide, 8-chloro-, 838⁶.
 --, N, N-diethyl-. See *Coramine*.
Nicotine. (See also *Insecticides*; *Sprays*, *Tobacco*.)
 adsorption from soln. by charcoal, 236⁷.
 and its applications, 3773¹.
 auditory disturbances due to, 2217⁹.
 -chloroform syncope, 3974¹.
 compd. with hemin, 3481⁵.
 consumption in smoking, 4530⁷.
 convulsions from, counteraction with Ca , 1683⁷.
 dehydrogenation of, 148¹.
 detection of, 5542⁹.
 detn. in tobacco, 1717⁷, 2785⁵, 3050¹.
 dust carrier for, bentonite as, 3295⁷.
 effect on adrenal, 909⁶.
 on adrenal, localization of, 1960².
 on blood sugar, 1172².

- on blood vessels of penis, 2037.
on crop muscles, 3981¹.
on growth of chickens, 2212¹.
on leucocytes, 5238¹.
on nerve centers, 1440⁹.
on preps. of intestinal muscle, 208⁶.
on sartorius, 3746⁹.
on shortening reflex of intestine, 1949⁶.
on spermatozoa, 3986⁶.
on vasomotor nervous system, 4270⁶.
on uterus and adnexa uteri, 2765².
Eutellix tenellus of tobacco planted for production of, 3295⁶.
formation in young tobacco plant and its detection, 3949⁶.
in fresh tobacco leaves, 2785¹.
max. wt. of, which can exist in vapor form in a 1000 cubic ft. fumigating chamber, 3535¹.
in metabolism of tobacco plant, 411³.
optical properties of, and its derivs., 4475⁹.
pharmacol. synergism of, 1684⁶.
poisoning, blood sugar in, 202⁷.
poisoning by, alk. reserve in, 1683⁹, 2762⁹.
properties of, and derivs., 5186⁷.
reducing, in tobacco, P 1218⁹, P 4770¹.
removal from tobacco, P 934¹, 3772⁶, 5543⁷.
removal from tobacco, app. for, P 3776⁶, P 4301⁶.
rotatory dispersion of solns. of, in ultra-violet, 754⁹.
salts of, detn. of, 1077³.
-soap preps., deterioration of, 1206⁹.
sulfate, species resistance of aphids to, 3296².
tartrate of, effect on internal pressure of bladder, 3027¹.
tetrachloriodide, 4476².
in tobacco, 5005⁶.
in tobacco, factors affecting amt. of, 2525¹.
tobacco high in, 5539⁶.
in tobacco leaf epidermis, localization and disappearance of, 864³.
toxic action on respiratory mechanism, 902⁹.
vapor pressure of, 2238⁶.
Nicotinic acid (3-pyridinecarboxylic acid), derivs., physiol. action of, 3022⁷.
N-methylbetaine—see *Trigonelline*.
reaction with SOCl₂, 837⁶.
tetrachloriodide, 4476².
—, 6-amino-, nitrate, 1641⁶.
—, 6-amino-5-nitro-, 1641⁶.
—, 2 - [p - (p - aminophenyl)phenylcarbamyl]-, 127⁷.
